DE–6922 **13**

DISTANCE EDUCATION

B.Sc. (I.T.) DEGREE EXAMINATION, DECEMBER 2013.

DIGITAL COMPUTER FUNDAMENTALS

(2007 onwards)

Time : Three hours Maximum : 100 marks

Answer any FIVE questions.

All questions carry equal marks.

(5 × 20 = 100)

1. (a) Convert the following:

(i) $(AB6)_{16} = (?)_{10}$

(ii) $(7574)_8 = (?)_{10}$

(iii) $(1011.1111)_2 = (?)_8$

(iv) $(62.32)_8 = (?)_2$ (10)

(b) Convert the decimals 35 and 47 to binary and perform $(35 - 47)_{10}$ using 2's complement. (10)

2. (a) Find the simplified Boolean function in sum of products form and product of sums form for the Karnaugh map represented by $Y(A,B,C,D) =$ $\sum m(0,3,7,8,9,11,12,13) + \sum d(1,4,14,15)$ (10)

(b) Explain the function of 16 to 1 multiplexer with neat diagram. (10)

3. (a) Simplify the Boolean functions by means of the tabulation method.

$$F(A,B,C,D,E,F) = \sum(6,9,13,18,19,25,27,29,41,45,57,61)$$ (10)

(b) With suitable diagram explain the functions of Decoders and Encoders. (10)

4. (a) Explain the working of a parallel binary adder. (10)

(b) Prepare the truth table of a full adder and using Karnaugh maps design the logic circuit. (10)

5. (a) With neat circuit diagram and truth table explain the operation of Master slave flip – flops. (10)

(b) Draw the Schematic block diagram of a BCD counter. Describe its working principles. (10)

6. (a) Explain the operation of a 4 bit shift register using D flip – flop. Draw the circuit diagram. (10)

(b) Explain the design of an ALU with diagram. (10)

7. (a) Discuss the important features of various generations of computers. Give examples of computer for each generation. (10)

(b) What is the function of memory in a computer? Explain the different types of memory. (10)

8. (a) What do you understand by 'Peripheral'? Explain with examples. Discuss the function of input and output devices. (10)

(b) Draw Karnaugh map and simplify the Boolean function

$$Y(A,B,C,D) = \pi M(1,5,7,8,9,10,11,12,13,14,15)$$ (10)

DISTANCE EDUCATION

B.Sc. (IT) DEGREE EXAMINATION, DECEMBER 2013.

DATA STRUCTURES USING C

(2007 Onwards)

Time : Three hours Maximum : 100 marks

Answer any FIVE questions

All questions carry equal marks.

(5 × 20 = 100)

1. (a) Explain data types in C language.

   (b) Explain control structures in C language with example.

2. (a) How do you pass arguments to function? Explain with example.

   (b) With example explain array.

3. (a) Explain pointers with example.

   (b) How do you create data file? Explain with example.

4. (a) Explain PUSH and POP operations.

   (b) Discuss about queue.

5. (a) Briefly explain single linked list.

   (b) Define tree. Explain binary tree.

6. (a) Explain gets( ) and puts( ) with example.

   (b) Explain C operators.

7. (a) Explain library function.

   (b) Write a C program to sort 'n' numbers in ascending order.

8. (a) Define structure. Explain how to process structure in C.

   (b) Write a C program for payroll calculation using file.

DE–6924 **15**

DISTANCE EDUCATION

B.Sc. (I.T) DEGREE EXAMINATION, DECEMBER 2013.

DISCRETE MATHEMATICS

(2007 onwards)

Time : Three hours Maximum : 100 marks

Answer any FIVE questions.

All questions carry equal marks.

$(5 \times 20 = 100)$

1. (a) Obtain the principal disjunctive normal form of $P \to ((P \to Q) \wedge \neg(\neg P \vee \neg Q))$. (10)

   (b) (i) Show that $Q \vee (P \wedge \neg Q) \vee (\neg P \wedge \neg Q)$ is a tautology.

