DISTANCE EDUCATION

B.Sc. (Information Technology) DEGREE EXAMINATION, MAY 2013.

DIGITAL COMPUTER FUNDAMENTALS

(2007 onwards)

Time : Three hours Maximum : 100 marks

Answer any FIVE questions.

All questions carry equal marks.

$(5 \times 20 = 100)$

1. (a) Convert binary 11111001001 to decimal. (5)

   (b) Convert 1111100101 binary to octal. (5)

   (c) Convert 7C9 hexadecimal to decimal. (5)

   (d) Convert CD42 hexadecimal to binary. (5)

2. (a) Prove mathematically De Morgan's theorems for any two elements A and B in Boolean algebra.

   (i) $\overline{A+B} = \overline{A} \cdot \overline{B}$

   (ii) $\overline{A \cdot B} = \overline{A} + \overline{B}$. (10)

   (b) Find the canonical sum of products (SOP) form for the expression given below :

   $f(A, B, C) = AB + \overline{A}\,\overline{B} + AC + \overline{A}\,\overline{C}$. (10)

3. (a) Obtain the minimal expression for the switching function given below, using Karnaugh map.

$f(A,B,C,D) = \Sigma(1, 3,4,5,9, 11,12, 13)$. (10)

(b) What are decoders? Draw and explain the working of a 3 to 8 line decoder. (10)

4. (a) Draw and explain a binary half adder. Find out its sum and carry bit outputs also show how it can be realized using five NAND gates only. (10)

(b) Draw and explain a 4-bit parallel binary subtractor. (10)

5. (a) Draw and explain the working of a positive edge triggered J-K flip flop. (10)

(b) Explain counters and how are they broadly classified. (10)

6. (a) Write short notes on shift registers and ring counter. (10)

(b) Draw and explain the working of a clocked R-S flip flop. (10)

7. (a) Classify computers on the basis of generations. Discuss the different generations of computers. (10)

(b) Explain the various input and output devices of a digital computers. (10)

8. (a) Draw the block diagram of a digital computer. Explain the functions of its basic parts. (10)

(b) Explain the computer memory in detail. (10)

DISTANCE EDUCATION

B.Sc. (Information Technology) DEGREE EXAMINATION, MAY 2013.

DATA STRUCTURES USING 'C'

(2007 onwards)

Time : Three hours Maximum : 100 marks

Answer any FIVE questions.

All questions carry equal marks.

($5 \times 20 = 100$)

1. (a) What are C tokens? How are they classified? Give examples for each. (10)

   (b) Explain the various arithmetic, logical and relational operators in C with examples. (10)

2. (a) Compare the while structure with the do-while structure. (10)

   (b) Write a 'C' program to find the factorial of a given positive number. (10)

3. (a) Explain the need for array variables. (10)

   (b) Write a 'C' program to perform matrix multiplication. (10)

4. (a) What is recursion? Give an example. (10)

   (b) What are the advantages of pointers? (10)

5. (a) Explain with an example how a structure can be organized in 'C'. (10)

(b) Write a C program to read and write the details of ten employees using an array of structure.

Field Name	Data type
Name	String
Id	Integer
Address	String
Pay	Float

(10)

6. (a) Explain how defining, opening, and closing a file are carried out in 'C' with examples. (10)

(b) What is data structure? What are its classification? Explain. (10)

7. (a) Write an algorithm to insert and delete element in stack. (10)

(b) Discuss the structure of 'Queue'. (10)

8. (a) What are the various applications of tree? Explain. (10)

(b) Compare Singly linked list with Doubly linked list. (10)

DE–5880 **15**

DISTANCE EDUCATION

B.Sc. (Information Technology) DEGREE EXAMINATION, MAY 2013.

DISCRETE MATHEMATICS

(2007 Onwards)

Time : Three hours Maximum : 100 marks

Answer any FIVE questions.

All questions carry equal marks.

