Theme

This Seminar will enlighten the Next Generation Technology for Sustainable Fisheries. Further this seminar is aimed to motivate and create the knowledge among young students for establishing the fishery business.

Targeted audience

Those who are involved in Fisheries, including the academics and civil society groups (Faculty Members, Teachers, Scientists, Research Scholars, Professionals, Policy makers and Administrators from India). The registered participants will be provided with working lunch and certificate.

Registration link :

https://forms.gle/msnDPAVoezqxaqDJA

Registration Fee : No registration fee

Accommodation :

The participants should make their own arrangements for travel and accommodation.

Address for communication

Dr. N. M. Prabhu
Mob : 9444154070
Email : prabhunm71@gmail.com

Organizing Committee

Patrons

Dr. D. Karthikeyan, IAS
Dr. R. Swaminathan
Prof. S. Karuppuchamy
Vice-Chancellor Officiating Committee Members, Alagappa University

Chair Person

Prof. C. Sekar, Registrar i/c

Convener

Prof. B. Vaseeharan, Head,
Department of Animal Health & Management

Organizing Secretaries

Prof. E. Kannapiran
Head i/c, Dept. of Fisheries Science
Dr. N. M. Prabhu
Assistant Professor, DAHM

Co-Organizing Secretaries :

Prof. P. Srinivasan
Dr. M. Biruntha
Dr. V. Nithya
Dr. P. Kumar
Dr. S. Subeena Begum

Organizing Members

Dr. R. Kumar
Dr. R. Srinivasan
Dr. A. Veeruraj
Dr. N. Padmini
Dr. P. Marimuthu

Advisory Committee Members

Dr. J. Ravindran
Principal Scientist CSIR-CECRI, Karaikudi
Dr. T. T. Ajithkumar, Principal Scientist & Scientist in-charge, ICAR National Bureau of Fish Genetic Resources, Cochin
Dr. G. Tamilmani, Senior Scientist & SIC Fish nutrition, CMFRI, Mandapam
Dr. B. Johnson, Senior Scientist, CMFRI, Mandapam

POOCHARAM PRINTS

ALAGAPPA UNIVERSITY

(A State University Established in 1985)
Karaikudi - 630003. Tamil Nadu, India

2017 Accredited with A+ Grade by NAAC (CGPA : 3.64) | 2018 MHRD Innovation Cell Project on Category - I Grand Challenge | 2018 MHRD Swachh Campus Rank : 4 | 2021 NIRF National Institutional Ranking Framework Rank : 36 | 2022 QS Asia Rank : 229 | 2022 THE World Ranking Bandwidth 801 - 500

DEPARTMENT OF FISHERIES SCIENCE
in collaboration with
DEPARTMENT OF ANIMAL HEALTH AND MANAGENENT
Organizes

2nd National Seminar on

"Next Generation Technology for Sustainable Fisheries"

Date : 29th & 30th March 2022
Venue :
Conference Hall, 4th Floor,
Science Campus, Alagappa University

About the University

Alagappa University established by the Government of Tamil Nadu, as envisioned by the great Philarathropist Padma Bhushan (Late) Dr. R. M. Alagappa Chettiar is achieving Excellence in all spheres of Education by affording a Quality oriented Higher Education to the learners so that they are transformed into intellectually competent human resources that will help in the up-liftment of the nation. The 440 acre green and lush campus houses Sciences, Arts, Management and Education faculties with 44 Departments, 9 Centers and 2 Constituent Colleges on its campus. The University has been awarded with A+ Grade by NAAC (CGPA: 3.64 out of 4) in the Third Cycle of assessment and also the first State University that obtained the A+ status in the State of Tamil Nadu. The University has received many notable awards including the ISO 9001:2015 Certification. It is the only State University in Tamil Nadu obtained the Category-I Status. The University secured 33rd position among Universities in National Institutional Ranking Framework (NIRF) 2021 ranking, 199th position in QS Asia Ranking, 501-600th band width in TIMES ranking. The University has secured 4th position in Swachhta Ranking 2018 for the cleanest Higher Educational Institutions in the Country in the category of Government Institutions.

About the Departments

Alagappa University established the Department of Fisheries Science in 2018. At present, the Department is in the process of upgrading its infrastructures to offer high quality PG and Research programs. The programme provides fundamental knowledge on Taxonomy and biology of fish and shellfishes. In addition, the curriculum is framed to meet and reflect the upcoming needs of fishery and its allied industries.

The department of Animal Health and Management, was started in the year 2008. At present, the department offers M.Sc., M.Phil & Ph.D., Programmes in Zoology. The Department has well experienced faculty members who posses expertise in Animal Biotechnology, Molecular Biology, Nanobiotechnology, Cancer Biology and rDNA Technology. The aim of the department is to develop and commercialize products towards the welfare of human and animal health.

About the Seminar

Demand for seafood and advances in technology have led to fishing practices that are depleting fish and shellfish populations around the world. Scientists fear that continuing to fish at the present rate may soon result in a collapse of the world's fisheries. In order to continue relying on the ocean as an important food source, economists and conservationists say we will need to employ sustainable fishing practices.

Managing fish populations requires cooperation at all levels of government, from local communities to nations across the globe. In many indigenous cultures, people have fished sustainably for thousands of years. Sustainable Fishing Practices allow us to enjoy seafood while ensuring that populations remain for the future. Today's sustainable fishing practices reflect some lessons learned from these cultures. Sustainable fishing guarantees there will be populations of ocean and freshwater wildlife for the future. With technology and fisheries management, most fisheries can be made sustainable. Technology also empowers small-scale fishers generating information not just on fisheries, but on markets, which allows them to make better business decisions and demonstrate their commitment to ocean conservation. Technology also can help consumers make better decisions regarding what they eat and the impacts of their choices on the environment and on those who participate in its production. Aquaculture provide them with alternative livelihood opportunities for their socio-economic development.

It is essential for the student community especially out going UG, PG students and research scholars to perceive recent trends, developments in sustainable fisheries and its business opportunities.
