M.B.A. (G) DEGREE EXAMINATION, APRIL 2015

Second Semester

FINANCIAL MANAGEMENT

(Common for M.B.A. (G)/M.B.A. (CS)/M.B.A. (B & I) and Logistic Management)

(CBCS – 2012 onwards)

Time : 3 Hours Maximum : 75 Marks

Part A (5 × 3 = 15)

Answer **all** questions.

All questions carry equal marks.

1. What is meant by risk-return trade off?

2. Distinguish between gross working capital and net working capital.

3. What is meant by financial leverage?

4. What is capital rationing?

5. What is meant by ploughing back of profits?

Part B (5 × 10 = 50)

Answer **all** questions, choosing either (a) or (b).

All questions carry equal marks.

6. (a) Distinguish between the maximization and optimization goals of financial management.

Or

(b) Explain the concepts of discounting and compounding with suitable examples.

7. (a) Discuss the role of merchant bankers in capital issue process.

Or

(b) State and explain the sources of working capital finance.

8. (a) A Ltd sells goods at ₹ 10 per unit, its variable costs are ₹ 7 per unit and fixed costs amount to ₹ 1,70,000. It finances all its assets by equity funds. It pays 40% tax on its incomes. Z Ltd is identical to A Ltd except in the pattern of financing. Z Ltd finances its assets 50% by equity and 50% by debt, the interest on which amounts to ₹ 20,000.

Determine the degree of operating, financial and combined leverages when sales are ₹ 7,00,000 for both the firms and interpret the results.

Or

(b) From the following particulars relating to the capital structure of Blue Ltd.. Calculate the overall cost of capital, using

(i) Book value weights and

(ii) Market value weights.

Sources of funds	Book value (₹)	Market value
Equity share capital	45,000	90,000
Retained earnings	15,000	–
Preference share capital	10,000	10,000
Debentures	30,000	30,000

The after tax cost of different sources of finance is :

Equity share capital 14%; Retained earnings 13%

Preference share capital 10%; Debentures 8%.

9. (a) Initial investment ₹ 60,000

Life of the assets 4 years

Estimated net annual cash flows :

I year	₹ 15,000
II year	₹ 20,000
III year	₹ 30,000
IV year	₹ 20,000

Calculate Internal Rate of Return.

Or

(b) A machine costing ₹ 11,00,000 has a life of 10 years at the end of which its scrap value is likely to be ₹ 1,00,000. The firm's cut off rate is 12%. The machine is expected to yield an annual profit after tax of ₹ 1,00,000. Depreciation is charged on straight line basis for tax purposes. Calculate Net Present Value.

10. (a) The cost of capital and the rate of return on investment of King's Ltd are 10% and 15% respectively. The company has one million equity shares of ₹ 10 each outstanding and earnings per share is ₹ 5. Calculate the value of the firm in the following situations. Use Walter's model and comment on the results.

(i) 100% retention

(ii) 50% retention

(iii) No retention.

Or

(b) The following information relates to Rose Ltd. Earnings per share ₹ 10; Cost of capital is 10%; and rate of return is 15%.

Determine the market price per share under the Gordon's model, if retention is

(i) 60%

(ii) 40% and

(iii) 10%.

Part C (1 × 10 = 10)

Compulsory.

11. Victory Limited desires to invest ₹ 10,00,000 in a new project. It proposes to finance the project by issuing 60,000 equity shares of ₹ 10 each at par and required number of 15% debentures of face value ₹ 1,000 each at par. The company has to pay income tax at the rate of 40%. Investors of companies with a similar risk profile expect a return of 14% on their equity investment.

The project has a life of 5 years. It will require an additional working capital of ₹ 50,000. It is not expected to have any scrap value after its life. The after tax cash inflows for the five years are

Year	Cash inflow (₹)
6	4,00,000
7	3,00,000
8	3,00,000
9	2,00,000
10	2,00,000

Should the company invest in the project?

Substantiate your answer with necessary calculations. The company uses NPV method to evaluate its investments projects.

M.B.A. (G) (Logistics Management) DEGREE EXAMINATION, APRIL 2015

Second Semester

BUSINESS LAW

(Common for M.B.A. (G)/CS/IB/B & I and E.Com)

(CBCS – 2012 onwards)

Time : 3 Hours Maximum : 75 Marks

Part A (5 × 3 = 15)

Answer **all** questions.

All questions carry equal marks.

1. State the salient features of Quasi Contract.
2. Write the rights and duties of Agent.
3. What are the procedures for the redressal of the complaints?
4. State about the Carriers Act 1865.
5. Explain characteristics of the Companies Act 1956.

Part B (5 × 10 = 50)

Answer **all** questions.

All questions carry equal marks.

6. (a) "All agreements are not contracts but all contracts are agreements". Discuss the statement explaining the essentials of a valid contract.

Or

(b) Explain the various modes of discharge of a contract.

7. (a) What is contract of indemnity?

Or

(b) Explain the procedure for creation of agency and termination of agency.

8. (a) Define a Condition and Warranty and explain implied conditions and warranties in a Contract of sale.

Or

(b) Discuss the characteristics of the Consumer Protection Act, 1986.

9. (a) "Promotion is the first stage in the formation of a Company"-Explain the several stages involved in the formation of a Company.

Or

(b) Discuss the Laws on Carriage of Goods and its advantages.

10. (a) Define a company under Companies Act 1956. Explain its characteristics.

Or

(b) Explain the characteristics of a Private Limited Company. Explain the procedure for incorporation of a private limited company.

Part C (1 × 10 = 10)

Answer **all** questions.

11. Read the following case study and answer the questions:

A Joint Stock Company may be defined as an association of persons united for some specific business under a certificate of Incorporation granted by Government and

having a permanent paid-up or nominal capital of a fixed amount divided into shares or stock, and having for its members, holders of such shares or stock. The first thing in the formation of a public Joint-Stock Company's the preparation of Memorandum of Association. It is a document which sets out the constitution of the company and, as such is really the foundation on which the superstructure of the company stands. The Articles of the Association contain the rules and regulations regarding the internal working of the company. They lay down the rules as to the powers of the directors. The prospectus describes the prospects of the company and the advantages to be gained by becoming its shareholders. The prospects in addition to the contents of the Memorandum of Association contain other information regarding the prospects of the company. Directors are necessary for the management of companies as shareholders, sometimes numbering several thousands have not, as a matter of course, the right to take part in its day-to- day management.

(a) What are the features of a Joint Stock Company?

(b) What is the importance of Memorandum of Association?

(c) Distinguish between Memorandum of Association and Articles of Association.

M.B.A. (G) DEGREE EXAMINATION, APRIL 2015

Second Semester

MARKETING MANAGEMENT

(Common for M.B.A. (CS)/M.B.A. (G) and Logistic Management)

(CBCS – 2012 onwards)

Time : 3 Hours Maximum : 75 Marks

Part A $(5 \times 3 = 15)$

Answer **all** the questions.

All questions carry equal marks.

1. Explain: Sales Forecasting.
2. Explain: Product Life Cycle.
3. Define: Marketing.
4. "Customer is the King" - Comment.
5. Explain: Positioning.

Part B $(5 \times 10 = 50)$

Answer **all** the questions, choosing either (a) or (b).

All questions carry equal marks.

6. (a) What are the elements which form the marketing environment of an organization?

Or

(b) Discuss about the marketing strategies of Leaders, Challengers, Followers and Nichers.

7. (a) Discuss the process of Marketing Research.

Or

(b) What are the stages involved in the buying process of an industrial product.

8. (a) Explain the challenges involved in Product Management.

Or

(b) Why do new products fail? How can an organization avoid new product failure?

9. (a) Explain briefly about the various pricing objectives and suitable pricing strategies.

Or

(b) Account for the growth of online and E marketing.

10. (a) List the functions of Personal Selling.

Or

(b) Give a brief account on the emerging trends and challenges in marketing.

Part C $(1 \times 10 = 10)$

Compulsory

11. Read the following case and answer the questions

The resounding success of Tata Ace, a mini-truck with an engine capacity of less than one ton launched by Tata Motors in 2005, was due to a deep understanding of the market needs and customer requirements. The company realized that with the booming Indian economy there would be a demand for large multi-axle trucks which could transport materials more efficiently. At the same time, this would also necessitate a demand for

smaller vehicles on feeder routes for the hub-and-spoke type of arrangement. This would require smaller vehicles, which are capable of navigating through the narrow roads and by-lanes of cities, small towns, and villages, to service the feeder routes. At that time, the market for transporting small loads over short distances had been cornered by the three-wheeler majors like Bajaj and Piaggio. In order to compete effectively with the three-wheeler majors who dominated the market for small payload vehicles, the company needed to offer a better solution to the customers. The solution was in the market, and that is where the engineers went-to talk to the transporters, the small traders, and the farmers-to understand their needs and requirements.