(5 × 20 = 100)

1. (a) Prove that

(i) $\neg(P \leftrightarrow Q) \Leftrightarrow (P \vee Q) \wedge \neg(P \wedge Q)$

(ii) $Q \vee (P \wedge \neg Q) \vee (\neg P \wedge \neg Q)$ is a tautology. (10)

(b) Obtain the principal conjunctive normal form of the formula $(\neg P \rightarrow R) \wedge (Q \leftrightarrow P)$. (10)

2. (a) If $A = \{c, d\}$, $B = \{1,2\}$, $c = \{2,3\}$ find

(i) $A \times (B \cup C)$

(ii) $(A \times B) \cup (A \times C)$. (4)

(b) Let *A, B, C* and *D* be sets. Suppose *R* is a relation from *A* to *B, S* is a relation from B to C and T is a relation from *C* to *D*. Prove that $(T \circ S) \circ R = T \circ (S \circ R)$. (8)

(c) Let a relation *R* be defined on the set of all real numbers by "if *x*, *y* are real number, $xRy \Leftrightarrow x - y$ is a rational number". Show that the relation *R* is an equivalence relation. (8)

3. (a) Let $f : A \to B$ and $g : B \to C$ be functions. Prove that

(i) $g \cdot f$ is one – to – one if both f and g is one – to – one

(ii) $g \cdot f$ is onto if both f and g is onto. (10)

(b) If $f(x) = x + 2$; $g(x) = x - 2$ and $h(x) = 3x$ for $x \in R$. Find $g \circ f$, $f \circ g$, $f \circ f$, $g \circ g$, $f \circ h \circ g$. (10)

4. (a) Define n – ary operation, commutative binary operation associative binary operation, distributive binary operation and idempotent element. (10)

(b) Show that

(i) $\sim\sim A = A$

(ii) $A \cap (B \cup C) = (A \cap B) \cup (A \cap C)$

by using characteristic functions. (10)

5. (a) Define

(i) Semi group

(ii) Monoid

(iii) Abelian group

(iv) Subsemi group

(v) Submonoids. (10)

(b) Prove that for any commutative monoid $(M,*)$, the set of idempotent elements of M forms a submonoid. (10)

6. (a) Let $(M,*,e)$ be a monoid and $a \in M$. If 'a' is invertible, prove that its inverse is unique. (10)

(b) Let T be the set of all even integers. Show that the semi groups $(z,+)$ and $(T,+)$ are isomorphic. (10)

7. (a) Let M be the set of all 2 × 2 non – singular matrices of the form $\begin{bmatrix} a & b \\ c & d \end{bmatrix}$, where a, b, c, d are real such that $ab - cd \neq 0$, prove that. M is a group under matrix multiplication. (10)

(b) Show that $\langle z_n, +_n \rangle$ is an abelian group. (10)

8. (a) State and prove Lagranges theorem. (10)

(b) Prove that every subgroup of a cyclic group is cyclic. (10)

DE–5881 **23**

DISTANCE EDUCATION

B.Sc.(Information Technology)/B.Sc.(Information Technology)(Lateral) DEGREE EXAMINATION, MAY 2013.

INTERNET PROGRAMMING

(2007 onwards)

Time : Three hours Maximum : 100 marks

Answer any FIVE questions.

All questions carry equal marks.

(5 × 20 = 100)

1. (a) Discuss in detail about TCP. (10)

   (b) Describe the client/Server model. (10)

2. (a) Explain the Domain Name System. (10)

   (b) How can you create a web server? Explain. (10)

3. Discuss about:

   (a) Shopping on the Internet (10)

   (b) Self Education through Internet (10)

4. (a) How can you declare and initialize a variable? Explain. (10)

   (b) With examples, explain the control structures. (10)

5. (a) What do you mean by inheritance? Explain with an example. (10)

   (b) Write about I/O applets. (10)

6. (a) Discuss in detail about FTb. (10)

   (b) Describe the methods of HTTP. (10)

7. (a) Demonstrate the OOP principles. (10)

   (b) Write a Java Program for matrix multiplication. (10)

8. (a) Describe the string handling functions available in Java. (10)

   (b) Write a Java program to overload the arithmetic operators. (10)

ANALYSIS AND DESIGN OF INFORMATION SYSTEMS

(2007 onwards)

Time : Three hours Maximum : 100 marks

Answer any FIVE questions.

