M.B.A. (L.M.) DEGREE EXAMINATION, DECEMBER 2013.

First Semester

MANAGEMENT CONCEPTS

(Upto 2012–2013)

Time : Three hours Maximum : 100 marks

SECTION A — (5 × 8 = 40 marks)

Answer any FIVE questions.

All questions carry equal marks.

1. Is Management an Art or Science or Profession?

2. Elaborate the organizational structure and list out various factors which shape the underlying structure of an organisation.

3. Define strategy. What are the different types of strategies? What are the different types of policies?

4. Examine the factors that determine the span of management.

5. Explain the process of delegation.

6. Analyze the leadership style with its merits and demerits.

7. Attempt a brief note on Formal and Informal organization.

8. Write a note on 'Business Process Re-engineering'.

SECTION B — (4 × 15 = 60 marks)

Answer any FOUR questions.

All questions carry equal marks.

9. Assess the contribution of Fayol to management thought and practice.

10. What are the differences between delegation and decentralisation? Describe the factor determining the degree to decentralisation and the advantages and disadvantages of decentralisation.

11. Directing is a strategy to get sub-ordinates and others to carry out plans – Explain.

12. Define leadership and critically analyze the leadership theories.

13. How various theories of motivation help manager in understanding behaviour of his subordinates?

14. Describe the process of decision-making.

15. Define Total Quality Management. What are the chief requirements for the successful working of TQM programme in an industrial organizations?

DISTANCE EDUCATION

M.B.A.(LM) DEGREE EXAMINATION, DECEMBER 2013.

First Semester

ORGANISATIONAL BEHAVIOUR

(upto 2012-13)

Time : Three hours Maximum : 100 marks

PART A — (5 × 8 = 40 marks)

Answer any FIVE questions.

1. Explain individual differences and models of individual behaviour.

2. What are the different types of incentives?

3. What are the different types of groups?

4. Write notes on :

   (a) Group norms

   (b) Group think.

5. How could power be used effectively in organisation?

6. Explain in brief the strategies available to resolve destructive conflict.

7. Write note on :

   (a) Efficiency

   (b) Effectiveness.

8. Why do people resist change?

PART B — ($4 \times 15 = 60$ marks)

Answer any FOUR questions.

9. What is learning? Write on principles of learning.

10. Explain attribution theory. What are its implications on OB?

11. Differentiate teams from groups. How are teams formed?

12. What are the sources of power and its characteristics?

13. Explain cross cultural diversity in detail.

14. How can resistance to change be overcome?

15. Explain in detail the classification of OD interventions.

DISTANCE EDUCATION

M.B.A. (Logistics Management) DEGREE EXAMINATION, DECEMBER 2013.

First Semester

MANAGERIAL ECONOMICS

(Upto 2012–2013)

Time : Three hours Maximum : 100 marks

PART A — (5 × 8 = 40 marks)

Answer any FIVE questions.

All questions carry equal marks.

1. Distinguish between economic profits and accounting profits with suitable examples.

2. Distinguish between derived demand and autonomous demand.

3. Explain the different types of cost with examples.

4. Differentiate between Cost control and Cost reduction. What are the essentials for the success of cost reduction programme?

5. Narrate the assumptions and properties of Cobb-Douglas Production functions.

6. Differentiate between skimming pricing and penetration pricing with suitable examples.

7. Explain the managerial uses of production function.

8. Discuss the importance and limitations of National income estimates.

PART B — ($4 \times 15 = 60$ marks)

Answer any FOUR questions.

All questions carry equal marks.

9. Point out the responsibilities of a managerial economist in the current turbulent economic situation.

10. Discuss critically the different methods of demand forecasting.

11. Explain the effects of government intervention in price fixation. What steps are necessary to make this intervention effective?

12. Discuss why profit maximization is not always the aim of a business firm.

13. Analyze the break even analysis with its managerial uses.

14. Describe the methods for measuring profits.

15. Examine the various methods of evaluating capital budgeting.

DISTANCE EDUCATION

M.B.A. (LM) DEGREE EXAMINATION, DECEMBER 2013.

First Semester

FINANCIAL AND MANAGEMENT ACCOUNTING

(2011 academic year onwards)

(Upto 2012-13)

Time : Three hours Maximum : 100 marks

PART A — (5 × 8 = 40 marks)

Answer any FIVE questions.