   (ii) Prove that $p \to q \Leftrightarrow \neg q \to \neg p$ (10)

2. (a) Show that $A - (B - C) = (A - B) \cup (A \cap C)$. (5)

   (b) Prove that the relation "congruence modulo m" over the set of positive integers is an equivalence relation. (8)

   (c) If $A = \{2, 3\}$, $B = \{1, 2, 3\}$ and $C = \{1, 3, 5\}$, find $A \times B \times C$. (7)

3. (a) Let $f : A \to B$ and $g : B \to C$ be both one-to-one and onto functions, prove that $(g \circ f)^{-1} = f^{-1} \circ g^{-1}$. (10)

(b) Let $X = \{1, 2, 3, 4\}$ and $f : X \to X$ be given by $f = \{(1, 2), (2, 3), (3, 4), (4, 1)\}$. Form the composite functions f^2, f^3 and f^4. (10)

4. (a) Using characteristic function of set, prove that $A \cap (B \cup C) = (A \cap B) \cup (A \cap C)$. (10)

(b) Let $*$ be a binary operation on X which is associative and which has identity $e \in X$. If an element $a \in X$ is invertible, prove that both of its left and right inverses are equal. (10)

5. (a) Prove that for any commutative monoid $(m, *)$, the set of idempotent elements of m forms a submonoid. (10)

(b) Let T be the set of all even integers. Show that the semigroup $(z, +)$ and $(T, +)$ are isomorphic. (10)

6. (a) Let $(m, *, e)$ be a monoid and $a \in M$. If 'a' is invertible, prove that its inverse is unique. (10)

(b) Show that the monoid homomorphism preserves the property of invertibility. (10)

7. (a) (i) Define group and abelian group.

(ii) State and prove the cancellation laws in group. (10)

(b) Show that every group of order 4 is abelian. (10)

8. (a) State and prove Lagrange's theorem. (10)

(b) Prove that a subgroup H of a group G is a normal subgroup of G if and only if every left coset of H in G is a right coset of H in G. (10)

DISTANCE EDUCATION

B.Sc. (IT)/ B.Sc. (IT) (Lateral) DEGREE EXAMINATION, DECEMBER 2013.

INTERNET PROGRAMMING

(2007 Onwards)

Time : Three hours Maximum : 100 marks

Answer any FIVE questions.

All questions carry marks $(5 \times 20 = 100)$

1. Draw and explain the network topologies. Also give the applications of each topology. (20)

2. (a) Explain the following
   (i) Domain Name system.
   (ii) Email. (10)

   (b) Explain the following
   (i) FTP
   (ii) HTTP. (10)

3. (a) Explain the Internet at home. (10)

   (b) How does Internet help to find job? (10)

4. (a) Explain JAVA data types with examples. (15)

   (b) Write about variable declaration in JAVA. (5)

5. (a) Describe the constructors. (10)

   (b) Discuss about method overloading. (10)

6. (a) Describe about client/ server models. (15)

   (b) Write short notes on TCP/IP. (5)

7. (a) Explain in detail with examples of one dimensional arrays in JAVA. (10)

   (b) Write a Java program to sort the given array. (10)

8. (a) Describe the string handling methods with examples. (10)

   (b) Write a Java program to compare the given two string. (10)

B.Sc. (I.T)/B.Sc. (Inf.Tech.) (Lateral) DEGREE EXAMINATION, DECEMBER 2013.

ANALYSIS AND DESIGN OF INFORMATION SYSTEMS

(2007 onwards)

Time : Three hours Maximum : 100 marks

Answer any FIVE questions.

(5 × 20 = 100)

1. (a) Describe the elements of system.

   (b) Distinguish between the following:

   (i) Interaction and Interdependence

   (ii) Physical and abstract systems.

2. (a) When does an analyst terminate a project? Explain.

   (b) Discuss the role of system analyst in computer based information system.

3. (a) Write down the strategies for determining information requirement.

   (b) What is structured analysis? Write brief review about tools of structured analysis.

4. (a) Give the classification of forms and explain in detail.

   (b) List out the types of form designs and explain.

5. (a) Discuss in detail about Quality Assurance.

   (b) Classify the types of data bases and explain.

6. (a) How can you select Hardware selection? Explain its major phases.

   (b) Explain the procedure for software selection.

7. (a) Discuss the importance of system maintenance.

   (b) Explain in detail about post implementation review.

8. (a) Describe the characteristics of system.

   (b) Describe the different types of files.

DE–6927 **25**

DISTANCE EDUCATION

B.Sc. (IT) /B.Sc.(Inf.Tech) (Lateral) DEGREE EXAMINATION, DECEMBER 2013.