All questions carry equal marks.

($5 \times 20 = 100$)

1. (a) What are the types of systems? Explain. (10)

   (b) Explain the role of system Analyst. (10)

2. (a) Write about the fact finding techniques. (10)

   (b) Draw and explain the symbols used in Data flow Diagram with an example. (10)

3. (a) Compare logical and physical Design. (10)

   (b) Discuss about output Design. (10)

4. (a) Explain the methods of file organization. (10)

   (b) Write about Top down approach. (10)

5. (a) What is Conversion? Explain the conversion methods. (10)

   (b) Discuss about post Implementation Review. (10)

6. (a) Explain the phases of system development life cycle. (10)

   (b) List and explain the skills of a Systems Analyst. (10)

7. (a) Write about Preliminary Investigation. (10)

   (b) Discuss about Cost Benefit Analysis. (10)

8. (a) What are the types of databases? Explain. (10)

   (b) Write about :

      (i) Warnier Orr Diagram (5)

      (ii) Structured Walkthrough. (5)

APPLICATION PROGRAMS

(2007 onwards)

Time : Three hours Maximum : 100 marks

$(5 \times 20 = 100)$

Answer any FIVE questions.

All questions carry equal marks.

$(5 \times 20 = 100)$

1. (a) Describe windows Desktop. (10)

   (b) Describe the steps to get help in Ms Office. (10)

2. (a) Discuss the menu items from Insert menu in Ms Word. (10)

   (b) Explain the following: (10)

      (i) Bulleted and numbered list

      (ii) Using Ruler

      (iii) Header and footer.

3. (a) Describe the use of workbook and worksheets in Excel. (10)

   (b) How to build an Excel Database? (10)

4. (a) Explain the following: (10)

   (i) Editing Text

   (ii) Add or Delete a slide.

   (b) How to create graph chart? State its uses. (10)

5. (a) Write the steps required to create a new database as Ms Access. (10)

   (b) How to combine Excel data and charts with word Document? (10)

6. (a) Describe managing files with windows Explorer. (10)

   (b) How to work with multiple windows? (10)

7. (a) Discuss about Table handling. (10)

   (b) How to setup column options in Ms Word? (10)

8. (a) What is a primary key? How to create a primary key for a table in MS Access? (10)

   (b) Write procedure to add, insert and delete records in Ms Access tables. (10)

COMPUTER NETWORKS

(2007 onwards)

Time : Three hours Maximum : 100 marks

Answer any FIVE questions.

All questions carry equal marks.

($5 \times 20 = 100$)

1. (a) What is Network? Explain the uses of Computer Networks. (10)

   (b) Write about ISDN and Communication Satellites. (10)

2. (a) Discuss about the design issues of Data link layer. (10)

   (b) Explain about ALOHA and Carrier Sense Multiple Access Protocols. (10)

3. (a) Discuss about Protocol specification and verification. (10)

   (b) Discuss about Multiple Access Protocols. (10)

4. (a) Explain about the Design issues of Network Layer. (10)

   (b) Write about Internetworking concept. (10)

5. (a) Write about Internet Control protocols. (10)

   (b) How Network layer is implemented in ATM Networks? Explain. (10)

6. (a) Discuss about Addressing, Flow control and Buffering. (10)

   (b) Explain about TCP and UDP Protocols. (10)

7. (a) Discuss about Multiplexing and Crash Recovery. (10)

   (b) Write about Measuring network performance and Protocols for Gigabit networks. (10)

8. (a) Write a detailed note on Network security. (10)

   (b) Discuss in detail about World Wide Web Concepts. (10)

Time : Three hours Maximum : 100 marks

Answer any FIVE questions.