Discussions with potential customers and a detailed market research indicated that there was indeed a need for a vehicle for transporting sub one ton loads over small distances. Customers wanted a last mile distribution vehicle that had low maintenance costs, higher driver safety, and better driving comfort. What came out more strongly was the social status that small traders, transporters and farmers associated with a four-wheeler "truck." Accordingly, it was decided that the vehicle should be positioned as a Tata truck in mini size with a competitive price tag while maintaining high quality standards. Pricing was a crucial issue as the vehicle had to be priced in comparison to the three- wheelers, and therefore the cost had to be reduced. This was achieved through a combination of using and modifying parts already developed for other vehicles in the Tata stable, and outsourcing, which constituted as much as 82 percent of the product.

As the commercial-vehicle owners were concerned with the turnaround time of the vehicle for the next trip and the loading capacity, Tata Ace was designed to achieve top speeds of about 8-14 kph higher than that of the other three-wheelers, and also a cargo bed bigger than the existing three-wheelers. Thus, Tata Ace was fitted with

a 700cc engine capable of delivering 16bhp, suitable for both rural and urban use, with the ability of carrying a variety of payloads, and with the agility to navigate narrow by-lanes owing to its lower turning radius. The sporty car-like features were modelled to ensure comfort in ride and handling while differentiating the vehicle from the three-wheelers. The sleek appearance as well as the positioning as a truck in mini size reinforced the social prestige aspect.

The vehicle was advertised using the symbol of a baby elephant with the tag line "small is big". It was launched with a 15 to 20 percent higher price tag than that of a comparable model of three-wheeler. As the vehicle operated only within a limited radius, the service points had to be closer to the vehicles' operating routes. For this purpose, the company augmented the service network by training automobile garages that were branded as Tata-certified service points.

Within 22 months of the launch of the vehicle, the company rolled out the 1,00,000th Ace, surpassing its own optimistic estimates by a huge margin. Besides the Indian market, Tata Ace was also launched in the international markets of Sri Lanka and Nepal.

(a) Identify two activities done by Tata Motors while applying the marketing concept for developing Ace.

(b) What are the different types of benefits or gratifications that consumers can draw from a product or a service? Discuss with respect to the case.

RW–10095

641204/643203/ 622204/652204

M.B.A. (G) DEGREE EXAMINATION, APRIL 2015

Second Semester

Logistic Management

HUMAN RESOURCE MANAGEMENT

(Common for M.B.A. (CS)/M.B.A., IB & E-Com.,/ M.B.A. (G) and Logistic Management)

(CBCS 2012 onwards)

Time : 3 Hours Maximum : 75 Marks

Part A (5 × 3 = 15)

Answer **all** questions.

All questions carry equal marks.

1. What is Human Resource Management? Write its objectives.

2. What do you understand by Human Resource Planning? What is its importance?

3. What are the essentials of selection procedure?

4. Distinguish between minimum wage, fair wage and a living wage.

5. How to prevent accidents in industry? Explain.

Part B (5 × 10 = 50)

Answer **all** questions choosing either (a) or (b).

All questions carry equal marks.

6. (a) Why is it important for companies today to make their human resources into a competitive advantage? Explain how HR can contribute to doing this.

Or

(b) Discuss the role and structure of Human Resource function in organisations.

7. (a) What are the factors affecting Human Resource Planning? List and discuss various barriers which render planning ineffective.

Or

(b) What is recruitment? What are the techniques of recruitment? Discuss the factors affecting the recruitment.

8. (a) Explain different methods of training the employees. Suggest a suitable training method for salesman of a heavy machine manufacturing organisation.

Or

(b) What is promotion? What are its purpose? How do you compare merit as a basis of promotion with that of seniority?

9. (a) "The payment of bonus act, 1965 is enacted to reduce conflicts on account of bonus. But the reverse has happened". Discuss.

Or

(b) Discuss the job evaluation systems.

10. (a) What are the different types of trade unions? Explain the four important types of union structure.

Or

(b) Discuss about welfare and safety provisions of employees in organisation.

Part C (1 × 10 = 10)

11. Read the following case and answer the given questions :

Low salary for nationals and high salary for expatriates for the same

Air nuigini-national carrier of papua new guinea used to pay more than double the salary to expatriate pilots compared to that of national pilots. In fact national pilots are in no way inferior to expatriate pilots in skills and in performance in safety, regularity and punctuality. The salary discrimination was necessitated to attract foreign pilots due to shortage of national pilots. This practice was along with polices and practices of compensation management in other public and private organizations in papua new guinea.

These practices resulted in the dissatisfaction among national pilots that prompted them to look for opportunities in other countries. The fast growth of airlines industry in various countries led to shortage of pilots resulting in higher salaries for pilots across the countries. Majority of the pilots of papua new guinea (PNG) who are dissatisfied with the salaries in air nuigini based on skill levels and performance records procured jobs in various airline companies particularly in the middle-east with triple the salary level of their previous jobs in air nuigini. In fact, one of the former national pilot of papua new guinea got the job of the deputy CEO of one of the middle-east airline company.

The migration of PNG pilots reached the peak level in April 2008 and ultimately air nuigini did not have required number of pilots to operate their flights and air nuigini had to cancel some of its domestic flights and delay the operation of international flights, resulting in halting the wings of air nuigini flights.

Consequently, air nuigini modified its compensation policy and offered equally salary levels to its national pilots along with that of expatriate pilots to combat the situation. However, it could not attract those pilots who left the company, but could halt the further migration of pilots to other companies.

Questions :

(a) Do you think the compensation discrimination based on the nationality is desirable?

(b) Why did the management of air nuigini failed to foresee the situation?

(c) Suggest the strategies to prevent such situation in future and in other organizations in various countries that differentiate the salaries of expatriates from that of nationals consequent upon shortage of human resources of certain categories.

M.B.A. DEGREE EXAMINATION, APRIL 2015

Second Semester

General/Logistics Management

PRODUCTION AND OPERATIONS MANAGEMENT

(common for M.B.A. (G) & Logistic Mgt.)

(CBCS – 2012 onwards)

Time : 3 Hours Maximum : 75 Marks

Part A (5 × 3 = 15)

Answer **all** questions.

All questions carry equal marks.

1. What are the functions of production and operations management?
2. Describe any two capacity expansion strategy.
3. What is method study?
4. Describe cellular layout.
5. What are the types of inventory?

Part B (5 × 10 = 50)

Answer **all** questions by choosing either (a) or (b).

All questions carry equal marks.

6. (a) Analyse the level of coordination required between operations management and other business functions in order to achieve organizational objective/competitive advantage.

Or

(b) Evaluate how standardization and modularization improve overall efficiency of operations management.

7. (a) Assume that you are going to open a retail supermarket in your community select three sites. Perform a location factor analysis for each and select the best site.

Or

(b) Discuss the determinants of capacity for manufacturing and services appropriate example.

8. (a) Explain the contribution of work-study, time-study and method-study to the moving assembly line or modern production system.

Or

(b) Explain the process planning procedure and also state the need for considering capacity expansion plan for process planning procedure.

9. (a) Draw a layout diagram of a facility familiar to you and evaluate the merits and demerits of the layout. Also provide suggestions to improve the facility.

Or

(b) Discuss the advantages and limitations of ALDEP.

10. (a) Discuss the MRP – 1 and its limitations.

Or

(b) How ABC analysis is used manage inventory?

Part C (1 × 10 = 10)

Compulsory.

11. Kyle Peschken has been a manager for the discount store, Zelmart for the past two years. It's time for his annual performance review and Kyle would like to make a big impression on the corporate staff. Walking through the store, he makes a mental note of which departments need to be straightened. which ones need to he reorganized. and which employees he'd like to schedule during the week of his review. And then he sees it-blocking the aisles. creating commotion, and looking very unprofessional-the long line in the electronics department. It's time to confront Chris, the sales clerk. "Chris what's the holdup here?" "I 'm waiting for a manager to approve this $ 120 check. And then I have to show this lady a digital camera from the display cabinet. She's been waiting half an hour. and then…. Alright Chris ... I can help out for a little while …."Two hours later, Kyle exited the electronics department disheartened. That's no way for a store manager to spend his afternoon. There's got to be a logical way to solve this, thought Kyle. He walked hack to his office and wrote down the facts as he knew them.