APPLICATION PROGRAMS

(2007 onwards)

Time : Three hours Maximum : 100 marks

Answer any FIVE questions.

All questions carry equal marks.

(5 × 20 = 100)

1. (a) How to view drives with my computer? Also explain as to how files are managed with windows explorer? (10)

   (b) Write short notes on (10)

   (i) Toolbars and its uses

   (ii) Dialog boxes and its types.

2. (a) Explain the edit menu and its items in Ms–word.(10)

   (b) Explain the uses of templates and wizards. (10)

3. (a) Discuss the filler options available in excel. (10)

   (b) How to insert and work with a chart object in Ms–Excel. (10)

4. (a) Explain the types of 'views' in Ms–PowerPoint. How to change views and work with it? (10)

   (b) Discuss about background animation in power point. (10)

5. (a) Write the steps to create and save a table in Ms–Access. (10)

   (b) What are the steps to create, save and execute a query in Ms–Access. (10)

6. (a) How to work with multiple windows at a time? (10)

   (b) Explain about toolbars. (10)

7. (a) Discuss about table handling. (10)

   (b) Describe the steps in merging a form letter with data. (10)

8. (a) How to add speaker notes to a slide presentation? (10)

   (b) What are handouts? How to create handouts? (10)

COMPUTER NETWORKS

(2007 onwards)

Time : Three hours Maximum : 100 marks

Answer any FIVE questions.

All questions carry equal marks.

(5 × 20 = 100)

1. (a) Discuss about Network Hardware and NetWork Software. (10)

   (b) Explain about ISDN. (10)

2. (a) Write about Error Detection and Correction codes. (10)

   (b) Discuss about DLink Protocols. (10)

3. (a) Write a detailed note on Sliding Window Protocols. (10)

   (b) Discuss about Finite State Models and PetriNet Models. (10)

4. (a) Explain about Routing Algorithms. (10)

   (b) Write about Internet Control Protocols. (10)

5. (a) Write about Network layer in ATM Network. (10)

   (b) Explain about Tunneling and Fragmentation. (10)

6. (a) Discuss about the Elements of Transport Protocols. (10)

(b) Explain about Internet Transport Protocols. (10)

7. (a) Write about Secret Key and Public key algorithms. (10)

(b) What is WWW? Explain in detail. (10)

8. (a) Explain the Fundamentals of E-mail and Privacy. (10)

(b) What is Data Compression? Explain in detail. (10)

DE–6929 **32**

DISTANCE EDUCATION

B.Sc. (IT)/B.Sc. (Information Technology) (Lateral) DEGREE EXAMINATION, DECEMBER 2013.

VISUAL PROGRAMMING

(2007 onwards)

Time : Three hours Maximum : 100 marks

Answer any FIVE questions.

All questions carry equal marks. ($5 \times 20 = 100$)

1. (a) What is GUI? Explain about required H/W and S/W for windows.

   (b) Explain about format of a window and working with windows.

2. (a) Write about Program, File and Print Managers and their uses.

   (b) Discuss about Control Panel and Paint brush.

3. (a) Explain in detail about Basics of VB.

   (b) Discuss about MsgBox and InputBox with example.

4. (a) Explain about Menu creation in VB with example project.

   (b) Write about Scroll bars and Frames in VB with examples.

5. (a) Discuss about the steps involved between VB project Creation and Execution.

   (b) Explain about IF and Select Control Structures with examples.

6. (a) Write a VB program for converting Fahrenheit to Celsius. Design the form for accepting Fahrenheit and displaying Celsius.

   (b) Explain about Looping control Structures in VB.

7. (a) Write about function procedures and sub procedures in VB.

   (b) Explain about Recursive functions and Multiple forms in VB.

8. (a) Explain about Arrays and Loops in VB.

   (b) Discuss about :

   (i) Event Handling. (4)

   (ii) Graphics. (4)

   (iii) MDI forms. (2)

DISTANCE EDUCATION

B.Sc. (I.T.)/B.Sc. (Inf. Tech.) (lateral) DEGREE EXAMINATION, DECEMBER 2013.

PRINCIPLES OF INFORMATION TECHNOLOGY

(2007 onwards)

Time : Three hours Maximum : 100 marks

Answer any FIVE questions.