All questions carry equal marks.

1. What are subsidiary books? Bring out its advantages.

2. What are the points of distinction between a statement of affairs and a balance sheet?

3. Explain the Single Entry System. How does it differ from double entry system?

4. What is "Funds Flow Statement"? What purpose does "Funds Flow Statement" serve?

5. Describe any four profitability ratios.

6. Distinguish between common size and comparative statements.

7. What are the objectives of budgets?

8. Discuss the objectives and goal of capital rationing.

PART B — (4 × 15 = 60 marks)

Answer any FOUR questions.

9. Using the following data, complete the balance sheet.

Gross profit ratio	20%
Current ratio	1.8
Stock turnover ratio	4 times
Debt collection period (360 days per year)	20 days
Long-term debt to shareholders' equity	40%
Total assets turnover (on sales)	0.3 times
Credit sales to total sales	80%
Gross profit	Rs. 1,08,000
Shareholders' equity	Rs. 12,00,000

10. The following information relates to the productive activities of G Ltd., for three months ended 31st December 2011 at 50% capacity utilization.

	Rs.
Fixed expenses :	
Management salaries	2,10,000
Depreciation of machinery	1,75,000
Sundry office expenses	3,62,500
Variable expenses at 50% capacity :	
Materials	6,00,000
Labour	6,40,000
Semi-variable expenses at 50% capacity :	
Indirect labour	2,47,500
Salesmen salary	72,000

It is further noted the semi-variable expenses remain constant between 40% and 70% capacity, increase by 10% of the figures between 70% and 95% capacity and increase by 15% above 95% capacity. Sales at 50% capacity's Rs. 21,25,000, sales at 60% capacity is Rs. 21,50,000, sales at 90% capacity is Rs. 38,50,000. Prepare a flexible budget at 60% and 90% production capacity.

11. Which of the following should be selected as they are mutually exclusive.

YEAR	CASH INFLOWS	
	M	N
1	10000	30000
2	40000	50000
3	30000	80000
4	60000	40000
5	90000	60000

Both of the projects require an investment of Rs. 1,00,000

Target (return on investment) 12%

NPV factor : Year :	1	2	3	4	5
@ 12%	0.893	0.797	0.712	0.636	0.567

12. On 31st March 2011, the following Trial Balance was extracted from the books of Chandran :

	Dr	Cr
	Rs.	Rs.
Capital	–	5,00,000
Plant and Machinery	8,00,000	–
Sales	–	17,70,000
Purchases	6,00,000	–
Returns	10,000	7,500
Opening stock	3,00,000	–
Discounts	3,500	8,000
Bank charges	750	–
Sundry Debtors and creditors	4,50,000	2,50,000

	Dr	Cr
	Rs.	Rs.
Salaries	68,000	–
Carriage inwards	7,500	–
Carriage outwards	12,000	–
Bad debts provision	–	5,250
Rent, Rates and taxes	1,00,000	–
Advertisement	20,000	
Cash in hand	9,000	–
Cash at bank	60,000	
Manufacturing wages	1,00,000	–
	25,40,750	25,40,750

You are asked to prepare the final accounts for the year ended 31st March 2011 and the Balance sheet as on that date.

The following adjustments are required : (a) Closing stock Rs. 3,50,000, (b) Depreciate plant at 6% p.a., (c) Bad debts provision to be raised to Rs. 6,000, (d) Interest on capital to be allowed at 10% pa., (e) 2.5% of the profit is to be carried to Reserve fund.

13. State and explain the various accounting conventions.

14. What is capital budgeting? Elaborate on various methods of capital budgeting appraisal method.

15. Discuss about the techniques of financial statement analysis.

M.B.A. (LM) DEGREE EXAMINATION, DECEMBER 2013.

First Semester

PRINCIPLES OF LOGISTICS MANAGEMENT

(Upto 2012–13)

Time : Three hours Maximum : 100 marks

PART A — (5 × 8 = 40 marks)

Answer any FIVE questions.

All questions carry equal marks.