- Customer service managers (CSMs) must approve all checks over $100 and over 50% of purchases in electronics exceed $100.
- It's more efficient to stage CSMs at the front of the store by the 12 checkout lines.
- It takes an average of 10 minutes for the CSM to reach electronics after being paged.
- Because of cost controls, the number of CSMs is limited to two per shift and there is no room in the budget for additional hires of any type.

- Electronics must be purchased in the electronics department (to prevent theft).
- Store policy allows customers to check out other items at the electronics counter they are making purchases in that department. (This makes sense especially if the customer wants to write a check for the entire purchase.)
- Store clerks must monitor the locked cabinets and stay with a customer w ho wants to view an item from the cabinet.
- Because of the site of the enclosed department, only two checkout counters will fit in electronics.
- Moving the electronics department to the front of the store would not he wise because shoppers tend to pick up impulse items on their way to the center of the store where electronics are located.
- The average time a customer spends in electronics during peak periods is an unacceptable 40 minutes.

Help Kyle come up with a solution to his inefficient department. Draw a flowchart of the current process from the customers point of view and try to identify areas or improvement. If small improvements will not fix the problem, try a more innovative approach.

RW–10092

622201/652201/641201/ 643201/632201

M.B.A. (G) DEGREE EXAMINATION, APRIL 2015

Second Semester

BUSINESS RESEARCH METHODOLOGY

(Common for M.B.A. (CS)/M.B.A. IB & E-COM./ M.B.A. (G)/M.B.A. (Logistic Mgt./M.B.A. (B & I))

(CBCS 2012 onwards)

Time : 3 Hours Maximum : 75 Marks

Part A ($5 \times 3 = 15$)

Answer **all** questions.

1. What are the objectives of business research?
2. What is causal research?
3. Define a sampling plan.
4. Write the assumptions in parametric testing.
5. Define a synopsis.

Part B ($5 \times 10 = 50$)

Answer **all** either (a) or (b) in the given questions.

6. (a) Explain the different types of research in detail.

Or

(b) Explain the process of research in detail.

7. (a) List out different data collection techniques. Explain.

Or

(b) Explain the different scaling techniques with examples.

8. (a) What are the different types of sampling? Explain them in detail.

Or

(b) Explain the components and use of research design in any social science research.

9. (a) What are the different stages in processing of data? Explain its relevance in research.

Or

(b) Explain the meaning of analysis of variance. Describe the technique of analysis of one way and two way classification.

10. (a) Explain the different types of research reports.

Or

(b) Describe the layout and features of research report.

Part C (10)

11. Catalogues listing text books were examined to discover the relationship between the cost of book and number of pages it contains. The perusal gives the following data for ten books :

Pages :	700	540	210	625	380	910
Price (Rs) :	12	11	5	10	7	15
Pages :	420	610	750	400		
Price (Rs) :	8	9	12	9		

(a) Obtain the line of regression for estimating the price of book.

(b) What is your estimate for the price of a book containing 500 pages?

BUSINESS ETHICS AND CORPORATE GOVERNANCE

(Common for G/LM)

(CBCS – 2012 onwards)

Time : 3 Hours Maximum : 75 Marks

Part A (5 × 3 = 15)

Answer **all** questions.

All questions carry equal marks.

1. What are the objectives of ethics?

2. Mention few unethical practices in advertising.

3. Distinguish between corporate governance and corporate management.

4. What do you mean by economic and non-economic objectives of corporations?

5. Distinguish between CSR and Philanthropy(charity)

Part B (5 × 10 = 50)

Answer **all** questions, choosing either (a) or (b).

All questions carry equal marks.

6. (a) Briefly discuss Kohlher's moral development process.

Or

(b) Define Business Ethics. Explain the concept and values of business ethics.

7. (a) What are the issues in Business ethics with respect to Consumer Protection?

Or

(b) What are the primary rights of shareholders? Explain their duties and responsibility.

8. (a) Briefly discuss the elements of good corporate governance.

Or

(b) Briefly mention the principal responsibilities of the Board.

9. (a) What shall be the contents of code of conduct and code of ethics of an organization, according to you?

Or

(b) Compare and contrast the corporate governance practices adopted in a domestic and multinational corporations with an example.

10. (a) What are "Best Boards"? What parameters were set for the evaluation of the "best boards"?

Or

(b) Describe the principles and objectives of any two forums which bestow award for excellence in corporate governance.

Part C $(1 \times 10 = 10)$

(Compulsory)

11. Read the following case and answer the questions.

Trade in human Organs

An entrepreneur in a certain country conceives of a business that is designed to avoid waste and is committed to recycling. One of the first actions is to contact an undertaker with a view to purchasing spectacles from the deceased with a view to setting up a shop that sells such recycled goods. The undertaker saw no problem with that idea and entered into an arrangement to sell the goods, they being of no further use to the former owner.

That was such a successful venture that the entrepreneur extended the idea and suggested to the undertaker that artificial dentures would be a good next venture. With some misgivings the undertaker agreed, but with the proviso that they were properly sterilised first. Among the reservations by the undertaker here was the notion of who is the owner? Should the relatives be consulted? How were the proceeds to be divided? Having solved that problem satisfactorily, the entrepreneur found business so good that he wished to extend it further.

The next stage was seen as a rather personal form of recycling, that of body organs. Where a corpse had an undamaged and potentially useful organ, that too might be harvested. Here the problems become more complicated. The recycling of organs needs much more technical knowledge than is available to the average undertaker. Among the technical problems are those of tissue typing, of preservation and prompt use, of the setting up of a register and of financial compensation and to whom. Add to this is the problem of whose permission is needed.

If this venture is successfully exploited with a proper setup is then the demand could well increase. Suppose that the entrepreneur is so successful that he wanted to extend the supply and, ideally, have fresh organs from young healthy cadavers. Being a lateral thinker he contacted prison authorities who might have a supply of those executed. At least, he argued, they were not put to death in vain. If the prison authorities agreed and appropriate rules were framed, then the pressure might be on the system to ensure a steady supply and thus affect the rate at which prisoners were condemned to death.

One of the interesting ideas that the entrepreneur had was a prisoner who was not condemned to death might agree to the removal of a non-vital removal (say. one kidney) in return for a commutation of sentence and thus save the state the cost of further imprisonment as well as providing the prisoner with funds to start a new life.

Suppose, instead of a prison situation there is a hospital one. In a hospital there are always those who are very ill and in need of a transplant. For organ removal one needs to be certain that the donor is really dead before removal and dead from natural causes rather than being 'helped' along the way because of an urgent need for the organ. The criteria of 'death' then becomes a crucial one. A patient might be physically surviving, put be brain dead. Could one harvest an organ from a brain dead patient, which would involve ignoring other vital signs?

In this case one can see the escalation of a comparatively small moral issue into one which has very wide ramifications. This engaging case has some further aspects: one is the moral position of starting with simple items from the dead and escalates into a problem involving some very complex issues. Put in interrogative form here are some of the issues and questions for solution.

(a) Is the selling of spectacles from cadavers morally correct, provided permission is given?

(b) Does that same point apply to full dentures?

RW–10118 **641444**

M.B.A. (G) DEGREE EXAMINATION, APRIL 2015

Fourth Semester

Elective Paper — LABOUR LEGISLATIONS

(CBCS – 2012 onwards)

Time : 3 Hours Maximum : 75 Marks

Part A (5 × 3 = 15)

Answer **all** questions.

1. What are the procedures for appointment of inspectors under the Factories Act, 1948?

2. What is the object of the Minimum Wages Act, 1948?

3. Define the "Employment injury" terms as used in the Employees' State Insurance Act, 1948.

4. Write a note on the amalgamation of trade unions.

5. What do you understand by the term "remuneration" as used in the Equal Remuneration Act, 1976?

Part B (5 × 10 = 50)

Answer **all** questions, choosing either (a) or (b).

6. (a) What are the provisions of the factories Act, 1948 with regard to appointment of Welfare Officers? What are their qualifications and duties?

Or

(b) Define the following terms as used in the Workmen's compensation Act, 1923 :

(i) Partial disablement,

(ii) Total disablement,

(iii) Wages,

(iv) Workman,

(v) Dependent.

7. (a) Elucidate briefly the procedure for fixing minimum wages. What is the composition of such minimum rate wages?

Or

(b) State how the inspectors are appointed for the purposes of the Minimum wages Act, 1948. What are their powers?

8. (a) How does the Employees' State Insurance Act, 1948 provide for the adjudication of disputes and claims?