All questions carry equal marks.

(5 × 20 = 100)

1. (a) Discuss in detail about Revolution in Computers and Communications.

   (b) Write a detailed note on developments in Computer and Communication Technology.

2. (a) Explain the different types of Software.

   (b) Discuss about Integrated Software suites and Groupware.

3. (a) Write a detailed note on Video/Voice Communication.

   (b) Discuss in detail about Shared Resources.

4. (a) How computer is used to communicate? Explain in detail.

   (b) Write about Communication Channels.

5. (a) Write about Cyperethics.

   (b) Explain about Fundamentals of Storage.

6. (a) Discuss about organizing Data in Secondary storage.

   (b) Explain about File Management.

7. (a) Write about the phases of System Analysis and Design.

   (b) Discuss about the Steps involved in Programming.

8. (a) Explain the Generations of Programming languages.

   (b) Discuss about various Internet Programming languages.

MOBILE COMPUTING

(2007 Onwards)

Time : Three hours Maximum : 100 marks

Answer any FIVE questions.

All questions carry equal marks.

($5 \times 20 = 100$)

1. (a) Explain wireless network architecture.

   (b) Explain Win CE operating system.

2. (a) Elucidate the IPV6.

   (b) Discuss about GPRS services.

3. (a) Explain wireless application protocol.

   (b) Write about XML features.

4. (a) Explain enterprise WAP strategy.

   (b) How do you navigate between cards and decks using WML with examples?

5. (a) Briefly explain WML script with examples.

   (b) Explain the events in WML script.

6. (a) Discuss about GSM architecture.

   (b) Explain Symbian operating system.

7. (a) Explain the cellular digital packet data.

   (b) Discuss about WLL.

8. (a) Explain WAP client software.

   (b) How do you display image using WML? Explain.

DE–6932 **35**

DISTANCE EDUCATION

RDBMS

(2007 onwards)

Time : Three hours Maximum : 100 marks

Answer any FIVE questions.

All questions carry equal marks.

($5 \times 20 = 100$)

1. (a) Explain logical data base design. (10)

   (b) Discuss about the various types of user interface. (10)

2. (a) Discuss about the concept of a relational model. (10)

   (b) With example explain data control facilities. (10)

3. (a) Explain types of database. (10)

   (b) Explain the architecture of Oracle with neat diagram. (10)

4. (a) Explain data access SQL commands with example. (10)

   (b) What is meant by Union? With example explain how to join multiple tables. (10)

5. (a) Explain how to modify, rename and drop tables using SQL. (10)

(b) Explain how create and eliminate index with examples. (10)

6. (a) Explain the various advantages of DBMS. (10)

(b) Explain data manipulation facilities in relational model. (10)

7. (a) Explain various types of DML commands. (10)

(b) With examples explain how you can work with NULL values.

8. (a) Explain the following with example

(i) Creat Table. (4)

(ii) Insert Table. (4)

(iii) Copy Table. (2)

(b) Explain in detail about query languages. (10)

DE–7626 **16**

DISTANCE EDUCATION

B.Sc. (IT) DEGREE EXAMINATION, DECEMBER 2013.

COMPUTER LAB I (C AND DATA STRUCTURES LAB)

(2007 Onwards)

Time : Three hours Maximum : 100 marks

ONE question should be given to each candidate by LOT system.

Each subdivision carries 50 marks.

1. (a) Write a C program to convert the given number into words for numbers 1 to 10.

   (b) Write a C program to evaluate the given mathematical expression using stack.

---------- Cut here ----------

2. (a) Write a C program to input a temperature in Fahrenheit and find the corresponding temperature in Celsius.

   (b) Write a C program to implement insert and delete operations an linked list.

---------- Cut here ----------

3. (a) Write a C program to find the maximum and minimum in a given set of numbers.

   (b) Write a C program to implement insert and delete operations on queue using array concept.

4. (a) Write a C program to arrange the given set of data in ascending order.

(b) Write a C program for linked list implementation of queue operations.

---------- Cut here ----------

5. (a) Write a C program to concatenate two given strings and find the length of the concatenated string.

(b) Write a C program to implement push and pop operations on stack.

---------- Cut here ----------

6. (a) Write a C program to find the factorial of a given number using function.

