SYLLABUS FOR

M.A. INTEGRATED HOME SCIENCE

(2019 Onwards)

DEPARTMENT OF WOMEN'S STUDIES

ALAGAPPA UNIVERSITY

{Accredited with 'A+' Grade by NAAC (CGPA: 3.64) in the Third Cycle}

KARAIKUDI - 630 003, SIVAGANGAI

TAMIL NADU

ALAGAPPA UNIVERSITY, KARAIKUDI – 630 003

CHOICE BASED CREDIT SYSTEM (CBCS)

&

CREDIT FRAMEWORK FOR M.A. INTEGRATED HOME SCIENCE

REGULATIONS

(Applicable to all the candidates admitted from the academic year 2019-20 onwards)

1. ELIGIBILITY:

i) For Admission: A pass in the Higher Secondary Examination (Academic / Vocations Stream) conducted by the Government of Tamil Nadu.

2. DURATION:

The course is for a period of five years. Each academic year shall comprise of two semester viz. Odd and Even semesters. Odd semesters shall be from June / July to October / November and Even Semesters shall be from November / December to April /May. There shall be not less than 90 working days which shall comprise 450 teaching clock hours for each semester. (Exclusive of the days for the conduct of University end-semester examinations).

i) The M.A. Integrated Home Science course is for a period of five years.

The M. A. Integrated Home Science course has single entry and double exit points. Thus, the students can opt to leave (if passes the examinations) in the following stages with appropriate B.A Home Science /M.A. Integrated Home Science as indicated in Table 1:

Part I Credits	Part II **Credits**	Part III Credits	Part IV **Credits**	Part V **Credits**	Total Credits for Award	Normal Duration	Exit Points/ Awards
12	12	95	20	1	140	Six Semesters	B.A. Home Science
-	-	90 (Core, Elective& Non Major Elective)	-	-	90	Four Semesters	M.A. Integrated Home Science

For the Degree (B.A. Home Science): The candidates shall have subsequently undergone the prescribed course of study for a period of not less than three academic years, passed the examinations prescribed and fulfilled such conditions as have been prescribed therefore.

For the Degree (M.A Integrated Home Science): The candidates shall have subsequently undergone the prescribed course of study for a period of not less than five academic years, passed the examinations prescribed and fulfilled such conditions as have been prescribed therefore.

3. THE CBCS SYSTEM:

All programmes (named after the core subject) mentioned earlier shall be run on Choice Based Credit System (CBCS). It is an instructional package developed to suit the needs of students to keep pace with the developments in higher education and the quality assurance expected of it in the light of liberalization and globalization in higher education.

4. COURSES IN PROGRAMMES:

A. Courses in UG Programmes

The UG & PG programme consists of a number courses. The term 'course' is applied to indicate a logical part of the subject matter of the programme and is invariably equivalent to the subject matter of a 'paper' in the conventional sense. The following are the various categories of courses suggested for the UG programmes.

Part I – Language Courses (LC) (Tamil special subjects designed in lieu of the above).

Part II – English Language courses (ELC) or special subject designed in lieu of.

The Language courses and English Language Courses are 4 each in number and the LC and ELC are meant to develop the students' communicative skill at the UG level. Core courses are the basic courses compulsorily required for each of the programme of study.

Part III includes Core Course (CC), Allied Course (AC) and Elective Course (EC).

I. Core courses are the basic courses compulsorily required for each of the program of study. These will be related to the subject of programme in which the candidate gets his / her degree. The number of Core Courses shall be 15.
II. Allied Courses cover preferably two disciplines that are generally related to the main subject of the programme. Each discipline shall provide 4 Allied Courses.
III. Elective Courses are three in number for the UG programme. The programme shall provide three set of Elective Courses (each set contain 2 Elective courses). Out of which, a student is required to choose three Elective courses from the options given in the respective Discipline. Six Elective Courses are given to the students. A student shall choose three Elective Courses from the list of Elective Courses offered at their respective disciplines.

Selection of students to the EC:

The Department Committee shall follow a selection procedure on a first come first served basis, fixing the maximum number of students, giving counselling to the students etc. to avoid overcrowding to particular course (s) at the expense of some other courses. The Colleges shall provide all information relating to the ECs in each programme to all the students so as to enable them to choose their ECs.

Part IV: It consists of five categories:

I. Those who have not studied Tamil upto XII standard and taken a Non-tamil language under Part I shall take Tamil comprising of two courses (level will be at 6th Standard).
b) Those who have studied Tamil upto XII standard and taken a non-tamil language under Part I shall take advanced Tamil comprising of two core subjects.

II. Two Non –Major Elective in Third and Fourth Semester

III. Skill-based Subjects: In order to enhance the employability skills of the students Skill Based Subjects are included from third semesters.

IV. UGC sponsored Ability enhancement compulsory course(AECC): Environmental studies course in Second Semester

V. Value Education in First Semester

Part V Extension and Extra Curricular Activities: These should be carried out outside the class hours

SEMESTERS: An academic year is divided into two Semesters. In each semester, courses are offered in 15 teaching weeks and the remaining 5 weeks are to be utilized for conduct of examinations and evaluation purposes. Each week has 30 working hours spread over 5 / 6 days a week.

B. Courses in PG programme

The following are the various categories of courses suggested for the PG programmes.

I. CORE COURSES (CC) 13 papers for project pattern

II. ELECTIVE COURSES (EC) 3 in the Semester I, II and III

III. NON - MAJOR ELECTIVE COURSES (NME) in the Semester II and III

IV. SELF LEARNING COURSES (SLC) under MOOCs in the Semester II and III

V. Project Work (PW) in the Semester IV

i) A candidate who does not pass the examination in any course(s) may be permitted to appear in such failed course(s) in the subsequent examinations to be held in October / November or April / May. However candidates who have arrears in Practical shall be permitted to take their arrear Practical examination only along with Regular Practical examination in the respective semester.

ii) A candidate should get registered for the first semester examination. If registration is not possible owing to shortage of attendance beyond condonation limit / regulation prescribed OR belated joining OR on medical grounds, the candidates are permitted to move to the next semester. Such candidates shall re-do the missed semester after completion of the programme.

iii) Viva-Voce: Each candidate shall be required to appear for Viva-Voce Examination (in defense of the Project only).

iv) For the Project Report, the maximum marks will be 75 percent for project report evaluation and for the Viva-Voce it is 25 percent (if in some programmes, if the project is equivalent to more than one course, the project marks would be in proportion to the number of equivalent courses).

v) The results of all the examinations will be published through the University Department where the student underwent the course as well as through University Website.

5. CREDITS:

The term 'credit' refers to the weight age given to a course, usually in relation to the instructional hours to it. For instance, a six hour course per week is assigned five/ four credits, four / five hour course per week is assigned four / three credits and two hour course per week is given two credits. However, in no instance the credits of a course can be greater than the hours allotted to it.

The total minimum credits, required for completing a UG programme is 140. The details of credits for individual components and individual courses are given in Table – 2

The total minimum credits, required for completing a PG programme is 90.The details of the number of courses and credits per course for PG programmes are given in Table -3.

6. COURSE:

Each course is to be designed variously under lectures / tutorials / laboratory or field work / seminar / practical training / Assignments / Term paper or Report writing etc., to meet effective teaching and learning needs.

7. CONDONATION:

Students must have 75% of attendance in each course for appearing the examination. Students who have 74% to 70% of attendance shall apply for condonation in the prescribed form with the prescribed fee. Students who have 69% to 60% of attendance shall apply for condonation in prescribed form with the prescribed fee along with the Medical Certificate.

Students who have below 60% of attendance are not eligible to appear for the examination. They shall re-do the semester(s) after completion of the programme.

8. QUESTION PAPER PATTERN:

Core & Allied Papers

Part A

Ten questions (No choice) 10 x 2 = 20 marks

Two questions from each unit

Part B

Five questions (either or type) 5 x 5 = 25 marks

One question from each unit

Part C

Three questions out of five 3 x 10 = 30 marks

One question from each unit

Distribution of marks between Theory, Practical and Project:

Core / Skill Based	Int.	Ext.	Total
Theory papers	25	75	100
Practical papers	25	75	100
Internship	25	75	100
Project work	25	75	400

9. EVALUATION:

The performance of a student in each course is evaluated in terms of percentage of marks with a provision for conversion to grade points. Evaluation for each course shall be done by a continuous internal assessment by the concerned course teacher as well as by an end semester examination and will be consolidated at the end of the course. The components for continuous internal assessment are:

Two tests	-	15 marks (third / repeat test for genuine absentees)
Seminar / Quiz	-	5 marks
Assignments	-	5 marks
	---	---
Total	-	25 Marks

Attendance need not be taken as a component for continuous assessment, although the students should put in a minimum of 75% attendance in each course. In addition to continuous evaluation component, the end semester examination, which will be a written type examination of at least 3 hours duration, would also form an integral component of the evaluation. The ratio of marks to be allotted to continuous internal assessment and to end semester examination is 25 : 75. The evaluation of laboratory component, wherever applicable. Will also be based on continuous internal assessment and on an end-semester practical examination.

10. PASSING MINIMUM:

The passing minimum for CIA shall be 40% out of 25/15* marks (i.e.10/6* marks) in Theory papers and 40% out of 40/10* marks (i.e. 16/4* marks) in Practical Examinations.

Failed candidates in the Internal Assessment are permitted to improve their Internal Assessment marks in the subsequent semesters. (2 chances will be given) by writing test and by submitting Assignments.

The passing minimum for University Examinations shall be 40% out of 75 marks (i.e. 30 marks) for Theory papers and 40% out of 60 marks (i.e. 24 marks) for Practical papers.

11. GRADING

Once the marks of the CIA and end-semester examinations for each of the courses are available, they will be added. The marks thus obtained will then be graded as per details provided in Table 4.

Computation of SGPA and CGPA: Following procedure to compute the Semester Grade Point Average (SGPA) and Cumulative Grade Point Average (CGPA) may be adopted:

- The SGPA is the ratio of sum of the product of the number of credits with the grade points scored by a student in all the course components taken by a student and the sum of the number of credits of all the courses undergone by a student, i.e.

  $$SGPA(Si) = \sum (CixGi) / \sum Ci$$

  Where 'Ci' is the number of credits of the ith course component and 'Gi' is the grade point scored by the student in the ith course component.

- The CGPA is also calculated in the same manner taking into account all the courses undergone by a student over all the semesters of the programme, i.e.

  $$CGPA = \sum (CixSi) / \sum Ci$$

Where 'Si' is the SGPA of the ith semester and 'Ci' is the total number of credits in that semester.

- The SGPA and CGPA shall be rounded off to 2 decimal points and reported in the transcripts.
- UGC guidelines on Choice Based Credit System (CBCS) may be referred for further illustration on computation of SGPA, CGPA etc.

12. CLASSIFICATION OF FINAL RESULTS (TABLE – 4)

For each of the three parts, there shall be separate classification on the basis of CGPA as indicated in Table – 5.

13. CONFERMENT OF THE DEGREE

A candidate shall be eligible for the conferment of the Degree of Bachelor of Arts only if he / she has earned the minimum required credits for the programme prescribed therefore (i.e.140 credits).

A candidate shall be eligible for the conferment of the Degree only after he / she has earned the minimum required credits for the programme prescribed therefore (i.e.90 credits).

14. RANKING: UNIVERSITY EXAMINATION

The top scorer in the Semester Examinations would be declared as University Rank Holders. Rank Certificate will be issued for a Programme.

15. Revision of Regulations and Curriculum

The University may from time to time revise, amend and change the Regulations and Curriculum, if found necessary.

Outcomes	

Course Teacher

Dept of English

Semester -I			
Course code: 4531C1	**Core I: PRINCIPLES OF FOOD SCIENCE**	Credits: 5	Hours: 6

Objectives	➢ To obtain knowledge of different food groups and their nutritional value. ➢ To gain experience in the preparation of food.
Unit - I	Introduction to Food Science a. Definitions - Food, Nutrients. b. Classification of foods and nutrients, based on their functions – energy yielding, body building and regulative. c. Basic food groups - IV, V (ICMR) & VII, Balanced Diet.
Unit - II	Food Preparation Techniques a. Preliminary techniques – Cleaning, Peeling & Stringing, Cutting & Grating, Soaking, Processing, Sieving, Coating, Blanching, Marinating, Roasting, Grinding and Sprouting. b. Moist heat – Boiling, Simmering, Poaching, Stewing, Steaming, Pressure Cooking; Dry Methods - Baking, Roasting, Toasting, Grilling c. Microwave and Solar cooking d. Different methods of cooking and their influence on nutrient retention
Unit - III	Cereals Pulses Nuts and Oil seeds a. Cereals – Rice & Wheat-– Structure, Milling, Parboiling, by-products; nutritive value, storage. Role of cereals in cookery b. Pulses - Structure, nutritive value, sprouting, presence of toxic substances, storage. Role of pulses in cookery c. Nuts and oilseeds – nutritive value and its importance in meals.
Unit – IV	Fruits Vegetables spices and condiments a. Fruits - Classification, nutritive value, role of fruits in human nutrition. b. Vegetables - Classification according to structure, nutritive value, effect of heat, acid and alkali, storage and conservation of nutrients, role of vegetables in cookery. c. Spices and condiments – uses and abuses, role of spices and condiments in cookery.
Unit - V	Animal Food a. Milk and Milk products, nutritive value, physical properties, processing of milk, role of milk in cookery. b. Flesh Foods – meat, fish and poultry – classification, nutritive value – methods of cooking, role of flesh foods in meal c. Egg, structure, composition, uses in diet.

Orient Blackswan, Delhi.			
Outcomes	Enable the students to ➢ Understand the basic principles and practices of cleaning and sanitation in food preparation. ➢ Know about the cooking methods,principles of menu planning and food presentation		

Course Teacher
P.Venkateswari
Dr.P.Veeramani

Semester -I			
Course code: 4531A1	**BASICS OF TEXTILES AND CLOTHING**	Credits: 4	Hours: 4

Objectives	➢ To understand the basics of Textiles and Clothing ➢ To impart knowledge on different textile finishes.
Unit - I	Introduction to the Field of Textiles - Major Goals - Classification of Fibres - Natural & Man Made - Primary and Secondary Characteristics of Textile Fibres
Unit - II	Manufacturing Process, Properties and uses of Natural Fibres - Cotton, Linen, Jute, Pineapple, Hemp, Silk, Wool, Hair Fibres, Man-Made Fibres-Viscose Rayon, Nylon, Polyester.
Unit - III	Spinning - Definition, Classification. Spinning - Blending, Opening, Cleaning, Doubling, Carding, Combing, Drawing, Roving. Yarn - Definition, Classification - Simple and Fancy Yarns, Sewing Threads and its importance.
Unit – IV	Wovens - Basic Weaves - Plain, Twill, Satin. Fancy Weaves - Pile, Double Cloth, Leno, Swivel, Lappet, Dobby and Jacquard.Knitting –Warp and Wet Knitting.
Unit - V	Non-wovens - Felting, Fusing, Bonding, Lamination, Netting, Braiding & Calico, Tatting and crotcheting

Outcomes	Enable the students to ➢ Get basic knowledge on basic textiles and manufacturing processing ➢ Gain in depth knowledge on cloths, fibres and yarn.

Course Teacher

Prof.K. Manimekalai

Semester -I			
Course code: 4531VE	**INTRODUCTION TO GENDER STUDIES**	Credits: 2	Hours: 2
Objectives	➢ To introduce women's studies as an academic discipline ➢ To explain changing trend in the status of Women		
Unit - I	Gender studies: Definition - Scope of gender studies - Interdisciplinary nature of Gender studies, Gender studies Vs Women's studies, Need for Gender as an academic category.		
Unit - II	Gender concepts: Gender Vs Sex – Understanding patriarchy – Gender roles- Stereotypes- Equity Vs Equality-– Gender discrimination-Gender violence - Gender awareness – Gender sensitization and training.		
Unit - III	Women's Status in the Family; Patriarchal- Matriarchal –Joint –Nuclear Family –Socialization –Internalization.		
Unit – IV	Gender and Education –Enrolment Pattern – Primary to Higher Education – literacy Rates - Drop-out Rates - Educational Policy in India		
Unit - V	Gender Division of Labour – Women Triple Role - Unpaid labour- Women in Organised and Unorganised Sectors		
Reference and Textbooks: ➢ Neera Desai,Vina Mazumdar and Kamalini Bhansasli. From Women's Education to Women's Studies: a Long Drawn Struggle for Legitimacy and Influence, New Delhi: Indian Association for Women's Studies. ➢ Robinson, Victoria and Diane, Richardson. (1993). Introducing Women's Studies: Feminist Theory and Practice. London: Macmillan. ➢ Ann Oakley (1972).Sex and Gender and Society, London; Temple smith. ➢ Brike, Lynda (1987) Women, Feminism and Biology, The Feminist Challenge, Brighton; Harvester press. ➢ Mittal Mukta (1995).Women power in India. New Delhi: Indian Association of Women's Studies.			
Outcomes	Enable the students to ➢ Gain knowledge on gender studies and gender concepts ➢ Aware about the gender gap in education and work force participation

Semester -II			
Course code: 4532C1	**CORE III: PRINCIPLES OF CHILD DEVELOPMENT**	Credits: 5	Hours: 6
Objectives	➢ To become knowledgeable about the basic concepts in Child Development ➢ To inculcate the growth processes taking place from conception to Late childhood		
Unit - I	Pre-natal Development: the beginning, conception, period of prenatal development, factors affecting & hazards of prenatal period. Infancy: The newborn, characteristics, major adjustment of infants, factors influencing adjustment to post natal life, developmental trends & hazards.		
Unit - II	Baby hood: Characteristic & developmental tasks of babyhood, Physical, mental, motor, speech, emotional, social, moral and personality development, during baby hood period. Early interest in play, family relationship development in babyhood period, Hazards & happiness of baby hood period.		
Unit - III	Early childhood: Characteristic & developmental tasks of early childhood, physical, mental, motor, speech, emotional, social moral & personality development during early childhood period. Play & common interest in early childhood period, Family relationship in early childhood, Hazards & happiness in early childhood period.		
Unit – IV	Late childhood: Characteristic & developmental tasks of late childhood, physical growth, motor skills, speech development, emotional development, expressions pattern of socialization, play interest, moral, personality development& Development of understanding during late childhood period, common interest in family relationship during late childhood, Hazards & happiness in late childhood period.		
Unit - V	Children with special needs: Definition, classification, characteristics of special children, Physical, emotional and social development of children with special needs and rehabilitation.		
Reference and Textbooks: ➢ L.E.Berk Basten-Allyn & Bacon, Child Development, London. ➢ E.B.Harlock. Developmental Psychology ➢ P.H.Mussen, J.J. Conger & J.Kagan, A.C.Huston. Child Development & personality, Harper & Row Publications, New York. ➢ F.P.Rice. Human Development, Perntice Hall, New Jersey. ➢ M.Cole & S.Cole. The Development of Children- Scientific American Books- Freeman & Co, New York			
Outcomes	Enable the students to ➢ Understand the growth processes taking place from conception to Late childhood ➢ Know about the development of children with special needs and rehabilitation		

Course Teacher

Prof.K. Manimekalai

Semester -II			
Course code: 4532C2	**Core IV: FABRIC SUFACE ORNAMENTATION (P)**	Credits: 4	Hours: 8
Objectives	➢ To become knowledgeable on traditional embroidery types in India ➢ To learn about the preparation for fabric surface embellishment		
Unit - I	**Introduction to Embroidery and Indian Traditional embroidery motifs (only theoretical inputs).**Theoretical/ Tutorial and Self-study inputs **Andhra Pradesh:** Banjara Embroidery – Bihar: Kantha Embroidery Sujani Embroidery **Tamil Nadu:** Conventional Embroidery - Toda Embroidery (Pukhoor) **Uttar Pradesh:** Chikankari Embroidery – Mukaish/ Badla Embroidery - Patti ka kaam Embroidery (Aligarh) **West Bengal:** Kantha Embroidery		
Unit - II	**Gujarat:** Ahir Embroidery - Banni/ Heer Bharat Embroidery - Jat Embroidery - Kanbi Embroidery - Kathi Embroidery - Khaarek Embroidery - Kutch Embroidery - Mirror Embroidery - Ari Embroidery - Mutwa Embroidery - Pakko Embroidery - Rabari Embroidery - Suf Embroidery - Ahir Embroidery - Banni/ Heer Bharat Embroidery - Jat Embroidery - Kanbi Embroidery - Kathi Embroidery - Khaarek Embroidery - Kutch Embroidery - Mirror Embroidery - Ari Embroidery - Mutwa Embroidery - Pakko Embroidery - Rabari Embroidery - Suf Embroidery - Bead Embroidery		
Unit - III	**Himachal Pradesh:** Chamba Rumal Embroidery **Jammu & Kashmir:** Kashidakari Embroidery - Crewel Embroidery - Sozni/ Dorukha Embroidery **Karnataka:** Lambani Embroidery - Kasuti Embroidery **Manipur:** Shamilami Embroidery - Hijaya Mayek Embroidery **Odisha:** Pipli Applique Embroidery **Punjab:** Phulkari Embroidery - Bagh Embroidery **Rajasthan:** Dabka Embroidery - Danka Embroidery - Gota Patti Embroidery - Karchobi Embroidery - Meo Embroidery – Pichwai		
Unit – IV	**Practical: Embroidery and Handwork** a. Running and its variations b. Back stitch c. Stem stitch d. Chain stitch and its variations e. Lazy daisy stitch f. Button hole and its variations g. Herring bone and its variations h. Knots and their variations i. Straight stitch		

Unit - V	**Practical: Embroidery and Handwork** a. Feather stitch b. Couching c. Appliqué work d. Cut work e. Patch work f. Beads Work g. Sequins Work h. Ribbon work
Reference and Textbooks: • Shailaja D.Naik. (1996). Traditional Embroideries of India, S.B. Nangia for A.P.H. Publishing Corporation. • Anne Morrell (1995). The Techniques of Indian Embroidery, Interweave Press Inc. • Bhatnagar, P. (2004). Traditional Indian Costumes & Textiles, Abhishek Publications, Chandigarh. • Lehri, R.M. (2011) Indian Embroidery Ethnic and Beyond. Super Book House, Mumbai.	
Outcomes	Enable the students to ➢ Assimilate with various Traditional embroidery types in India ➢ Understand the preparation for fabric surface embellishment