1. Write down the importance of logistics activities.

2. Explain the factors determining logistics requirements of consumer durable goods.

3. Explain the concept of location analysis for strategic planning models.

4. What are various location problems in logistics management?

5. Write short notes on "Risk Pooling Effects".

6. What are strategies used to fulfill customer service expectation?

7. Explain the importance of High Value and Sensitive Cargoes in logistics.

8. What do you understand by planning design techniques?

PART B — (4 × 15 = 60 marks)

Answer any FOUR questions.

All questions carry equal marks.

9. Explain the principle of marketing channel structure with suitable example.

10. Discuss in detail about the cost effectiveness distribution strategy with practical example.

11. Discuss about logistics in different Industries. How it is applicable in textile industries?

12. Explain the significance of Six-Sigma quality in supply chain.

13. Write down the adaptability of Road, Rail, and Shipping modes for bulk transport.

14. Explain the significance of value of information in customer service in logistics.

15. Explain the simulation of logistics system in customer services.

DE–7549 **21**

DISTANCE EDUCATION

M.B.A. (L.M.) DEGREE EXAMINATION, DECEMBER 2013.

Second Semester

QUANTITATIVE METHODS

Time : Three hours Maximum : 100 marks

PART A — (5 × 8 = 40 marks)

Answer any FIVE questions.

All questions carry equal marks.

1. Describe the various types of graphs and their uses.

2. Discuss the relevance of marginal, average and total costs.

3. Explain the method of North West Corner rule.

4. Explain the differences between transportation problem and assignment problem.

5. A factory produces a certain type of outputs by three types of machines. The respective daily production figures are Machine 1 = 3,000 units, Machine 2 = 2,500 units, Machine 3 = 4,500 units. Past experience shows that 1% of the output produced by Machine 1 is defective, the corresponding fractions of defectives for the other two machines are 1.2% and 2% respectively. An item is drawn at random from the days production run and is found to be defective. What is the probability that it comes from the output of (a) Machine 1, (b) Machine 2, and (c) Machine 3?

6. Use the principle of dominance, solve the game

	Player B		
	3	–2	4
Player A	–1	4	2
	7	2	6

7. Discuss the possible behaviour of customers in a queuing system.

8. Explain decision making under uncertainty.

PART B — (4 × 15 = 60 marks)

Answer any FOUR questions.

All questions carry equal marks.

9. What is the significance of duality theory in linear programming? Describe the general rules for writing the dual of a linear programming problem.

10. Fit a Poisson distribution to the following data and calculate the theoretical frequencies.

x :	*0*	*1*	*2*	*3*	*4*
f :	*123*	*59*	*14*	*3*	*1*

11. A Company is producing a single product and is selling it through five agencies situated in different cities. All of a sudden, there is demand for the product in another five cities not having any agency of the company. The company is faced with the problem of deciding how to assign the existing agencies to dispatch the product to need cities in such a way that the total travelling distance is minimized. The distance between the surplus and deficit cities (in kilometers) is given below. Determine the optimum assignment schedule.

Surplus city	Deficit City				
	A1	B2	C1	D1	E2
A	10	5	9	18	11
B	13	19	6	12	14
C	3	2	4	4	5
D	18	9	12	17	15
E	11	6	14	19	10

12. Solve the transportation problem by VAM method :

Destination

		A	B	C	D	Availability
	A1	2	3	11	7	6
Sources	A2	11	0	6	1	1
	A3	5	8	15	9	10
Requirements		7	5	3	2	

13. Solve the LPP :

Minimize ; $Z = 3x_1 + 2x_2 + 3x_3$

Subject to the constraints : $2x_1 + x_2 + x_3 \leq 2$

$3x_1 + 4x_2 + 2x_3 \geq 8;$

$x_1, x_2, x_3 \geq 0.$

14. A firm manufacture three products A, B and C. Their profits per unit are Rs.300, Rs.200 and Rs.400 respectively. The firm has two machines and the required processing time in minutes on each machine for each product is given in the following table :

	Product		
	A	B	C
Machine 1	4	3	5
2	2	2	4

Machines 1 and 2 have 2000 & 2500 machine-minute respectively. The upper limits for the production volumes of the product A, B and C are 100 units, 200 units and 50 units, respectively. But, the firm must produce a minimum of 50 units of the Product A. Develop a LP model for mis-manufacturing situation to determine the production volume of each product such that the total profit is maximized.