Or

(b) Describe the power of exemption from the operation of provisions of any scheme under the Employees' Provident Funds and Miscellaneous Provisions Act, 1952.

9. (a) What are the various methods for the settlement of industrial disputes under the Industrial Disputes Act, 1947?

Or

(b) Briefly explain the provisions relating to dissolution of a trade union under the Trade Unions Act, 1926.

10. (a) What are the conditions for the payment of maternity benefit under the Maternity Benefit Act, 1961? When is this benefit forfeited?

Or

(b) Explain the functions of the Advisory Committee under Equal Remuneration Act, 1976.

Part C (1 × 10 = 10)

(Compulsory)

11. Case study:

You are a senior personnel manager who was present at an abortive meeting between the management and the trade union leader.

Write a conciliatory letter inviting the trade union leader for further talks for negotiation outlining the demands conceded so far and also pin-pointing the pending demands. Also assure that the management is always prepared to approach the issues on humanitarian considerations subject only to certain constraints. However re-assure that no problem is insoluble.

M.B.A. (G) DEGREE EXAMINATION, APRIL 2015

Fourth Semester

Elective – SALES MANAGEMENT

(CBCS – 2012 onwards)

Time : 3 Hours Maximum : 75 Marks

Part A (5 × 3 = 15)

Answer **all** the questions.

All questions carry equal marks.

1. Differentiate Marketing and Selling.

2. Identify the possible objections that could be raised by a customer to buy a printer worth Rs. 6000.

3. Explain Job analysis and its outcomes with specific reference to the profile of a sales executive.

4. How can the sales force training outcomes be measured?

5. What is a sales audit? What are its benefits?

Part B (5 × 10 = 50)

Answer **all** the questions, choosing either (a) or (b).

All questions carry equal marks.

6. (a) What is more important for a sales manager operating in a global environment?

Or

(b) How would you classify the sales people? Which type of selling situation will each of them fit it?

7. (a) Explain the steps involved in selling a product such as washing machine to the hostels of a large Institution where over 500 students stay in the hostel?

Or

(b) You are the sales Executive of BCB Mutual Funds? How will you generate prospects for developing your business?

8. (a) Explain the steps involved in forming Sales Territories.

Or

(b) Explain the steps involved in selection and recruitment of sales manager.

9. (a) What are the factors to be considered in training the sales force?

Or

(b) What are the various methods of compensating the sales force?

10. (a) What are the various types of sales reports? Explain with examples.

Or

(b) Explain the techniques of performance appraisal that can be used to appraise sales personnel.

Part C (1 × 10 = 10)

Compulsory

11. Read the following situation and answer the question below.

Sales manager Prakash was interviewing several candidates for a sales position with the XYZ Company dealing with household Electrical appliances. After interviewing, testing and assessing several candidates, two clearly stood out above the rest, one male and the other female. Although the male was slightly more qualified, Prakash suspected that his male customers might enjoy interacting with female and thus be more willing to give XYZ their business.

Which candidate should Prakash choose? Explain with reasons.

M.B.A. (G) DEGREE EXAMINATION, APRIL 2015

Fourth Semester

Elective – DISTRIBUTION MANAGEMENT

(CBCS 2012 onwards)

Time : 3 Hours Maximum : 75 Marks

Part A (5 × 3 = 15)

Answer **all** questions.

All questions carry equal marks.

1. What is the role of distribution channel?

2. What is the difference between retailer and distributor?

3. Distinguish between stockist and dealer.

4. Enumerate the importance of supply chain.

5. Define vertical marketing system.

Part B (5 × 10 = 50)

Answer **all** questions choosing either (a) or (b).

All questions carry equal marks.

6. (a) Explain the factors influencing the choice of channel.

Or

(b) Discuss the effective methods of relationship marketing.

7. (a) What are the different trends in retailing and wholesaling? Elucidate with example.

Or

(b) Write a note on : Managing Dealer Network.

8. (a) What are the causes for channel conflict and suggest any one remedy to manage the same?

Or

(b) Explain the role played by each marketing channel member.

9. (a) Write a note on : Information systems and channel management.

Or

(b) What are the specific issues relating to maintenance of stocks?

10. (a) What are the advantages and disadvantages of vertical marketing system?

Or

(b) Briefly discuss the issues and challenges encountered in international distribution.

Part C (1 × 10 = 10)

(Compulsory)

11. Read the following case and answer the questions.

The President of Maxwell Corporation was considering whether the company should set up its own distribution system or to outsource the entire distribution and logistics functions to a third party service provider. The company had set up a manufacturing plant in Vizag where wide range of orthopedic equiprnents Viz.,

crutches wheel chairs, walkers back braces, heating pads, elastic bandages, canes, knee braces, shoulder braces were manufactured, Presently, the finished goods warehouse was located at Vizag itself and product were sent to all major towns in India as a point-to point dispatch. The company was supplying these equipments directly to retail stores at all these location. Marketing activity was headed by a general manager-marketing based at Vishakatpatnam who was supported by a sales team comprising of sales officers. The Company was not resorting to advertisement and publicity through the products of the company was fairly well known. It was felt that all these customers wanted quick response to their orders as the products catered to emergency patients. But, these retail outlets carried only very limited inventories. This was due to the fact that most of the products came in a variety of styles, shapes and sizes and requirement was more customers-driven. Keeping even a moderate inventory of all types was not economically viable and lead to dead stocks in long run. The company was looking at various options which included the following :

(a) Setting up of hub and spoke type of a distribution network wherein it was proposed to set up a stock point or mother warehouse in each zone viz, East, West, North and South and respective retail outlets were to be fed from the mother warehouse located in that zone.

(b) Setting up of a central warehouse anywhere in central India and feeding retail outliers from this location.

(c) Changing the distribution channel from the present numerous retail outlet systems to a more efficient system.

(d) Outsourcing the entire distribution and logistics to a third party wherein the entire activity of transportation and distribution, till the ultimate retail outlet would be taken care of by this service provider and company could focus more on activities of marketing and sales.

Questions :

(i) What in your opinion is of immediate importance for Maxwell Corporation and why?

(ii) What should be the distribution channel for Maxwell and outline the advantages for, having such a type of set up?

Part A (5 × 3 = 15)

Answer **all** questions.

1. Explain the importance of scanning the environment.

2. Explain briefly the political environment of business.

3. State the major functions of bank.

4. What are the significance of technology in modern business?

5. What is meant by incorporation? Why it is required?

Part B (5 × 10 = 50)

Answer **all** questions.

6. (a) What do you mean by business environment? What are the constituents of business environment?

Or

(b) Discuss the impact of LPG on Indian economy.

7. (a) Explain the role of government in business.

Or

(b) State the problems of SSI and suggest suitable measures to overcome them.

8. (a) Discuss the role and functions Central Bank of our country.

Or

(b) Explain the various forms and uses of foreign capital.

9. (a) Discuss the impact of socio-cultural factors on modern business world.

Or

(b) Explain the role and uses of IT in Indian business.

10. (a) State the salient features of law on consumer protection.

Or

(b) Describe the legal aspects of entering primary capital market.

Part C $(1 \times 10 = 10)$

Compulsory

11. Century Polyesters

Century Polyesters, B.K. Birla Group Company, manufacturer's polyester partially oriented yarn (POY), polyester chips and nylon tyre cord fabric (NTCF). The production of Century Polyesters takes place mainly at Pune, Mahad and Bharuch in India. In 2003-04, their

profit after tax declined by about 2% to 57 crore, from Rs. 58.09 in 2002-03. But the sales increased by 4% to Rs. 980.4 crore in 2003-04 from Rs. 946.21 crore in 2002-03. Margins were under high pressure due to volatility in raw material prices and competition from low priced imports.

Profit margins in Century Polyester operation can be improved with the reduction in excise duty and stable raw material prices. But profit margins in NTCF were affected because of increase in caprolactam prices, low priced Chinese imports and appreciation of the rupee. However, Century's special interest in nylon textile yarn could increase its market share.

To cope with the increasing competition, the company is trying its level best to increase its operational efficiencies, value addition and product mix. They are focusing on energy conservation and modernization. In 2003-04, the company undertook steps to revamp its polymerization capacity at Pune and concentrated on POY capacity expansion at Bharuch. To increase its generative capacity, the company has installed 2 diesel generating sets of 6 MW each at Pune. The NTCF capacity expansion of about 7500 tonnes per annum is on the verge of completion. Earlier, most of the NTCF demand was met by Chinese imports due to less production rate in India. Estimated investment for all these schemes is about Rs. 280 crore.

