International Year of Millets - 2023

National Workshop on

Sustainable Marketing and Consumption of Millets and its products

Sponsored by

ICSSR, NewDelhi

12th February 2024, Monday

Convocation Seminar Hall
Alagappa University, Karaikudi

ABOUT THE WORKSHOP

Proposed by Indian Government, Food and Agriculture Organization and United Nations have recognised 2023 as International Year of Millets or IYM2023 for awareness about health and nutritional benefits of millets.

Millets play an important role in food security and economy of many countries in Africa and Asia. They are gaining prominence in Europe and North America due to their gluten-free and hypoglycemic properties. India is one of the thresholds of discussing the Food security Bill that will have far-reaching implications for the poor and the marginalized, in their struggle to access food and nutrition to lead a dignified and healthy life.

World is facing agrarian as well as nutritional challenges. Millets as climate change compliant crops score highly over other grains like wheat and rice in terms of marginal growing conditions and high nutritional value. These nutri-cereals abode vitamins, minerals, essential fatty acids, phyto-chemicals and antioxidants that can help to eradicate the plethora of nutritional deficiency diseases. Role of millets cannot be ignored for achieving sustainable means for nutritional security.

The role of millets in designing the modern foods like multigrain and gluten-free cereal products is well known. Due to the richness of millets in polyphenols and other biological active compounds, they are significant in lowering rate of fat absorption, slow release of sugars and thus reducing risk of heart disease, diabetes and high blood pressure.

The growing demand among all the generations for nutrient rich food to boost immunity was felt during COVID-19. But the production of millets and supply has not been built to cover up all. From the available literature and reports, it is evident that there is a strong need for supply of seed, fertilisers and equipments to grow millets, uptrend technologies to improve millets productivity, integration of producers, affordability of millets to all people, innovation in value added millet products, and many.

Tamilnadu is one of the State, that supplies significant quantity of millets, viz. Jowar/Sorghum, Pearlmillet, Fingermillet, Kodomillet, Littlemillet, Prosomillet, Foxtailmillet, Banyardmillet. Due to less cultivation and lack of market awareness, these millets are still in the nascent stage of reaching the people.

It is imperative that marketing of millets in Tamilnadu, need to be discussed with respect to the socio-economic impact of the producers in marketing millets, supply and distribution, fluctuations of cost and promotion, cultivation and processing technologies on the sustainable marketing of millet products

The workshop would bring in awareness of purchase and consumption patterns of millets and its value-added products, and implications of marketing environment of millets to arrive at comprehensive measures for enhancing the productivity and consumption of millets, by 2030.

The IYM2023 gives a thriving opportunity to increase the contribution of millet to food security and increase the global production of millets ensuring sustainable production and consumption.

OBJECTIVES OF THE WORKSHOP

Bring out the importance of Millets in achieving sustainable means for food security.

Discuss the marketing tactics and challenges for the millets and its value-added products in the country.

Understand the implications of marketing environment of millets to arrive at comprehensive measures for enhancing the consumption of millets.

Create awareness on the nutritional benefits of millets for a healthy sustainable living. Exemplify the role of millets in bringing agricultural sustainability and expanded markets.

Draft working conclusion and policy recommendations to augment sustainable marketing of millets.

Jeevidam Limited,Business
Initiative of DHAN Foundation.

ALAGAPPA UNIVERSITY

Alagappa University, the only State University in Tamil Nadu to be accredited with 'A+' Grade with a CGPA of 3.64 by NAAC (third cycle) has emerged from the galaxy of institutions initially founded by the great philanthropist and educationist Dr. RM. Alagappa Chettiar, with the motto "Excellence in Action". The University brought into existence by a Special Act of the Govt. of Tamil Nadu in May 1985 and recognized by the University Grants Commission (UGC), has 15 Schools of Learning comprising, 44 Departments, 2 Constituent Colleges, and 9 Centres of Development Studies offering over 75 Programs to foster research, development, and dissemination of knowledge in various branches of learning. 46 Affiliated Colleges located in the districts of Sivaganga and Ramanathapuram are part of the University. The University, as a member of the Association of Indian Universities (AIU) and the Association of Common Wealth Universities (ACU), has rewarding relations with other academic institutions, research laboratories, and industrial establishments and formed International Collaborations with Universities / Institutions of Higher Learning in countries like China, Malaysia, West Indies, U.S.A. and South Korea, to offer innovative and exchange programs. The University has obtained Category-I status by the MHRD-UGC and occupies 2nd place out of the 12 State Universities with Category-I Status in the Country and thereby was granted Autonomy status by MHRD.