15. What are the advantages and limitations of using simulation?

DE–7550 **22**

DISTANCE EDUCATION

M.B.A. (Logistics Mgt) DEGREE EXAMINATION,
DECEMBER 2013.

Second Semester

BUSINESS ENVIRONMENT

Time : Three hours Maximum : 100 marks

PART A — (5 × 8 = 40 marks)

Answer any FIVE questions.

All questions carry equal marks.

1. Why scanning the environment is important?

2. Briefly explain about industrial policies?

3. Explain the role of Central Bank.

4. Write a short note on EXIM Policy.

5. Briefly explain about Fiscal deficit and Inflation.

6. Discuss about the patent law.

7. What do you mean by LPG? Explain?

8. Explain the features of Societal Structure.

PART B — (4 × 15 = 60 marks)

Answer any FOUR questions.

All questions carry equal marks.

9. Is it important to learn about Business Environment? Discuss.

10. Briefly explain about the roles played by the Government in SSI.

11. "Does Political system has any impact on business" — Elucidate.

12. Critically examine the various Social Responsibilities of a Business?

13. Explain the key features of consumer protection and consumerism in India.

14. "The global business environment is significantly influenced by WTO" —Elucidate.

15. Elaborate the technology trends in India.

DISTANCE EDUCATION

M.B.A. (L.M) DEGREE EXAMINATION, DECEMBER 2013.

Second Semester

BUSINESS RESEARCH

Time : Three hours Maximum : 100 marks

PART A — (5 × 8 = 40 marks)

Answer any FIVE questions.

All questions carry equal marks.

1. Distinguish between Descriptive Research and experimental Research.

2. Distinguish between census and sampling.

3. What is questionnaire pre-testing?

4. Distinguish between processing of data and analysis of data.

5. What is stratified random sampling?

6. Distinguish between Technical report and non-technical report.

7. Explain "survey method" of collecting data, and bringout its merits and demerits.

8. Based on the information on 1,000 randomly selected fields about the tenancy status of the cultivators and use of fertilizers collected in an agro-economic survey, the following classification was noted.

	Owned	Rented	Total
Using fertilizers	416	184	600
Non-using fertilizers	64	336	400
Total	480	520	1,000

Would you conclude that owner-cultivator is more inclined towards the use of fertilizers at 5% level? Work out Chi-square test as a testing procedure?

PART B — (4 × 15 = 60 marks)

Answer any FOUR questions.

All questions carry equal marks.

9. Discuss the applications of Research in various functions of Management.

10. Explain different types of scaling techniques.

11. Two different nutritional supplements are used on a sample of eight boxers. The strength of the boxers was then measured on a 100 point scale. The recorded data for eight boxers is as follows :

Boxer :	1	2	3	4	5	6	7	8
Strength after supplement 1 :	49	32	44	48	51	34	30	42
Strength after supplement 2 :	40	45	50	43	37	47	55	57

The researcher would like to test the hypothesis that the two supplements yield the same median strength. Test at 5 percent level of significance.

12. What do you mean by sampling design? What points should be taken into consideration while developing the sampling design for studying the problems of domestic airline passenger.

13. You have been assigned the task of measuring the job satisfaction of Blue Collar Employees in your organization. Design a suitable questionnaire to measure the same.

14. Distinguish between parametric and non-parametric tests with examples.

15. Discuss the various types of sampling techniques.

GLOBAL BUSINESS AND MNC'S

Time : Three hours Maximum : 100 marks

SECTION A — ($5 \times 8 = 40$ marks)

Answer any FIVE questions.

All questions carry equal marks.

1. Explain the concept of International Business.

2. Define FDI? State the benefits of FDI.

3. Discuss about commercial and regulatory documents.

4. What are the forms of foreign collaboration?

5. Brief about WTO and Global Trade.

6. Write an essay on environmental aspects in International Trade.

7. Explain about Regional Trade associations.

8. Write a short note on Multilateral Investment guarantee agency and global investment.

SECTION B — (4 × 15 = 60 marks)

Answer any FOUR questions.

All questions carry equal marks.