(b) Write a menu driven program in C to find an element using linear and binary search procedure.

---------- Cut here ----------

7. (a) Write a C program that receives the data such as age and name of person to check the eligibility for voting. Take the condition that if a person is more than 18 years old, he is eligible to vote, else display the number of year he has to wait for voting.

(b) Write a C program to sort the given set of elements using insertion sort.

8. (a) Write a C program to sort the given set of elements using selection sort.

(b) There are 20 students in a class. Their names and marks in five different subjects are given. If a student takes more than 40 marks in each subject, then he is declared "PASS", otherwise "FAIL". Write a C program to do the above.

DE–7627 **26**

DISTANCE EDUCATION

B.Sc. (IT)/B.Sc. (IT) (Lateral) DEGREE EXAMINATION, DECEMBER 2013.

COMPUTER LAB II — (JAVA PROGRAMMING LAB)

(2007 onwards)

Time : Three hours Maximum : 100 marks

One question should be selected by the Examiner and given to each candidate by LOT.

Answer both subdivisions (a) and (b).

1. (a) Write a Java program to illustrate the overriding.

   (b) Write a Java program to create and manipulate

      (i) canvas

      (ii) scroll bars

      (iii) frames.

---------- Cut here ----------

2. (a) Write a Java program to find the product of two matrices.

   (b) Write a Java program to copy the contents of one file to another.

3. (a) Write a Java program to sort the given list of names in alphabetical order.

(b) Write a Java program that displays the number of characters, lines and words in a text file.

---------- Cut here ----------

4. (a) Write a Java program to illustrate the single inheritance.

(b) Write a Java program to handle the mouse events and keyboard events.

---------- Cut here ----------

5. (a) Write a Java program to create multiple threads in Java.

(b) Write a Java program that read a file name from the user and display the contents of file.

---------- Cut here ----------

6. (a) Write a Java program to implement produces/consumer problem using synchronization.

(b) Write a Java program to draw the various polygons using applet.

7. (a) Write a Java program to illustrate the hierarchical inheritance.

(b) Write a Java program to handle mouse events and keyboard events.

---------- Cut here ----------

8. (a) Write a Java program to illustrate the layout managers.

(b) Write a Java program to read and write the data in a student data file using random access.

DE–7628 **27**

DISTANCE EDUCATION

B.Sc. (IT)/B.Sc. (IT) (Lateral) DEGREE EXAMINATION, DECEMBER 2013.

COMPUTER LAB — III (APPLICATION PROGRAM LAB)

(2007 onwards)

Time : Three hours Maximum : 100 marks

Answer ONE question from each Unit, chosen by Examiner and given to the candidates by Lot system.

MS-Word	:	25 marks
Excel	:	35 marks
Access	:	40 marks
Total	:	100 marks

UNIT I
(MS-WORD)

1. Prepare an invitation for a function to be conducted in your university. Use different text orientation and pictures to make it attractive.

---------- Cut here ----------

2. Type lecture notes and provide audio explanation with the help of sound files.

---------- Cut here ----------

3. Create a table of student data that contains REGNO, NAME, ENGLISH, TAMIL and MATHS marks. Add a new column named TOTAL and find the row total for each student. Add two rows named TOTAL and AVERAGE. Find the total and average values for each subject mark. Convert the table to text.

4. Prepare the first page of your practical record note book with picture insertion and alignment.

---------- Cut here ----------

UNIT II
(MS-EXCEL)

5. Create the following worksheet in EXCEL for electricity bill.

Consumer No.	NAME	TYPE	PR	CR	UNITS	AMT
101	YES	D	500	625	....	....

(a) Add data for 10 customers with type 'D' for domestic user and type 'I' for industrial user.

(b) Find UNITS column for each customer and calculate bill using slab (Assume your own slab rate).

(c) All the consumers should be charged a minimum bill of Rs. 50.

---------- Cut here ----------

6. Create a worksheet with the following columns :

Salesman number, name, city, product name, sale amount.

Add three records for five different salesmen who have carried out sales of different products in different cities. Find the following :

(a) City wise total sales.

(b) Salesman wise total sales.

(c) Product wise total sales.

(d) Grand total sales.

7. The following were the observations made in certain experiments for the values of y and the given values of x.

x :	1	2	3	4	5	6	7	8	9	10
y :	10	30	45	25	15	28	40	32	15	35

Compute the following :

(a) Find mean, median and standard deviation.