Other issues which captured much attention include the company's outstanding foreign currency loans of about 15.9 million euro, 129 million yen and US$ 2.2 million, which were due for payment during 2004-05. Appreciation of rupee against dollar had adversely affected their margins.

Questions :

(a) What were the major problems century polyesters had to overcome?

(b) Why did they go for capacity expansion of NTCF?

FINANCIAL AND MANAGEMENT ACCOUNTING

(Common for MBA (G) & Logistic Management, B & I, & IB)

(CBCS – 2012 onwards)

Time : 3 Hours Maximum : 75 Marks

Part A (5 × 3 = 15)

Answer **all** questions.

1. What are the uses of double entry system of book keeping?

2. State the differences between the trial balance and balance sheet.

3. Who are the users of financial statements?

4. Explain the rule for the preparation of schedule of changes in working capital.

5. Prepare the production budget.

Products	Stock on 1.1.2011 (units)	Stock on 31.1.2011 (units)	Sales (units)
P	1000	1200	2500
Q	1200	1400	3000
R	1400	1600	3500

Part B (5 × 10 = 50)

Answer **all** questions.

6. (a) Explain in detail the various accounting concepts.

Or

(b) Prepare the purchases book from the following :

1.1.2012 purchased goods from A for Rs. 2,000

5.1.2012 Ram sold goods to us for Rs. 1,000

10.1.2012 purchased typewriter for Rs. 1,500

15.1.2012 bought goods from Babu for Rs. 1,500

Subject to a TD @ 5%

20.1.2012 purchased goods for Rs. 500

30.1.2012 bought goods on credit for Rs. 750.

7. (a) Explain the format of a balance sheet with imaginary figures.

Or

(b) Raj started business on 1.1.2013 with a capital of Rs. 25,000. He immediately bought furniture for Rs. 6,000. During the year he borrowed Rs. 15,000 from his wife and introduced a further capital of his own amounting to Rs. 9,500. He had withdrawn Rs. 900 at the end of each month for family expenses. On 31.12.2013 his position was as follows :

Cash Rs. 600, Cash at bank Rs. 7,800, Debtors Rs. 14,400, Stock Rs. 20,400, B/R Rs. 4,800, creditors Rs. 1,500, Rent due Rs. 450.

Furniture to be depreciated by 10%. Find out the profit on loss made by Raj during 2013.

8. (a) Define ratio. What are the pros and cons of ratio analysis?

Or

(b) From the following revenue statement, calculate any five profit ability ratios.

	Rs.
Sales	5,00,000
(–) cost of goods sold	3,00,000
G/P	2,00,000
(–) Operating expenses	1,20,000
Operating profit	80,000
(+) Non-operating income	12,000
	92,000
(–) Non-operating expenses	4,000
N/P	88,000
(–) Tax 50%	44,000
N/P after tax	44,000

9. (a) From the following B/S of X Ltd. Prepare a fund flow statement.

B/S

Liabilities	Previous year	Current year	Assets	Previous year	Current year
Equity capital	8.00	12.00	Land and building	5.54	11.32
Share premium	0.80	1.20	Machinery	3.56	5.13
General reserve	0.60	0.90	Furniture	0.24	0.15
P and L a/c	1.95	2.08	Stock	2.21	2.60
5% debentures	–	2.60	Debtors	3.65	3.91
Corporation tax	0.98	1.09	Bank and cash	0.48	0.40
Creditors	3.35	3.64			
	15.68	23.51		15.68	23.51

Depreciation :
Machinery Rs. 1.28 lakh
Furniture Rs. 0.04 lakh

Or

(b) State the difference between fund flow statement and cash flow statement. Also explain the steps involved in the preparation of fund flow statement.

10. (a) IT Ltd. started business on 1st April 2012 with cash balance of Rs. 1,00,000. Prepare a cash budget from 1st April to 31st July from the following information :

(i) Sales are made to one distributor only on 30 days terms, 2% discount and cheques are received on the first day of the following due date.

(ii) Furniture purchased for Rs. 10,000 and payment made in April.

(iii) All purchases are made on net 30 days terms.

	April Rs.	May Rs.	June Rs.	July Rs.
Purchases	50,000	40,000	30,000	40,000
Wages	40,000	50,000	40,000	40,000
Cash expenses	4,000	5,000	4,000	4,000
Sales	60,000	70,000	80,000	80,000

Or

(b) What is meant by capital budgeting? What are the different methods of ranking investment proposals?

Part C (1 × 10 = 10)

Compulsory.

ORGANISATIONAL BEHAVIOUR

(Common for M.B.A. (G)/IB/B&I)

(CBCS – 2012 onwards)

Time : 3 Hours Maximum : 75 Marks

Part A (5 × 3 = 15)

Answer **all** questions.

1. Define OB. Name the key elements involved in OB.

2. Explain the importance of motivation.

3. State the differences between formal and informal groups.

4. Explain the importance of change.

5. Why is organisational culture so important? How do the employees learn organisational culture?

Part B (5 × 10 = 50)

Answer **all** questions.

6. (a) "OB represents interaction among individuals, groups and the organisation". Elucidate this statement.

Or

(b) Discuss the challenges and opportunities for organisational behaviour.

7. (a) How do you define personality? What are the specific traits that constitute the concept of personality?

Or

(b) What are the consequences of stress? Also explain the organisational strategies in coping with employees' stress.

8. (a) Define Group cohesiveness. What are the factors contributing to Group cohesiveness?

Or

(b) Compare the three important leadership styles. Under what situations would each style be effective?

9. (a) Define Power. Explain the various sources of power.

Or

(b) Explain in detail some of the methodologies for managing political behaviour.

10. (a) Define Organisational culture. What steps can the management take to maintain the cultural values within the organisation in the face of dynamics of external environment?

Or

(b) What are the reasons for resistance to change? What can the management do to overcome such resistance?

Part C (1 × 10 = 10)

(Compulsory)

11. Case study :

Subir Das has been a production line employee for nearly 15 years with Nest Paints Ltd. He was a very strong union man also. Five months ago he was promoted as a supervisor of the production line on which he had previously worked. He was now part of the management and enjoyed his position. As a supervisor, he noticed an employee was repeatedly late for work. He noted four occurrences and after the fifth in 20 days, sent the employee home without pay as stipulated in the labour management agreement. A grievance was filed by the union asserting that Subir was harassing the employee. During a meeting in the plant managers office, the union chief claimed that Subir was harrassing the employee. and the employee had come in time. Subir insisted that the employee had come twenty minutes late. The plant manager also expressed concern at Subir's behaviour as a supervisor stating that several other employees had confided that Subir seemed to enjoy harassing them. Subir believes that the union is out to get him. He likes his job as a supervisor and wonders why all the employees have turned against him.

Questions :

(a) Has Subir's attitude changed since he became a supervisor? Explain.

(b) What should Subir do now?

Answer **all** questions.

1. What is managerial economics? How does it differ from economics?

2. What are the determinates of supply?

3. Define cost. What are the kinds of costs?

4. State the differences between peretration pricing and skimming pricing.

5. Define national income. Also explain the concepts of national income.

Part B (5 × 10 = 50)

Answer **all** questions.

6. (a) "Managerial economist contributes to decision – making in business" – Elucidate.

Or

(b) Discuss the nature and scope of managerial economics.

7. (a) Define demand and describe its determinates with suitable examples.

Or

(b) What are the different methods of measuring elasticity of demand?

8. (a) Distinguish economics from diseconomies of scale and suggest possible causes of each.

Or

(b) Explain the Gobb – Douglas production function.

9. (a) Explain the method of price determination under monopolistic competition.

Or

(b) State any two theories of profit.

10. (a) Explain the various methods of measuring national income. What are the difficulties in the measurement of national income?

Or

(b) Discuss the different phases of business cycle. What are the effects during expansion and recession?

Part C $(1 \times 10 = 10)$

(Compulsory)

11. Mutiplex business has gained steady momentum in India. Ticket prices in such multiplexes are adjusted in accordance to the movie, time of the day and the day of a week. Hit movies on a weekend or a holiday are charged the maximum, while during weekdays when prices are kept lower the benefit goes to the audience. Besides taking over the metros, these multiplexes have

undertaken the risk of broadening their network to non-metros. But the game in non-metros is slightly different from that in metros. The profit margin is slightly different in the non-metros, classified according to their affordability factor, tastes and preferences. During week days, the prices of tickets vary from Rs.150 -200 in the metros and soar up during the weekends making the tickets available at Rs. 200-250. The morning shows are priced at Rs. 60, 80 or 100 attracting the school and college folk, The price of tickets in non-metros varies from Rs. 80-100 during the week. "Customers in these towns would not have the capacity to pay upwards of Rs. 100 for a ticket, hence we have entered these towns under a separate brand name of PVR Talkies", says Aashish Shukla CEO, PVR Talkies.