Course Teacher

Prof.K. Manimekalai

Semester -II			
Course code: 4532A2	**ALLIED II: PRINCIPLES OF BIOCHEMISTRY**	Credits: 4	Hours: 4
Objectives	➢ To understand the basic concepts in food biochemistry ➢ To study about the biochemical pathways and their relevance to the life		
Unit - I	Carbohydrates - Classification, monosaccharide's, oligosaccharides, polysaccharides, structure and configuration of aldose, ketoses, triose, tetrose, pentose, hexose, Polysaccharides- Homo-starch, insulin, glycogen, cellulose, Heteropolysaccharides		
Unit - II	Lipids - Classification of lipids, fatty acids, essential fatty acids, triglycerols, phospholipids, glycolipids, lipoprotein, sterols, amphipathic lipids, fatty acid oxidation (β-oxidation), Functions, sources and requirements.		
Unit - III	Amino acids and Proteins Amino acid, classification, properties, essential amino acid, structure of proteins- primary, secondary, tertiary, quaternary structure of proteins; protein denaturation.		
Unit – IV	Enzymes and Vitamins Enzymes: Nomenclature and classification, kinetics of enzymic reactions, types of enzymes, enzyme inhibition, reversible inhibition, irreversible inhibition, conditions affecting enzymatic reactions, co-enzymes. Vitamins: classification, functions, requirement and deficiency conditions, vitamin A, D, E, K, Ascorbic acid, Thiamine, Riboflavin, Niacin, Pyridoxine, Folic acid, Pantothenic acid, cyanocobalamine		
Unit - V	Metabolism of Carbohydrates and Proteins Glycolysis and Tricarboxylic acid (TCA) cycle, HMP shunt, Gluconeogenesis Transamination, deamination, urea cycle.		
Reference and Textbooks: • Berg, J.M., Tymocezko,J. L. (2007) Biochemistry (6th ed.). W H Freeman and Company,ϖ New York. • Das, D. (1992). Biochemistry (7th ed.).Academic publishers, Calcutta. • Jain, J.L. (2001). Fundamentals of Biochemistry (5th ed). S.Chand and Company Ltd. • Satyanarayana,U. and Chakrapani,U. (2006). Biochemistry (3rd ed.). Books and Allied Pvt Ltd, Kolkata.			
Outcomes	Enable the students to ➢ Understand the basic concepts in food biochemistry ➢ Know about the classification of macro nutrients and its enzymatic reactions		

Course Teacher
R.Ramya

Dr.P.Veeramani

Semester -II			
Course code: 4532ES	**AECC -ENVIRONMENTAL STUDIES**	Credits:2	Hours: 2
Objectives	➢ To gain knowledge on the various types of natural resources, its uses and degradation. ➢ To understand the terms of pollution and pollutant and effect of pollution on environment and health		
Unit - I	The Multidisciplinary Nature of Environmental Studies Definition, Scope and importance Need for public awareness		
Unit - II	Natural Resources Renewable and non-renewable resources a) Forest Resources: Use and over-exploitation, deforestation, case studies, Timber extraction, mining, dams and their effect on forests and tribal people b) Water Resources: Use and over-Utilization of surface and ground water, floods, drought, conflicts over water, dams- benefits and problems. c) Mineral resources: Use and exploitation, experimental effects of extracting and using mineral resources, case studies. d) Food resources: world food problems, changes caused by agriculture and overgrazing, effects of modern agriculture, fertilizer-pesticide problems, water logging, salinity, case studies. e) Energy resources: Growing energy needs, renewable and non-renewable energy sources, use of alternate energy resources, Case studies. f) Land resources: Land as a resource, land degradation, main induced landsides, soil-erosion and desertification • Role of individual in conservation of natural resources • Equitable use of resources for sustainable lifestyle		
Unit - III	Ecosystems, Bio-diversity and its conservation Ecosystems • Concept of an Ecosystem • Structure and function of an Ecosystem • Energy Flow in the Ecosystem • Food Chains, Food Webs and Ecological Pyramids Biodiversity and its conservation • Introduction- Definition: Genetic, Species and Ecosystem Diversity • Bio-Geographical Classification of India • Value of Biodiversity: Consumptive Use, Productive Use, Social Ethical, Aesthetic and Option Values. • Biodiversity at Global, National and Local Levels • India as a Mega-Diversity Nation • Hot Spots of Biodiversity • Threats to Biodiversity: Habitat Loss, Poaching of Wildlife, Man-Wildlife Conflicts • Endangered and Endemic Species of India		

	• Conservation of Biodiversity in-Situ and Ex-Situ Conservation of Biodiversity
Unit – IV	Environmental Pollution • Causes, Effects and Control measures of:- a) Air Pollution b) Water pollution c) Soil pollution d) Marine pollution e) Noise pollution f) Thermal pollution g) Nuclear hazards
Unit - V	Field Work • Visit to a local area to document environmental assets–river/ forest/ grassland/ hill/ mountain • Visit to a local polluted site- Urban/Rural/Industrial/Agricultural • Study of common Plants, insects, birds • Study of simple ecosystem-pond, River, Hill slopes, etc
Reference and Textbooks: • Agarwal, K.C. (2001). Environmental Biology, Nidi Publ.Ltd., Bikaner • Burner,R.C. (1989). Hazardous Waste Inclineration. McGraw Hill Inc. • Clark R.S. Marine Pollution, Clanderson Press Oxford (TB). • Cunnigham, W.P.Cooper, T.H.Gorhani, E & Hepworth,M.T (2001).Environmental Encylopedia. Jaico Publ. House, Mumbai. • Hawlinks R.E., Encyclopedia of Indian Natural History, Bombay Natural History Society, Bombay. • Heywood,V.H & Watson,R.T. (1995). global biodiversity Assesment. Cambridge Univ.Press.	
Outcomes	Enable the students to ➢ Gain knowledge about Renewable and non-renewable resources ➢ Understand knowledge about Bio-diversity and its conservation.

Semester -III			
Course code: 4533C1	**CORE: V PRINCIPLES OF NUTRITION**	Credits:5	Hours:6

Objectives	➢ To obtain an insight into the major nutrients in food and the current trends in nutrition. ➢ To understand the nutritional deficiencies and recommended dietary allowances to acquaint about nutritional requirement in special conditions.
Unit - I	**Introduction to Nutrition -** History of Nutrition- Brief History of Nutritional Status, Definition of Nutrition and Malnutrition. Scope of Nutritional Studies.Requirements and RDA - Formulation of RDA and Dietary Guidelines, Reference Man and Reference Women.
Unit - II	**Energy and Carbohydrates -** Energy Balance, Assessment of Energy Requirements, Deficiency and Excess. Carbohydrates- Definition, Classification and functions, Food sources, Digestion, Absorption, Metabolism, RDA and deficiency. Dietary fiber – Classification and Nutritional significance.Glycemic index of foods.
Unit - III	**Proteins -** Definition, Classification and functions, Food sources, Digestion, Absorption, Metabolism, RDA and deficiency. Factors affecting protein quality; Protein quality evaluation methods; Quality difference between vegetable and animal protein sources;
Unit – IV	**Lipids -** Definition, Classification, Functions and Sources of Lipids, Digestion and Absorption, Metabolism, RDA and deficiency. Types such as saturated and unsaturated; Essential Fatty Acids (EFA): Definition and functions; PUFA; Role of n-3, n-6 fatty acids in health and disease; Trans fatty acids and its association to cardiovascular diseases.
Unit - V	**Vitamins,Minerals and Water -** Vitamins- Functions, Requirements, Sources, Deficiency and Excess (Fat soluble and water soluble)Macro and Micro Minerals - Functions, Requirements, Sources, Deficiency and Excess (Calcium, Phosphorus, Magnesium, Sodium, Potassium and Chloride, Iron, Copper, Manganese, Fluoride, Zinc and Iodine).Interrelationship between vitamins and minerals in metabolism. Water: Body composition – extra- and intra- cellular fluid; Physiological functions; water balance and its regulation; Requirement and the sources; Nutritional and health problems due to imbalance of water intake.

- HongKongNeiman,N. Catherine. (1990). Nutrition, Wm.C. Brown Publishers. USA.
- Swaminathan, M. Essentials of Food and Nutrition. Vol. I and II, Ganesh and Company, Madras.

Outcomes	Enable the students to ➢ Know about major nutrients in food and the current trends in nutrition ➢ Understand the nutritional deficiencies and recommended dietary allowances to acquaint about nutritional requirement in special conditions

Course Teacher

R.Ramya

Prof.K. Manimekalai

Semester -III			
Course code: 4533C2	**CORE VI - HUMAN PHYSIOLOGY**	Credits: 5	Hours: 5
Objectives	➢ To enable the students to understand the basic structure and functions of human body ➢ To inculcate knowledge about common diseases / disorders affecting each system		
Unit - I	Digestive System - Brief Description of Organs of the GI Tract. Accessory Organs of Digestion – Liver, Gall Bladder and Pancreas, Digestion and Absorption of Carbohydrates, Protein and Fats. NERVOUS SYSTEM- Elementary Anatomy of Nervous System, Functions of Different Parts of the Brain, Autonomic, Sympathetic and Parasympathetic Nervous System.		
Unit - II	Respiratory System - Respiratory Organs, Structure and their Functions, Mechanism of Respiration.Sense Organs – Eye: Structure and Functions. Ear: Structure and Functions. Nostrils: Structure and Functions		
Unit - III	Blood- Composition and Functions, Blood Clotting and its Significance, Blood Groups, Blood Transfusion and its Importance. Cardiovascular System-Structure of Human Heart and Functions – Cardiac cycle, Blood Pressure, Pulse Pressure.Lymphatic System - Lymph, Lymph Glands and its Functions.		
Unit – IV	Skin – Structure and Functions, Regulation of Body Temperature.Excretory System-Structure and Functions of Kidney, Mechanism of Urine Formation.		
Unit - V	Reproductive System - Reproductive system of Male and Female, Menstrual cycle, Menarche, Fertilization and Menopause.Endocrine System-Listing of endocrine glands and location, Functions of Thyroid, Parathyroid, Adrenal and Pituitary Glands.		
Reference and Textbooks: • Guyton, A.C, Hall, J.E. (1996). Text book of Medical Physiology.Prism Books (Pvt) Ltd, Bangalore. • Winwood (1988) Sear's Anatomy and Physiology for nurses. Guide to prevention of lifestyle diseases, Deep and Deep publications, New Delhi.			
Outcomes	Enable the students to ➢ Understand the functions of the human organ system ➢ Gain knowledge on the common diseases and disorders		

Course Teacher

P.Sindhuja

Prof.K. Manimekalai

Semester -III			
Course code: 4533A3	**ALLIED: III FASHION DESIGNING**	Credits: 4	Hours: 4
Objectives	➢ To impart knowledge on Design, Fashion Production, elements and Principles of Design.		
Unit - I	**Design:** Definition, Classification of Design: Structural and Decorative, Design Process: Concept, research, design exploration and conceptualization, design development.		
Unit - II	**Fashion Production:** Sketching the fashion figure, Sketching Garments, Garments and Garment components, Construction design details, Trimmings and Treatments, Figure Types-Achieving Perfect Proportions		
Unit - III	**Elements of Design:** Line: Classification, Types- Straight, Curved, Zigzag, Direction-Vertical, Horizontal, Diagonal, Application- Structural and Decorative, Psychological Association and visual effect of Lines. Shape: Define, Types of Shape, Visual effects of shape, Space and shape, Silhouette: Basic fashion Silhouettes, Texture: Define, Effect of Texture, Categories of Texture, Visual effects of texture.		
Unit – IV	**Elements of Design** Colour: Understanding Colour, Colour dimensions: Hue, Value and Intensity, Colour Wheel: Munsell Colour system and Prang Colour System, Colour Warmth: Warm Colors, Cool Colors, Colour harmonies/Schemes, Colour forecasting, Expressive Qualities of Colour.		
Unit - V	**Principles of Design:** Repetition, Gradation, Rhythm, Radiation, Harmony, Contrast, Dominanace, Proportion, Balance, Unity		
Reference and Textbooks: • Tate. (2004). Inside Fashion Design, Pearson Education India. • Pamela Stecker. (1996). The Fashion Design Manual, Macmillan Education AU. • Ann Marie Fiore (2010) Understanding Aesthetics for the Merchandising and Design Professional. • Richard Sorger, Jenny Udale (2006).The Fundamentals of Fashion Design. AVA Publishing. • Tim Jackson, David Shaw (2000). Mastering Fashion Buying and Merchandising Management.Macmillan International Higher Education.			
Outcomes	Enable the students to: ➢ Summarize the Design Process ➢ Describe the elements and Principles of design ➢ Discuss the fashion production process		

Course Teacher

Prof.K. Manimekalai

Semester -III			
Course code: **453S01**	**SBS– I FABRIC ANALYSIS (P)**	Credits: 2	Hours: 4

Objectives	➢ To gain knowledge on fabric design and structure in woven and knitted fabrics
	I. Woven Fabrics 1. Plain, Matt 2. Regular Twill 3. Honey comb 4. Extra Weft 5. Mock leno 6. Figured terry 7. Double Cloth 8. Sateen 9. Jacquard II. Knitted Fabrics 1. Single and Double jersey 2. Rib

Reference and Textbooks:

- Craig Huntington. Tensile Fabric Structures: Design Analysis and Construction.
- John T Andrews. Techniques of till fabric analysis.

Outcomes	Enable the students to ➢ Aware about the fabric design and structure in woven and knitted fabrics ➢ Analyze the following fabric and draw design, draft and peg plan

Semester -IV			
Course code: 4534C1	**CORE – VII COMMUNITY NUTRITION**	Credits: 5	Hours: 6
Objectives	➢ To understand the Nutritional Problems of a Community ➢ To Learn the Methods used for assessing the Diet and Nutritional Status of a Community ➢ To know the On-going Intervention Programmes for Overcoming Malnutrition in the Community.		
Unit - I	Nutritional status in India, Importance of Good Nutrition. Nexus between Poverty and Malnutrition, PEM, Micro Nutrient Deficiencies (Vitamin A, Nutritional Anaemia, IDD), Prevalence of Diet related Non-Communicable Chronic Diseases.		
Unit - II	Assessment of Nutritional status of the Community - Direct Methods – (a) Anthropometric Measurements (b) Clinical Examination (c) Bio-Physical Examination (d) Functional Assessment (e) Bio-Chemical Estimation. Indirect Methods - (a) Dietary Assessment (b) Vital Health Statistics.		
Unit - III	Nutrition Education - Meaning, Need, Principles and Methods. Factors influencing Nutrition related Behaviour, Behavioural Changes related to Nutrition Education. Nutrition intervention for specially vulnerable groups, Awareness on Fortified Foods.		
Unit – IV	Intervention Programmes to Combat Malnutrition- ICDS Programmes, Balwadi Nutrition Programmes, Noon Meal Programme. National Nutritional Anaemia Prophylaxis Programme (NNPP), Iodine Deficiency Disease Control Programme.		
Unit - V	Role of International Organizations – UNICEF, FAO, WHO, CARE, World Bank.S		
Reference and Textbooks: ➢ Srilakshmi (2006). Food Science.New Age International Pvt.Ltd. Newdelhi. ➢ Srilakshmi (2008). Nutrition Science. New Age International Pvt.Ltd. Newdelhi. ➢ SreeDevi.V. (1997). Nutrition Education.Discovery Publishing House. New Delhi. ➢ Swaminathan. M. (1985). Essentials of Food and Nutrition. Vol I and Vol. II Madras. Ganesh and company. Hyderabad. ➢ National Nutrition Policy (1993). Govt. of India.			
Outcomes	Enable the students to ➢ Aware about the nutritional problems and status in a community ➢ Gain knowledge on nutritional intervention programmes and acquire skill in Conducting Nutrition Education		

Course Teacher

P.Venkateswari

Dr.P.Veeramani

Semester -IV			
Course code: 4534C2	**CORE –VIII PUBLIC HEALTH NUTRITION**	Credits:5	Hours:6
Objectives	➢ To understand the concept of public health and nutrition ➢ To be familiar with the current concerns in public health nutrition		
Unit - I	**Concept and scope of public nutrition -** Relation between health and nutrition - Definition and multidisciplinary nature of public nutrition - Concept and scope - Role of public nutritionist - Millennium Development goals - Current concerns in public health nutrition		
Unit - II	**Introduction to Nutritional deficiency diseases -** Causes, symptoms, treatment, prevention of the following: - Protein Energy Malnutrition (PEM), Vitamin A Deficiency (VAD), Iron Deficiency Anemia (IDA), Iodine Deficiency Disorders (IDD), Zinc Deficiency, Flurosis.		
Unit - III	**Social health problems -** Smoking, Alcoholism, Drug addiction, AIDS including AIDS Control Programme, community health care, national health care delivery system, population policy. Health economic and economics of malnutrition impact on productivity and national development.		
Unit – IV	**Nutrition for special conditions -** Introduction to Nutrition for physical fitness and sport, Feeding problems in children with special needs, Considerations during natural and man-made disasters e.g. floods, war- basic guidelines in disaster management.		
Unit - V	**Food Security** (a) Key terms, factors affecting food security, recent concern (b) Technologies for food and nutrition security (c) Health based interventions including immunization, provision of safe drinking water/sanitation, prevention and management of diarrhoeal diseases.		

Reference and Textbooks:

- Bamji MS, Rao NP, and Reddy V. (2009). Text Book of Human Nutrition. Oxford & IBH Publishing Co. Pvt Ltd.

Outcomes	Enable the students to ➢ Gain knowledge about public health and nutrition ➢ familiar with the current concerns in public health nutrition

Course Teacher

R.Ramya

Prof.K. Manimekalai

Semester -IV			
Course code: 4534A4	**ALLIED: IV INTERIOR DESIGN**	Credits: 4	Hours: 5
Objectives	➢ To understand the elements and principles of design. ➢ To learn about the elements of art in the creation of new design ➢ To learn the application of principles of design in creating beautiful interiors.		
Unit - I	Development of Interior Design Concepts - A Historic Review. Place of Interior in the Modern Era- Changing trends and Salient Features, Objectives of Aesthetic Planning - Beauty, Expressiveness, Functionalism, Economy. Role of good Taste – Meaning and Importance. Need for developing skill in Aesthetics.		
Unit - II	Design - Definition, Meaning, Purpose. Types - Structural and Decorative Characteristics, Classification of Decorative Design - Naturalistic, Conventional, Geometric, Abstract, Historic, Biomorphic. Elements of Design - Line and Direction, Form and Shape, Size, Colour, Light, Pattern, Texture and Space - Application of elements to Form Designs.		
Unit - III	Principles of Design –Balance, Rhythm, Emphasis, Harmony, Proportion - Meaning and Application of Design Concepts in the Interior and Exterior Houses and other Commercial Buildings.Development of design from Motifs and Application.		
Unit – IV	Flower arrangement- Principles &Types of Flower Arrangement. Accessories in the Home – Classification and Selection.		
Unit - V	Man as a Consumer of Design, Qualities and Role of a Good Interior Designer, Interior Design - Career Options. Application of Design in Interior Decoration.		
Reference and Textbooks: ➢ Faulkner, S. and Faulkner, R. (1987) Inside Today's Home, Rine hart publishing company, Newyork. ➢ Caroline cliften et. al., The complete Home Decorator, Portland House New York. ➢ Seetharaman, P and Pannu, P. Interior Design and Decoration, CBS publishers and Distributors, New Delhi ➢ Pratap, R. M. (1988). Interior Design principles and practice, standard publishers distribution, Delhi. ➢ Goldstein, Art in Everyday life, Oxford and IBH publishing house.			
Outcomes	Enable the students to ➢ Gain the basic knowledge on Interior design ➢ Aware about the New decorative design		

Course Teacher

Prof.K. Manimekalai

Semester -IV			
Course code: 453S03	**SBS-IIFOODPROCESSING & PRESERVATION (P)**	Credits: 2	Hours: 2

Objectives	➢ To impact knowledge on basic and applied aspect of food processing and preservation. ➢ To provide the knowledge of basic principles and procedure in the production of important food product.
	Practical 1. Preparation of jams and jellies 2. Preparation of syrups, sauce, squashes 3. Preparation of pickles, chutneys 4. Preparation of marmalades, candies 5. Preparation of crystallized fruits /vegetables 6. Visit to processing units 7. Visit to FCI and IIFPT (Tanjore)

Reference and Textbooks:

- Fuller, G.W. (1994). New Food Product Development: From Concept to Market place, CRC Press. New York.
- Man, C.M.D and James, A.A. (1994). Shelf life Evaluation of Foods. Blackie Academic and Professional. London.
- Olickle, J.K. (1990). New Product Development and Value Added. Food Development Division, Agriculture. Canada.
- International Journal of Food Science and Technology.

Outcomes	Enable the students to ➢ Familiarize with the potential use of various by products of food industry. ➢ Gain knowledge on basic principles and procedure in the production of important food product.

Course Teacher

P.Archana

Dr.P.Veeramani

Semester -IV			
Course code: 453S04	**SBS-II FUNDAMENTALS OF APPAREL DESIGNING (P)**	Credits: 2	Hours: 2

Objectives	➢ To study and prepare the basic components for apparel constructions. ➢ To enable the students to prepare the sample for fullness, necklines, pockets, yokes etc.,
Practical	1. Preparation of Samples for Temporary Hand Stitches - (Even, Uneven, Diagonal, Slip Basting) 2. Preparation of Samples for Permanent Hand Stitches - (Running, Back, Run and Back, Hemming, Slip, Over – Casting, Over Handing, Whipping) 3. Preparation of Samples for Seams - (Plain, Single Top Stitch, Double Top Stitch, Welt, Lapped, Slot, French, Mantua Makers, Flat Fell-Machine or Hemmed, Piped and Corded Seam.) 4. Preparation of samples for seam finishes - (Pinked, Double Stitch, Edge Stitch, Herring Bone, Over Cast and Bound Seam Edge Finish.) 5. Preparation of samples for Fullness - (Darts, Tucks, Pleats, Godets, Gathers and Shirrs, Frills and Ruffles) 6. Preparation of samples for Faced Necklines - (Bias, Shaped, and Decorative.), Binding Necklines - (Bias and French) 7. Preparation of samples for Pockets - (Patch Pocket, Welt/Bound Pocket, Set-in Pocket/Side Seam Pocket.) 8. Preparation of samples for yokes and its types. 9. Preparation of plain sleeves, Puff sleeve (anyone type), raglan / kimono Sleeve. 10. Preparation of Fasteners - (Hook and Eye (Thread and Metal), Press Button, Velcro, Fancy, Button, Shirt Button, Button Hole, Link/Kurta Buttons.)

