Department of Civil Engineering

Academic Year 2020-2021 – ODD Semester

04.02.21

DEPARTMENT CIRCULAR

Department of Civil Engineering and IQAC of IGCE in association with **VEERANAR CONSTRUCTION** is going to organize Value Added Course for all Second, Third and Final year students on "**Advanced Surveying**" from 08.02.21 to 12.02.21, though, https://meet.google.com/mnd-tdmps-gbp(Google meet link). Certificates will be issued to the eligible participants at the end of the Course.

Resource Person Detail	1. Mr.K. KINGSELY MAXWEL, Surveyor, Veeranar Construction, Puthukkottai-614601
Venue	https://meet.google.com/mnd-tdmps-gbp (Google Meet)

Value Added Course on "**Advanced Surveying**"

SYLLABUS

S.NO	TOPIC COVERED	DURATION (in hours)	DATE
1	Surveying and introduction in surveying	3	08.02.21
2	Plane and geodetic surveying	3	08.02.21
3	Principles of surveying	3	09.02.21
4	Advanced technology in surveying	3	09.02.21
5	Drone technology	3	10.02.21
6	Lidar technology	3	10.02.21
7	Drone to map software	3	11.02.21
8	Micro station software	3	11.02.21
9	Arc GIS software	3	12.02.21
10	GPS surveying	3	12.02.21
	Total Hours	30	-

REPORT ON VALUE ADDED COURSE

Title:	**"Safety in construction"**				
Resource Person:	**Mr.K. KINSELY MAXWEL,** Surveyor, Veeranar Construction, Puthukottai				
Date of conduct from:	08.02.21	To:	12.02.21	Duration:	30 Hours
Organized Department:	**CIVIL ENGINEERING**				
Participant Year:	2, 3, 4	Semester:	ODD	No. of Students Registered:	25
Venue:	https://meet.google.com/mmd-tpqm-gb(Google meet link)				

Outcome of Value-Added Course (VAC): At the end of the Course, Students can able to

- Impact knowledge on the usage of basic surveying instruments
- Able to use levelling instruments in surveying operation
- Abel to use total station and electromagnetic distance measurement instruments
- Able to prepare planimetric maps

Assessment Process

Students, who are securing more than **70%** on total score and secured more than 75% in attendance is eligible to receive the certificate for the VAC course conducted.

Total Score = (0.5 *Attendance in VAC out of 100 percentage + 0.5 *Test mark in VAC out of 100 marks) .

Value Added Course on **"Advanced surveying"**

MCQ QUESTIONS (25X4 = 100 Marks)

1. **What is Surveying?**
   a) Surveying is used to find the elevations of given points with respect to given or assumed datum
   b) Surveying shows the relative positions of the objects on the surface of the earth
   c) Surveying is to find the elevation of points having the same contour interval
   d) All of the mentioned

2. **Which of the following is the first principle of surveying?**
   a) Whole to whole
   b) Part to part
   c) Part to whole
   d) Whole to part

Dr. G. Balakrishnan, M.E., Ph.D.
Principal
Indra Ganesan College of Engineering
IG Valley, Madurai Main Road
Manikandam, Trichy-620 012.

3. **Which of the following type of surveying is used for exploring mineral wealth?**
   a) Military surveying
   b) Mine surveying
   c) Topographic surveying
   d) Engineering surveying

4. **In which of the following type of surveying only linear measurements are made?**
   a) Dumpy level
   b) Theodolite surveying
   c) Chain surveying
   d) Contouring

5. **Which of the following classification in surveying is based on the instrument used?**
   a) Traverse surveying
   b) Cadastral surveying
   c) Topographic surveying
   d) Hydrographic surveying

6. **In which of the following areas does compass surveying is not recommended?**
   a) Large areas
   b) Undulating areas
   c) Crowded with many details
   d) Local attraction suspected areas

7. **In which of the following cases compass surveying is recommended?**
   a) When area is small, undulating and not details are crowded
   b) When area is large, undulating and crowded with many details
   c) When area is small, even and crowded with many details
   d) When area is large, even and crowded with many details

Dr. G. Balakrishnan, M.E., Ph.D.,
Principal
Indra Ganesan College of Engineering
IG Valley, Madurai Main Road
Manikandam, Trichy-620 012.