(b) Correlation coefficient between x and y.

(c) Draw the bar chart.

---------- Cut here ----------

8. Create a data table to create a ready reckoner table for a commercial bank that contains simple interest for Rs. 1,000 with varying period and interest rates. Create the table as shown below :

READY RECKONER TABLE FOR INTEREST CALCULATION PER 1000

	INTEREST RATE						
PERIOD	5%	6%	7%	...	...	...	14%
1							
2							
3							
..							
..							
..							
..							
10							

UNIT III
(MS-ACCESS)

9. Create employee table with the fields empno, name, age, sex, street, city, pin and salary.
   (a) Add 20 records.
   (b) Write a query to display all the male employees whose salary is between 10000 and 50000 and living in city Coimbatore.
   (c) Show all the records in the table for the city Chennai by filtering.

---------- Cut here ----------

10. Create STUDENT table with the fields Regno, name, mark1, mark2 and mark 3.

    Create ADDRESS table with the fields Regno, street, city and pin.
   (a) Write a query to display Regno, name and total of all the three subject marks.
   (b) Write a query to display Regno, name, street, city, pin and total of all three subject marks.

---------- Cut here ----------

11. Create inventory table with fields Itemno, name quantity on hand and reorder level.
   (a) Create a form in custom format.
   (b) Create a query REORDER to show all the items.
   (c) Create a macro that executes REORDER query automatically.

---------- Cut here ----------

12. Create two tables SALES1, SALES2 and join them to produce a third table SALES3.

DE–7629 **36**

DISTANCE EDUCATION

B.Sc. (IT)/B.Sc. (IT) Lateral DEGREE EXAMINATION, DECEMBER 2013.

COMPUTER LAB IV (VISUAL BASIC AND ORACLE LAB)

(2007 onwards)

Time : Three hours Maximum : 100 marks

1. Examiner has to select TWO questions, One from Visual Basic and another from Oracle.
2. Each question carries 50 marks.
3. Questions are to be given to the candidates by lot system.
4. Write an algorithm or flowchart if necessary.

VISUAL BASIC

1. Write a VB program to calculate simple interest or compound interest using three command buttons namely input, calculate and display.

---------- Cut here ----------

2. Write and test a VB program to select candidates for four posts, based on their qualifications :

Male and PG degree	: Manager
Male, Graduate and Typing	: Clerk
Female and PG degree	: Secretary
Female, Graduate and Typing	: Steno

3. Write a VB program to convert the temperature from C to F and F to C at user's choice using label, text and enter key.

---------- Cut here ----------

4. Write a test a VB program to compute and print either the sum or the PRODUCT of first N natural numbers. Use option button.

---------- Cut here ----------

5. Write and test a VB program to print twenty address labels in a two-column format for the address :

The Head,

Department of Computer Science,

Alagappa University,

Karaikudi – 630003.

---------- Cut here ----------

ORACLE

6. Create table mark with the following fields.

Reg. No., Name, Marks for four subjects (Tamil, English, Maths, Biology)

(a) Add 5 records.

(b) Show data in fields Name and Reg. No. alone on the screen.

(c) Show data in fields Reg. No., Biology and Maths alone on the screen.

(d) Show all fields on the screen.

7. Create table RESULT with the following fields :

   Reg. No., Name, Mark 1, Mark 2, Mark 3, Total, Result

   (a) Add 10 records (fill all fields except total and result fields)

   (b) Fill total field with the sum of three marks.

   (c) Fill the result field with pass if total > = 150 otherwise fail.

---------- Cut here ----------

8. Create table BIODATA with the following fields :

   Name, Age, Sex, Degree, City

   (a) Add 5 records.

   (b) Display all male records.

   (c) Delete all B.Sc. degree holders and then display.

   (d) Display all records having age < 18 and city = Chennai.

---------- Cut here ----------

9. Create table SALES with the following fields :

   Sale no., Sale name, Sale amount, Commission, Sale date.

   (a) Add 5 records.

   (b) Compute commission :

   if sale amount < 1000 then no commission

   if sale amount ≥ 1000 but ≤ 5000 commission is 5% of sale amount

   if sale amount > 5000 then commission is 10% of sale amount.