Questions :

(a) What type of pricing strategy do you see in case of multiplexes? Evaluate on the basis of various pricing categories.

(b) Is this price discrimination or flexible pricing? Give logic.

M.B.A. (G) (Arrear) DEGREE EXAMINATION, APRIL 2015

Third Semester

STRATEGIC MANAGEMENT

(Common for M.B.A. (G)/LM)

(CBCS – 2012 onwards)

Time : 3 Hours Maximum : 75 Marks

Part A (5 × 3 = 15)

Answer **all** questions.

1. Define Mission.

2. What is meant by EVA?

3. What are business level strategies?

4. Draw the BCG Matrix.

5. What is ERP?

Part B (5 × 10 = 50)

Answer **all** questions.

6. (a) Discuss the process of strategic planning.

Or

(b) Discuss the dimensions of strategic decisions.

7. (a) Discuss the components for competitive analysis.

Or

(b) Discuss the steps in making a PEST analysis.

8. (a) Discuss the conditions where stability strategy is used.

Or

(b) Explain the different strategic options for production function.

9. (a) Discuss the GE business screening process.

Or

(b) Discuss the various aspects of Hofer's product market matrix.

10. (a) Discuss the different methods for strategic control in companies.

Or

(b) How is a corporate strategy implemented?

Part C $(1 \times 10 = 10)$

Compulsory.

11. Study the Case below and answer the question(s) :

In 1994, Jeff Bezos gave up an attractive career as a financial analyst in D.E. Shaw & Co. with an ambition to start business. Realizing the revenue-generation potential of the World Wide Web (then in a booming stage), he came up with a novel business plan of selling books online. In 1995. he launched Amazon.com, an online vendor of books that enlisted books under all categories to be sold through its website. This website provided the necessary information regarding the publishing house, price of the product, etc.

In 2007, Amazon launched an e-reader called 'Kindle'. Within 2 years, by 2009, the company launched two more versions of e-readers, namely Kindle 2 and Kindle DX (DX stands for Deluxe). While on one side, e-reader is considered as a possible replacement of a book in terms of convenience, others are sceptical about the benefits provided by the e-reader and opine that e-readers cannot totally wipe away the publishing industry. However, keeping the prospects of the e-readers and the publishing industry in view, the big question is, can the two survive together or would one replace the other.

Question : Why should Amazon eat in to its own sales of books through its Amazon website by selling eBooks? What aspect of business strategy can be learnt by this case?

M.B.A. (G/LM) (Arrear) DEGREE EXAMINATION, APRIL 2015

Third Semester

MANAGEMENT CONTROL AND INFORMATION SYSTEM

(CBCS – 2012 onwards)

Time : 3 Hours Maximum : 75 Marks

Part A (5 × 3 = 15)

Answer **all** questions.

All questions carry equal marks.

1. What is understood by the term MIS? How does it assist managers in their day-to-day functioning?

2. Explain the terms : Profit centre and investment centre.

3. What are the different bases for classifying decisions?

4. What is a DFD? What are the symbols used in constructing DFD's?

5. Explain the role of MIS in MNC's.

Part B (5 × 10 = 50)

Answer **all** questions, choosing either (a) or (b).

All questions carry equal marks.

6. (a) Discuss the various activities performed by MIS in an organisation.

Or

(b) Explain in detail the operating support systems.

7. (a) What is meant by the word 'system'? Discuss different kinds of system.

Or

(b) Discuss various types of information and their uses in business decision making.

8. (a) What is meant by system implementation? Discuss the steps involved in the implementation process.

Or

(b) What is DSS? Discuss its components and characteristics.

9. (a) Explain the following structured analysis tools : Data dictionary, Data flow diagram and decision trees.

Or

(b) Briefly explain the phases involved in system development.

10. (a) Explain briefly any five information systems in a business organisation.

Or

(b) Discuss the significance of MIS in service and non-profit organisations.

Part C $(1 \times 10 = 10)$

Compulsory.

11. Case Study :

Siba international is a medium-sized company in India with about 1,500 employees. The company manufacturers special machines for the agro-based industry, both for farms and food processing plants. The company buys

material and components from about 200 vendors located in India, Japan and Germany. Products are sold either to wholesalers or directly to clients (from a mailing list of about 1,500 customers). The business is quite competitive.

The company has the following information systems in place, financial accounting, engineering, research and development and manufacturing (CAM). These systems are independent of each other and only the Financial accounting system is on a LAN.

The company is having profitability problems. Cash is in high demand and short supply. It is proposed that the company explores the possibility of using information technology to improve the situation. However, vice-president of finance objects to the idea, claiming that most of the tangible benefits of information technology are already being realised.

Questions :

Assume you are hired as a consultant to the president of Siba International.

(a) Prepare a list of potential applications of information technologies that you think could help the company.

(b) Suggest a suitable design of information systems. Would you recommend any telecommunication arrangements? Justify such design.

M.B.A. (G) (Arrear) DEGREE EXAMINATION, APRIL 2015

Third Semester

Elective — MARKETING COMMUNICATION

(CBCS – 2012 onwards)

Time : 3 Hours Maximum : 75 Marks

Part A (5 × 3 = 15)

Answer **all** questions.

All questions carry equal marks.

1. What do you understand by target audience?
2. What are the different elements of a good copy?
3. Define lay out.
4. Write short notes on pre testing.
5. What is meant by an Advertorial?

Part B (5 × 10 = 50)

Answer **all** questions choosing either (a) or (b).

All questions carry equal marks.

6. (a) Write about the Growth of advertising in India with minimum three examples.

Or

(b) Briefly explain the various types of advertising with suitable example.

7. (a) Explain about construction of an advertisement with example.

Or

(b) What is positioning in the mind of the consumer in an advertising context?

8. (a) Select an advertisement and explain about the market identification Strategy.

Or

(b) What are the steps involved in the development of a media plan.

9. (a) Explain about the criticisms on advertising with three examples.

Or

(b) What are the methods involved in evaluation of advertising effectiveness?

10. (a) Explain Sales Promotion Discuss the different methods of Consumer Promotion.

Or

(b) Explain about the importance of PR Activities in developing an effective IMC Plan.

Part C (10)

Compulsory

11. Study the case given below and answer the questions given at the end of the case :

Honda Siel cars Ltd. maker of City, Civic, Accord, Jazz and CR-V has mostly been confined to metros even as other car makers have hit the country roads to gain huge incremental volumes that helped car sales rise more than

30% in 2010. Looking at the growth rates the company is all set to expand its network of small cities and towns and tie up with state run and regional banks to ensure its upcoming compact car Honda Brio does not repeat the failure of Honda Jazz hatchback. Honda wants to tap the huge potential in smaller cities to ensure the Brie takes on competitors and revive its flattening sales. According to company's top management, Brio has been developed after 5 years of painstaking research of the Indian market keeping in view the local conditions and catering the car to typical Indian family. Thus it will cater to urban nuclear families, but will also meet specific needs of larger family units in small towns. The company has already increased its network to 150 outlets in 72 cities currently from 120 outlets in 2010. It is also a known fact that Honda is currently facing tough times as sales have been flat, Brio would be the first high-volume Honda car to hit the Indian markets by September 2011.

Develop a detailed communication plan for brand Brio for its successful launch, covering the following aspects :

(a) Communication strategy to be used

(b) Kind of media vehicle options available and media selection for such a product.

(c) Methods to measure the communication effectiveness.

Elective — BUSINESS MARKETING

(CBCS – 2012 onwards)

Time : 3 Hours Maximum : 75 Marks

Part A (5 × 3 = 15)

Answer **all** questions.

1. Explain the meaning and importance of Business Marketing.

2. Briefly explain the following :

   RFP, RFQ and EOI.

3. Discuss the important positioning strategies.

4. State the differences between personal selling and advertisement.

5. What is channel conflict?

Part B (5 × 10 = 50)

Answer **all** questions.

6. (a) Give an account of the classification of business goods and services.

   Or

   (b) State the important differences between business marketing and consumer marketing.

7. (a) Discuss the Robinson's Buy Grid model.

Or

(b) Explain in detail the process of Tendering.

8. (a) Describe the various methods of segmenting markets for industrial products.

Or

(b) Describe the different stages in the introduction of a new product.

9. (a) What are the important factors which affect industrial pricing?