8. **Which of the following is not required for chain surveying?**
   a) Dumpy level
   b) Pegs
   c) Arrows
   d) 20 m chain

9. **Which of the following is the last step in chain surveying?**
   a) Fixing
   b) Reconnaissance
   c) Running survey lines
   d) Marking

10. **Which of the following cannot be done with the help of theodolite in surveying?**
    a) Measuring horizontal distances
    b) Prolonging survey lines
    c) Laying off horizontal angles
    d) Locating points on lines

11. **Which of the following is an indirect method of surveying?**
    a) Countouring
    b) Chain surveying
    c) Tacheometry
    d) All of the mentioned

12. **Which of the following branch of surveying is used to find the elevations of given points with respect to given or assumed datum?**
    a) Plane table surveying
    b) Traversing
    c) Contouring
    d) Levelling

13. **Which of the following is the principles of surveying?**
    a) Covering the entire area
    b) Working from whole to part
    c) Taking measurements
    d) Determining the elevation differences

Dr. G. Balakrishnan, M.E., Ph.D.,
Principal
Indra Ganesan College of Engineering
IG Valley, Madurai Main Road
Manikandam, Trichy-620 012.

14. **Which of the following surveying methods is meant to be having high precision?**
    a) Terrestrial photogrammetry
    b) Traverse surveying
    c) Aerial photogrammetry
    d) Theodolite surveying

15. **Which of the following doesn't describe the use of hydrographic surveying?**
    a) Nautical charts for navigation
    b) Establishing mean sea level
    c) Laying an Alignment
    d) Making underground investigations

16. **Which of the following type of ranging is done if both ends of surveying lines are visible?**
    a) Indirect
    b) Reciprocal
    c) Unable to do
    d) Direct

17. **Which of the following is not a method of levelling?**
    a) Spirit levelling
    b) Traverse levelling

c) Barometric levelling
d) Trigonometric levelling

18. **In which of the following type of surveying in the mean surface of the earth is considered as a plane and the spheroidal shape is neglected?**
a) Plane Surveying
b) Geodetic Surveying
c) Hydrographic Surveying
d) Topographic Surveying

19. **Which of the following doesn't involve the method of traversing?**
a) Plane Table surveying
b) Tacheometric surveying
c) Chain surveying
d) Theodolite surveying\

Dr. G. Balakrishnan, M.E., Ph.D.,
Principal
Indra Ganesan College of Engineering
IG Valley, Madurai Main Road
Manikandam, Trichy-620 012.

20. **Which of the following is not a method of plane table surveying?**
a) Trisection
b) Intersection
c) Resection
d) Radiation

21. **While taking Observations for the height and distances, which of the following method of surveying is used?**
a) Plane surveying
b) Geodic surveying
c) Chain surveying
d) Compass surveying

22. **Which of the following type of surveying can be employed in a magnetic area?**
a) Compass surveying
b) Traverse surveying
c) Plane table surveying
d) Theodolite surveying

23. **Which of the following survey deals with bodies of water for the purpose of navigation, water supply, harbor works or for the determination of mean sea level?**
a) City surveying

b) Cadastral surveying
c) Topographic surveying
d) Hydrographic surveying

24. **Determining points of strategic importance are called _____**
a) Traverse surveying
b) Military surveying
c) City surveying
d) Topographic surveying

25. **Which of the following is not a natural error in compass surveying?**
a) Local attraction due to the proximity of local attraction forces
b) Pivot being bent
c) Magnetic changes in the atmosphere due to clouds and Strom's
d) Variation in declination

Academic Year 2020-2021 – Even Semester

DATE: 04.08.2021

Department of Civil Engineering and IQAC of IGCE in association with **TM Design & Constructions** is going to organize Value Added Course for all Second, Third and Final year students on **"BIM- Building Information and Modeling"** from 09.08.21 to 13.08.21, though, https://meet.google.com/ssd-tdmvs-gbm (Google meet link). Certificates will be issued to the eligible participants at the end of the Course.