All questions carry equal marks.

($5 \times 20 = 100$ marks)

1. (a) What do you mean by Icons? Explain about the concept of Icons. (10)

   (b) What are the various menus available in windows and explain it. (10)

2. (a) Write about the hardware requirements for windows. (10)

   (b) What is GUI? Discuss. (10)

3. (a) Write short notes on OLE. (10)

   (b) What is the use of print manager? Explain it. (10)

4. (a) Explain about operating modes in windows. (10)

   (b) What are the picture attributes available in paint brush? Explain. (10)

5. (a) What is the use of message box. Explain. (10)

   (b) Discuss the Frames in detail. (10)

6. (a) Explain the CASE statement with suitable example. (10)

(b) How do you test and run programs in Visual Basic? Illustrate. (10)

7. (a) Write a VB Program to find the odd or even number in a given list of 10 numbers. (12)

(b) Write about Recursive Functions. (8)

8. (a) Explain in detail about creating procedures and functions. (10)

(b) Write short notes on Arrays and control arrays. (10)

MOBILE COMPUTING

(2007 onwards)

Time : Three hours Maximum : 100 marks

Answer any FIVE questions.

All questions carry equal marks.

($5 \times 20 = 100$)

1. (a) Explain how 4G mobile phones work. (10)

   (b) Discuss about Symbian OS architecture. (10)

2. (a) Explain mobile IP and its application. (10)

   (b) Discuss about WLL system. (10)

3. (a) Explain wireless application protocol. (10)

   (b) Write about WAP gateways. (10)

4. (a) Explain fundamentals of WML. (10)

   (b) How do you handle tables using WML? (10)

5. (a) Briefly explain the control structures of WML script. (10)

   (b) Explain the events and phone.com extensions in WML script. (10)

6. (a) Write about 2G and 2.5G technology. (10)

   (b) Explain mobile devices. (10)

7. (a) Discuss about IPV6. (10)

   (b) Explain VOIP in detail. (10)

8. (a) Explain WAP client software and hardware. (10)

   (b) Write an example program to get the input values from user using WML. (10)

DE–5888 **35**

DISTANCE EDUCATION

RDBMS

(2007 onwards)

Time : Three hours Maximum : 100 marks

Answer any FIVE questions.

All questions carry equal marks. (5 × 20 = 100)

1. (a) Discuss about Schema and Subschema. (10)

   (b) Explain the components and benefits of DBMS. (10)

2. (a) Discuss the concepts of Relational model. (10)

   (b) Describe the Data Manipulation facilities. (10)

3. (a) Explain in detail about database Architecture. (10)

   (b) Discuss the types of databases. (10)

4. Write about views of multiple tables using query and selecting distinct values. (20)

5. How can you perform the following: (20)

   (a) Create a table

   (b) Modify a table

   (c) Rename a table

   (d) Droping a table

6. (a) Write in detail about Mapping Operation. (10)

   (b) Write a note on Embedded SQL. (10)

7. Explain in detail about manipulative capabilities and user interfaces in DBMS. (20)

8. (a) Explain the elements of SQL language. (10)

   (b) Discuss the privileges required for the table. (10)

DE–6616 **16**

DISTANCE EDUCATION

B.Sc. (Information Technology) DEGREE EXAMINATION, MAY 2013.

C AND DATA STRUCTURES — LAB

Time : Three hours Maximum : 100 marks

ONE question should be given to each candidate by lot system.

Answer both subdivisions (a) and (b).

1. (a) Write a C program to input a basic pay and calculate Gross-pay and Net-pay.