Reference and Textbooks:

- Nora Abousteit and Alison Kelly ,The Burda Style Sewing Handbook
- Wendy Mullin,Sew U: The Built by Wendy Guide to Making Your Own Wardrobe
- Wendy Mullin, Sew U Home Stretch: The Built by Wendy Guide to Sewing Knit Fabrics
- Anita A. Stamper, Experimental Apparel Construction: Laboratory Manual

Outcomes	Enable the students to ➢ Prepare the basic components for apparel constructions ➢ Prepare the sample for fullness, necklines, pockets, yokes etc.,

Course Teacher

Prof.K. Manimekalai

Dr.P.Veeramani

Semester - V			
Course code: 4535C1	**Clinical Nutrition**	Credits: 5	Hours: 5

Objectives	• To learn about the metabolism of carbohydrate, amino acid and lipids • To understand the Biochemical changes due to metabolic disorders
Unit - I	**Metabolism -** Review of Digestion and Absorption. Carbohydrate – Glycogenesis, Glycogenolysis, Glycolysis, Gluconeogenesis, Kreb's Cycle and Pentose Phosphate Pathway. Amino Acid - Intermediary Metabolism and Urea Cycle.Lipid - Intestinal Resynthesis of TG, Transport, Oxidation of Fatty Acids, Biosynthesis of Cholesterol
Unit - II	**Genetic control of metabolism -** Nucleic Acids, DNA replication, RNA – Synthesis, Types and Functions, Genetic Code, Protein Biosynthesis, Recombinant DNA Technology
Unit - III	**Biochemical changes due to disorders of metabolism -** Diabetes Mellitus, Inborn errors of Metabolism with respect to Lactose, Galactose, Phenyl Alanine and Uric Acid (Gout)
Unit – IV	**Digestive System** - Diarrhoea, Constipation, Gastritis, Ulcers, Colitis, Malabsorption Syndrome -Nutritional Implications.Metabolic and Nutritional Implications of Hepatitis, Cirrhosis of Liver, Hepatic Coma.Pancreatitis, Cholecystitis and Cholelithiasis
Unit - V	**Renal System -** Metabolic and Nutritional implications of Nephritis, Nephrotic Syndrome, Renal Failure.Renal Calculi, Dialysis.Water, Electrolyte Losses, and Replenishment. Effect of Dehydration and Water Intoxication

Reference and Textbooks

- Ramakrishnan, S. & Venkat Rao. (1995). Nutritional Biochemistry. Chennai, T.R.
- Shils. et al. (1994). Modern Nutrition in Health and Disease. Vol. I and II. New York, Lea and Febiger

Outcomes	• Aware about the digestion and absorption of carbohydrate, amino acid and lipids. • Gain knowledge about Biochemical changes due to metabolic disorders

Course Teacher
Dr.P.Veeramani
P.Archana

Semester - V			
Course code: 4535C2	**Clinical Nutrition (P)**	Credits: 4	Hours: 8
Objectives	To develop skills in Analysis of Urine and estimation in Serum		
Content	1. Analysis of Urine 2. Collection of Blood and separation of Plasma and Serum 3. Estimation of Blood Glucose 4. Estimation of Total Protein 5. Determination of A/G ratio 6. Estimation of Serum Urea 7. Estimation of Serum Creatinine 8. Estimation of Cholesterol 9. Estimation of Bilirubin		
Reference and Textbooks • ICMR. (1978). Laboratory techniques in Nutrition. Hyderabad: NIN. • Oser, B.L. (1965). Hawk's Physiological Chemistry. New Delhi: Tata McGraw Hill • Chawla, R. (1995). Practical Clinical Biochemistry. Methods and Interpretations. New Delhi: Jaypee Brothers. Medical (P) Ltd. • Pattabiraman, T.N. (1998). Laboratory Manual in Biochemistry. New Delhi: All India Publishers and distributors			
Outcomes	• Enable the students to estimate the Blood Glucose, Total Protein, Serum Urea, Serum Creatinine, Cholesterol and Bilirubin in the given sample		

Course Teacher

Dr.P.Veeramani

P.Archana

Semester – V			
Course code: 4535C3	**Food Microbiology**	Credits: 5	Hours: 5
Objectives	• To study about the microorganisms in food • To Study the Microbes in relation to food spoilage, food borne diseases and food preservation		
Unit - I	Microbiology of Foods: Concept and its history. Role of microbiology in biotechnology, Role of microorganisms in fermented foods – soya bean products, vegetable and dairy foods, baked items, other preparations, uses of microbes in industry		
Unit - II	Incidence and growth of microorganisms in food - Microbes in Air, water and soil, food contamination and its sources – fruits, vegetables, milk and meat . Factors affecting the growth of microbes in food, control and its destruction – Physical and chemical methods		
Unit - III	Food spoilage – its causes, spoilage and its chemical changes. Spoilage in cereal, milk and its products. Meat, poultry, fish and other sea foods, fruits and vegetables, fruit juices and preserves – by yeasts, moulds and bacteria. Prevention of spoilage		
Unit – IV	Hazards of food microbes: Food borne diseases and its types - intoxications, infections, mycotoxins		
Unit - V	Examination of food borne diseases: Receiving report and assessment, investigation, identifying causative factors, association between food items an illness, sample collection and reporting		
Reference and Textbooks • Frazier, W.C & Westhoff, D.C. (1992). Food Microbiology. New Delhi: Tata McGraw Hill Hill Publishing Co., Ltd. • Annak. Joshua, (2001). Microbiology. Popular Book Depot. Chennai. • Ray, B. (2001). Fundamental Food Microbiology, 2nd Ed, CRC press, Boca raton FL			
Outcomes	• Gain knowledge on microorganisms and its identification in food • Familiar with microbes in food, food borne diseases and food preservation		

Course Teacher

Prof.K. Manimekalai

R.Ramya

Semester - V			
Course code: 453E1A	**Elective I (A) - Pattern Making (P)**	Credits: 3	Hours: 5
Objectives	➢ To enable the students to draft and grade the patterns for sleeves, collars and yoke ➢ To gain knowledge on designing, drafting and grading basic apparel for children , women and men		
	I. Draft and grade the Patterns for the following a) Sleeve 1. Plain 2. Puff sleeve at top and bottom 3. Bell sleeve b) Collar 1. Shirt 2. Peter pan 3. Stand c) Yoke 1. Simple 2. Partial II. Designing and Drafting and grading basic apparel for a) Children Bib, Panty, Jabla Summer Frock Angel Top, A-line Frock, Sun Suit b) Women Saree Petticoat, Middi and Middi top, Blouse, Nighty, Salwar Kameez c) MenFull Sleeve Shirt, Pleated Trouser, S.B.Vest, Nehru Kurtha, Night Dress		
Reference and Textbooks: ➢ Practical Clothing Construction. (1986). Part I and II. Chennai: Mary Mathews, Cosmic Press. ➢ Pattern Grading for Women's Clothes. (1990). The E Technology of Seizing – Gerry Cooklin, Blackwell Science Ltd ➢ Practical clothing construction. Part I & Part II- Mary Mathews, Chennai (1985). ➢ Zarapkar, K.R. (2005). Zarapkar System of cutting. Navneet India Ltd			
Outcomes	➢ Learn about draft and grade the patterns for sleeves, collars and yoke ➢ gain knowledge on designing, drafting and grading basic apparel for children , women and men		

Course Teacher

Prof.K. Manimekalai

Semester - V			
Course code: 453E1B	**Elective: I (B) - Fashion CAD and Portfolio (P)**	Credits: 3	Hours: 5
Objectives	• To understand the various concepts, elements, principles and knowledge gained while studying fashion design course • To gain knowledge on development of technical specification – measurements, grading, pattern making, cutting & sewing of the portfolio garment		
	The students shall prepare: 1. Current trend for Mens/Women's/Kids wear in the market 2. Fashion Forecast for Sprint/Summer 2020/Autumn/Winter 2020 3. Inspiration recording 4. Target Customer profiling 5. Forecast interpretation for target customer profile 6. Mind mapping / abstract development for design/ styles 7. Mood Board 8. Colour Board 9. Material Exploration 10. Theme /Story Board 11. Silhouette Development 12. Croqui model rendering with silhouette, colour & material textures 13. Develop measurement for the portfolio sketches 14. Present the Portfolio presentation – Collection submission		
Reference and Textbooks: Suresh, G.S. (2016). Computer Aided Design Laboratory. Lakshmi Publications			
Outcomes	• Understand the trend analysis and fashion forecast • Identify various aspects and factors of preparing a portfolio • Apply various concepts, elements, principles and knowledge gained while studying fashion design course • Prepare the product based out of approved portfolio sketches using Fashion CAD • Develop a technical specification – measurements, grading, pattern making, cutting & sewing of the portfolio garment		

Course Teacher

Dr.P.Veeramani

Semester - V			
Course code: 453E2A	**Elective: II (a)-Family Resource Management**	Credits: 3	Hours: 3
Objectives	• To understand family resource management • To understand the basic principles of art in Interior decoration		
Unit - I	Meaning and definition of home management. Management process - planning, controlling and evaluation, factors influencing home management. Planning: Types and importance of controlling the plan - Adjusting, supervising checking and types of evaluation		
Unit - II	Values - concept, characteristics, classification and factors influencing values. Goals - Concept, types, factors influencing goals. Standards – concepts, characteristics and classifications. Interrelatedness of values, goals and standards. Resources – Types, Characteristics of resources		
Unit - III	Money - definition, types. Family budget - definition, importance, types, steps in making budget, factors affecting the budget, advantages of budgeting. Account keeping – importance, types of account systems, methods of handling money, family financial records. Time - definition, steps in making time plan, tools in time management.		
Unit – IV	Time management process – planning, controlling and evaluation. Energy – definition, planning, controlling and evaluation. Fatigue-concept of fatigue, types of fatigue, avoidance of fatigue. Decision making: process of decision making, types of decisions, methods of resolving conflicts, Resources – Definition, meaning, classification of resources		
Unit - V	Work simplification: Definition, importance, techniques – process chart, operation chart, Mundel's classes of changes. Concept of fatigue, types of fatigue, avoidance of fatigue		
Reference and Textbooks: • Kaur, H., & Macneil, C. (1994). Theory and Practice of Home Management. Delhi: Surjeet. • Varghesese, M.A.et al (2006) Home Management. New Age International • Nickell, P., & Dorsey, J.M. (2002). Management in Family Living. CBS Publishers & Distributors • Nair, S.R. (2002). Consumer Behavior in Indian perspective. Mumbai:Himalaya			
Outcomes	• Gain knowledge on family resource management • Will gain knowledge about the basic principles of art in Interior decoration		

Course Teacher

P.Sindhuja

Dr.P.Veeramani

Semester - V			
Course code: 453E2B	**Elective: II (B)-Genetically Modified and Organic Foods**	Credits: 3	Hours: 3
Objectives	• To aware about the concepts in genetically modified and organic foods. • To learn the Genetic modification in Food industry and in Medicine		
Unit - I	Genetic modification – concepts, methods of genetic modification, genetic modification of bacteria, plant & animal, controversies over genetic modification, policy around the world (USA, European Union, EU regulation, Japan, China & other developing countries)		
Unit - II	Genetic modification in Agriculture – transgenic plants, genetically modified foods, application, future applications, ecological impact of transgenic plants		
Unit - III	Genetically modified foods – organic foods, types of organic foods, identifying organic foods, organic food & preservatives		
Unit – IV	Genetic modification in Food industry – background, history, controversies over risks, application, future applications		
Unit - V	Genetic modification in Medicine - gene therapy, types of gene therapy, vectors in gene therapy, molecular engineering, human genetic engineering, problems & ethics		
Reference and Textbooks: • Pamela C. Ronald. (2010). Tomorrow's table: Organic Farming, Genetics and the Future of Food. Oxford. • Maria Rodale. (2010). Organic Manifesto –How organic farming can heal our planet, feed the world and keep us safe. Rodale. • Lillian E. Forman. (2009). Genetically modified foods. ABDO. • Natalie Regis. (2015). Genetically modified crops and foods. Britannica			
Outcomes	• Gain knowledge about the genetically modified and organic foods. • Aware about genetic modification in Food industry and in Medicine		

Course Teacher

P.Venkateswari

Dr.P.Veeramani

Semester - V			
Course code: 453S05	**Skill Based Subject: III (A) – Bakery & Confectionary**	Credits: 2	Hours: 2

Objectives	• To understand the importance of baking and confectionery • To develop skills and responsibility for setting up bakery and confectionery units
Unit - I	Introduction and Scope of Bakery and Confectionary-Types of Flour and their Characteristics-Other Raw Materials Used in Bakery and their Role, Heat and Density Measurement, Conversion Tables, Dough and Cake Mixing Temperatures, Yeast Calculations
Unit - II	Types of Leavening Agents, Types of Yeast. Nature & Characteristics of Dough- Types of Dough, Steps in Yeast Dough Production, Types of Dough Making Process, Controlling Fermentation, Bread Faults and their Causes
Unit - III	Biscuits - Meaning and Preparation. Cookies-Production, Sandwich Cookies, Ice Box Cookies, bar Cookies, Macaroons, Wafers and Lace Cookies, Assorted Cookies, Factors affecting the texture, Colour and keeping quality of Biscuits and Cookies
Unit – IV	Different Types of Paste - Short Crust, Sweet Crust, Rough Puff, Puff Paste, Choux Paste, Suet Paste Preparation, Faults and Products of the above pastes- Icings, Fillings and Glazes- Different Types of Icings
Unit - V	Sponges - Basic Preparation Methods, Types of Sponges, Preparation of Syrups. Steps Involved in Preparing Large Cakes-Wedding Cakes, Birthday Cakes, Gateaux Basic Preparation

Reference and Textbooks:

- Wilfred J. France. F. (1976). (ed.). The New International Confectioner. Virtue and Company.
- William J. Sultan. (1989). 5th ed. Practical Baking. John Wiley & Sons
- Wayne Gisslen (2008). 5th ed. Professional baking. John Wiley & Sons
- Kinton & Ceserani. (1987). Practical Cookery. Hodder & Stoughton
- Ashok Kumar. Y. (2009). Text book of Bakery & Confectionary. PHI learning.

Outcomes	• Gain the basic knowledge on bakery and confectionary • Develop the skills on setting up the bakery and confectionery unit

Course Teacher

P.Venkateswari

Dr.P.Veeramani

Semester - V			
Course code: 453S06	**Skill Based Subject III (A) – Home Based Catering**	Credits: 2	Hours: 2

Objectives	• To understand the Home based catering • To develop skills and responsibility for Food Service Unit
Unit - I	**Introduction to Food Service -** Factors contributing to the growth of food service industry - Kinds of food service establishments
Unit - II	**Food Production -** Menu planning: Importance of menu, Factors affecting menu planning, Menu planning for different kinds of food service units - Food Purchase and Storage - Quantity Food production: Standardization of recipes, quantity food preparation - techniques, recipe adjustments and portion control - Hygiene and Sanitation
Unit - III	**Resources 3 -** Money – Manpower – Time - Facilities and equipment - Utilities
Unit – IV	**Planning Of A Food Service Unit Preliminary Planning -** Survey of types of units, identifying clientele, menu, operations and delivery
Unit - V	**Planning the set up -** Identifying resources - Developing Project plan - Determining investments- Project Proposal

Reference and Textbooks

- Philip E. Thangam. (2008) Modern Cookery for teaching and Trade Part I & II. Orient Longmam
- Taneja, S., & Gupta, S.L. (2001). Entrepreneurship development. Galgotia

Outcomes	• Gain the basic knowledge on Menu planning • Develop the skills on Food Service Establishments

Course Teacher

Prof.K. Manimekalai

R.Ramya

Semester - V			
Course code: 453S07	**Skill Based Subject III (B)-Basics of Wet Processing**	Credits: 2	Hours: 2
Objectives	• To impart knowledge on Pretreatment, Dyeing and colouring, Machineries for dyeing, Printing and Finishing		
Unit - I	**Pretreatment:** Introduction, Fabric Preparation Processes: Desizing, Scouring, Mercerization, Carbonization, Heat Setting, Drying, Quality control in fabric preparation		
Unit - II	**Dyeing :** Dyeing-Definition, Classes of dyes for different fiber: Cellulosic fibers, Protein fibers, Polyamide fibers, Polyester fibers, Acrylic fibers, Fiber blends, Fluorescent brightening agents, Different Stages of Dyeing Process, Colour fastness, Assessment of Colour fastness		
Unit - III	**Machineries for Dyeing:** Machinery for Fiber Dyeing, Yarn Dyeing and Fabric Dyeing - Woven and Knitted – Hank, Beam, jigger, Winch, Jet, Soft Flow Dyeing Machines, Colour Matching Cabinet		
Unit – IV	**Printing**: Definition, Preparation of Printing Paste, Methods of Printing - Direct, Discharge, Resist, Screen Printing, Roller Printing, Rotary Printing, Transfer Printing, Stencil Printing, Block Printing, Flock Printing and Other Latest Printing Methods		
Unit - V	**Finishing**: Objective of Finishing, Classification of Finishes: Physical or Mechanical, Chemical Finishes, functional Finishes, Plasma finishes, Surface finishing, Repellent finishes, Flame- and Fire-retardant finishes, Soil release finishes		
Reference and Textbooks: • Rose Sinclair. (2014). Textiles and Fashion: Materials, Design and Technology. Elsevier. • Asim Kumar Roy Choudhury. (2017). Principles of Textile Finishing Woodhead Publishing. • Francis J. Kafka. (1973). Batik, Tie Dyeing, Stencilling, Silk Screen, Block Printing: The Hand Decoration of Fabrics. Courier Corporation			
Outcomes	• Summarize the Pretreatment process in wet processing • Classify classes of dyes • Describe the machineries used for fiber, yarn and fabric dyeing • Discuss the process of different printing and finishing		

Course Teacher

Prof.K. Manimekalai

Semester - V			
Course code: 453S08	**Skill Based Subject III (B)-Training for Community Development**	Credits: 2	Hours: 2
Objectives	• To conceptualize the training programmes for community development • To evaluate sustainability of training programme for community development		
	1. Designing training programmes on specific goal that aims at the development of community. 2. Developing skills in selection and use of different training methods – case study, role play, psychodrama, buzz group, group discussion, transactional analysis, business games, etc. 3. Organizing and conducting training programmes for village people 4. Evaluating specific training programmes 5. Visit to training and development organizations that focus on development of community		
Reference and Textbooks • Prior, J. (1994). Hand Book of Training and Development. Bombay: Jaico. • Anne Hope & Sally Timmel. (2000). Training for Transformation: A Handbook for Community Workers. UK: Practical Action. • Jerry W. Robinson. (2010). Introduction to Community Development: Theory, Practice and Service – Learning. SAGE Publications			
Outcomes	• Become competent to frame and evaluate the sustainability of the training programme for community development		

Course Teacher

Prof.K. Manimekalai

P.Sindhuja

Semester - VI			
Course code: 4536C1	**Diet Therapy**	Credits: 5	Hours: 6

Objectives	• To understand the basic concepts in Dietetics and feeding methods in therapeutic diet • To gain knowledge of Inborn errors of Metabolism
Unit - I	Basic concepts of Dietetics, Therapeutic adaptations of Normal Diet, Routine Hospital Diets - Clear-Fluid, Full-Fluid, Soft, Regular Normal Diet. Special Feeding Methods -Parenteral and Enteral Feeding. Nutritional Care for Overweight, Underweight and Anemia
Unit - II	Febrile Conditions – Typhoid, Tuberculosis and Malarial Infections.GI tract Diseases-Peptic Ulcer, Constipation, Diarrhea, Steatorrhoea, Irritable Bowel Syndrome, Malabsorption Syndrome, Celiac Sprue, Tropical Sprue
Unit - III	Diseases of the Liver - Hepatitis, Cirrhosis of Liver, Hepatic Coma. Diseases of Gall Bladder and Pancreas – Cholelithiasis, Cholecystitis, cholecystectomy, Pancreatitis, Diabetes mellitus-Prevalence, Types, Etiology, Symptoms, Diagnosis, Treatment and Complications
Unit – IV	Diseases of the Cardiovascular System- Atherosclerosis and Hyper Tension, Hypercholesterolemia.Renal Diseases - Glomerulonephritis, Nephrotic Syndrome, Acute and Chronic Renal Failure, Dialysis and End Stage Renal Disease
Unit - V	Management of Cancer, Surgery, Trauma and Burns. Inborn errors of Metabolism – Biochemical Basis and Nutritional Management of Phenyl Ketonuria and Maple Syrup Urine Disease, Allergies- Food Allergy, Reactions, Types of Allergens, Diagnosis and Treatment

Reference and Textbooks

- Mahaj, L. K., & Arlin, M. T. (1992). Kruse's Food, Nutrition and Diet Therapy, (8th ed.). London: W B Saunders
- Joshi, S. A. (1992). Nutrition and Dietetics. New Delhi: Tata McGraw Hill
- Ruth. A. Roth. (2007). Nutrition and Diet Therapy. Australia: Thomson Delmar Learning
- Townsend,C.E. (2000). Nutrition and Diet therapy. (7th ed.). Delmar Publisher Albany
- Williams, M.H. (2002). Nutrition for health and fitness. Boston: Mc-Graw Hill
- Gibney, M.J. et al. (2005). Clinical Nutrition. (1st.ed.). Blackwell Science

Outcomes	• Aware about the routine hospital diets and special feeding methods in therapeutic diet • Understand the inborn errors of metabolism, food allergy and its diagnosis and treatment

Course Teacher
Prof.K. Manimekalai
P.Archana

Semester - VI			
Course code: 4536C2	**Diet Therapy Internship (P)**	Credits: 3	Hours: 6
Objectives	• To familiarize the students with the principles of Planning Therapeutic Diets for various Disease Conditions • To have practical experience in the Management of a Dietary Department and Patient Counselling for a Period of One Month		
	Contents 1. Observation and study of organization and Management of the dietary department. 2. Understanding the medical history of the patients, study of case sheets and diagnostic tests used 3. Planning therapeutic diets and Computation of Nutritive value 4. Observation and Study of a. Purchase storage and issue b. Production c. Service d. Evaluation and Follow Up 5. Participation in Diet counselling units, experience in Imparting Diet counselling and understanding the Records Maintained in Diet Counselling Units		
Reference and Textbooks • Mahaj, L. K., & Arlin, M. T. (1992). Kruse's Food, Nutrition and Diet Therapy, (8th ed.). London: W B Saunders • Joshi, S. A. (1992). Nutrition and Dietetics. New Delhi: Tata McGraw Hill • Ruth. A. Roth. (2007). Nutrition and Diet Therapy. Australia: Thomson Delmar Learning • Townsend,C.E**.** (2000)**.** Nutrition and Diet therapy**.** (7th ed.). Delmar Publisher Albany			
Outcomes	• Gain knowledge about Appropriate Nutritional Care for Life Cycle • Able to plan the therapeutic diets and computate the Nutritive value		

Course Teacher

Prof.K. Manimekalai

P.Archana

Semester -VI			
Course code: 4536C3	**Extension Education in Home Science**	Credits: 5	Hours: 6

Objectives	• To impart the areas of extension, development, management and communication • To understand the importance and use of communication technology in extension work
Unit - I	Socio-Economic conditions in the Village, Analysis of the Rural Problems – Illiteracy, Poverty, Poor Health and Malnutrition. Role of Women in Home and Farm. Role of Voluntary Agencies in Rural Upliftments – BGMS, KGNMI, AIWC, CSWB
Unit - II	Home Science Extension Education - Meaning, Definition, Objectives and Principles of Extension Education. Need for Extension Education, Origin, Concept, Objectives and Characteristics of Home Science Extension, Steps in Home Science Extension Teaching, Role of Home Science Extension in Rural Development
Unit - III	Extension Administration and Functionaries: Administrative set-up for Rural Development – Central, State, District, Block and Village Level, Extension personnel working at Block Level, Role and Functions of Women extension Workers, Qualities of an Extension Worker, Training Women Extension Workers
Unit – IV	Communication Methods and Teaching Aids used in Extension - Meaning, Key Elements, Types, Problems, Importance of Communication in Extension. Audio Aids – Radio and Recorded Talks. Visual Aids – Flannel Graphs, Flash Cards, Posters and Charts. Audio Visual Aids – Films, Television and Video Cassettes. Recent Trends in Communication – Meaning and use of Website, e-Mail, Multimedia and e-Learning
Unit - V	Extension Programme Building- Meaning and importance of Programme Planning, Principles of Programme Planning, Execution and Evaluation, Programme Development Process. Welfare Programmes for Women and Children - Programmes for Women and Children –Swadhar, Swa-ShaktiSABLA, Balika Samriddhi Yojana (BSY), Kishor Shakti Yojana (KSY), SGSY

Reference and Textbooks

- Reddy, A.A. (1987). Extension Education. Andhra Pradesh: Srilakshmi Press.
- Dahama, O.P. & Bhat Nagar, O.P. (1985). Extension and communication for development. New Delhi: Oxford and IBH.