9. Explain the factors influencing International Business.

10. Explain about foreign Technological Transfer.

11. Explain the procedure for availing credit Insurance.

12. Write a note on strategic merger and Joint ventures.

13. Explain about antidumping and countervailing duties of WTO.

14. Write a note on NAFTA and European Union.

15. Explain about the World Intellectual property organization and global innovation.

MODERN LOGISTICS OPERATIONS

Time : Three hours Maximum : 100 marks

PART A — (5 × 8 = 40 marks)

Answer any FIVE questions.

1. What is tracking inward shipments?

2. How does logistics support market forcasting?

3. Explain vendor managed inventory for vendors and the firm.

4. Write a note on invoice documentation and outbound documentation.

5. How are the goods delivered to distribution centers and retail outlets?

6. What is the role of call centers in supporting logistics service providers?

7. Explain the logistics of time and quality perishable products.

8. What is Automatic Identification Technology?

PART B — (4 × 15 = 60 marks)

Answer any FOUR questions.

9. Explain in detail the different inventory management systems.

10. How does logistics support order fulfillment consignment covergence/divergency and delivery effected?

11. What are the documents related to import logistics?

12. What is supply chain engineering? How does it support logistic function?

13. What are the steps involved in life cycle logistics for projects and products?

14. How does the ESI system help in supply chain standards system?

15. "Use of IT in logistics resource management system support the better management of logistics" – validate.

PACKING AND PACKAGING MANAGEMENT

Time : Three hours Maximum : 100 marks

PART A — (5 × 8 = 40 marks)

Answer any FIVE questions.

All questions carry equal marks.

1. Explain the tests you would conduct for 'packaging'.

2. Define packaging. Mention 5 P's of Packaging Entities. Discuss how packaging is a tool for sales promotion.

3. Explain the role of load securing in unitization. What is the difference between rigid and non-rigid containers?

4. Explain the costs involved in Packaging for two consumer goods with suitable examples.

5. A firm is devoted towards eco-friendly packaging. Show how to put to use R3 Technology for reducing the wastages.

6. Which type of packaging systems would you employ for commodities like milk, tea, fruit juices and potato chips? Explain briefly.

7. Describe the New Shipping Policy Package for Indian shipping.

8. Explain different types of proof packaging. Whether proof packaging is different from child-resistant packaging?

PART B — ($4 \times 15 = 60$ marks)

Answer any FOUR questions.

All questions carry equal marks.

9. Explain the meaning, functions and essentials of packaging and distinguish how these aspects are different from packing, with suitable examples.

10. Discuss the laws governing consumer protection with respect to packaging.

11. Explain the applications of traditional packing and packaging materials that are used currently and discuss the trends that are emerging to replace them.

12. What are the design considerations in packaging? Explain in detail.

13. Write short notes on :

    (a) Bar code technology

    (b) Packing of perishable products

    (c) RF tags and

    (d) Packaging standards.

14. Explain how packaging processes are automated in packaging industry, with a suitable example.

15. Discuss the latest technology trends in packaging industry of consumer and industrial goods.

RAIL – ROAD LOGISTICS

Time : Three hours Maximum : 100 marks

PART A — (5 × 8 = 40 marks)

Answer any FIVE questions.

All questions carry equal marks.

1. Explain the inter-relationships between transportation and logistics?

2. What are the typical freight loads that are carried by Indian Railways?

3. What do you understand by the term 'reverse logistics' in road logistics?

4. What are the factors that influence the choice of roadways logistics?

5. Show that technology had contributed to container movement in rail and road logistics?

6. What is freight consolidation and what are its advantages?

7. How outsourcing of roadways fleet could be cost effective? Explain.

8. What is the role of supply chain partners in rail and road segments?

PART B — ($4 \times 15 = 60$ marks)

Answer any FOUR questions.

All questions carry equal marks.

9. Discuss in detail the processes involved in in–bound and out–bound logistics.

10. In India, the most significant way of transportation is Road. What is the reason for this supremacy?

11. Explain the features of railway logistics and the logistical facilities offered by Indian railways.

12. Discuss the principles governing the freight rate determination of rail cargo.

13. Why should Roadways and Railways need to grow together for sustainable logistics network in India?

14. Discuss the problems and future prospects of inter-state road logistics.

15. Write short notes on

    (a) Dedicated Freight Corridor

    (b) Container Rail and

    (c) Freight Train.