Resource Person Detail	Mr.M.Mohamedanas, Assistant Engineer, TM Design & Constructions
Venue	https://meet.google.com/ssd-tdmvs-gbm(Google Meet)

REPORT ON VALUE ADDED COURSE						
Title:	**"Safety in construction"**					
Resource Person:	Mr.M.Mohamed anas, Assistant Engineer, TM Design & Constructions					
Date of conduct from:	09.08.21	To:	13.08.21	Duration:	30 Hours	
Organized Department:	**CIVIL ENGINEERING**					
Participant Year:	2, 3, 4	Semester:	ODD	No. of Students Registered:	25	
Venue:	https://meet.google.com/ssd-tdmvs-gbm (Google meet link)					

Outcome of Value-Added Course (VAC): At the end of the Course, Students can able to

- Impact knowledge on the usage of basic surveying instruments
- Able to use levelling instruments in surveying operation
- Abel to use total station and electromagnetic distance measurement instruments
- Able to prepare planimetric maps

Assessment Process

Students, who are securing more than **70%** on total score and secured more than 75% in attendance is eligible to receive the certificate for the VAC course conducted.
Total Score = (0.5 *Attendance in VAC out of 100 percentage + 0.5 *Test mark in VAC out of 100 marks) .

MCQ QUESTIONS (25X4 = 100 Marks)

1.
Which of the following is a key benefit of using BIM in construction projects?

- Improved collaboration and communication between team members
- Faster completion of construction projects
- Lower construction costs
- All of the above

2.
What is clash detection in BIM?

- The process of identifying inconsistencies in construction drawings
- The process of identifying conflicts between different 3D models
- The process of identifying issues with the construction schedule
- The process of identifying problems with the construction budget

3.
What is the difference between LOD 100 and LOD 500 in BIM?

- LOD 100 provides the most detailed information while LOD 500 provides the least detailed information
- LOD 500 provides the most detailed information while LOD 100 provides the least detailed information
- There is no difference between LOD 100 and LOD 500
- LOD 100 and LOD 500 refer to different types of information in BIM

4.
Which of the following is not a software commonly used in BIM coordination?

- Revit
- Navisworks
- AutoCAD

Dr. G. Balakrishnan, M.E., Ph.D.,
Principal
Indra Ganesan College of Engineering
IG Valley, Madurai Main Road
Manikandam, Trichy-620 012.

- SketchUp

5.
What is the purpose of a COBie file in BIM?

To provide a list of materials and equipment needed for construction

- To provide a record of construction change orders
- To provide a standardized format for sharing construction information
- To provide a schedule for construction activities

6.
What is the purpose of a BIM Execution Plan (BEP)?

- To outline the scope of a construction project
- To provide a schedule for construction activities
- To define the BIM processes and standards to be used throughout a construction project
- To identify potential conflicts between different 3D models

7.
What is the purpose of a clash report in BIM?

- To identify inconsistencies in construction drawings
- To identify conflicts between different 3D models
- To identify issues with the construction schedule
- To identify problems with the construction budget

8.
What is the purpose of a BIM model coordination meeting?

- To review and resolve clashes between different 3D models
- To review and approve construction change orders
- To review and approve construction schedules
- To review and approve construction budgets

9.
Which of the following is not a BIM Level of Development (LOD)?

- LOD 100
- LOD 300
- LOD 400
- LOD 600

Dr. G. Balakrishnan, M.E., Ph.D.,
Principal
Indra Ganesan College of Engineering
IG Valley, Madurai Main Road
Manikandam, Trichy-620 012.