Outcomes	• Gain the basic knowledge in Extension Education, Management and communication • Adopt the various communication technologies for the extension activity

Course Teacher
Prof.K. Manimekalai
P.Sindhuja

Semester - VI			
Course code: 4536C4	**Food Service Management**	Credits: 5	Hours: 5

Objectives	• To inculcate the historical development and types of Food Services in India. • To teach about the Resources required for Managing Food Outlets and Maximizing Resource Use
Unit - I	Organization of food service management: Definition, Various types of Food Service institutions, their characteristics and functions
Unit - II	Planning a food service unit, layout design, planning of different work areas – preparation, cleaning, storing, serving and dining areas. Lighting and ventilation, working heights in relation to equipment
Unit - III	Institutional Menu Planning: Factors influencing menu planning, principles of menu planning, different kinds of menus
Unit – IV	Quality food Service – types-Centralized, de-centralized objectives. Styles of service
Unit - V	Importance of sanitation and hygiene in food, kitchen hygiene, Hygienic handling of Food, employee's health, hygiene of food service unit

Reference and Textbooks

- Boella, M.J. (1983). Personnel Management in the Hotel and Catering Industry. (3rd ed.). London: Hutchinson
- Drucker, P.F. (1975). Management. New Delhi: Allied Publishers
- Hitchcock, M.J. (1980). Food Service Systems Administration. New York: Macmillan
- Kotas, R. (1972). Accounting in the Hotel and Catering Industry. Inter text Books. (3rd ed). London: Butler and Tanner

- Sethi, M., & Malhan, S. (1993). Catering Management: An integrated approach. New Delhi: Wiley Eastern
- Terry, G.R. (1972). Principles of Management. (6th ed.). London: Inwin Dorsey International

Outcomes	• Gain Knowledge about Food Service Management • Learn about the importance of food quality, sanitation and hygiene in food service unit

Course Teacher

Prof.K. Manimekalai

R.Ramya

Semester - VI			
Course code: 453E3A	**Food Sanitation & Hygiene**	Credits: 3	Hours: 3
Objectives	➢ To raise consciousness about Sanitation and Hygiene ➢ To impart skills in Handling of Food in the Food Service and Preparation Area		
Unit - I	**Introduction to Hygiene & Sanitation in Foods -** Relationship of Microbes to Sanitation, Public Health Hazards due to contaminated Water and Food; Role of Microorganisms - Water and Food Borne Illness; Physical, Chemical and Biological Contamination; Sources of Contamination, Vehicles and Routes		
Unit - II	**Kitchen and Food plant hygiene -** Safety in food Procurement, Storage Handling and Preparation; Safety of Leftover Food, HACCP- Need, Benefits and Principles		
Unit - III	**Personnel Hygiene -** Food Handlers, Habits, Clothes, Illness; Training & Education for safe Methods of Handling and Serving Food		
Unit – IV	**Cleaning -** Sterilization & Disinfection; Different Methods used – Detergents, Heat, Chemicals; Tests for Sanitizers Strength; Selecting and Installing Equipment; Cleaning of Equipment and Premises		
Unit - V	**Waste Product Handling -** Waste Disposal – Solid and Liquid Waste; Rodent and Insect Control; Uses of Pesticides		
Reference and Textbooks • Entis, Phyllis. (2007). Food Safety: Old Habits, New Perspectives. USA: ASM. • Schmidt, Ronald, H., & Rodrick, G.E. (2003). Food Safety Handbook. Wiley Interscience • Mehta, Rajesh & George, J. (2005). Food Safety Regulations Concerns and Trade: The Developing Country Perspective. Macmillan • Paster, Tara. (2007). The HACCP: Food Safety Training Manual. Johnwiley			
Outcomes	➢ Develop the skills in handling of Food in the Food Service and Preparation Area		

Course Teacher

P.Venkateswari

Dr.P.Veeramani

Semester - VI			
Course code: 453E3B	**Elective: III (B)-Regulations of Food Product Development**	Credits: 3	Hours: 3
Objectives	➢ To understand the concept of new food product development ➢ To gain knowledge on regulatory aspects in product development and product commercialization		
Unit - I	Food Needs & Consumer Preference - Market survey and its importance in designing a questionnaire to find consumer needs for a product. Developing a Product to Meet the Requirements of a needy people. Product life cycle. Creating brand value for the Product		
Unit - II	New Food Product - Definition, Classification, New Food Product Development (NPD) process and activities, The Stage-Gate model NPD success factors, new product design, market-oriented NPD methodologies, organization for successful NPD; Reasons for new food product development (corporate, market place, technological and governmental influences) Assessing needs from various perspectives		
Unit - III	Generation of New Product Ideas Internal sources of ideas; External sources of ideas; Market place analysis Screening; Objectives of screening; Criterion of screening Refining the Screening Procedure for the product Sensory Evaluation, Shelf life Testing, Product Integrity and conformance to standards		
Unit – IV	Quality, Safety & Regulatory Aspects - Product Stability; evaluation of shelf life; changes in sensory attributes and effects of environmental conditions; accelerated shelf life determination; developing packaging systems for maximum stability and cost effectiveness; interaction of package with food; Regulatory Aspects; whether standard product and conformation to standards; Approval for Proprietary Product		
Unit - V	Product Commercialization, Launch, Evaluation & Case Studies - Outcomes and activities in product commercialization, Pre-launch trial, Steps in product launch, Evaluation of the Launch, product performance testing, developing test market strategies, Case Studies of some successes and failures, food choice models and new product trends		

Reference and Textbooks

- Jacqueline H. Beckley., & Michele Foley Elizabeth J. Topp & J. C. Huang Witoon Prinyawiwatkul. (2007). Accelerating New Food Product Design and Development. Blackwell Publishing Company. USA: IFT Press.
- Howard R. Moskowitz, I., Sam Saguy & Tim Straus (2009). An Integrated Approach to New Food Product Development. USA: Taylor and Francis Group, LLC.
- Mary Earle & Richard Earle (2008). Case studies in food product development. USA :Wood head and CRC Press LLC

Outcomes	➢ Become competent in new food product development. ➢ Aware about regulatory aspects in product development and product commercialization

Course Teacher

Prof.K. Manimekalai

P.Venkateswari

Semester - VI			
Course code: 453S09	**Skill Based Subject: IV(A)-Quality Management in Food Processing and Preservation**	Credits: 2	Hours: 2
Objectives	➢ To teach different methods of food processing and preservation. ➢ To impart about the food quality assurance		
Unit - I	Principles of fresh food storage: Nature of harvested crop, plant, animal; product storage; effect of cold storage and quality – storage of grains		
Unit - II	Processing and preservation by heat: Blanching, pasteurization, sterilization and UHT processing, canning, extrusion cooking, dielectric heating, microwave heating, baking, roasting and frying		
Unit - III	Processing and preservation by low Temperature – refrigeration, freezing, CA, MA, and dehydro-freezing. Food irradiation, mechanism, the electro-magnetic spectrum, forms of radiant energy		
Unit – IV	Processing and preservation by drying- selection of methods based on characteristics of foods to be produced, advantages and disadvantages of different methods, sundrying, tray or tunnel drying, spray drying, drum drying, freeze drying, fluidized bed drying		
Unit - V	Food Quality assurance –Quality parameters- physical, chemical, functional, microbial; Rapid diagnostic methods of food quality – instruments and kits, Food standards – GMP, codex alimentations, ISO – 9000 serious, Food laws - PFA, FPO, AGMARK, MPO, BIS, Food safety and standards act, 2006		

Reference and Textbooks

- Thoms Richardson & Johan, W. Finley. (2003). Chemical Changes in Food during Processing. New Delhi: CBS Publishers and Distributors.
- Desrosier, N.W & James, N. (2007). Technology of food preservation. AVI.
- World Health Organisation. (1998). Guidelines for Drinking Water Quality, (2nd edition). 1*(2), and (3)*, Geneva
- Visit to food processing Industries- Rice, wheat, pulse, millets, fleshy foods, Egg milk, and milk product and fruit and vegetable processing Industry.

Outcomes	➢ Gain knowledge on methods in food processing and preservation ➢ Understand the food quality assurance

Course Teacher
Prof.K. Manimekalai
R.Ramya

Semester - VI			
Course code: 453S10	**Skill Based Subject: IV Fundamentals of Tourism & Hospitality Management**	Credits: 2	Hours: 2
Objectives	➢ To gain knowledge on tourism and hospitality management		
Unit - I	Meaning, Significance and History of Tourism in India Tourism industry: Systems, components, infrastructure Types of Tourism: Ecotourism, Heritage tourism, Medical tourism, Educational tourism etc		
Unit - II	Travel Agent: Types of travel agencies, Functions of travel agency, How to setup travel agency, sources of income for a Travel Agency The tour operator: Types of tour operators, packages tour, guides and escorts. Formalities and regulations for tourism (in brief): Passport, Visa, Health Regulations for International Travel, Customs Regulations, Emigration and Immigration, Taxes Paid by Travellers & Travel Insurance. Itinerary Planning: Meaning, components, resources for planning, calculation of tour cost		
Unit - III	Hospitality Management: Meaning, Principles, Scope, Accountancy and Book Keeping		
Unit – IV	Hospitality Institutions: Meaning& types, understanding the basic culinary and catering terminologies, Classification of Hotels, Hotel divisions & departments, Functions & personnel in Front Office Management& House Keeping		
Unit - V	Types of services offered in the hotel, Types of menu, Room setting, Table setting & different types of napkin folds		
Reference and Textbooks • Kamra, K.K., & Chand, M. (2006). Basics of Tourism-Theory (1st ed.).Operation and Practice. New Delhi: Kanishka • Puri, M. & Chand, G. (2006). Tourism Management (1st ed.). New Delhi: Pragun • Roday, S., Biwal A., & Joshi. V. (2009). Tourism Operations and Management (1st ed.). New Delhi: Oxford University press. • Metti, M.C. (2008). Hotel Management and Catering. New Delhi: Anmol • Mohini Sethi. (2016). Institutional Food Management (2nd ed.). New Age International			
Outcomes	➢ Aware about the types of tourism, travel agent and tour operators ➢ Familiarize the students in hospitality management		

Course Teacher

Prof.K. Manimekalai

Dr.P.Veeramani

Semester - VI			
Course code: 453S11	**Skill Based Subject: IV(B) - Office Automation**	Credits: 2	Hours: 2
Objectives	➢ To Understand the basic concepts in Office Automation ➢ To enhance the knowledge on MS Office,MS Power Point and MS Access		
Unit - I	Computer Concepts – Introduction to Computers – Definition - Advantage & Disadvantages – Classification of Computers (Desktop, Laptop, Notepad) Hardware features & Uses – Defining Hardware – Components of Computer – Diagram of Computer – Primary Storage Concept – Secondary Storage Devices – Input / Output, Devices – Software Concepts – Operating System (O/S)		
Unit - II	Management Information Systems – An Overview – Introduction to MIS – Meaning and Role of MIS – Objectives of MIS – Elements of MIS – Characteristics of MIS – Applications of MIS (Briefly) in Accounting and Finance Management – Marketing Management – Materials Management - Production Management – Personnel Management – Role of Computers in MIS		
Unit - III	Introduction to MS Office 2000 – Characteristics & Its applications – Introduction to MS Word Creating, Editing, Formatting, Saving Documents – Types of Document Formats – Mail Merge Features – Spreadsheet Introduction to MS Excel – Definition, Characteristics, Mathematical functions in Excel, Creating and Working with Graph and Charts		
Unit – IV	Introduction to MS Power Point – Creating, Formatting, Editing, Viewing Slideshow, Creating a Presentation using MS Power Point		
Unit - V	Introduction to MS Access – Meaning, Creating of Database, Modification, Storing and retrieving of records from a database – Introduction to Business Process Outsourcing – Creation of email ID		
Reference and Textbooks • Memoria, C.B. MS Office – Complete Reference. New Delhi: BPP • Malhotra, T.D. Computer Awareness and Applications New Delhi: Kalyani • Mustafa, A. Principles of Information Technology. Madurai: Nagas			
Outcomes	➢ Gain the basic knowledge on Computer concepts ➢ Familiarize with the MS Office, MS Power Point, MS Access		

Course Teacher

Prof. K. Manimekalai

ALU Computer Centre

Semester - VI			
Course code: 453S12	**Skill Based Subject: IV (B) NGO and Corporate Social Responsibility**	Credits: 2	Hours: 2
Objectives	➢ To familiarize the students about the characteristics and functions of NGO ➢ To understand the role of CSR in improving the standard of living of the down trodden		
Unit - I	Concept of NGO: Meaning of NGO and GO, Difference between Government Organizations and NGO, Characteristics of good NGO, Structure of NGO, Functions of NGO, Historical Perspective of NGO, Advantages of NGO, Present status of NGO, Contribution of NGO in the Development. Role of International NGO in development		
Unit - II	Establishing a NGO: Steps for starting NGO, Registration of NGO, Selection of Personnel, Training of Personnel, Proposal writing under NGO, Identifying Funding agencies, Resource Mobilization, Planning, Implementation and Evaluation strategy under NGO. Accountability and impact assessment for NGOs		
Unit - III	NGO Management: Organizational types and structures, Managing people and teams in NGOs, NGO management competencies		
Unit – IV	CSR: Meaning, CSR Process, Steps in developing a CSR strategy and policy evolution**.** Tools, technical guidance and standards to be used for assessment		
Unit - V	Indian Scenario: Overview of CSR in India, CSR initiatives government and corporate establishments		
Reference and Textbooks: • Chandra, S. (2003). Guidelines for NGO Management in India. New Delhi: Kanishka • Lewis, D. (2001). (2n ed.). Management of Non Governmental Development Organization New York: Routledge, • Abraham, A. (2003). Formation and Management of NGOs. (3rd ed.). New Delhi: Universal Law Publishing Co. Pvt Ltd., • Sundar, P. (2013). Business and Community: The Story of Corporate Social Responsibility in India. New Delhi: Sage. • Aggarwal, S. (2008). Corporate Social Responsibility in India. New Delhi: Sage			
Outcomes	➢ Gain knowledge on characteristics, structure and functions of NGO ➢ Aware about the role of CSR in improving the standard of living of the down

Semester -I			
Course code: 453N02	**Advanced Food Science**	**Credits: 5**	**Hours: 5**
Objectives	➢ To impart Knowledge on functional Classification of Food ➢ To guide about the Composition and Nutritive value of Food		
Unit - I	Functional Classification of Foods, Basic Food Groups -4, 5, 7 & 9.Cooking Methods –Water, Oil and Air as Medium. Cereals – Structure, Composition, Nutritive value of Rice, Wheat, Ragi, Maize, Cereal Cookery - Cooking Methods, Effect of Moist Heat and Dry Heat, Factors Affecting Gelatinization. Fermentation – Definition, Advantages, Cereal Products.		
Unit - II	Pulses – Composition and Nutritive value of pulses and Legumes- Toxic constituents in Pulses, Pulse Cookery – Methods, Effect of Cooking, Factors affecting Cooking Quality, Germination – Definition and Advantages. Nuts and Oil Seeds - Classification, Composition and Nutritive value. Fruits and Vegetables – Classification, Composition, Selection and Nutritive value of some common Vegetables and Fruits, Pigments in Fruits and Vegetables, Fruit and Vegetable Cookery – Methods, Effect of Cooking on Nutrients and Pigments.		
Unit - III	Fleshy Foods – Structure, composition, nutritive value and selection of fleshy foods, post-mortem changes, tenderization of meat, Meat cookery –Cooking methods and changes during cooking. Egg – structure, composition, nutritive value, selection of egg, egg cookery, factors affecting foam formation. Fish – Classification, composition, nutritive value, selection, curing and smoking of fish.		
Unit – IV	Milk - Composition, Nutritive value, Effect of Heat, Acid and Enzymes on Milk Proteins. Milk Products - Pasteurized Milk, Whole Milk Powder and Cheese. Fats and Oils-Composition, Nutritive value, Types of Fatty Acids in Groundnut, Sunflower, Sesame, Coconut and Soybean, Hydrogenation Process- Types and Prevention of Rancidity, Changes in Fat on Cooking. Sugar - types of Sugar and Stages of Sugar Cookery, Artificial Sweeteners – Cyclamate and Saccharin.		
Unit - V	Beverages – Classification, Coffee and Tea – Processing and Preparation. Cocoa – Use of Cocoa in Chocolate Preparation. Spices – Uses of Spices in Cookery Food adulteration – Definition, Common Adulterants and Methods to detect Adulterants Food standards – BIS, AGMARK, FPO Fortification and Enrichment - Definition, Objectives, Fortification of Cereal and Cereal Products.		
Reference and Textbooks: • Srilakshmi B. (2005) Food Science, New Age International (P) Ltd. Publishers. • Swaminathan M. (1979) Food Science and Experimental Foods, Ganesh and Co., Madras, Reprint. • Swaminathan M. (1996) Essentials of food and nutrition, Vol. I & II Bappco Publications, • Manay Shakunthala, N and Shadaksharaswamy M. (2008) Food facts and principles, New Age International, Reprint.			
Outcomes	➢ Gain knowledge about the Functional Classification of Food ➢ Familiarize with the Nutritive value of Food		

Course Teacher
Prof.K. Manimekalai
R.Ramya

Semester -I			
Course code: 453N02	**Advanced Food Science (P)**	**Credits: 5**	**Hours: 10**

Objectives	➢ To guide students on Experimental Cookery on Healthy Foods ➢ To enlighten about the Formulation of Healthy Foods
Unit - I	1. Experimental Cookery of Cereals a. Steaming, Boiling and pressure Cooking of Rice b. Preparation and Evaluation of Mixed Rice, Ragi Leaf Cake and Biscuit. 2. Experimental Cookery of Pulses c. Boiling, Steaming and Pressure Cooking of Pulses using Hard and Soft Water with and without Baking Soda. d. Preparation of Sprouted /Germinated Pulse Flour.
Unit - II	3. Experimental Cookery of Fruits and Vegetables a. Effect of Acid and alkali on Color, texture and Flavor. b. Enzymatic and Non-enzymatic Browning and its Prevention. 4. Experimental Cookery on Milk and Milk Products. a. Effect of acid on Milk. b. Preparation and evaluation of Ice-Cream and Kheer.
Unit - III	5. Experimental Cookery on Egg a. Effect of Sugar and Salt on Egg Foam Formation. b. Preparation and Evaluation of Poached, Scrambled Egg and Egg Custard.
Unit – IV	6. Experimental Cookery on Sugar a. Stages of Sugar Cookery b. Preparation and Evaluation of Mysore Pak and Gulabjamun. 7. Experimental Cookery on Fats and Oils a. Smoking Point of Oils b. Preparation and Evaluation of Puri and Potato Chips.
Unit - V	8. Formulation of Healthy foods a. Preparation and evaluation of (i) Ragi malt (ii) KulandaiAmudhu

Reference and Textbooks:

- Wardlaw and Insel MG, Insel PM (2004). Perspectives in Nutrition, Sixth Edition. Mosby.
- Chadha R and Mathur P (eds). (2015). Nutrition: A Lifecycle Approach. Orient Blackswan, Delhi.

Outcomes	➢ Understand knowledge about Experimental Cookery on Healthy Foods ➢ Gain knowledge about the Formulation of Healthy Foods

Course Teacher
R.Ramya
Dr.P.Veeramani

Semester -I			
Course code: 453N03	**Community Nutrition and Education**	**Credits: 5**	**Hours: 5**

Objectives	➢ To develop competencies among students for reaching out to vulnerable group in community and facilitating them to secure rewarding careers and vocations in extension media and communication for Rural Development.
Unit - I	Community- Definition, Characteristics and Types of Community. Assessment of Nutritional Status of the Community - Direct Methods – (a) Anthropometric Measurements (b) Clinical Examination (c) Bio-Physical Examination (d) Functional Assessment (e) Bio-Chemical Estimation. Indirect Methods - (a) Dietary Assessment (b) Vital Health Statistics
Unit - II	Incidence, Prevalence, Epidemiology and Preventive Measures of Nutritional Problems in India – PEM, Vitamin A Deficiency, Anemia, Iodine Deficiency Disorder and Fluorosis. Food Security - Definition, Factors affecting Food Security System, National and International Approaches to Improve Food Security. Nutrition Education- Types and Methods of Education, Principles of Planning, Executing and Evaluating Nutrition Education Programmes, Problems of Nutrition Education.
Unit - III	Nutrition Intervention Policies and Programmes in India- National Nutritional Policy, PDS, Objectives and Operation of Chief Minister Noon Meal Programme (CMNMP), Integrated Child Development Service (ICDS), Primary Health Center (PHC). National organizations – ICMR, NIN, NNMB, CFTRI, DFRL, ICAR, NIPCCD, NSI, NFI and IDA. International Organization– FAO, WHO, UNICEF, UNESCO, UNDP and World Bank. - International Voluntary Services – CARE, CRS, IDRC, Micronutrient Initiative (MI), IFPRI, WFS, WFP, AUSAID, CIDA, SIDA, DANIDA, USAID.
Unit – IV	Extension - Meaning, Philosophy, Objectives, Principles, Functions, Components and Dimension of Education. - Extension Education – Meaning, Process and Principles of Learning in Extension Education. - Extension Models- Technology, Innovation Transfer Model, Social Education Model, Indigenization Model, Social Action / Conscientization M**o**dels, Empowerment Participation Model, Combination Models. - Extension Approaches – Agricultural Extension, Commodity Specialized, Training and Visit, Participatory, Project, Farming Systems Development, Cost Sharing, Educational Institution, Integrated, Area, Cluster and Target Approach.
Unit - V	National Extension Systems – Genesis, Growth, Objectives, Principles, Critical Appraisal of the Community Development Programme. ICAR Extension System, Agricultural Universities, KVK, TTCs, Extension Systems of Ministry of Rural Development, Department of Science and Technology, Department of Industries and Department of Women and Child Development, Development work by NGOs, Support Structures and their Functions – Panchayat, Panchayat Union and DRDA, Central Social Welfare Board, State Social Welfare Board, National Level Voluntary agencies like CAPART, KVIC, Local Level Voluntary Agencies. People's Organization at Gross Roots – SHGs, Elected Panchayats.

Reference and Textbooks:

- Srilakshmi, B. (2002) Nutrition Science, New Age International, New Delhi.
- Swaminathan, M. (2003) Handbook of Food and Nutrition, the Bangalore Printing and Publishing Co. Ltd, Fifth Edition.
- Padmini Gupta, RuchiThakkar, (2015) Nutritional Disorders and Community Health, Pointer Ltd Publishers, Jaipur.
- Reddy, R.S. (2004), Nutrition Education, Common Wealth Publisher, First Edition.
- Park and Park, (2000), Park's Textbook of Preventive and Social Medicine, 18th edition, M/S BanarasidsBhanot, Jabalpur.

Outcomes	➢ Develop Competencies in Community Nutrition and Nutrition Education ➢ Familiar with Extension Media and communication for Rural Development

Course Teacher
P.Arhcana
Prof.K. Manimekalai

Semester -I			
Course code: 453N04	**Food Product Development and Marketing**	**Credits: 5**	**Hours: 5**

Objectives	➢ To understand the concept of development of a New Product and Prepare New Products Based on Special Dietary Requirements, Functionality, Convenience and Improvisation of Existing Traditional Indian Foods.
Unit - I	New Food Products – Definition, Classification, Factors Shaping New Product Development – Social Concerns, Health Concerns, Impact of Market Place Influence and Technology, Reason for New Food Product Development- Corporate, Market Place, Technological and Governmental Influences.
Unit - II	Steps in Food Product Development- Market and Literature Survey to Identify the Concepts of New Products Based on Special Dietary Requirements, Functionality, Convenience and Improvisation of Existing Traditional Indian Foods, Screening of Product Concept on the Basis of Techno-Economic Feasibility, Development of Prototype Product and Standardization of Formulation Process, Proximate Analysis of New Product, Packaging, Labelling and shelf-Life Studies, Cost Analysis and Final Project Report.
Unit - III	Case Studies of Food Processing, Business and its Aspects, Business Opportunity, Identification and Assessment Techniques, Business Idea Generation and Evaluation Exercise, Market Assessment Study, Analysis of Competitive Situation, SWOT Analysis for Business and for Competitors, Preparation of Business Plan, Preparation of Project Report, Methods of Arrangement of Inputs – Finance and Material.
Unit – IV	Criteria for Formulation of New Food Products for Infants, Pre-School Children, Adolescents, Pregnant and Nursing Mothers, Old Age, Sports Persons, Armed Sources Personnel, Emergencies and Therapeutic Uses. Standard and Safety of Food and Food Products; Criteria for Ingredients and Finished Products Laid down in the FSSAI Regulations, 2011.
Unit - V	Concept of Market and Marketing –Market Promotion and Positioning of Food Products, Role of Advertisement and Technologies in Promotion of New Products. Export Potential for selected Indian Food Products, Role of Export Promoting Agencies and Export Quality Control and Inspection Act, 1963.

