FOUR-DAY ENTREPRENEURSHIP CAMP FOR SCHOOL STUDENTS

The inaugural function of a Four-day Camp for School Students on the importance of Entrepreneurship was held today (19.06.2018) at Alagappa University. The programme titled "**Mission Possible : Create Entrepreneurs from Seeds**" is being conducted by the Department of Women's Studies, Alagappa University, Karaikudi in collaboration with Entrepreneurship Development and Innovation Institute, Government of Tamil Nadu, Chennai, from 19.06.2018 to 22.06.2018.

The purpose of this school camp programme is to **educate, train and empower** the next generation entrepreneurs to become productive individuals, conducting fruitful enterprises; and it also aims at making them lead meaningful lives of integrity, serving others and making the world a better place to live in. Besides lectures by expert trainers, management games and field and industrial visits would be conducted as part of the programme to create awareness among them

on the importance of becoming entrepreneurs so as to contribute to their own progress and also to the development of the nation.

Prof.K.Manimekalai, Dean, Faculty of Arts, in her welcome address, referring to the significance of the programme, stated that building a society which encourages young entrepreneurs for social development and national progress has become imperative in the current employment scenario. She asserted that young entrepreneurs with innovative ideas, time management, entrepreneurial skills and incredible self confidence are needed for sustainable development of the nation. This Entrepreneurial School Programme, she hoped, would provide ample opportunities to students to learn the concept of entrepreneurial skills and to build the mindset required to solve real-world problems.

Presiding over the function, Prof.N.Rajendran, Vice-Chancellor, Alagappa University, pointed out the importance of imparting entrepreneurship training to the young school students along with their regular studies. "Spreading entrepreneurial skills among school students would result in long term benefit", he observed. He said that any idea powerfully conveyed to school students would easily get imprinted on their minds and he contended that training of entrepreneurial skill at this stage is very appropriate. He further stated that entrepreneurship education benefits students from all socio-economic backgrounds as it teaches kids to think outside the box and nurtures unconventional talents and skills. He appealed to the trainers, besides giving training to the participants, present interesting case studies to them. The study of the history of world-class entrepreneurs would reveal how they started their business ventures on a small scale and how they faced innumerable challenges to sustain and to develop their business over the years.

The Vice-Chancellor said that many of the women entrepreneurs are doing extremely well in their business by adopting innovative strategies. The programme, he added, would help the school students to learn the fundamentals of entrepreneurship, creative problems-solving, delivering an effective elevated pitch, understanding start-up financials and writing a business plan and also help the students to take their business ideas from concept to reality.

Dr.P. Veeramani, Assistant Professor, Department of Women's Studies, proposed a vote of thanks. 60 school students from six schools of Karaikudi region are participating in this camp.