10.
Which of the following is not a benefit of using BIM in design?

- Improved visualization of design concepts
- Improved collaboration among team members
- Improved accuracy of construction cost estimates
- Reduced construction time

11.
What is the purpose of a BIM execution team?

- To oversee the BIM process and ensure adherence to project standards
- To provide construction schedule updates to stakeholders
- To review and approve construction change orders
- To manage the construction budget

12.
Which of the following is not a BIM software feature commonly used in model coordination?

Clash detection

- 4D scheduling
- Visualization tools
- Cost estimating tools

Dr. G. Balakrishnan, M.E., Ph.D.,
Principal
Indra Ganesan College of Engineering
IG Valley, Madurai Main Road
Manikandam, Trichy-620 012.

13.
What is a BIM object?

- A 2D drawing of a construction component
- A 3D model of a construction component with associated data
- A list of construction specifications
- A schedule of construction activities

14.
Which of the following is not a common BIM file format?

- IFC
- COBie
- DWG
- BIMX

15.
Which of the following is a key benefit of using BIM in construction project scheduling?

- Which of the following is a key benefit of using BIM in construction project scheduling?
- Increased accuracy of the construction schedule
- Reduced construction costs
- Improved collaboration among team members

16.
What is the difference between a BIM model and a CAD model?

- A BIM model includes construction information beyond just 3D geometry
- A CAD model is more detailed than a BIM model
- There is no difference between a BIM model and a CAD model
- A BIM model is only used for visualization purposes, while a CAD model is used for construction documentation

17.
What is the purpose of a BIM 360 platform?

- To manage and share construction information in a cloud-based environment
- To provide access to CAD software
- To provide access to construction estimating software
- To provide access to construction scheduling software

Dr. G. Balakrishnan, M.E., Ph.D.,
Principal
Indra Ganesan College of Engineering
IG Valley, Madurai Main Road
Manikandam, Trichy-620 012.

18.
What is the purpose of a BIM model review?

- To identify potential conflicts between different 3D models
- To approve construction change orders
- To approve construction schedules
- To approve construction budgets

19.
Which of the following is not a BIM software commonly used in design?

- Revit
- AutoCAD
- Rhino
- Navisworks

20.
What is the purpose of a BIM coordinator?

- To manage and oversee the BIM process throughout a construction project
- To manage and oversee the construction schedule
- To manage and oversee the construction budget
- To manage and oversee the construction change order process

21.
What is the purpose of a BIM 4D schedule?

- To provide a detailed list of construction activities
- To provide a 3D model of the construction project
- To link the construction schedule with the 3D model
- To provide a list of materials and equipment needed for construction

Dr. G. Balakrishnan, M.E., Ph.D.,
Principal
Indra Ganesan College of Engineering
IG Valley, Madurai Main Road
Manikandam, Trichy-620 012.

22.
What is the purpose of a BIM coordination plan?

- To outline the scope of a construction project
- To provide a schedule for construction activities
- To define the BIM processes and standards to be used throughout a construction project
- To identify potential conflicts between different 3D models

23.
What is the difference between BIM and VDC?

- BIM is focused on design while VDC is focused on construction
- BIM is focused on construction while VDC is focused on design
- BIM and VDC are the same thing
- BIM and VDC are not related to each other

24.
What is the purpose of a BIM model validation?

- To ensure that the BIM model meets the required standards and specifications
- To approve construction change orders
- To approve construction schedules
- To approve construction budgets

25.

Which of the following is a benefit of using BIM in facility management?

- Improved energy efficiency
- Reduced maintenance costs
- Improved occupant comfort
- All of the above

Dr. G. Balakrishnan, M.E., Ph.D.,
Principal
Indra Ganesan College of Engineering
IG Valley, Madurai Main Road
Manikandam, Trichy-620 012.

IV - CIVIL

20

Dr. G. Balakrishnan, M.E., Ph.D.
Principal
Indra Ganesan College of Engineering
JG Valley, Madurai Main Road
Manikandam, Trichy-620 012.