Income :

HRA = 15% of basic pay

DA = 90% of basic pay

Gross – pay = Basic pay + DA + HRA

Deductions :

PF = 20% of basic pay

Tax = 10% of Gross-pay

Deductions = PF + Tax

Net – pay = Gross – Pay – Deductions.

(b) Write a menu driven program in C to find an element using linear and binary search methods.

2. (a) Write a C program to concatenate two given strings and find the length of the concatenated string.

   (b) Write a C program to implement insert and delete operations on linked list

---------- Cut here ----------

3. (a) Write a C program to compute commission earned by a salesman according to the scheme given below :

Upto 10,000	: 0% commission
Above 10,000 upto 50,000	: 5% commission
Above 50,000	: 10% commission

   (b) Write a C program to sort the given set of elements using insertion sort.

---------- Cut here ----------

4. (a) Write a C program to find the factorial of a given number using FUNCTION declaration.

   (b) Write a C program to sort the given set of elements using selection sort.

---------- Cut here ----------

5. (a) Write a C program to find simple and compound interests using FUNCTION declaration.

   (b) Write a C program to implement push and pop operations on stack.

6. (a) Write a C program to sort ten numbers in ascending order with naming of variable and the value before and after sorting.

   (b) Write a C program to print the prime numbers between two limits.

---------- Cut here ----------

7. (a) Write a C program to find the biggest of 5 numbers. Modify the program to find the biggest of 10 numbers.

   (b) Write a C program to implement insert and delete operations as queue using array concept.

---------- Cut here ----------

8. (a) Write a C program for linked list implementation of queue operations.

   (b) Write a C program to find square root, square and cube of any number.

DE–6617 **26**

DISTANCE EDUCATION

B.Sc. (Information Technology)/B.Sc. (Information Technology) (Lateral) DEGREE EXAMINATION, MAY 2013.

LAB II — JAVA PROGRAMMING

(2007 onwards)

Time : Three hours Maximum : 100 marks

ONE question should be selected by the Examiner and given to each candidate by Lot.

Answer both subdivisions (a) and (b).

1. (a) Write a Java program to sort the list of names in alphabetical order using command line arguments.

   (b) Create and manipulate labels, lists, text fields, text areas and Panels.

---------- Cut here ----------

2. (a) Write a Java program to multiply two matrices if it is possible, otherwise display suitable message.

   (b) Write a Java program to read and write the data in an employee file using random access.

---------- Cut here ----------

3. (a) Write a Java program to illustrate the multilevel inheritance.

   (b) Write a Java program to display the contents of file along with a line number before each line.

4. (a) Write a Java program to create multiple threads.

   (b) Write a Java program to handle mouse events and keyboard events.

---------- Cut here ----------

5. (a) Write a Java program to overhead the + operator for string addition.

   (b) Write an applet to draw the various polygons.

---------- Cut here ----------

6. (a) Write a Java program to create a package.

   (b) Write a Java program to display the number of characters, lines and words in a text file.

---------- Cut here ----------

7. (a) Write a Java program to illustrate the implementation of multiple inheritance using interfaces.

   (b) Write a Java program to count the number of words and characters in a text.

---------- Cut here ----------

8. (a) Write a Java program to illustrate the implementation of abstract class.

   (b) Write a Java program that reads a file name from the user and display the contents of file.

DE–6618 **27**

DISTANCE EDUCATION

B.Sc. (Information Technology)/B.Sc. (Information Technology) (Lateral) DEGREE EXAMINATION, MAY 2013.

LAB III — APPLICATION PROGRAMS

(2007 Onwards)

Time : Three hours Maximum : 100 marks

Examiner has to select ONE question each from WORD EXCEL and ACCESS.

MS – WORD : 25
EXCEL : 35
ACCESS : 40
Total : 100

SECTION – A

MS – WORD

1. Prepare your resume. Use Table, bullets and different colour features.

---------- Cut here ----------

2. Prepare a news report using two columns, insert a picture in the first column and make the text flow around it.

---------- Cut here ----------

3. Prepare an invitation for a function to be conducted in your institution. Use different text orientation and pictures to make it attractive.