Reference and Textbooks:

- Sivarama Prasad. A, (1985) Agricultural Marketing in India – Mittal Publications, New Delhi.
- Acharya. S.S. and N.L. Agarwal, (1992) Agricultural Marketing In India – Oxford and IBH Publishing Co. Pvt. Ltd., New Delhi,
- Aaron, L. Brody, John B. Lord (2005) Developing New Food Products for A Changing Market Place, 2nd Edition,
- Gordon. W. Fuller. (2004) New Food Product Development,
- Fuller, Gordon W. (2001) New Product Development- From Concept to Marketplace, CRC Press.

Outcomes	➢ Gain knowledge about Food Product Development and Marketing ➢ Understand the new Products Based on Special Dietary Requirements, Functionality, Convenience and Improvisation of Existing Traditional Indian Foods.

Course Teacher
P.Venkateswari
Dr.P.Veeramani

Semester -I			
Course code: 453EC1	**(A) Home Textiles**	**Credits: 4**	**Hours: 4**

Objectives	➢ To teach Introduction to Home Textiles ➢ To impart knowledge in Finishes and quality parameters used in Home Textiles.
Unit - I	Introduction to Home Textiles – Fabrics used for Living area, Kitchen, Dining, Bed room, Bath room accessories and general household textiles. Textile for Furnishing and Upholstery applications – scope, fixed upholstery, non-stretch loose covers & stretch covers.
Unit - II	Window/ Curtain Fabrics - Sun filters (Sheers and nets), Semi-sheers, Reflective textiles, drapes and Blinds. Bed Room Textile - Sheets & Pillow Cases, Quilted Textile, Blankets & Rugs - Jacquard blankets, Printed blankets, Fire proof blankets, Baby blankets. Bed Spreads, Mattress covers.
Unit - III	Dining Room Textiles Tablecloths – Colour – Woven & Printed type, jacquard types, embroidered types, non-woven types. Table mats – Colour -woven, Printed jacquard, embroidered. Kitchen Textiles Aprons, Dish cloth, Tea cosy, Bread bag, Mittens, Pot Holders, Table Mats – Construction & manufacturing.
Unit – IV	Bath Room Textiles – bath towels, bathrobes, floor mats, handtowels, beach towels, towels for swimming pools.- Terry Towels – types and applications. Floor Coverings – Introduction, Pile Fibres, Backing fibres & fabrics – Tufted carpets, woven carpet.
Unit - V	Finishes and quality parameters used in Home Textiles - Protection against unpleasant odour, - Temperature regulated beddings - Antimicrobial finish, - Moisture management - Test Method for towels, Rug and Home textiles and - Performance specifications of different home textiles.

Reference and Textbooks:

- Dr.Talukdar, Ajagaonkar, Sriramulu (2004) Weaving Machine, Mechanisms, Management
- Subrata Das, (2010)Performance of Home Textiles, Woodhead Publications India Pvt Ltd.

Outcomes	➢ Gain the knowledge describes various types of home textiles and their manufacturing methods. ➢ Understand requirements of different home textiles ➢ Learn to understand various finishes and evaluation methods of home textile.

Course Teacher
Prof.K. Manimekalai
Dr.P.Veeramani

Semester -I			
Course code: 453EC1	**(B) Women and Society**	**Credits: 4**	**Hours: 4**

Objectives	➢ To impart about the Different Sectors of Development, with Special Reference to Women. ➢ To introduce the Issues and Concerns of Women.
Unit - I	Women in Society – Ancient India and Modern India - Concept of Women's Movements – Basic Elements – Classifications Social Reform Movement – Status of Women through Ages.
Unit - II	Women's Role: Post Independence Period - Indian Independence Movement and Women's Movements - Narmada Valley Project Environmental Movement - Chipko Movement- Peasant Movement.
Unit - III	Position of Women in: Hinduism, Islam, Christianity - Social Reformers worked for the Emancipation of Women – Rajaram Mohan Roy, DayanadaSaraswathi, Mahatma Phule, PanditRamabai, Annie Besant, Sarojini Naidu, Muthulakshmi Reddy, DurgabaiDeshmukh, ArunaAsaf Ali.
Unit – IV	Women and Political Participation - Women and Panchayat Raj Institutions – International, National and Local Women in Parliament through Ages - Women's Bill.
Unit - V	Rise of NGOs in Women Organization for Women's Development – all India Women's Conference (AIWC) – Women's India Association (WIA) - National Council of Women in India (NCWIE) - Indian Association of Women's Studies.

Reference and Textbooks:

- Geraldine Forbes (1998) Women in Modern India, New York: Cambridge University
- Leslie L. Heywood (2005) The Women's Movement Today, Jaipur: Rawat Publications Vol. I & II
- Suguna (2009) Women's Movements, New Delhi: Discovery Publishing House Pvt. Ltd.
- SumitSarkar and Tanika Sarkar (2007) Women and Social Reform in Modern India, New Delhi: Permanent Black, Vol I & II

Outcomes	➢ Gain knowledge about the status of women in the society. ➢ Can set up their own NGOs for the development of women.

Course Teacher
Prof.K. Manimekalai
Dr.P.Veeramani

Semester –II			
Course code: 453N05	**Advanced Nutrition and Itermediary Metabolism**	**Credits: 5**	**Hours: 5**

Objectives	➢ To highlight metabolic role of nutrients and their relationship to human health and wellbeing. ➢ To gain knowledge on advanced nutrition.
Unit - I	Energy metabolism Basal and resting metabolism (BMR and RMR) – influencing factors. Methods to determine energy requirements and expenditure. Thermogenesis, adaptation to altered energy intake, latest concepts in energy requirements and RDA - ICMR and WHO
Unit - II	Carbohydrates: Classification and functions; Digestion and absorption process; Metabolism and regulation; dietary fibre meaning and types; Physiological role and health benefits of dietary fibre, Resistant starch meaning and its physiological benefits; Requirements and food sources; Glycemic index of foods. Proteins – Classification and Functions, Review of metabolism of Protein, Concepts of essential and non-essential amino acids – their role in growth and development. Physiological functions of proteins. Requirements, nitrogen balance concept. Methods of evaluating protein quality. Protein malnutrition. Muscle wasting – clinical features and biochemical changes. RDA-ICMR and WHO.
Unit - III	Lipids – Classification and Functions, Review of metabolism of Lipid, Concepts of visible and invisible fats, EFA, SFA, MUFA, PUFA – sources and physiological functions. Role of lipoproteins (Chylomicrons, VLDL, IDL, LDL and HDL), cholesterol, triglycerides in health and disease. Vitamins: Classification – fat and water soluble; Fat soluble vitamins (A,D,E and K): Functions, Requirements and food sources; Physiological, pharmacological and therapeutic effects, toxicity and deficiency of fat soluble vitamins; Water soluble vitamins: Thiamine, riboflavin, niacin, biotin, pyridoxine, folic acid, pantothenic acid, ascorbic acid, cyano-cobalamin, choline, inositol functions, requirements, food sources; Deficiency and toxicity of water soluble vitamins.
Unit – IV	Minerals: Macro minerals: Calcium, phosphorus, Magnesium, sodium, potassium and chloride functions, requirements, food sources, deficiency and toxicity; Micro minerals: Iron, copper, zinc, manganese, iodine, fluoride. Trace Minerals: Selenium, cobalt, chromium, vanadium, silicon, boron, nickel functions, requirements, food sources, deficiency and toxicity. Interrelationship between vitamins and minerals in metabolism.
Unit - V	Water: Body composition – extra- and intra- cellular fluid; Physiological functions; water balance and its regulation; Requirement and the sources; Nutritional and health problems due to deficiency or excess of water intake. Phytochemicals: Non nutritive food components and their potential health benefits: polyphenols, tannins, phytate, phytoestrogens, cyanogenic compounds, lectins and saponins.

Reference and Textbooks:

- Srilakshmi, B. (2005) Food Science, New Age International (P) Ltd., Publishers, New Delhi.
- Potter, N. and Hotch Kiss, J.H. (1996): Food Science, Fifth edition, CBS Publishers and Distributors, New Delhi
- Julians, B.O. (1985). Rice Chemistry and Technology, 2nd edition, American Association Chemists, St. Paul Mimesota, USA.
- Charley, H. (1982). Food Science, 2nd edition, John Wiley & Sons, New York.

Outcomes	➢ Know about the metabolic role of nutrients and their relationship to human health and wellbeing. ➢ Understand advanced nutrition.

Course Teacher
P.Venkateswari
Prof.K. Manimekalai

Semester -II			
Course code: 453N06	**Therapeutic Nutrition**	**Credits: 5**	**Hours: 5**

Objectives	➢ To educate the students on Causes, Symptoms, Dietary Management and Drug Treatment Interaction with Nutrients in Various Disorders.
Unit - I	Therapeutic Diets – Principles & Objectives of Diet Therapy. Review of Hospital Diets - Regular Diet, Liquid Diet, Light Diet, Soft Diet, Pre and Postoperative Diet. Diet Planning and Use of Exchange List in Nutrient Calculation. Gastrointestinal Disorder – Etiology, Symptoms and Modifications of Diet in Diarrhea, Constipation, Peptic Ulcer, Malabsorption Syndrome and Ulcerative Colitis.
Unit - II	Disorders of Liver and Gall Bladder - Etiology, Classification and Dietary Regimen in Jaundice, Hepatitis, Cirrhosis, Hepatic Coma, Cholecystitis and Cholelithiasis. Nutrition and Alcoholism. Diseases of Kidney – Etiology and Dietary Management in Glomerulonephritis, Nephrosis, Renal Failure, Nephroscelerosis, Nephrolithiasis, Dialysis and Transplantation.
Unit - III	Diseases of the Heart & Circulatory System- Risk Factors of Cardiac Diseases, Causes, Prevention and Dietary Management of Hypertension, Atherosclerosis, Congestive Heart Failure, Hyperlipoproteinemia, Hypercholesterolemia, Role of Antioxidants in the Prevention and Treatment. Obesity and Underweight – Etiology, Types, Dietary Modifications in the Management of Obesity and Underweight. Anemia – types, Signs & Symptoms, Clinical Manifestation, Dietary Interventions.
Unit – IV	Disorders of Pancreas - Pancreatitis. Diabetes mellitus – Classification, Etiology Symptoms, Metabolic Changes, Long Term & Short Term Complications, Types of Insulin, Dietary Modifications for Diabetes Mellitus, Glycemic Index of Foods, Nutritive and Non- Nutritive Sweeteners. Nutrition in Cancer- Causes of Cancer Cell Development, Metabolic and Nutritional alterations in Malignancy, Bodies' Defense System, Cancer Therapy & nutrition, eating problems in cancer, feeding and blend preparation for cancer.
Unit - V	Etiological Factors & Dietary Modifications in Fever, Injury & Burns, Allergy, Dental Diseases – Dental Caries & Peritonitis. Management of Nervous Disorders- Alzheimer Disease, Parkinson's disease, Autism. Management of Musculoskeletal System Disorders - Osteoporosis, Osteomalasia, Osteoarthritis and Rheumatoid Arthritis.HIV Infection and AIDS- Clinical Manifestations, HIV infection and other disease, Immunity and AIDS Virus, Dietary Management.

Reference and Textbooks:

- Gopal, C. Kamalakrishnaswamy (2000) Nutrition in Major Metabolic Disease, Oxford India Paper Backs Publisher
- Lory A. Smolin and Mary B. Grosvenor (2000) Nutrition Science and Application, Saunders College Publishing New York.
- Mahan, L.K., Stump, S.E and Krause, S (2004) Food Nutrition & Diet therapy, 11th edition, W.B. Saunders Co.

Outcomes	➢ Gain Knowledge about Dietary Management and Therapeutic Nutrition

Course Teacher
P.Archana
Prof.K. Manimekalai

Semester -II			
Course code: 453N07	**Therapeutic Nutrition Internship**	**Credits: 8**	**Hours: 10**

Objectives	➢ To familiarize the students in planning the Diet for an Infant, Preschool Children, School Children, Adolescent Boys and Girls, Adult Men and Women, Old Aged Person and macro and micro deficiency diseases. ➢ To enable the students to interpret the Patient Data and Diagnostic Tests
Unit - I	Market survey of Commercial Nutritional Supplements and Nutritional support substrates. Commonly used test for Diagnosis of Various diseases- system wise.
Unit - II	Interpretation of Patient Data and Diagnostic Tests. Drawing up of Diet Prescription using a Case Study Approach.
Unit - III	Follow up – Acceptability of Diet Prescription, Compliance and Discharge Diet Plan. Preparation of Diet Counseling Aids for common Physiological conditions in Life Cycle and Disorders.
Unit – IV	Planning balanced Diet for an Infant, Preschool Children, School Children, Adolescent Boys and Girls, Adult Men and Women, Old Aged Person.
Unit - V	Planning Diet for Deficiency conditions of Macro and Micronutrients. Planning Diet for Patients with common Multiple Disorders, Complications and Discharge Diet Plans.

Reference and Textbooks:

- Mahan, L.K., Stump, S.E and Krause, S, (2004)Food Nutrition & Diet therapy, 11th edition, W.B. Saunders Co,
- Mahtab S. Bamji, Prasad Rao, N. Vinodini Reddy. (2003) Textbook of Human Nutrition, Oxford and IBH Publishing Co. Pvt. Ltd.
- Passmore, D.P and Break, J.P. (1986) Human Nutrition& Dietetics, English language Book Society, Livingeston.

Outcomes	➢ Plan the Diet for an Infant, Preschool Children, School Children, Adolescent Boys and Girls, Adult Men and Women, Old Aged Person and macro and micro deficiency diseases. ➢ Interpret the Patient Data and Diagnostic Tests

Course Teacher
P.Archana
Prof.K. Manimekalai

Semester -II			
Course code: 453EC3	**A) Women and Health**	**Credits: 4**	**Hours: 4**

Objectives	➢ To introduce the concept of health and the issues related to Gender and health ➢ To study about the national and international initiatives in the promotion of Women Health.
Unit - I	Health: Concept, Definition and types of Health – Parameters of Community Health - Gender and Health - Health Care Needs of Women, Men - Health Status of Women - Factors influencing women's health - Health Indicators of Women - Mortality - Morbidity - Sex ratio, Child sex ratio, Life expectancy – MMR – IMR - Fertility
Unit - II	Women's Reproductive Health – Prenatal and Postnatal Health Care- Menstrual Hygiene Management – Menopause – Hormonal Replacement Therapy – Sex Selective Abortion – MTP – NRT – Amniocentesis Test – Clinical Trials and Gender Bias – Infertility: IVF & Surrogacy
Unit - III	Gender and Nutrition– Nutrition for pregnant and lactating mothers - Nutrition education for girls – Anemia - Gender bias in nutrition intake -Protein Malnutrition – Gender Discrimination - Breast Feeding – Health Seeking Behaviour – Initiatives on Nutrition Program – National –NRC – Rishori Sakthi - International - WHO – ICDS – UNICEF - RTI and STI.
Unit – IV	Gender and Health issues: Feminization of HIV/AIDS – Private vs Public Spheres – Balancing Drudgery and Health Needs – Pollution and Health –Health issues of LBGTQ– Environmental & Occupational Health hazards- Health issues relating to: sex workers, women with disabilities, women elderly.
Unit - V	Programme and Policies for Health for women : International Initiatives – ICPD – Cairo- National Health Policies, NRHM, ASHA, ICDS - Population Policy 2000 – MCH to RCH Approaches-Impact of Population Policies – Tamil Nadu State

Reference and Textbooks:

- Rao, Mohan (2004) From Population Control to reproductive health, New Delhi Sage Publication
- Singh, Lakshmi Abha (2005) Rural Women: Work and Health, New Delhi: The women press
- Sarma, suranjan (2004) Public Investment Primary Health Care, New Delhi: Mittal publications
- Srivastava Sanjay, Brasted Howard (ed) (2004) Sexual sites, Seminal Attitudes Sexualities, Masculinities and Culture in South Asia, New Delhi Sage: publications

Outcomes	➢ Gain knowledge on the concept of health and the issues related to Gender and health ➢ Able to acquire information on National and International Initiatives in the promotion of Women Health.

Course Teacher
Prof.K. Manimekalai
Dr.P.Veeramani

Semester -II			
Course code: 453EC4	**(B) Food Service Management**	**Credits: 4**	**Hours: 4**
Objectives	➢ To inculcate the Knowledge on Institutional Food Administration Strategies and Management.		
Unit - I	Introduction to Food Service Systems: Evaluation of the Food Service Industry, Characteristics of the various types of Food Service Units - Commercial - Hotel, Motel, Restaurant, Cafeteria and Chain Hotels; Welfare - Hospital, School Lunch, Residential Establishment and Industrial Catering; Transport - Air, Rail, Sea and Space; Miscellaneous - Contract and Outdoor.		
Unit - II	Management - Approaches to Catering Management, Principles and theories of Management, Functions of Management, and Styles of Management, Management Tools- Organisation Chart and its Types. Strategies in Planning- Conceptual Strategy, Marketing Strategy, Financial Strategy, types of Plans.		
Unit - III	Management of Resources – Finance- Determining the Finance needed to Establish or Run an Unit, Budgets, Sources of Finance, Planning Adequate Cash Flow. Space & Equipment Management- Steps in Planning Layouts, Determining Equipment, Selection and Placement, Layout Analysis.		
Unit – IV	Material Management- Menu Planning, Planning the Material Needed, Methods of Selection, Purchasing, Receiving and Storage, Quantity Food Production, Service and Modes of Delivery, Planning Menus for Banquet, Outdoor Catering, Packed Meals and Restaurant. Personnel Management- Manpower Planning, Placement, Recruitment, Induction, Training, Motivation and Performance Appraisal. Time and Energy Management- Measures for Utilisation and Conservation.		
Unit - V	Financial Management - Definition, Cost Concept, Component of Cost, Food Cost Control, Pricing, Book Keeping and Accounting, Techno-Economic Feasibility of Food Production/Service Enterprise. Marketing and Sales Management-Market Survey, Sales Analysis, Market Promotion. Quality Assurance- Food Quality, Total Quality Management, Analysis of Processed and Finished Products.		
Reference and Textbooks: • Avery, A.C. (1980): Modern Guide to Food Service Equipment. Boston CBI Publishing Company. • Brichfield, J. (1988): Design and Layout of Food Service Facilities, New York. VanNortrand Reinhold. • Brodner, J., Maschal, H.T., Carlon, H.M. (1982): Profitable Food and Beverage Operation 4th Edition, Hayden Book Company, New Jersey. • Coltman, M.M. (1977): Food and Beverage Cost Control. Printice Hall Series.			
Outcomes	➢ Gain the Knowledge about Food Service Management ➢ Learn about Management of human and non human resources in food service management.		

Course Teacher
R.Ramya
Dr.P.Veeramani

Semester -III			
Course code: 453N08	**Advanced Biochemistry**	**Credits: 5**	**Hours: 6**
Objectives	➢ To understand the composition and function of blood, water and electrolyte ➢ To study about the classification, Structure and properties of macro nutrients		
Unit - I	Components of blood - Composition and function of blood, Plasma and blood corpuscles, Structure and function of haemoglobin, abnormal haemoglobins. Blood coagulation – mechanism and regulation, Blood groups Water and electrolyte - Regulation of water and electrolyte balance, Role of hormones and kidneys in their maintenance, Hydrogen ion homeostasis and acid-base balance.		
Unit - II	Carbohydrates - Occurrence, Classification and Structure, Physic-chemical properties and biological importance of carbohydrates. Monosaccharide and related compounds, disaccharides and Polysaccharides. Metabolism of carbohydrates - Aerobic and anaerobic degradation, Glycogenesis and Glycogenolysis, Glycolysis and Gluconeogenesis, Cori‟s cycle, Pyruvate Dehydrogenase complex, Krebs-cycle and Pentosephosphate pathway, Regulation of carbohydrate metabolism, Sugar derivatives of biomedical importance and Inter conversion of Hexoses		
Unit - III	Proteins - Classification, structure and properties of amino acids, Classification, properties and structure of proteins - Primary, secondary, tertiary and quaternary structure. Metabolism of Proteins - General reactions of protein metabolism Essential amino acids. Inborn errors of protein metabolism. Metabolism of amino acids- Decarboxylation, Transamination, Deamination, Glycine, Tyrosine, Tryptophan, Methionine and urea cycle. Nucleic acids- Biosynthesis and degradation of purines and pyrimidines and their regulation.		
Unit – IV	Lipids - Structure and Biological importance and distribution of fats and fatty acids, Chemical properties and characterization of fats. Metabolism of Lipids - Biosynthesis of saturated and unsaturated fatty acids, β-Oxidation of fatty acid, Biosynthesis of glycerides, phospholipids and cholesterol, Regulation of lipid metabolism and ketone bodies, Disorders of lipid metabolism, lipoproteins and their significance, Role of free radicals and antioxidants in health and diseas		
Unit - V	Vitamins - Structure and Biochemical properties of water soluble and fat solublevitamins and their coenzyme activity. Hormones - Mechanism of hormone action and its regulation - Hormones of Pancreas, Pituitary, Adrenal, Thyroid and Sexhormones. Bioenergetics - Electron transport chain, Oxidative Phosphorylation and synthesis of ATP Enzymes, Enzymes in differential diagnosis of diseases and their clinical significance		

Reference and Textbooks:

- Murray, R.K., Granner, D, K., Mayes, P.A. and Rodwell, VW. (2000): Harpers Biochemistry, Macmillan worth Publishers.
- Nelson D.L. and Cox, M.M. (2000): Lehninger's Principles of Biochemistry, Macmillan Worth Publishers.
- Devlin, T.M. (1997) Text book of Biochemistry with Clinical Correlations, Wiley Liss Inc.
- Stryer, L. (1998): Biochemistry, W.H. Freeman and Co.
- Conn, E.E., Stumpt. P.K. Bruening, G. and Doi, R.H. (2001): 5th Ed. Outlines of Biochemistry, John Wiley and Sons.