Or

(b) Discuss the significance of personal selling in business marketing. Also explain the types of industrial salesmen.

10. (a) Discuss the factors influencing the choice of channel of distribution.

Or

(b) State the importance and strategic role of logistics in business marketing.

Part C $(1 \times 10 = 10)$

Compulsory.

11. As a student of marketing specialisation, what kind of advertising media you prefer for the following products :

    (a) Boilers

    (b) Automobile tyres

    (c) Bearings and Gears

    (d) Fire Extinguishers

    (e) Personal computers.

***Elective* — CONSUMER BEHAVIOUR**

(CBCS – 2012 onwards)

Time : 3 Hours Maximum : 75 Marks

Part A (5 × 3 = 15)

Answer **all** questions.

All questions carry equal marks.

1. What do you mean by consumer psychographics?

2. Define Consumer Learning.

3. Define Reference Group.

4. Write short notes on Cross Culture.

5. Name any four influences of online purchase.

Part B (5 × 10 = 50)

Answer **all** questions, choosing either (a) or (b).

All questions carry equal marks.

6. (a) Discuss the impact of consumer Behavior study on Marketing.

Or

(b) Why is it critically important for marketers to understand consumer? Support your answer with Indian examples.

7. (a) What is meant by consumer attitude? What are its components and functions?

Or

(b) How do demographic factors influence consumer behavior?

8. (a) Describe the role of young children in the family consumption process with an example.

Or

(b) Explain the concept of diffusion of innovation with suitable examples.

9. (a) Explain the role of consumer in a social setting.

Or

(b) Discuss the role of family in consumer decision making process.

10. (a) Explain the Howard Sheth model of consumer decision making.

Or

(b) What are the challenges that a marketing manager faces with regard to launching of new product? Support it with an example.

Part C $(1 \times 10 = 10)$

Compulsory question.

11. Cultural Dimensions and Celebrities.

There is a growing trend among the urban youth population to buy personal belongings to reflect the symbolic appeals of being trendy and modern. Fastrack. the wristwatch brand from Titan, has introduced several trendy designs. The brand has also launched trendy

eyewear and used a film celebrity to promote this line. Apart from Fastrack, Titan also used a film celebrity for the Titan brand of watch. It also has Sonata watch for which it used a cricket celebrity.

Discuss the cultural dimensions related to such a strategy of Titan, with its different products being associated with different celebrities.

M.B.A. (G) DEGREE EXAMINATION, APRIL 2015

INTEGRATED MATERIAL MANAGEMENT

(CBCS – 2012 onwards)

Time : 3 Hours Maximum : 75 Marks

Part A (5 × 3 = 15)

Answer **all** questions.

1. Explain the following codification system :
   (a) Alphabetical system
   (b) Numerical system
   (c) Decimal system

2. What is meant by value analysis?

3. List out the factors which may weaken negotiation.

4. How will you classify different types of stores?

5. How do you evaluate the stores performance?

Part B (5 × 10 = 50)

Answer **all** questions.

6. (a) What is meant by IMM? What are the advantages of integrated materials management?

Or

(b) What is meant by codification? What are the pros and cons of codification?

7. (a) Discuss the P-system and Q-system of inventory management.

Or

(b) What is ABC method of classification of inventory? What are the benefits of ABC classification?

8. (a) What is a make or buy decision? What are the criteria which help a firm whether to make or buy an item?

Or

(b) What is meant by vendor rating? What are the different methods of vendor rating?

9. (a) What are the factors affecting the layout of stores?

Or

(b) State the procedure for the receipt and issue of materials.

10. (a) Explain the practical problems in management of obsolete stocks, surplus stocks and scrap.

Or

(b) What are the material handling and transportation management issues?

Part C (1 × 10 = 10)

Compulsory.

11. Supply Chain Success : Mumbai Dabbawalas

The dabbawallas of Mumbai are a unique case in logistics. Neatly stacked dabbas (tiffins or lunch boxes) are a common sight at most of the railway stations, late every morning in Mumbai, India. A man who is illiterate/Semiliterate delivers hot lunch at the doorstep of the subscriber. It is an error-free system and there are virtually no mismatches. The Mumbai Tiffin Box Suppliers Association is a 38-year-old organization with 4,500 members and a huge, loyal customer base. Their customer-base includes office goers, students, shopkeepers, etc. instead of carrying their own lunch at on early hour in the morning; they prefer to subscribe to this dabba service. For a small fee, the dabbawala picks up the freshly packed lunch from the subscriber's house and delivers it to his/her office at lunchtime. Once lunch is over, the empty dabba is again collected by the dabbawala. This is done with the help of Mumbai's extremely efficient railway system called the Mumbai locals. There are special trains known as dabbawala specials. The dabbas change many hands and are loaded and off-loaded in many trains before their final delivery.

There is a scientific method of putting an identification mark on each dabba. Each dabba lid is marked with a particular code. The code format is 'DBOF' where D denotes the dabbawala's number (assigned by the association), BO is a combination indicating the building/office and F is the floor number of that building where the Tiffin box has to be delivered. The lid is also marked with a number denoting the railway station where the box has to be off-loaded, followed by an alphabet indicating the station where it is to be picked up. Can you imagine what the fee for all of this is? The

service charges vary between Rs. 150 (US$3) to Rs. 300 (US$6) per month, depending on the customer's location and the distance covered.

This service was started by the Parsi banker when he employed a carrier to fetch his lunch every afternoon. The idea caught on and this inspired many unemployed people to become dabba carriers. Soon, each dabbawala had a handful of customers. To ensure that each carrier worked only in a particular district and didn't interfere with other dabbawallas, a union called the 'Mumbai Tiffin Box Carrier Association' was formed in 1968. today's there are more than 5000 semi-literate dabbawallas who transport 1,75,000 boxes in a 3-hour period, traversing 25 km using public transportation, involving multiple transfer points. In 1998, Forbes Global magazine conducted an analysis of the service and gave the dabbawalas a six sigma efficiency rating.

Questions :

(a) Define the inputs, process and outputs of mumbai's dabbawallas.

(b) What are the other businesses in India that can learn from the dabbawallas?

RW–10146 **641335**

M.B.A (G) (Arrear) DEGREE EXAMINATION, APRIL 2015.

Third Semester

***Elective* – MODERN MANUFACTURING MANAGEMENT**

(CBCS – 2012 onwards)

Time : 3 Hours Maximum : 75 Marks

Part A (5 × 3 = 15)

Answer **all** questions.

1. What is modular design?
2. Define product layout. Explain the importance of layout.
3. What is meant by PPC? What are the main functions of PPC?
4. What are the factors affecting scheduling?
5. Explain KAIZEN.

Part B (5 × 10 = 50)

Answer **all** questions.

6. (a) What is product design? What are the factors affecting product design?

Or

(b) State the various stages of preliminary design and final design of a product.

7. (a) Explain the various types of layout. What are the pros and cons of each type?

Or

(b) What are the tools and techniques of plant layout design?

8. (a) Define forecasting. State the different techniques of forecasting.

Or

(b) What are the forecasting errors?

9. (a) What is meant by scheduling? Also explain the Johnson's algorithm.

Or

(b) Explain the meaning and objectives of lean manufacturing. Also list the components of lean manufacturing.

10. (a) What is TQM? Discuss the scope and benefits of TQM.

Or

(b) Define the steps of six sigma DMAIC and DMADV. What are the benefits of six sigma?

Part C $(1 \times 10 = 10)$

Compulsory.

11. SMALL PUMP COMPANY

Mr. Harish Mangla, owner and manager of Mangla Engineering Company, a medium-sized maker of industrial products, studied a report from Er. Mittal, product designer and manager of the small pump, the company's major product. The report attributed the customer's complaints about breakdown to several purchased parts and sub-assemblies, which had been subsequently machined in Mangla's plant. Er. Mittal blamed both "careless manufacturing and poor quality materials' for the failure, and started that the product's success was built on "a reputation for quality, precision, and trouble-free operation."

Khandekar, manager manufacturing, observed that "Quality control and inspections costs had soared since he had to put three extra workers on inspection, as sub-assembly and material quality has deteriorated. There was Rs 25,654 in rework and overtime here that upset his budget."

Then, Dolly Shaw, purchasing manager, met Harish and said, Several of our suppliers have told me that they have bitter complaints on the quality of their products from the crowd in the quality control and inspection and receiving departments in manufacturing. According to them, the material was all right as shipped. It's not my job to receive and inspect materials-that's up to manufacturing. But if suppliers are not living up to the specifications on the purchasing order, I want to know about it. Manufacturing should not go behind my back to threaten suppliers. This has to stop, or I'll never be able to get consistent quality from suppliers with everybody calling them."