4. Create a form letter that informs the customer about the date of maturity of a deposit amount in a commercial bank and request the customer for renewal. Send the letter to all customer using mail merge.

---------- Cut here ----------

SECTION – B

MS – EXCEL

5. Create a worksheet in Excel for electricity bill with the following information :

   Consumer no., Name, Type, PR, CR, Units, amount

   (a) Add data for 10 customers with type D for domestic user and type I for industrial user

   (b) Calculate the bill using slab (assume your own rates)

   (c) All the customers should be charged a minimum bill of Rs. 100 even if their bill amount is below Rs. 100.

---------- Cut here ----------

6. Create a worksheet with the following columns :

   Salesman no., name, city, product name, sale amount

   Add three records for five different salesmen who have carried out sales of different products in different cities. Find the following:

   (a) City – wise and salesman – wise total sales

   (b) Productwise and grand total sales.

7. The following were the observations made in certain experiments for the values y and given the values of x

x:	1	2	3	4	5	6	7	8	9	10
y:	10	30	45	25	15	28	40	32	15	35

Compute the following :

(a) Find mean, median and standard deviation

(b) Correlation coefficient between x and y

(c) Draw the bar chart and shading cells.

---------- Cut here ----------

8. Create a data table to create a ready reckoner table for a commercial bank that contains simple interest for Rs. 10,000 with varying period and interest rates.

---------- Cut here ----------

SECTION – C

MS ACCESS

9. Create employee table with the fields :

EMPNO, NAME, SEX, AGE, STREET, CITY, PIN, SALARY

(a) Add data for 10 employees

(b) Write a query to display all female employees whose salary is between 10,000 and 50,000 and living in city "COIMBATORE"

(c) Write a query to display all male employees whose ages are in the range 50 to 60

(d) Show all the records in the table for the city "CHENNAI" by filtering.

10. Create student table with the following fields :

    Reg No., Name, Mark 1, Mark 2, Mark 3.

    Create address table with the following fields :

    Reg No., Street, city, pincode.

    (a) Write a query to display Reg. No., Name and total of all three subject marks.

    (b) Write a query to display Reg. No., Name, Street, City, Pincode and total of all three subject marks.

---------- Cut here ----------

11. Create inventory table with the fields :

    Item no., Name, Quantity on hand, Reorder level

    (a) Create a form in custom format

    (b) Create a query reorder to show all the items

    (c) Create a macro that executes reorder query automatically

---------- Cut here ----------

12. Create two table SALES1 and SALES2. Join them to produce a third table SALES3.

DE–6619 **36**

DISTANCE EDUCATION

B.Sc. (Information Technology)/B.Sc. (Information Technology) (Lateral) DEGREE EXAMINATION, MAY 2013.

LAB IV — VISUAL BASIC AND ORACLE

(2007 onwards)

Time : Three hours Maximum : 100 marks

Examiner has to select ONE question and is given to candidate by LOT system.

Each subdivision carries 50 marks.

1. (a) Write and test a VB program to print twenty address labels in a two-column format for the address.

   The Registrar, Alagappa University, Karaikudi-630003.

   (b) Create a table NUMB with the following fields :

   NUM, SQRTNO, SQRNO, CUBENO.

   (i) Add 5 records

   (ii) Replace SQRTNO with square root value of given numbers.

   (iii) Replace SQRNO with square of given number

   (iv) Replace CUBNO with cube of given number

   (v) Display all the records.

---------- Cut here ----------

2. (a) Write a VB program to compute the surface area and volume of a sphere given the radius. Use option button and input boxes.

   (b) Create a table BLOOD with the following fields : DNO, DNAME, DOB, DAGE, DBLOOD, DSEX

(i) Add 5 records