Outcomes	➢ Gain knowledge about composition and function of blood, water and electrolyte. ➢ Know about the classification, Structure and properties of macro nutrients

Course Teacher
P.Venkateswari
Prof.K. Manimekalai

Semester -III			
Course code: 453N09	**Food Microbiology**	**Credits: 5**	**Hours: 6**

Objectives	➢ To study about Microorganisms and its Identification in Food. ➢ To gain knowledge on prevention methods in contamination and spoilage of food
Unit - I	Introduction – Types of Microorganisms, Classification and Nomenclature, Morphology, Structure, Reproduction and their Importance in Food (Bacteria, Fungi, Viruses and Prions, Protozoans and Others).
Unit - II	Microbial growth- Bacterial Growth Curve, Intrinsic and Extrinsic Parameters of Food affecting the Microbial Growth. Food Spoilage - Types of Food Spoilage, Factors responsible for Microbial Spoilage, Acidity, Temperature, Time, Oxygen, Moisture, Water Activity, Changes caused by Micro-Organisms during Spoilage (Breakdown of Proteins, Carbohydrates, Fats and Other Constituents).
Unit - III	Water – Sources, Bacteriology of Water Supplies, Bacteriological Examination, Purification of Water, Water Borne Diseases and Prevention. Microbiology of Food and its Products. Food Borne Diseases-Food Infection and Intoxication.
Unit – IV	Isolation and Identification of Microorganisms, Methods for the Microbiological Examination of Foods – Indicator Organisms, Direct Examination, Cultural Techniques, Enumeration Methods – Plate Counts, Most Probable Number Counts, Alternative Methods – Dye Reduction Tests, Electrical Methods, ATP Determination; Rapid Methods for the Detection of Specific Organisms and Toxins.
Unit - V	Prevention of Contamination and Spoilage – Principles of Preservation, Classification of Food Preservation. Physical Methods - High Temperature, Low Temperature, Irradiation and Microwave Heating, Concentration, Drying and Dehydration. Chemical Methods- Preservatives. Biological - Fermentation, Hurdle Technology. Non Destructive Method of Preservation – High Pressure Processing, Pulse Electric Field, Pulse Light Field, Ultrasound, MAP, CAP and Vacuum Packaging.

Reference and Textbooks:

- Pelczar, M.I and Reid, R.D, (1993) Microbiology, MC Graw Hill Book Company, New York,5th edition,
- Atlas M.Ronals (1995) Priniciples of microbiology, 1st edition, Mosby – year book Inc,Missouri, U.S.A,
- Frazier, W.C,(1988) Food Microbiology, MC Graw Hill Inc 4th edition,
- Banwart ,(1989) Basic Food Microbiology, 2nd edition CBS Publisher,
- Bensaon, H.J, (1990)Microbiological applications, C. Brown publishers, U.S.A,

Outcomes	➢ Gain knowledge on Microorganisms and its Identification in Food ➢ Aware about the prevention methods in contamination and spoilage of food

Course Teacher
P.Archana
Dr.P.Veeramani

Semester -III			
Course code: 453N10	**Research Methodology And Statistical Analyses**	**Credits: 5**	**Hours: 6**

Objectives	➢ To teach Research Methodology ➢ To inculcate different Statistical Methods and its Applications
Unit - I	Meaning of Research- Process of Research, Objectives of Research. Developing a Research Proposal, Presentation of a Problem, Identifying the Problem - Defining and delimiting the Problem. Types of Research - Fundamentals, Applied, Action, Animal Experimentation, Descriptive, Tools for Research, Different types of Experimental Designs.
Unit - II	Measure of Central Tendency: Mean, Median, Mode and their uses with examples and their Advantages and Disadvantages. Measure of Dispersion: Significance and Methods used in studying Dispersion (Range, Quartile Deviation, Mean Deviation and Standard Deviations) with their Uses, Advantages and Disadvantages.
Unit - III	Test of Relationship; Meaning, Types and Methods used to Study Correlation (Simple Co-efficient of Correlation, Rank Correlation, Co-efficient of Concurrent Deviation and other Methods), Regression along with their uses, Advantages and Disadvantages. Testing of Hypothesis, Meaning, Basic Concept Concerning Testing of Hypothesis.
Unit – IV	a) Sampling- Type Probability, Non-Probability Sampling, Probability Sampling-Simple Random Sampling, Systematic Random Sampling, Two Stage and Multi Stage Sampling, Cluster Sampling. Non- Probability Sampling, Quota Sampling, Volunteer Sampling. b) Data Analysis- Quantitative, Qualitative, Presentation of Data - Tables, Graphs, Illustrations, Foot Notes and Bibliographical Presentations.
Unit - V	Research Reports - Basic concepts of Research Report - Preliminaries - Title Page, acknowledgement, List of Tables, List of Figures, Index - Main text. - Bibliography, Glossary, Appendices. Role of computers and its applications in Textile Research. Student- "t" Test, Analysis of Variance- One way and Two way Classification- Characteristics of ANOVA, Chi-Square: General Features of Chi-square- 2*2 type tables, Duncan's Table.

Reference and Textbooks:

- Gupta (1993), Statistical Methods, Sultan Chand and sons, Daryagang, New Delhi.
- Kothari. C.R. (1991) Research Methodology, Methods and Techniques, Wiley Eastern Ltd, New Delhi.
- Wilkinson and Bhandarkar.P.L.C. (2010) Methodology and Techniques of Social Research, Himalaya Publishing House, Bombay.

Outcomes	➢ Gain knowledge on types of Research and Able to develop a Research Proposal. ➢ Get familiar with various Statistical Tools used in the Research Methodology.

Course Teacher
R.Ramya
Dr.P.Veeramani

Semester -III			
Course code: 453EC5	**(A) Fabric Sourcing**	**Credits: 4**	**Hours: 6**

Objectives	➢ To enable the students to Knowledge of different fabric clusters in India. ➢ To implant knowledge about Lead Time for Fabric Sourcing
Unit - I	Fundamentals of Fabric Sourcing - How to buy Fabrics - Basic knowledge requisite for fabric sourcing - Vendor Analysis & Development Selection of Vendor.
Unit - II	Knowledge of different fabric clusters in India - Types of fabrics produced, and end use of different fabrics produced in India - Factors to be considered while sourcing from domestic suppliers - Overseas Fabrics sourcing locations - Knowledge of different overseas fabric locations - Sourcing from nominated vendors - Factors to be considered while sourcing from overseas.
Unit - III	Lead Time for Fabric Sourcing - Time and Action Calendar for Sourcing - Lead time calculation for Fabric Sourcing - Cost Benefit Analysis while fabric sourcing - Just in Time Sourcing - Import verses Domestic Sourcing - advantages and disadvantages.
Unit – IV	Import of Fabrics - Policy Procedure and Documentation for Importing Fabrics from global sources - Licenses required for importing fabrics from overseas markets - Clearing and Forwarding, port handling procedure while importing fabrics - Transportation for import of fabrics.
Unit - V	Supply Chain Management & Inventory - In-bound logistics & Out-bound logistics - Transportation - Internal and external - Warehouse management - storing & inventory systems - Stock Plans and issuing materials to operations - Procedure to issue materials to internal customers - Supermarket or Store operations in garment industry.

Reference and Textbooks:

- Susheela Dantyagi (1998) Fundamentals of Textiles and their Care, Orient Longman Ltd New Delhi.
- Gokarneshan, (2009) Fabric Structure and Design - New Age International
- Anbumani, (2006) Knitting Manufacture Technology, New Age International, Chennai
- Ruth Clock & Grace Kunz, Upper by Sadale (2000). Apparel Manufacture- Sewn Product Analysis River Publications, New York
- JE Booth, (1996) Principle of Textile Testing by CBS Publication New Delhi

Outcomes	➢ Gain knowledge the fundamentals of Fabric sourcing methods and lead time ➢ Become familiar with different fabric clusters in India

Course Teacher
Prof.K. Manimekalai

Semester -III			
Course code 453EC6	**(B) Functional Foods and Nutraceuticals**	**Credits: 4**	**Hours: 6**
Objectives	➢ To learn the Concepts on Functional Foods and Nutraceuticals ➢ To instruct the Isolation of photochemical from plant materials.		
Unit - I	Functional Foods and Nutraceuticals–Definition, concept, history and market; Evolution of nutraceuticals and functional foods market. Classification of nutraceuticals and functional foods. Significance and relevance of nutraceuticals and functional foods in the management of diseases and disorders.		
Unit - II	Natural occurrence of certain phytochemicals- Antioxidants and flavonoids: omega – 3 fatty acids, carotenoids, dietary fiber, phyto estrogens; glucosinates; organo sulphur compounds. Dosage for effective control of disease or health benefit with adequate safety; studies with animals and humans; acute and chronic studies. Regulatory issues.		
Unit - III	Isolation of phytochemicals from plant materials: Care in handling and storage of raw materials with minimal damage to sensitive bioactive compounds; Extractive methods for maximum recovery and minimal recovery and minimal destruction of active material; stability studies. Recent developments in the isolation, purification and delivery of phytochemicals.		
Unit – IV	Prebiotics, probiotics and symbiotics- Probiotics: Definition, types and relevance; Usefulness in gastro intestinal health and other health benefits; development of probiotic products; recent advances in probiotics; Challenges and regulatory issues related to probiotic products. Prebiotics: Prebiotic ingredients in foods; types of prebiotics and their effects on gut microbes; health benefits of prebiotics; recent development in prebiotics. Symbiotic.		
Unit - V	Functional foods - Definition, development of functional foods, use of bioactive compounds in appropriate form with protective substances and activators; Effect of environmental condition and food matrix; Effects of processing conditions and storage; Development of biomarkers to indicate efficacy of functional ingredients; Research frontiers in functional foods; delivery of immunomodulators /vaccines through functional foods. Nutrigenomics- concept of personalized medicine. Use of nanotechnology in functional food industry.		
Reference and Textbooks: • Wildman, R.E.C. (2007) Handbook of Nutraceuticals and Functional Foods, second edition. CRC Press. • Gibson GR & William CM. (2000) Functional Foods - Concept to Product. • Goldberg I. (2004) Functional Foods: Designer Foods, Pharma Foods. • Brigelius-Flohé, J & JoostHG. (2006) Nutritional Genomics: Impact on Health and Disease. Wiley VCH. • Cupp J & Tracy TS. (2003)Dietary Supplements*:* Toxicology and Clinical Pharmacology. Humana Press.			
Outcomes	➢ Gain knowledge on Natural occurrence of certain photochemical ➢ Understand about the Prebiotics, probiotics and symbiotics.		

Course Teacher
P.Venkateswari
Prof.K. Manimekalai

Semester - IV			
Course code: 453N11	**Macro and Micro Nutrients**	**Credits:5**	**Hours: 5**
Objectives	➢ To study about the micronutrients& macronutrients and its utilization		
Unit - I	Energy – Energy value of Foods and its Determination, Energy Expenditure, Components, Basal Metabolism, Factors affecting BMR, Role of Carbohydrate, Protein and Fat in Energy Metabolism. Dietary Fibre - Definition, types of Fibre in Plant Foods, Sources, Role of Dietary Fibre and Resistant Starch, Effect of over Consumption of Fibre		
Unit - II	Carbohydrates – Chemistry, Classification, Function, Digestion, Absorption, Utilization - Glycolysis, TCA Cycle, HMP Shunt and Energy Production, Gluconeogenesis. Pentose Phosphate Pathway, Glycogenolysis, Glycogenesis. Proteins - Chemistry, Structure, Classification, Function and Utilization.		
Unit - III	Amino Acids – Classification, Function, General Pathways of Protein Metabolism, Denaturation, Transamination, Deamination, Decarboxylation and Urea Formation, Evaluation of Protein Quality. Fats – Chemistry, Classification, Function, Utilization, Transport, Deposit, Biosynthesis and Oxidation of Saturated and Unsaturated Fatty Acids, Cholesterol, Phospholipids and Bile Pigments.		
Unit – IV	Fat Soluble and Water soluble Vitamins - Chemistry, Digestion, Absorption, Metabolism, Physiological Functions, RDA, Sources, Deficiency Disorders, Toxicity, Method of Assessment and Interrelationship.		
Unit - V	Macro minerals (calcium, phosphorous, potassium, sodium and chloride) and Micro minerals (iodine, iron, copper, fluorine, zinc, magnesium, manganese, chromium and selenium) - Chemistry, digestion, absorption, metabolism, physiological functions, RDA, sources, deficiency disorders, toxicity, method of assessment and interrelationship between minerals. Water and Acid base balance. Interrelationship between vitamins and minerals.		
Reference and Textbooks: • Gardon, M. Wardlaw., Paul, M. Iunset and Marcia, F. Seyler, (1994) Contemporary Nutrition, Mosby Publications. • Lehninger, A.L, (2000) Biochemistry, Worth Publishers Inc, New York • Geissler, C. and Powers, H., (2007) Human Nutrition, 11th edition, Elsevier Publication, • Lehninger, A.L, (2000) Biochemistry, worth publishers INC, New York • Powar and Chatwal, (2000) Biochemistry, Himalaya publishing house			
Outcomes	➢ Attain knowledge about macronutrients and its utilization ➢ Understand knowledge about Micronutrients and its Utilization		

Course Teacher
R.Ramya
Dr.P.Veeramani

Semester -IV			
Course code: 453N12	**Nutrition Through Life Cycle**	**Credits: 5**	**Hours: 5**

Objectives	➢ To understand the growth, development and nutritional requirements in different stages of life cycle.
Unit - I	Different food Groups, Recommended Dietary Allowances for Indians, Basis for requirement, computation of Allowances. Nutrition in Pregnancy-Stages of Gestation, Physiological Adjustments, Weight gain during Pregnancy and Nature of Weight Gain, Nutritional Requirements, Storage of Nutrients, Physiological cost of Pregnancy and Complications of Pregnancy.
Unit - II	Nutrition in lactation- physiological adjustments during lactation, hormonal controls & reflex action, physiology of milk production, nutritional components of colostrum and mature milk, special foods during lactation, nutritional requirements during lactation. Nutrition in infants – rate of growth, weight as the indicator, breast Vs bottle feeding, nutritional allowances, feeding premature and low birth weight infants, supplementary feeding and weaning foods.
Unit - III	Nutrition in preschool Children – Growth and development, Food Habits, Nutritional Requirements, Supplementary Foods. Nutrition in School Age - Early and Middle Childhood, Growth and Development, Food Habits, Nutritional Needs and Packed Lunch. Nutrition during adolescence - physical growth, pubertal changes, nutritional needs and eating disorders- anorexia nervosa and bulimia, adolescent pregnancy and its complications.
Unit – IV	Nutrition during adulthood – Type of work, adult consumption unit, meal planning and nutritional needs. Nutrition during old age - physiological and psychological changes during old age, nutritional requirements, factors affecting food intake, common nutritional problems in old age.
Unit - V	Nutrition in yoga and exercise- Role of carbohydrate, protein, fat, vitamins, minerals, water and electrolyte in exercise and its changes before, during and after exercise. Nutrition in Sports, Nutrition in space, defence, high altitudes, extreme hot and cold climates and submarines.

Reference and Textbooks:

- Swaminathan, M. (2004) Advanced text book on Food and Nutrition, Anmol Publication Pvt, Ltd, Second Edition.
- VenkataiahS.D., (2004)Nutrition Education, Anmol Publication Pvt. Ltd, Revised
- Mahtab S. Bamji, Prasad Rao, N. Vinodini Reddy. (2003) Textbook of Human Nutrition, Oxford and IBH Publishing Co. Pvt. Ltd, Second Edition,
- Srilakshmi, B. (2002) Nutrition Science, New Age International ltd, New Delhi,
- Gopal, C. Kamalakrishnaswamy (2000) Nutrition in Major Metabolic Disease, Oxford India Paper backs Publisher

Outcomes	➢ Aware about the growth, development and nutritional requirements in different stages of life cycle

Course Teacher
P.Archana
Prof.K. Manimekalai

Semester -IV			
Course code: 453N13	**Computer Application in Nutrition and Dietetics (P)**	**Credits: 5**	**Hours: 10**

Objectives	➢ To teach the basics of Computer and its Applications. ➢ To educate skills to apply Computer Based Technology in Food Science and Nutrition.
Unit - I	Introduction to Computers - History of Development of Computers, Main Frame, Minis, Micros and Super Computer Systems, Binary Numbers, Bits, Bytes, CPU, Input and Output Devices, Main and Auxiliary Stage Device, Software and Hardware
Unit - II	Operating Systems and MS Office - Introduction to Operating Systems, Windows Applications MS Word, MS Excel, MS Access and MS Power Point Practical: MS Word, Excel, Access and Power Point
Unit - III	Computer Networks - LAN, WAN, Intranet, Extranet, Service Providers, Modem, Fibre OpticsBasic of HTML, WWW, URL, TCP/IP Practical: Introduction to Computer Networks
Unit – IV	Multimedia - Basic Elements, Hardware, Application of Multimedia, Introduction Multimedia, Authorizing Tools. Practical: Introduction to Macro Flash Player, Adobe Photoshop, Corel Draw.
Unit - V	Application of Computers in Food Science and Nutrition - Power Point Presentation, Nutrient and Diet Calculation, Nutrition Education and Counseling, Nutrition Software and Websites, E-Journals in Food Science and Nutrition, Use of SPSS. Practical - Developing Mini Projects in Food Science and Nutrition using MS Word, MS Excel and MS Power Point.

Reference and Textbooks:

- Balagurusamy. E (2008) Computing Fundamentals and C programming, Tata McGraw Hill Education Private Limited, New Delhi.
- Bansal.S.K (2004) Text Book of Information Technology, APH, Publishing Corporation.
- Andrew S. Tanenbaum (2009) IV Edition, Computer Networks, Pearson Education and Dorling Kindersley Publishers, Delhi.
- James F. Kurose and Keith W Ross (2008) III Edition, Computer Networking, A Top-Down Approach Featuring the Internet, Pearson Education and Dorling Kindersley Publishers, Delhi.
- Ralf Steinmetz and KlaraNahrstedt (2011) Multimedia – Computing, Communications and Applications, Person Education and Dorling Kindersley Publishers, Delhi

Outcomes	➢ Understand the Basics Knowledge in Computer Applications ➢ Gain knowledge about the Application of ICT in Food Science

Course Teacher
P.Venkateswari
Prof.K. Manimekalai

Semester - IV			
Course code: 453N14	**Project/Dissertation**	**Credits: 6**	**Hours: 10**

Objectives	Help the students to lean the knowledge about the projects

Preliminary

1. Title Page- title, Authors Name
2. Certificate of Originality by the Guide
3. Declaration by the Author
4. Table of Contents
5. List of Tables
6. List of Figures
7. Acknowledgement
8. Abstract

I. Introduction: Statement of the Problem, Significance, Need for the Study, Objectives, and Definitions.
II. Review of Literature
III. Methodology: Tools used, Procedures, Hypothesis.
IV. Results and Discussion: Tables and Figures, Statistical Presentations, Hypothesis Testing.
V. Summary and Conclusion
VI. Suggestion for the Future Study
VII. References

Outcomes	They will gain in-depth knowledge about the research ethics.

Course Teacher
Prof.K. Manimekalai

SEMESTER – I			
Course code: 453T01	**CORE I –FASHION AND CLOTHING PSYCHOLOGY**	**Credits: 5**	**Hours: 5**

Objectives	➢ To teach about Fashion Psychology ➢ To illuminate experience in different types of Display Techniques
Unit - I	**Factors influencing Fashion Changes** – Psychological needs of Fashion, Social Psychology of Fashion, Technological, Economical, Political, Legal and Seasonal influence. Role of costume as a status Symbol, Personality and Dress, Clothes as Sex Appeal, Cultural value Fashion Cycles, Repetition of Fashion
Unit - II	**Fashion Evolution –** Fashion Cycles, Length of Cycles, Consumer groups in Fashion Cycles – Fashion Leaders, Fashion Innovators, Fashion Motivation, Fashion Victim, Fashion Followers Adoption of Fashion – Trickle Down, Trickle up and Trickle Across Theory Fashion Forecasting – Market Research, Evaluating the Collection, Fashion services and Resources (Fashion services, Colour Services, Video Services, Newsletter Services, Websites, Directories and References), Design - Historic and Ethnic Costume.
Unit - III	**Visual Merchandising of Fashion, Types of Displays -** Window Displays, Interior Displays, Elements of Display – The Merchandise, Mannequins and Forms, Props, Signage, Lighting. Merchandising Presentation – Tools and Techniques – Back Drop, Forms, Fixtures. Fashion Show – Definition, Planning, Budgeting, Location, Timings, Selection of Models, Collection, Set Design, Music, Preparing the Commentary, Rehearsal.
Unit – IV	**Understanding fashion designer** – types – classicist, idealist, influenced, realist, thinking poet. Indian Fashion Designers – Haute couture – ohithosla, GitanjalKashyap, Hemant Trivedi, J.J.Valaya, James ferrerira, Ritu Kumar, RohitBal, Tarun Tahiliani Minimalists – Himanshu and Sonali Sattar, Sangeethe Chopra, Wendell Rodricks Village India – BhaminiSubramaniam, Anjumodi, Indiar, Broker, MadhuJain.Studio line – BhairaviJaikishan, Kishan Mehta, Ravi Bajaj, RituBeri, Rockys.
Unit - V	World fashion Centres - France, Italy, America, far east contributions of well known designers from France, America, Italy, Britain and Far east countries.

Reference and Textbooks:

- Drake et-al (1991) – Retail Fashion, Promotion and Advertising Macmillan publishing Company, New York.
- Gini Stephens Frings (1999) – Fashion, From Concept to Consumer, 6th Edition – Prentice Hall.
- Bennett (1998) – Inside the Fashion Business, Coleman & Co, Mumbai.
- Harriet T, McJimsey (1973) – Art and Fashion in Clothing Selection, The Iowa state University Press, Ames, Iowa.

Outcomes	Enable the students to ➢ Get basic knowledge on Fashion Psychology ➢ Through industry visit students get hands on experience in types of display Techniques.

Course Teacher
Prof.K. Manimekalai
Dr.P.Veeramani

SEMESTER – I			
Course code: 453T02	**CORE II- CARE FOR TEXTILES AND CLOTHING**	**Credits: 5**	**Hours: 5**
Objectives	➢ To teach about care and Maintenance for Textile and Clothing ➢ To instruct about various techniques in Textile Care and Clothing		
Unit - I	**Water-** Types- Soft Water-Hard Water- Purification of Water. Soaps, Detergents –Types– Manufacturing – Properties. Reasons for non use of Banned Chemicals and solvents like CFC, CTC & white petrol		
Unit - II	**Laundering –** Objects – Methods - Laundering of White - Coloured, Cotton, Silk, Wool, Synthetic Fabrics, Lace Materials, Carpets. Clothing Care - Mending, Darning and Seasonal Care, Wardrobe Planning and Storage.		
Unit - III	**Dry Cleaning -** Chemicals Used - Sequence - Method - Commercial Dry Cleaning. Washing Machines – Types - Working Principles.		
Unit - IV	**Ironing and Pressing -** Hot Air, Steam, Permanent Pressing, Tumble Drier – Hydro Extractor - Working Principle.		
Unit - V	**Stain Removal –** Methods of Washing- Application of Friction- Hard Friction, Rubbing and Scrubbing - Application of Light Pressure, Squeezing, Suction-Washing-Use of Washing Machine, Methods of Finishing-Draping- Ironing - Dry Cleaning and Storage, Care Labelling. Details of care instructions		

Reference and Textbooks:

- Susheela Dantyagi (1998), Fundamentals of Textiles and their Care 5th edition, Orient Longman Ltd, New Delhi.
- Neomi D'Souza (1998), Fabric Care, New Age International Publisher.
- Wingate I.B. (1986), Textile Fabrics & Their Selection, Allied Publishers Pvt. Ltd. Madras
- Dantyagi. S. (1980), Fundamentals of Textiles & their Care. Orient Langnass Ltd. New Delhi.
- Tate of. Glesson (1961), Family Clothing, Latest Edition, John Wiley &Sons Inc., Illinois.
- Durgadeulkar (2011), Household Textiles and Laundry Work, Alma Ram & Sons. Delhi.
- E.T. Renbourn (2004), Physiology & Hygiene of materials& clothing, Published by Wood Head Publishing Limited.

