ALAGAPPA UNIVERSITY

(Accredited with A+ Grade by NAAC (CGPA : 3.64) in the Third Cycle)

KARAIKUDI

Date: 11.08.2017

The Alagappa University, Karaikudi and MHRD – Virtual Lab (Amrita Vishwa Vidyapeetham University) jointly organized a one-day workshop on Virtual Lab for Science Faculty and Students on 10.8.2017.

The workshop was held at two venues one in Convocation Hall and the other in Convocation Seminar Hall for various disciplines of science subjects. About 300 first year students of science subjects and faculty members attended the workshop.

Prof. V. Balachandran, Registrar i/c., inaugurated the Nodal Centre of the Virtual Lab at Alagappa University and he delivered the inaugural address stressing that the doors of the university are wide open for the students to learn the laboratory experiments for 24 hours for 7 days in a week. They can also learn the lab experiments at remote access. He further said that there are many differences between traditional and virtual lab. While the traditional lab does require huge amount to be spent to procure the lab apparatus, but the virtual lab does not need to spend any amount for it.

Prof. K. Gurunathan, Syndicate Member of Alagappa University, in his felicitation address, expatiated on the immense value of the virtual laboratory as a tool for distant learning and / or experimentation that allows people to share knowledge, data, voice, video, tools and many other resources. It provides a suitable environment to extend, improve, integrate, refine, and assist the learning and/or experimentation process of many subjects, thus contributing to an increase in the effectiveness of scientific research widening the use of scarce or costly equipment. The diversity of models and structures for virtual laboratories is

large and varies according to the nature of the project under investigation, the goal set and the technologies involved.

Prof. V. Palanichamy, Dean, Student Affairs, in his felicitation speech, drove home the point how far the Virtual Lab users from remote-access to labs in various disciplines of Science and Engineering. These Virtual Labs would cater to the students at the undergraduate level, post graduate level, in addition to the research scholars by enthusing students and whetting their appetite to conduct experiments. This would help them in learning basic and advanced concepts through remote experimentation by the provision of a complete Learning Management System around the Virtual Lab where the students can avail the various tools for learning, including additional web-resources, video-lectures, animated demonstrations and self-evaluation and by sharing costly equipment and resources, which are otherwise available to a limited number of users due to constraints on time and distances.

Mr. Saneesh, Project Manager and Technical Lead of Virtual Lab and Mr. Vysakhkanikolil, Deployment Officer of VALUE Virtual Amrita Vishwa Vidyapeetham were the resource persons, who gave hands-on experiments on V-Lab. Dr. C. Baskaran, Co-ordinator, welcomed the gathering and Dr. G. Ramalingam, Coordinator, proposed a vote of thanks.