1. b) Faster completion of construction projects
2. d) The process of identification problems with the construction budget
3. b) LOD 500 provides the most detailed information while LOD 100 provides the least detailed information
4. a) Revit
5. a) To provide a record of construction change orders.
6. d) To identify potential conflicts between different 3D models.
7. b) To identify conflicts between different 3D models.
8. a) To review and resolve clashes between different 3D models
9. c) LOD 400
10. d) Reduced construction time
11. c) To review and approve construction change orders.
12. d) Cost estimating tools
13. b) A 3D model of a construction component with associated data

14. c) DWG

15. b) Increased accuracy of the construction schedule

16. b) A CAD model is more detailed than a BIM model.

17. b) To provide access to CAD software.

18. a) To identify potential conflicts between different 3D models

19. e) Rhino

20. a) To manage and oversee the BIM process throughout a construction project.

21. b) To provide a 3D model of the constru project

22. c) To define the BIM process and standa to be used throughout a construction proje

23. d) BIM & VDC are not related to each other

24. b) To approve construction change orc

25. b) Reduced maintenance cost

Dr. G. Balakrishnan, M.E., Ph.D.,
Principal
Indra Ganesan College of Engineering
IG Valley, Madurai Main Road
Manikandam, Trichy-620 012

Mahendran. M

3rd civil.

21/25

1. b) Faster completion of construction Projects.

2. d). The Process of identifying problems with the construction budget.

3. b). LOD 500 Provides the most detailed information while LOD 100 Provides the least

4. c). Auto CAD

5. a). To Provide a record of construction change orders.

6. d) To identify Potential conflicts b/w different 3D models.

7. b). To identify conflicts b/w different 3D model.

8. a). To review & approve construction budgets.

9. c). LOD 400

10. a). Improved visualization of design concepts

11. d). To manage the construction budget.

12. d). cost estimating tools

Dr. G. Balakrishnan, M.E., Ph.D.,
Principal
Indra Ganesan College of Engineering
IG Valley, Madurai Main Road
Manikandam, Trichy-620 012.

13). A 3D model of a construction
b) Component with associated data.

Dr. G. Balakrishnan, M.E., Ph.D.,
Principal
Indra Ganesan College of Engineering
IG Valley, Madurai Main Road
Manikandam, Trichy-620 012.

14. c). BOG

15. b). Increased accuracy of the construction schedule.

16. b) A CAD model is more detailed than a BIM model.

17. b). To provide access to CAD software.

18. a). To identify potential conflicts b/w different 3D models.

19. b). Auto CAD.

20. a) To manage & oversee the BIM process throughout a construction project.

21. a). To provide a detailed list the activities.

22. c). Define the BIM processes & standards to be used throughout a construction project

23. a). BIM and VDC are the same thing.

24. b). To approve construction change orders

25. b). Reduced maintenance costs.

19/25

Dr. G. Balakrishnan, M.E., Ph.D.
Principal
Indra Ganesan College of Engineering
IG Valley, Madurai Main Road
Manikandam, Trichy-620 012.

1) b) faster completion of construction projects

2) d) The process of identifying problems with the construction budget

x 3) c) The is no difference between LOD 100 and LOD 500

4) c) Auto CAD

5) a) To provide a record of construction change orders.

6) d) To identify potential conflicts between different 3D models

x 7) a) To iden

8) a) To review and resolve clashes between diff 3D models.

9) c) LOD 400

x 10) d) Reduced construction time

11) c) To review and approve construction change orders.

12) d) Cost estimation tools.

13) b) A 3D model of a construction component with associated data.

14) c) DWG

15) b) Increased accuracy of the construction schedule

x 16) b) A CAD model is more detailed than a BIM model

17) b) To provide access to CAD software.

18) a) To identify potential conflicts between 3D models

19) b) Auto CAD

20) a) To manage and oversee the BIM process throughout a construction project

21) b) To provide 3D model of the construction project

22) c) To define the BIM process and standard to be

23) d) BIM and VDC are not related to each other

24) b) To Approve construction schedules

25) b) All of the above

Dr. G. Balakrishnan, M.E., Ph.D.,
Principal
Indira Ganesan College of Engineering
IG Valley, Madurai Main Road
Manikandam, Trichy-620 012.