Outcomes	Enable the students to ➢ Develop their knowledge on various types in Maintenance and Care of Textiles and Clothing. ➢ Expand their knowledge on various techniques adopted for Textile Care.

Course Teacher

Prof.K. Manimekalai

Dr.P.Veeramani

SEMESTER – I			
Course code: 453T03	**CORE-III ADVANCED WET PROCESSING (T)**	**Credits: 5**	**Hours: 5**

Objectives	➢ To moralize knowledge in the field of Preparation Methods ➢ To impart knowledge about Dying Process ➢ To teach about Finishing Process
Unit - I	**Pre-treatment Process -** Singeing, Desizing, Scouring, Bleaching, Mercisation, Wet Processing Equipments - Kier, J-Box, Stenter, Wool Carbonizing, Weighing of Silk, Heat Seating.
Unit - II	**Dyeing-**Definition, Classification of Colorants, Different Stages of Dyeing Process, Dyes suitable for different Fibres - Cotton, Viscose Rayon, Silk, Wool, Nylon and Polyester.
Unit - III	**Machinery for Fibre Dyeing, Yarn Dyeing and Fabric Dyeing –** Woven and Knitted – Hunk, Beam, Tigger, Winch, Jet, Soft Flow Dyeing Machines, Colour Matching Cabinet.
Unit - IV	**Printing -** Definition, Preparation of Printing Paste, Methods of Printing, Styles of Printing Methods of Printing - Direct, Discharge, Resist, Screen Printing, Roller Printing, Rotary Printing, Transfer Printing, Stencil Printing, Block Printing, Flock Printing and Other Latest Printing Methods.
Unit - V	**Finishing –** Classification of Finishing- Mechanical and Chemical Finishing- Enzymes, Wrinkle Free, Water Repellent, Proof Finishing, Bio polishing, Bio washing, Stone wash, Acid wash, Flame Retardant Finishes, Mildew Finish. Finishing Defeats and Remedies.

Reference and Textbooks:

- Dr. NallanKallai (2000), Fabric Finishing, New Age International.
- Shenai V. A (1996) Technology of Textile Processing, Sevak Publications, Mumbai.
- W. Clarke (2004), An Introduction to Textile Printing, Wood Head Publishing Limited, Cambridge, England.
- Marsh. J. T. (1999), An Introduction to Textile Finishing.
- Susheela Dantyagi, (2000), Fundamentals of Textiles and their care, Abhishek Publication.

Outcomes	Enable the students to ➢ Gain knowledge on Pre-treatment process and equipments used in Wet Processing. ➢ Aware about the Dying Process Suitable for Different Fibres. ➢ Get familiar on types and Methods in Finishing Processes.

Course Teacher

Prof.K. Manimekalai

Dr.P.Veeramani

SEMESTER – I			
Course code: 453T04	**CORE-IV ADVANCED WET PROCESSING (P)**	**Credits: 10**	**Hours: 5**
Objectives	➢To impart knowledge in advanced technology of wet processing		
	PREPARATION OF SAMPLES FOR FIBRE, YARN AND FABRIC **Pre-treatment Process** 1. Desizing 2. Scouring 3. Bleaching 4. Mercerization **Dyeing** 1. Dyeing of cotton fabric with direct dye; Reactive dye, Vat,. 2. Dyeing of silk, wool with acid and basic dyes 3. Dyeing of polyester fabric with disperse dyes **Printing** 1. Hand screen printing 2. Block printing using different techniques 3. Stencil printing using different techniques 4. Tie and Dye 5. Batik printing		
Reference and Textbooks: ➢ Arthur Courtney Hayes, Experiments in wet processing textile fibres: A laboratory manual supplementing a comprehensive course in textile chemistry.			
Outcomes	➢Enable the students to ➢Gain in depth knowledge on advanced technology of wet processing.		

Course Teacher

Prof.K. Manimekalai

Dr.P.Veeramani

SEMESTER – I			
Course code: 453EC1	**ELECTIVE –I (A) HOME TEXTILES (T)**	**Credits: 4**	**Hours: 4**
Objectives	➢ To teach Introduction to Home Textiles ➢ To impart knowledge in Finishes and quality parameters used in Home Textiles		
Unit - I	**Introduction to Home Textiles –** Fabrics used for Living area, Kitchen, Dining, Bed room, Bath room accessories and general household textiles. Textile for Furnishing and Upholstery applications – scope, fixed upholstery, non-stretch loose covers & stretch covers		
Unit - II	**Window/ Curtain Fabrics** - Sun filters (Sheers and nets), Semi-sheers, Reflective textiles, drapes and Blinds. Bed Room Textile - Sheets & Pillow Cases, Quilted Textile, Blankets & Rugs - Jacquard blankets, Printed blankets, Fire proof blankets, Baby blankets. Bed Spreads, Mattress covers		
Unit - III	**Dining Room Textiles Tablecloths –** Colour – Woven & Printed type, jacquard types, embroidered types, non-woven types. Table mats – Colour -woven, Printed jacquard, embroidered. Kitchen Textiles Aprons, Dish cloth, Tea cosy, Bread bag, Mittens, Pot Holders, Table Mats – Construction & manufacturing		
Unit – IV	**Bath Room Textiles –** bath towels, bathrobes, floor mats, handtowels, beach towels, towels for swimming pools- Terry Towels – types and applications. Floor Coverings – Introduction, Pile Fibres, Backing fibres& fabrics – Tufted carpets, woven carpet.		
Unit - V	**Finishes and quality parameters used in Home Textiles -** Protection against unpleasant odour, - Temperature regulated beddings - Antimicrobial finish, - Moisture management - Test Method for towels, Rug and Home textiles and - Performance specifications of different home textiles		
Reference and Textbooks: • Dr. Talukdar, Ajagaonkar, Sriramulu Weaving Machine, Mechanisms, Management • Subrata Das, Performance of Home Textiles, Woodhead Publications India Pvt Ltd.			
Outcomes	Enable the students to ➢ Gain the knowledge describes various types of home textiles and their manufacturing methods. ➢ Understand requirements of different home textiles.		

Course Teacher

Prof.K. Manimekalai

Dr.P.Veeramani

SEMESTER – I			
Course code: 453EC1	**ELECTIVE –I (B) WOMEN AND SOCIETY**	**Credits: 4**	**Hours: 4**

Objectives	➢ To impart about the Different Sectors of Development, with Special Reference to Women. ➢ To introduce the Issues and Concerns of Women. ➢ To Teach the Strategies for Empowerment of Women.
Unit - I	**Women in Society –** Ancient India and Modern India - Concept of Women's Movements – Basic Elements – Classifications Social Reform Movement – Status of Women through Ages.
Unit - II	**Women's Role:** Post Independence Period - Indian Independence Movement and Women's Movements - Narmada Valley Project Environmental Movement - Chipko Movement- Peasant Movement
Unit - III	**Position of Women in:** Hinduism, Islam, Christianity - Social Reformers worked for the Emancipation of Women – Rajaram Mohan Roy, Dayanada Saraswathi, Mahatma Phule, PanditRamabai, Annie Besant, Sarojini Naidu, Muthulakshmi Reddy, Durgabai Deshmukh, Aruna Asaf Ali.
Unit – IV	Women and Political Participation - Women and Panchayat Raj Institutions – International, National and Local Women in Parliament through Ages - Women's Bill
Unit - V	**Rise of NGOs in Women Organization for Women's Development** – all India Women's Conference (AIWC) – Women's India Association (WIA) - National Council of Women in India (NCWIE) - Indian Association of Women's Studies

Reference and Textbooks:

- Geraldine Forbes (1998) Women in Modern India, New York: Cambridge University
- Leslie L. Heywood (2005) The Women's Movement Today, Jaipur: Rawat Publications Vol. I & II
- B.Suguna (2009) Women's Movements, New Delhi: Discovery Publishing House Pvt. Ltd 4.
- SumitSarkar and TanikaSarkar (2007) Women and Social Reform in Modern India, New Delhi: Permanent Black Vol I &II

Outcomes	Enable the students to ➢ Gain knowledge about the status of women in the society. ➢ Can set up their own NGOs for the development of women

Course Teacher

Prof.K. Manimekalai

SEMESTER – II			
Course code: 453T05	**CORE V– APPAREL MERCHANDISING**	**Credits: 5**	**Hours: 5**

Objectives	➢ To enlighten the students about the Field of Apparel Merchandising ➢ To impart the Process to flow in Apparel Industry ➢ To know about Merchandiser Role in Apparel Industry
Unit - I	**Merchandising: Introduction, Meaning -** Apparel Merchandising – Concepts of Six Rights – Organization Structure of an Apparel Industry – Classification of Exporters – Rating or Grading of Export Houses – Classification of Buyers – Export merchandising and Retail Merchandising.
Unit - II	**Merchandising Process flow in Apparel Industry** – Buyer sourcing and Communication – Enquiry – Order Confirmation – Order Review and its Importance – Planning and Programming: Master Planning, Scheduling or Route Card – Factors for Route Card – Programming for Yarn, Knitting, Dyeing, Stitching, Sampling, Accessories – Samples: Meaning and Importance – Types of Samples – Expedition of Samples.
Unit - III	**Quality Standards and Specifications –** Quality Assurance – Quality control – Quality Inspection and its Types – Testing – Check Points before Cutting – Pilot Run or Trial Run and its Importance – Approvals – Types of Approvals – Shipping Marks – Final Inspection Procedures – Self, Second and Third Party Inspection – Effective Expedition Procedures – Order Sheet and its Contents – Packing List and its Contents – Document Formats: Order Sheet, Packing List, Invoice, Inspection and Testing Reports - Assortment and its Types.
Unit – IV	**Types of Merchandiser –** Functions of a Merchandiser – Essential Requisites of a Good Merchandiser – Vendor Sourcing, Evaluation and Development – Global Sourcing – Vendor Nomination by Buyers – Reasons for Vendor Nomination – Documents Recording and Maintenance – Claims and Reasons for Claims – Factory Audits – Buyers Code of Conducts
Unit - V	**Export Associations –** Apparel Export Promotion Council – Journals and Magazines related to Apparel and Textiles –Trade Shows and Fairs – Participation in Trade Shows – Advantages of Trade shows and Fairs – Apparel & Textile Trade shows and Fairs in India.

Reference and Textbooks:

- Daragho' Reilly, Jullian J. Gibbs, Building Buyer Relationships.
- Jeannette Jarnow, Kitty G. Dickerson (1996), Inside the Fashion Business. McMillan Publishing
- Apparel Views, Jan 09, Apparel Merchanidising 5. "Apparel Merchandising – The concept of six rights".

Outcomes	Enable the students to ➢ Gain basic knowledge on Apparel Merchandising in General. ➢ Get aware about the various processes in Apparel Industry and able to run own Industry. ➢ Get conscious about the Roles of Merchandiser in Apparel Industry.

Course Teacher

Prof.K. Manimekalai

Dr.P.Veeramani

SEMESTER – II			
Course code: 453T06	**CORE-VI ADVANCED GARMENT CONSTRUCTION (T)**	**Credits: 5**	**Hours: 5**

Objectives	➢ To inculcate knowledge on Standardized Body Measurements ➢ To guide about the Various Patterns in Garment Construction ➢ To get familiar with Drafting and its Types.
Unit - I	**Standardized body Measurements -** Observation of head Theory
Unit - II	**Preparation of Fabric for Cutting -** Developing blocks for basic Front, Basic Back, Basic sleeve and Basic Collar. - Interfacing – Purpose, Types, Steps involved in applying interfacing on Garments- NeckLine.
Unit - III	**Designing, Drafting and Construction details of the following** - School Uniforms – Maternitywear - Industrial Uniforms - Women Formal wear
Unit – IV	**Designing, Drafting and Construction details of the following** - T-Shirt - Men's Shirt- Half/Full Sleeve - Trousers - Narrow bottom or Bell bottom
Unit - V	Selection and use of Home Furnishings, Curtains, Draperies, Pillow Covers & Cushion Covers.

Reference and Textbooks:

- Gertrude Strict Land, (1956), "A Tailoring Manual, Mac Millon Company, New York.
- Mary Mathews (1986), Advanced Clothing Construction, Part I & II Cosmic Press, Chennai.
- Mabel, D. Erwin (1945), Practical Dress Design, The Macmillan Company, New York.
- Brockman, Magritha (1966), The Theory of Fashion Design, John Wiley Sons, New York.

Outcomes	Enable the students to ➢ Gain knowledge on standardized body measurements used in Garment Construction ➢ Elevate knowledge on various pattern used in advanced Garment Construction Unit. ➢ Able to Design Draft and Sew Dresses for Themselves.

Course Teacher

Prof.K. Manimekalai

Dr.P.Veeramani

SEMESTER – II			
Course code: 453EC3	**ELECTIVE – II (A) WOMEN AND HEALTH**	**Credits: 4**	**Hours: 4**
Objectives	➢ To introduce the concept of health and the issues related to Gender and health ➢ To study about the national and international initiatives in the promotion of Women's Health.		
Unit - I	**Health:** Concept, Definition and types of Health – Parameters of Community Health - Gender and Health - Health Care Needs of Women, Men - Health Status of Women - Factors influencing women's health - Health Indicators of Women - Mortality - Morbidity - Sex ratio, Child sex ratio, Life expectancy – MMR – IMR - Fertility		
Unit - II	**Women's Reproductive Health –** Prenatal and Postnatal Health Care- Menstrual Hygiene Management – Menopause – Hormonal Replacement Therapy – Sex Selective Abortion – MTP – NRT – Amniocentesis Test – Clinical Trials and Gender Bias – Infertility: IVF & Surrogacy		
Unit - III	**Gender and Nutrition–** Nutrition for pregnant and lactating mothers - Nutrition education for girls – Anemia - Gender bias in nutrition intake -Protein Malnutrition – Gender Discrimination - Breast Feeding – Health Seeking Behaviour – Initiatives on Nutrition Program – National –NRC – RishoriSakthi - International - WHO – ICDS – UNICEF - RTI and STI.		
Unit – IV	**Gender and Health issues:** Feminization of HIV/AIDS – Private vs Public Spheres – Balancing Drudgery and Health Needs – Pollution and Health –Health issues of LBGTQ– Environmental & Occupational Health hazards- Health issues relating to: sex workers, women with disabilities, women elderlies.		
Unit - V	**Programme and Policies for Health for women :** International Initiatives – ICPD – Cairo- National Health Policies, NRHM, ASHA, ICDS - Population Policy 2000 – MCH to RCH Approaches-Impact of Population Policies – Tamil Nadu State.		

Reference and Textbooks:

- World Health Organization. "Women of South East Asia-A health profile" WHO, 2000.
- Neera Desai and UshaThakkar (2006). Women in Indian Society, National Book Trust, New Delhi.
- Census of India Report-(2011), Ministry of Home Affairs, Government of India, New Delhi
- Rao, Mohan (2004), From Population Control to reproductive health, Sage Publication, New Delhi.
- Singh, Lakshmi Abha, Rural Women (2005): Work and Health, The women press, New Delhi.

Outcomes	Enable the students to ➢ Gain knowledge on the concept of health and the issues related to Gender and health ➢ Able to acquire information on National and International Initiatives in the promotion of Women Health.

Course Teacher
Dr.P.Veeramani

SEMESTER – II			
Coursecode:453EC4	**ELECTIVE II (B) FOOD SERVICE MANAGEMENT**	**Credits: 4**	**Hours:4**

Objectives	➢ To inculcate the Knowledge on Institutional Food Administration Strategies and Management.
Unit - I	**Introduction to Food Service Systems**. Evaluation of the Food Service Industry. Characteristics of the various types of Food Service Units - Commercial - Hotel, Motel, Restaurant, Cafeteria and Chain Hotels; Welfare - Hospital, School Lunch, Residential Establishment and Industrial Catering; Transport - Air, Rail, Sea and Space; Miscellaneous - Contract and Outdoor.
Unit - II	**Management of Resources** – Finance- Determining the Finance needed to Establish or Run an Unit, Budgets, Sources of Finance, Planning Adequate Cash Flow.Space & Equipment Management- Steps in Planning Layouts, Determining Equipment, Selection and Placement, Layout Analysis.
Unit - III	**Material Management-** Menu Planning, Planning the Material Needed, Methods of Selection, Purchasing, Receiving and Storage, Quantity Food Production, Service and Modes of Delivery, Planning Menus for Banquet, Outdoor Catering, Packed Meals and Restaurant.Personnel Management- Manpower Planning, Placement, Recruitment, Induction, Training, Motivation and Performance Appraisal.Time and Energy Management- Measures for Utilisation and Conservation.
Unit – IV	**Management -** Approaches to Catering Management, Principles and theories of Management, Functions of Management, and Styles of Management, Management Tools- Organisation Chart and its Types.Strategies in Planning- Conceptual Strategy, Marketing Strategy, Financial Strategy, types of Plans.
Unit - V	**Financial Management -** Definition, Cost Concept, Component of Cost, Food Cost Control, Pricing, Book Keeping and Accounting, Techno-Economic Feasibility of Food Production/Service Enterprise.Marketing and Sales Management-Market Survey, Sales Analysis, Market Promotion.Quality Assurance- Food Quality, Total Quality Management, Analysis of Processed and Finished Products.

Reference and Textbooks:

- Avery, A.C. (1980): Modern Guide to Food Service Equipment. Boston CBI Publishing Company.
- Brichfield, J. (1988): Design and Layout of Food Service Facilities, VanNortrand Reinhold.New York.
- Brodner, J., Maschal, H.T., Carlon, H.M. (1982): Profitable Food and Beverage Operation 4th Edition, Hayden Book Company, New Jersey.
- Coltman, M.M. (1977): Food and Beverage Cost Control. Printice Hall Series.
- Desseler, Garry (1987) Personnel Management Modern Concepts and Techniques, Prentice Hall, New Jersey.
- Green, E.F., Drake, G.G. Sweeny, J.F. (1978) Profitable Food and Beverage Management; Planning, Operations, Hayden Book Company, New Jersey.

Outcomes	Enable the students to ➢ Gain the Knowledge about Food Service Management ➢ Learn about Management of human and non human resources in food service management

Course Teacher

Prof.K. Manimekalai

Dr.P.Veeramani

SEMESTER – III			
Course code: 453T08	**CORE VIII - TEXTILE TESTING AND QUALITY CONTROL**	**Credits: 5**	**Hours: 5**
Objectives	➢ To study the Textile Testing Methods involved in Textile & Apparel Industry. ➢ To study the Quality system used in Apparel Industry.		
Unit - I	**INTRODUCTION TO TEXTILE TESTING** – FIBER - General aspects in Textile Testing. Routine tests performed in the Textile Industries. Textile testing equipments used in Spinning, Weaving Knitting and Garment Units. Fibre testing: Fibre length, Strength Fineness, Maturity and Trash Analysis Testing of Cotton Manmade Fibre& Blends.		
Unit - II	**YARN** - Yarn Testing; Yarn Numbering, Single Yarn Strength, Twist, Uster Class Mat Evenness, Crimp, Yarn Appearance for FIB. Standards and Specifications used in Textile Industries.		
Unit - III	**FABRIC** - Fabric Testing; Length, GSM, Seam Strength - Tensile, Tearing and Elemendrofom and Bursting. Abrasion Resistance- Yarn and Fabric, Pilling Resistance, Crease Recovery, Bending Length, Drape Co- efficient, Air Permeability, Water Permeability.		
Unit – IV	**FABRIC QUALITY** - Quality control: definition and importance. Textile quality standards and specifications.KES & FAST.Moisture and Thermal Relationship to the Fabric Properties. Colour Fastness Tests- Shrinkage and Dimentional Stability, Washing, Crocking, Pressing, Perspirations and Sunlight.		
Unit - V	**GARMENT** - Garment Quality Tests; Cutting Sewing, Pressing, Finishing and Packaging Defects. Spec Sheet Analysis- Pattern Making and Marking. Customer Returns and Inspection Procedures. Care Labelling System. (Self Study).		

Reference and Textbooks:

- Slater. K. (1993), Physical Testing& Quality ,Vol.23, No1/2/3, Textile Institute.
- Ruth Clock & Grace Kunz (2000), Apparel Manufacture- Sewn Product Analysis, Upper Sadale River Publications, New York.
- Booth (1996), Principle of Textile Testing, CBS Publication New Delhi.
- Grorver Wiley (1980). Hand Book of textile testing by Easters University, Delhi.

Outcomes	Enable the students to ➢ Gain knowledge on general aspects of Textiles Testing and Quality Control. ➢ Able to find the tests used to Identify various Textile Fiber

Course Teacher

Prof.K. Manimekalai

Dr.P.Veeramani

SEMESTER – III			
Course code: 453T09	**CORE-IX RESEARCH METHODOLOGY AND STATISTICAL ANALYSES (T)**	**Credits: 5**	**Hours: 5**

Objectives	➢ To teach Research Methodology ➢ To inculcate different Statistical Methods and its Applications.
Unit - I	**Meaning of Research-** Process of Research, Objectives of Research. Developing a Research Proposal, Presentation of a Problem, Identifying the Problem - Defining and delimiting the Problem. Types of Research - Fundamentals, Applied, Action, Experimental and Descriptive, Tools for Research, Different types of Experimental Designs.
Unit - II	**Measure of Central Tendency**: Mean, Median, Mode and their uses with examples and their Advantages and Disadvantages. Measure of Dispersion: Significance and Methods used in studying Dispersion (Range, Quartile Deviation, Mean Deviation and Standard Deviations) with their Uses, Advantages and Disadvantages.
Unit - III	**Test of Relationship**; Meaning, Types and Methods used to Study Correlation (Simple Co-efficient of Correlation, Rank Correlation, Co-efficient of Concurrent Deviation and other Methods), Regression along with their uses, Advantages and Disadvantages. Testing of Hypothesis, Meaning, Basic Concept Concerning Testing of Hypothesis.
Unit – IV	**a) Sampling-** Type Probability, Non-Probability Sampling, Probability Sampling- Simple Random Sampling, Systematic Random Sampling, Two Stage and Multi Stage Sampling, Cluster Sampling. Non- Probability Sampling, Quota Sampling, Volunteer Sampling. **b) Data Analysis-** Quantitative, Qualitative, Presentation of Data - Tables, Graphs, Illustrations, Foot Notes and Bibliographical Presentations.
Unit - V	**Research Reports - Basic concepts of Research Report** a. Preliminaries - Title Page, acknowledgement, List of Tables, List of Figures, Index. b. Main text. c. Bibliography, Glossary, Appendices. Role of computers and its applications in Textile Research. Student- "t" Test, Analysis of Variance- One way and Two way Classification- Characteristics of ANOVA, Chi-Square: General Features of Chi-square- 2*2 type tables, Duncan's Table. Survey on Textile related topics (Self study), Standardization of body measurements for a particular age group (Self study).

Reference and Textbooks:

- S.P.Gupta (1993), Statistical Methods, Sultan Chand and sons, Daryagang, New Delhi.
- Kothari.C.R. (1991) Research Methodology, Methods and Techniques, Wiley Eastern Ltd, New Delhi.
- Wilkinson and Bhandarkar.P.L.C. Methodology and Techniques of Social Research, Himalaya Publishing House, Bombay.

Outcomes	Enable the students to ➢ Gain knowledge on types of Research and Able to develop a Research Proposal. ➢ Get familiar with various Statistical Tools used in the Research Methodology.