Mr.Harish Mangla recognized that he had not yet resolved these interdepartmental conflicts. Marketing would try to set specifications as high as possible to ensure 100 per cent customer satisfaction; manufacturing would try to pass rework costs and responsibility for any material troubles onto purchasing as poor supplier quality, or to the marketing department as setting unattainable specifications; and purchasing would complain that sloppy machining and assembly or careless inspection caused the trouble. Harish sent a note to Dolly, Er. Mittal and Khandekar :

"The quality problem has apparently got out of hand all along the line from materials to product installation. Please meet me in my office at 9.00 am, Monday, and come prepared to discuss and recommend means of tiding over the present crisis."

Question :

How should Dolly Shaw, purchasing manager, prepare for this meeting? What recommendations should she bring up at the meeting?

RW–10147 **641344**

M.B.A. (G) (Arrear) DEGREE EXAMINATION, APRIL 2015

Third Semester

HR

HUMAN RESOURCE DEVELOPMENT

(CBCS – 2012 onwards)

Time : 3 Hours Maximum : 75 Marks

Part A (5 × 3 = 15)

Answer **all** questions.

All questions carry equal marks.

1. State the key performance areas of human resource development.

2. What do you mean by the term employee counselling?

3. What are the challenges of HRD climate?

4. What are the reasons for the failure of performance appraisal?

5. Define organizational culture and explain how does it contribute to the development of an organisation.

Part B (5 × 10 = 50)

Answer **all** questions choosing either (a) or (b).

All questions carry equal marks.

6. (a) Distinguish between Traditional Personnel Management and Human Resource Development.

Or

(b) Explain the key performance areas of human resource development.

7. (a) Discuss the various steps involved in performance appraisal process.

Or

(b) What are the skills required to provide successful counselling? Explain.

8. (a) Describe about human resource development strategies and organizational performance.

Or

(b) Explain the process of managing change through OD.

9. (a) Explain the methods of training evaluation. How is training need analysis done?

Or

(b) What is career planning? Explain the process of career planning.

10. (a) How would you design a HRD strategy? Discuss with examples each step of designing a HRD strategy.

Or

(b) Elaborate the human resource development experiences in India.

Part C (10)

(Compulsory)

11. **Case analysis :**

XYZ Ltd. has obtained a license for manufacturing state of the art machinery in India. The company is having a proven track record of three decades in marketing, sales, service and refurbishing of similar equipment imported from the collaborator.

Situation: You, Mr. A, are a talented graduate techie selected by the company at campus interview, along with a couple of your colleagues, with the assurance of getting a chance to work on a new project. This may give you a training opportunity abroad. You are happy as work, money and status are at your door! You can give better days to your retired mother and father.

Happening: You have joined after signing a bond. The HRD has given a one year training program comprising of three months each in four different departments. A week passes by and you and your colleagues find that the proposed project is yet to begin. You are required to work on nothing but recycling of old machines, from opening packages, dismantling, washing them in kerosene etc. ... This work is a mismatch to your core competence.

One fine day: During lunch break you meet Mr. B a post-graduate techie, who happened to join that very day, obviously on a better pay package. At tea-break Mr. B comes to meet you to bid good-bye as he has resigned, because he finds the situation not suitable for his career. You are now shocked and worried.

What do you do now?

- Go to the top boss and discuss your fears.
- Keep quiet and wait till your bond period is over.
- Search for a better opportunity, this time get in depth information, break the bond and resign.

Case Study Questions :

(a) What would you do if you are Mr. A?

(b) If you are the Managing Director of XYZ Ltd., how would you handle the situation?

M.B.A. (Arrear) DEGREE EXAMINATION, APRIL 2015

Fourth Semester

General/Logistics Management

Elective — SUPPLY CHAIN MANAGEMENT

(CBCS – 2012 onwards)

Time : 3 Hours Maximum : 75 Marks

Part A (5 × 3 = 15)

Answer **all** questions.

All questions carry equal marks.

1. Define supply chain management?

2. What is outsourcing?

3. Write a short note on value added functions in warehouse.

4. Describe the inventory planning processes.

5. Describe cost of service.

Part B (5 × 10 = 50)

Answer **all** questions choosing either (a) or (b).

All questions carry equal marks.

6. (a) Discuss about the drivers of supply chain management.

Or

(b) Explain the different dimensions of logistics.

7. (a) How sourcing strategy gives supply chain flexibility? Explain with example.

Or

(b) Explain the process involved in buy/make decision.

8. (a) Discuss the role of packaging in achieving sustainable supply chain.

Or

(b) How a strong supply chain network will be able to deliver the right product at right place at right price?

9. (a) Analyse the issues with demand forecasting. Explain with example.

Or

(b) Explain the principles of warehouse design and operations.

10. (a) Explain the revenue management in supply chain.

Or

(b) Explain the process of identifying customers' service requirements.

Part C $(1 \times 10 = 10)$

(Compulsory)

11. A problem faced by seasonal shippers is how to handle short-term surges of supply while keeping freight costs low. One of the clients of third-party Mark VII logistics services is a food processor that requires large amounts of raw materials which are not especially delicate. Huge amounts of the product move from Florida to plants in the north-eastern United States over a six-week period, by second-day delivery or faster. One week, the shipper could move between 200 and 230 loads. The next, shipment volume will be zero.

Prior to Mark VII, the shipper had handled the problem in—house. Its strategy consisted of coordinating the shipments through produce brokers and the price wasn't cheap. If it wanted capacity, the shipper would have to match what truckers were getting for moving higher-value perishables And because most movements during that time of year were headed north. shippers were expected to cover the carriers' hackhaul costs-almost $ 2 a mile.

Although the shipper's product was of relatively low value, its equipment needs were strict. It required refrigerated or insulated Trailer–48 inches long by 102 inches the minimum-equipped with satellite communication addition, it needed to haul between 5 and 20 loads a week from the destination plant to local consignees. And it wanted only one or two carriers to handle the whole job.

By bringing more truckers into the market, Mark VII could boost capacity and challenge the existing pricing structure. But how does one entice a high-quality carrier to enter a traffic lane for just six weeks? And how could Mark VII meet its customer's service demands while reducing weight costs?

What is your solution?

MANAGEMENT CONCEPTS

(Common for M.B.A. (G) & Logistic Management, (CS), B & I, & IB)

(CBCS – 2012 onwards)

Time : 3 Hours Maximum : 75 Marks

Part A (5 × 3 = 15)

Answer **all** questions.

1. Is management a science, an art or profession?
2. "Planning is looking ahead" – Elucidate.
3. What is meant by Informal Organisation?
4. State the assumption of Theory X.
5. Explain the need for co-ordination.

Part B (5 × 10 = 50)

Answer **all** questions.

6. (a) Describe the scope and functions of Management.

Or

(b) Explain the contributions of Henri Fayol to management.

7. (a) State the importance and process of planning.

Or

(b) Explain the meaning and process of decision making.

8. (a) Discuss the principles of organisation.

Or

(b) Explain the pros and cons of different kinds of organisation.

9. (a) What can the management do to satisfy the various level needs of workers as shown in Maslow's model?

Or

(b) Explain the obstacles to communication and how to overcome it?

10. (a) Describe the special control techniques.

Or

(b) Explain the following :

Part C $(1 \times 10 = 10)$

Compulsory

11. Mr. Mohan is the maintenance supervisor, of a large tourist bus company. He has been very concerned because the bus drivers were not reporting potential mechanical problems. Several months ago, he implemented a preventive maintenance programme. This programme depended Upon the drivers filling out a detailed report when they suspected any problem But this was not happening On a number of occasions a bus left the garage with major problems that the previous driver was aware of but had not reported Calling out the field repair teams to fix the breakdowns not only was Costing the company much time and trouble but also was very unsafe in some cases and created a high degree of customer ill will. The drivers themselves suffered from a loos of fares and tips in some cases, their lives were endangered by these

mechanical failures. After many oral and written threats and admonishments, Mohan decided to try a new approach He would respond directly to each report of a potential mechanical problem sent in by the driver with a return memo indicating what the maintenance crew had found wrong with the bus and what had been done to take care of the problems. In addition, the personal memo thanked the driver for reporting the problem and encouraged reporting any further problems In less than a month the number of field repair calls had decreased by half and number of turned in potential problem reports had tripled.

Questions :

(a) Keeping in view the above case, discuss the communication processes in a company.

(b) In communication terms, how do you explain the success of Mohan's follow up memos to the drivers?