STRATEGIC LOGISTIC MANAGEMENT

Time : Three hours Maximum : 100 marks

PART A — (5 × 8 = 40 marks)

Answer any FIVE questions.

1. State the role of logistics strategists.

2. What is the value added logistics services?

3. Explain the various logistics environmental scanning techniques.

4. How to develop a strategic logistics advantage profile?

5. Discuss the highlights of Porter's framework of competitive strategies.

6. What is the step involved institutionalizing strategy?

7. Distinguish between strategic mission and vision in logistics management.

8. Write short notes on "Logistics in Just in Time".

PART B — (4 × 15 = 60 marks)

Answer any FOUR questions.

9. Explain the logistics strategic management process with suitable practical examples.

10. Describe the impact of price competition in logistics.

11. Do the SWOT analysis for logistics Management in BSNL (or) ONGC.

12. Write about condition and risk of cost leadership, Differentiation and focus strategies.

13. Explain the different types of logistics service partner.

14. What do you mean by corporate level logistics strategies? Explain them.

15. Explain the Simons' Seven Strategy question for implementation.

IT FOR LOGISTICS MANAGEMENT

Time : Three hours Maximum : 100 marks

PART A — (5 × 8 = 40 marks)

Answer any FIVE questions.

All questions carry equal marks.

1. Distinguish between Internet and intranet usage in Logistics management, with an example.

2. List some of the features of word processing application in Logistics management.

3. Write short note on mobile commerce.

4. Explain the infrastructural requirements of E-business.

5. Write short note on Bull Whip effect.

6. How would you use e–advertisement in Logistics management. Illustrate with an example.

7. Manufacturers are better candidates for IT application in Logistics management than service organizations. Justify the statement.

8. Briefly explain ERP systems as an inter–organizational information system in Logistics management.

PART B — (4 × 15 = 60 marks)

Answer any FOUR questions.

All questions carry equal marks.

9. Discuss the impact and benefits of IT elements in logistics management.

10. What potential benefits could be one use of Internet based technologies bring to the Logistics management?

11. What do you understand by 'Bullwhip effect'? Mention some factors that contribute towards bullwhip effect. Also suggest some method by which one can reduce this effect.

12. Discuss how information technology can support decision making in marketing, production, purchase management functions.

13. Discuss the types of E-Business in detail.

14. Assume that you are working as an inventory manager for a Logistics organization. Develop an IT system for inventory management and control system.

15. Discuss the role of ERP in integrating the operating functions of a company.

BUSINESS LAWS

Time : Three hours Maximum : 100 marks

PART A — (5 × 8 = 40 marks)

Answer any FIVE questions.

All questions carry equal marks.

1. Explain the essential elements of a valid contract.

2. What is a quasi contract? Explain the different types of quasi contracts.

3. Distinguish between 'indemnity' and 'guarantee'.

4. Define Negotiable Instruments. Explain the features of negotiable instruments.

5. What are the different types of policies in life insurance?

6. What are the various circumstances in which a firm may be dissolved?

7. State the doctrine of 'Caveat Emptor' and exceptions to it.

8. How companies are classified on the basis of incorporation?

PART B — (4 × 15 = 60 marks)

Answer any FOUR questions.

All questions carry equal marks.

9. Discuss the classifications of contract.

10. Discuss the different modes in which the authority of an agent may terminate.

11. Who is an unpaid seller? What are his rights against the goods and the buyer?

12. Define a contract of insurance and explain its principles.

13. Explain the procedure for getting a partnership firm registered. What are the consequences of non-registration of a firm?

14. Discuss the powers and duties of a director of a company under the companies Act, 1956.

15. A is the husband of B and B is the wife of A. B forged the signature of her husband on 40 cheques at the rate of 10 cheques per month and cashed all the cheques. A was not aware of the forgeries and came to know of the forgery from his wife months after the forgery and that too his wife only informed him of the same. A informed the Bank of the forgery and the same night his wife committed suicide. A wanted the bank to return the amount paid to his wife. Answer the following questions:

    (a) Will 'A' get the money back from the bank?

    (b) Whether the bank was right in paying the cheques to A's wife?