Course Teacher
Prof.K. Manimekalai
Dr.P.Veeramani

SEMESTER – III			
Course code: 453T10	**CORE-X COMPUTER APPLICATION IN TEXTILES AND CLOTHING (P)**	**Credits: 5**	**Hours: 10**

Objectives	➢ To impart in computer application skill in textile and fashion designing through adobe photoshop and adobe illustrator.
	DESIGNING WITH ADOBE PHOTOSHOP Exercise – 1 Creating Stripe, Plaid and Print Repeats with different textured looks Exercise -2 Generating Color Combinations, Multi Color Prints & Tie Dyes, Rendering a Black and White Sketch with patterns clean sketch. Exercise-3 Creating New Prints: Any Type of Florals, Nautical, Ethnics or Any Type depending on the Current Trend of the Year. Exercise-4 Create Men's wear, Women's wear and Kids wear items with all types of Prints, Plaid patterns, Stripes and different textured looks Exercise-5 Create Presentation Board using Adobe Photoshop **DESIGNING WITH ADOBE ILLUSTRATOR** Exercise-6Sketch industry standard fashion flats Exercise-7Add bitmap graphics to vector files **DESIGN YOUR OWN VECTOR GRAPHICS** Exercise-8 Quickly render sketches with color and fabric patterns Trace, modify and recolor vector graphics Exercise-9 Create Presentation boards with text, background and shadow effects using illustrator.

Reference and Textbooks:

- John Wiley & Sons, 02-Nov-2011, Fashion Designer's Handbook for Adobe Illustrator, Marianne Centner, Frances Vereker.
- Frederick L Chipkin, Origin inc, 20-Apr-2014, Adobe Photoshop for Textile Design: for Adobe Photoshop CC (creative cloud).
- Robert Hume 30-Apr-2019, Fashion and Textile Design with Photoshop and Illustrator: Professional Creative PracticeBloomsbury Publishing USA.
- M. Kathleen Colussy 2006, Rendering Fashion, Fabric and Prints with Adobe Illustrator, Steve Greenberg, Pearson Prentice Hall.

Outcomes	Enable the students to ➢ Able to create new fabric prints and new colour combinations ➢ Illustrate Apparel design with Photoshop and illustrator

Course Teacher
Prof.K. Manimekalai
Dr.P.Veeramani

SEMESTER – III			
Course code: 453EC5	**ELECTIVE –III (A) FABRIC SOURCING**	**Credits: 4**	**Hours: 4**

Objectives	➢ To teach the students on different fabric clusters in India. ➢ To implant knowledge about Lead Time for Fabric Sourcing
Unit - I	**Fundamentals of Fabric Sourcing** - How to buy Fabrics - Basic knowledge requisite for fabric sourcing - Vendor Analysis & Development - Selection of Vendor.
Unit - II	**Knowledge of different fabric clusters in India** - Types of fabrics produced, and end use of different fabrics produced in India - Factors to be considered while sourcing from domestic suppliers - Overseas Fabrics sourcing locations - Knowledge of different overseas fabric locations - Sourcing from nominated vendors - Factors to be considered while sourcing from overseas
Unit - III	**Lead Time for Fabric Sourcing** - Time and Action Calendar for Sourcing - Lead time calculation for Fabric Sourcing - Cost Benefit Analysis while fabric sourcing - Just in Time Sourcing - Import verses Domestic Sourcing - advantages and disadvantages
Unit – IV	**Import of Fabrics** - Policy Procedure and Documentation for Importing Fabrics from global sources - Licenses required for importing fabrics from overseas markets - Clearing and Forwarding, port handling procedure while importing fabrics - Transportation for import of fabrics
Unit - V	**Supply Chain Management & Inventory** - In-bound logistics & Out-bound logistics - Transportation - Internal and external - Warehouse management - storing & inventory systems - Stock Plans and issuing materials to operations - Procedure to issue materials to internal customers - Supermarket or Store operations in garment industry.

Reference and Textbooks:

- SusheelaDantyagi, (1998) Fundamentals of Textiles and their Care, Orient Longman Ltd New Delhi.
- Gokarneshan (2009), Fabric Structure and Design - New Age International.
- Anbumani (2006), KnittingManufacture Technology, New Age International, Chennai.
- Ruth Clock & Grace Kunz (2000), Apparel Manufacture- Sewn Product Analysis, Upper Sadale River Publications, New York.
- Booth (1996), Principle of Textile Testing, CBS Publication New Delhi.
- Grorver (1980). Hand Book of textile testing, Wiley Easters University, Delhi.

Outcomes	Enable the students to ➢ Gain knowledge on the fundamentals of Fabric sourcing methods and lead time ➢ Become familiar with different fabric clusters in India

Course Teacher
Prof.K. Manimekalai
Dr.P.Veeramani

SEMESTER – III			
Coursecode:453EC6	**ELECTIVE –III (B) FUNCTIONAL FOODS AND NUTRACEUTICALS**	**Credits: 4**	**Hours: 4**

Objectives	➢ To learn the Concepts on Functional Foods and Nutraceuticals ➢ To instruct the Isolation of photochemical from plant materials.
Unit - I	**Functional Foods and Nutraceuticals–** Definition, concept, history and market; Evolution of nutraceuticals and functional foods market.Classification of nutraceuticals and functional foods. Significance and relevance of nutraceuticals and functional foods in the management of diseases and disorders.
Unit - II	**Natural occurrence of certain phytochemicals-** Antioxidants and flavonoids: omega – 3 fatty acids, carotenoids, dietary fiber, phytoestrogens; glucosinates; organosulphur compounds. Dosage for effective control of disease or health benefit with adequate safety; studies with animals and humans; acute and chronic studies.Regulatory issues.
Unit - III	**Isolation of phytochemicals from plant materials:** Care in handling and storage of raw materials with minimal damage to sensitive bioactive compounds; Extractive methods for maximum recovery and minimal recovery and minimal destruction of active material; stability studies.Recent developments in the isolation, purification and delivery of phytochemicals.
Unit – IV	**Prebiotics, probiotics and symbiotics- Probiotics:** Definition, types and relevance; Usefulness in gastro intestinal health and other health benefits; development of a probiotic products; recent advances in probiotics; Challenges and regulatory issues related to probiotic products. Prebiotics: Prebiotic ingredients in foods; types of prebiotics and their effects on gut microbes; health benefits of prebiotics; recent development in prebiotics. Symbiotic.
Unit - V	**Functional foods** - Definition, development of functional foods, use of bioactive compounds in appropriate form with protective substances and activators; Effect of environmental condition and food matrix; Effects of processing conditions and storage; Development of biomarkers to indicate efficacy of functional ingredients; Research frontiers in functional foods; delivery of immunomodulators /vaccines through functional foods. Nutrigenomics- concept of personalized medicine. Use of nanotechnology in functional food industry.

Reference and Textbooks:

- Wildman, R.E.C. (2007) Handbook of Nutraceuticals and Functional Foods, second edition. CRC Press.
- Gibson GR & William CM (2000). Functional Foods - Concept to Product.
- Goldberg I (2004). Functional Foods: Designer Foods, Pharma Foods.
- Brigelius-Flohé, J & JoostHG (2006). Nutritional Genomics: Impact on Health and Disease. Wiley VCH.

Outcomes	Enable the students to ➢ Gain knowledge on Natural occurrence of certain photochemical ➢ Understand about the Prebiotics, probiotics and symbiotics. ➢ Use the nanotechnology in functional food industry.

Course Teacher
Prof.K. Manimekalai
Dr.P.Veeramani

SEMESTER – IV			
Course code: 453T11	**CORE - XI TECHINICAL TEXTILES (T)**	**Credits: 5**	**Hours: 5**
Objectives	➢ To inculcate the knowledge of application of textile materials in various technical areas. ➢ To make the students to understand the requirements of fibre and fabrics, specific mechanical and chemical processing requirements,		
Unit - I	**Introduction to technical textiles:** Definition - Classification of technical textiles - Market growth and potential - application of technical textiles in various fields. Technical Fibres: High – Strength and high-modulus organic fibres, High chemical and combustion resistant organic fibres, High performance inorganic fibres, Ultra-fine and novelty fibres.		
Unit - II	**Medical Textiles:** Classification of medical textiles - Non-implantable materials, extracorporeal devices, implantable materials, healthcare and hygiene products. Design and characteristics required in textiles for medical and hygiene applications.		
Unit - III	**Protective Textiles**: Definition – Basic requirements – Garment design - choice of materials in protection from hazards due to thermal, flame, chemical, mechanical, ballistic, nuclear and extreme climate - Footwear textiles.		
Unit – IV	**Filtration Textiles:** Introduction, selection considerations - Fiber, fabric, design. Principle mechanism and types of filtration - Textiles in dry filtration, wet filtration, and filtration equipment - Design consideration - Filter media for paper industry – Design and manufacturing techniques, cigarette filters.		
Unit - V	**Automobile Textiles** – Introduction - fibres used – types – functions – properties – characteristics and applications. **Sports Textiles** – Introduction - fibres used – types – functions – properties – characteristics and applications.		
Reference and Textbooks: • Jarmila S Vedova (1990), Industrial Textiles, Elsevier Science Publishing Inc, New York. • David B Wootton (2001), The Application of Textiles in Rubber, Rapra Technology Ltd., UK. • Harrison P W (1998), The Design of Textiles for Industrial Applications, The Textile Institute, Manchester.			
Outcomes	Enable the students to ➢ Gain knowledge on textile materials in various technical areas. ➢ Able to find the quality evaluation in industrial areas.		

Course Teacher

Prof.K. Manimekalai

Dr.P.Veeramani

SEMESTER – IV			
Course code: 453T12	**CORE-XII FASHION MARKETING**	**Credits: 5**	**Hours: 5**

Objectives	➢ To teach about the Fashion Marketing ➢ To impart different types of Marketing
Unit - I	**Meaning and classification of Marketing**, Fashion Marketing, Fashion Market Size and Structure, Marketing Environment - Micro Marketing Environment, Macro Marketing Environment. Trends in Marketing Management.
Unit - II	**Marketing Function** – Definition and Classification. Product Planning and Development. The Fashion Industry and New Product Development. Product Line Policies- Product Mix and Range Planning. Fashion Product Cycles.
Unit - III	**Fashion Advertising** - Preparation, Medias, Various Departments & Agencies. Fashion Sales Promotional Programme for Apparel Marketing, Communication and Promotion, Personal Selling, Point of Purchase, Sales Promotion Objectives & Its Types.
Unit – IV	**Merchandising** – Definition, Role of Merchandiser, Types. Domestic & International Export Market Environmental. Channels of Distribution.
Unit - V	Promotional Activities of Government Organization Buyers & Sellers Meet. Costing – Basics & its Importance of Costing.

Reference and Textbooks:

- Pillai and Bagavathi (1987), MarketingS. Chand & Co Ltd, New Delhi.
- Philip C.F and Duneon D.T Irwin (1956), Marketing: Principle and methods Irwin publications.
- Backman T.N. Maynard H.H and Davidson W.R (1970), Principles of Marketing, Ronald New York.
- Haroldcars John Pomeroy, (1992), Fashion Design & Product development, Black Well Cambridge.

Outcomes	➢ Students get familiar with Fashion Merchandising in General ➢ Students gain knowledge on different types in Fashion Merchandising

Course Teacher

Prof.K. Manimekalai

Dr.P.Veeramani

SEMESTER – IV			
Course code: 453T13	**CORE – XIII PORTFOLIO PRESENTATION (P)**	**Credits: 5**	**Hours: 10**

Objectives	➢ To teach students in Portfolio Presentation
	Prepare the theme based designer garments. 1. Trend Analysis and Fashion Forecasts 2. Ideation and concept formation 3. Inspiration Board 4. Mood Board- With Research Work. 5. Colour Palette 6. Customer Profile. 7. Story Board 8. Material Exploration 9. Fabric Sourcing – Presentation. 10. Design Development 11. Illustration with Back Drops. 12. Technical Specification Sheet. 13. Pattern making and garment construction for children, men and women – three woven and three knitted garments. 14. Final presentation 15. Designer Show. (1) 16. Exhibition. (5)

Reference and Textbooks:

- R.S.N. Pillai and Bagavathi (1987), Marketing S. Chand & Co Ltd, New Delhi.
- Philip C.F and Duneon D.T Irwin; 3rd edition (1956), Marketing: Principle and methods Irwin publications.
- Backman T.N. Maynard H.H and Davidson W.R (1970), Principles of Marketing, Ronald Press Company New York.

Outcomes	Enable the students to ➢ Get aware about the importance of Portfolio Presentation and able to present their own Portfolio.

Course Teacher
Prof.K. Manimekalai
Dr.P.Veeramani

SEMESTER – IV			
Course code: 453T14	**Project work**	**Credits: 6**	**Hours: 10**

Objectives	➢ Help the students to learn the knowledge about the project

Preliminary

1. Title Page- title, Authors Name
2. Certificate of Originality by the Guide
3. Declaration by the Author
4. Table of Contents
5. List of Tables
6. List of Figures
7. Acknowledgement
8. Abstract

I. Introduction: Statement of the Problem, Significance, Need for the Study, Objectives, and Definitions.

II. Review of Literature

III. Methodology: Tools used, Procedures, Hypothesis.

IV. Results and Discussion: Tables and Figures, Statistical Presentations, Hypothesis Testing.

V. Summary and Conclusion

VI. Suggestion for the Future Study

VII. References

Outcomes	➢ They will gain in depth knowledge about the research ethics.

Course Teacher

Prof.K. Manimekalai

Dr.P.Veeramani

SEMESTER – IV			
Course code:	**NON- MAJOR ELECTIVE FOR OTHER DEPARTMENTS** **PUBLIC HEALTH NUTRITION**	**Credits: 2**	**Hours:**

Objectives	➢ To understand the concept of public health and nutrition ➢ To be familiar with the current concerns in public health nutrition
Unit - I	**Concept and scope of public nutrition -** Relation between health and nutrition - Definition and multidisciplinary nature of public nutrition. -Concept and scope - Role of public nutritionist -Millennium Development goals - Current concerns in public health nutrition
Unit - II	**Introduction to Nutritional deficiency diseases -** Causes, symptoms, treatment, prevention of the following:Protein Energy Malnutrition (PEM), Vitamin A Deficiency (VAD), Iron Deficiency Anemia (IDA), Iodine Deficiency Disorders (IDD), Zinc Deficiency, Flurosis,
Unit - III	**Social health problems -** Smoking, Alcoholism, Drug addiction, AIDS including AIDS Control Programme, community health care, national health care delivery system, population policy. Health economic and economics of malnutrition impact on productivity and national development.
Unit – IV	**Nutrition for special conditions -** Introduction to Nutrition for physical fitness and sport, Feeding problems in children with special needs, Considerations during natural and man-made disasters e.g. floods, war.- basic guidelines in disaster management.
Unit - V	**Food Security -** (a) Key terms, factors affecting food security, recent concern- (b) Technologies for food and nutrition security - (c) Health based interventions including immunization, provision of safe drinking water/sanitation, prevention and management of diarrhoeal diseases.

Reference and Textbooks:

- Mudambi, SR and Rajagopal, MV. Fundamentals of Foods, Nutrition and Diet Therapy; (2007); New Age International Publishers.
- Wardlaw GM, Hampl; (2007), JS. Perspectives in Nutrition; Seventh Ed; McGraw Hill.
- Sethi P and lakra P Aahaar vigyaan ,Poshan evam Suruksha, Elite Publishing house, 2015 Khanna K et al. Textbook of Nutrition and Dietetics; (2013); Phoenix Publisher.
- Sharma S, Wadhwa A (2003); Nutrition in the Community- A textbook; Elite Publishing House Pvt. Ltd.
- Srilakshmi B (2002); Dietetics; Fourth Ed; New Age International (P) Ltd.

Outcomes	Enable the students to ➢ Gain knowledge about public health and nutrition ➢ familiar with the current concerns in public health nutrition

Course Teacher
Prof.K. Manimekalai
Dr.P.Veeramani

SEMESTER – IV			
Course code:	**HOME TEXTILES**	**Credits: 2**	**Hours:**
Objectives	➢ To teach Introduction to Home Textiles ➢ To impart knowledge in Finishes and quality parameters used in Home Textiles		
Unit - I	**Introduction to Home Textiles** – Fabrics used for Living area, Kitchen, Dining, Bed room, Bath room accessories and general household textiles. Textile for Furnishing and Upholstery applications – scope, fixed upholstery, non-stretch loose covers & stretch covers		
Unit - II	**Window/ Curtain Fabrics -** Sun filters (Sheers and nets), Semi-sheers, Reflective textiles, drapes and Blinds. Bed Room Textile - Sheets & Pillow Cases, Quilted Textile, Blankets & Rugs - Jacquard blankets, Printed blankets, Fire proof blankets, Baby blankets. Bed Spreads, Mattress covers		
Unit - III	**Dining Room Textiles Tablecloths** – Colour – Woven & Printed type, jacquard types, embroidered types, non-woven types. Table mats – Colour -woven, Printed jacquard, embroidered. Kitchen Textiles Aprons, Dish cloth, Tea cosy, Bread bag, Mittens, Pot Holders, Table Mats – Construction & manufacturing		
Unit – IV	**Bath Room Textiles** – bath towels, bathrobes, floor mats, handtowels, beach towels, towels for swimming pools.- Terry Towels – types and applications. Floor Coverings – Introduction, Pile Fibres, Backing fibres & fabrics – Tufted carpets, woven carpet.		
Unit - V	**Finishes and quality parameters used in Home Textiles** A. Protection against unpleasant odour, B. Temperature regulated beddings C. Antimicrobial finish, D. Moisture management E. Test Method for towels, Rug and Home textiles and F. Performance specifications of different home textiles		
Reference and Textbooks: • Talukdar, Ajagaonkar, Sriramulu Weaving Machine, Mechanisms, Management • Subrata Das, Performance of Home Textiles, Woodhead Publications India Pvt Ltd.			
Outcomes	➢ Students grain the knowledge describes various types of home textiles and their manufacturing methods. ➢ Students able to understand requirements of different home textiles		

Course Teacher
Prof.K. Manimekalai
Dr.P.Veeramani

ACADEMIC QUALIFICATION

Qualification	Year	Grading	University	Subject & Area of specialization
Ph.D.	2002	Highly Commended	Alagappa University, Karaikudi	Women's Studies

ACADEMIC EXPERIENCE / SERVICE DETAILS

Post held	Organization	Date		Total Experience (In Years & Months)
		From	To	
Vice-Chancellor	Mother Teresa Women's University, Kodaikanal	20th July 2012	19th July 2015	3 Years
Registrar i/c.	Alagappa University, Karaikudi	7th October 2010	19th July 2012	1 Years 9 Months
Director	Centre for Women's Studies, Alagappa University, Karaikudi	5th November 2007	19th July 2012	4 Years 8 Months

PRIZES, MEDALS AND OTHER HONOURS

- Life Time Achievement Award, Academy of Universal Global Peace – USA, 2017.
- Appreciation Award – 2017, Alagappa University, Karaikudi
- Innovative B –School Award for Outstanding Contribution to Education, – 2016, 8th DNA and Stars of the Industry Group, Mumbai
- Innovative B –School Award for Outstanding Contribution to Education, – 2015, 7th DNA and Stars of the Industry Group, Mumbai

MEMBERSHIP IN ACADEMIC BODIES

- Governor's Nominee – Selection Committee, Bharathiyar University
- Governor's Nominee – Selection Committee, University of Madras
- Vice Chancellor's Nominee – Selection Committee, Bharathiyar University
- Advisor (Member), Civil Service (Main) Examinations, New Delhi 2013-2014.
- Advisor (Member), Tamil Nadu Public Service Commission 2012-2013.
- Chairperson – UGC Nominee for Guru Kashi University (private University), TalwandiSaho, Bathinda, Punjab, Expert Committee for Approval.
- Peer Team – Mata Ganga Khalsa College for Girls,Manji Sahib, Kottan, Ludhiana,

CURRICULAM VITAE

Dr. Meera Kaur, M.Sc., Ph.D., R.D., C.D.E.

Associate Professor, Family Medicine

Max Rady College of Medicine, University of Manitoba
Meera.kaur@umanitoba.ca

CANADA

Dr. Meera Kaur is Associate Professor of Family Medicine, Max Rady College of medicine, Rady Faculty of Health Sciences at the University of Manitoba Canada, Faculty Research Supervisor at the Regent University School of Medicine and Allied Sciences, Accra, Ghana and Conference Co- Chair of International Conference on Food Nutrition and Health (ICFNH). Previously, she served as Adjunct Professor of Biochemistry, Faculty of Science, University of Winnipeg and Research Consultant at the Institute of Cardiovascular Sciences, St. Boniface General Hospital Research Centre, Winnipeg, Canada. Dr. Kaur holds a Ph.D. in Food Science specializing in Medical Nutrition (Enteral Food) from the leading Central Food

Technological Research Institute (CFTRI), Mysore, India. Before immigrating to Canada, she served as Associate Professor in the department of Food and Nutrition at the Assam Agricultural University, Jorhat, India for over 15 years, where she has introduced several courses at undergraduate and graduate levels in the areas of Food Science and Clinical Nutrition.

Dr. Kaur's research interests lie in areas of Normal and Therapeutic Nutrition, Food Science and Family Medicine. She has published research papers in prestigious journals like Clinical Lipidology, Journal of Functional Food, and Fundamental and Clinical Pharmacology, and has published several encyclopedia articles for SAGE and Springer publication, USA. She is also a recipient of three patents for her seminal research in the area of Enteral Foods, one of which is licensed to a renowned multinational pharmaceutical company. Based on her research, she has written a book entitled *Medical Foods from Natural Sources* published by Springer, USA (http://www.springer.com/food+science/book/978-0-387-79377-1). Springer recognizes this book as an extremely valuable asset in their program. Dr. Kaur is also a frequently sought speaker and has been presenting several research and invited papers at national and international conferences.

Dr. Kaur has received several awards in recognition of her contribution towards teaching, research and outstanding service to patients' care. A few of her awards worth mentioning are the VAR's Nominee Award from the American Society of Parenteral and enteral Nutrition (ASPEN), USA; Merit Award from the Department of Immigration and Multiculturism, Government of Manitoba, Canada; Health Promotion Award from Seven Oaks General Hospital, Canada; Jawaharlal Nehru Award and Woman Scientist Award from the Government of India; Dr.

A.K. Bose Memorial Award from Indian Dietetic association and Nutrition Society of India; and, Excellent Performance Award from Claris Life Sciences Ltd., India. Dr. Kaur can be contacted at meera.kaur@umanitoba.ca or visit http://home.cc.umanitoba.ca/~kaur for further information.

CURRICULAM VITAE

S. LAKSHMI MANOKARI

Professor and Head

Department of Textiles and Apparel Design Periyar University, Salem-636 011 lakshmimanokari@yahoo.co.in
9943997453

EXPERIENCE

Teaching -21years
Research -17 Years

Administrative Experience (Head of the Department) -17 Years Bachelor of Vocation Coordinator -3 Years

EDUCATION

M.Sc., M.Phil., PhD

ON GOING FUNDED PROJECTS

Major Research Project Funded by UGC (Rs.9,91,000) for the Title "Synthesis of phytonano particles using Wrightia tinctoria and developing wound dressing with viscose non-woven for diabetic wound"

ON GOING SCHEMES

Received Grant from UGC to establish Bachelor of Vocation in Textiles and Apparel Design for 85 lakhs

TOTAL PUBLICATIONS

Journals -14, Conference Proceedings-03, Book Chapters-06 and Book-01

AWARDS AND ACKNOWLEDGEMENTS

2007- Certificate of Excellence for Contribution in Education by Lions Club of Erode Metro 2014- Best Teacher Award by Kongu Arts and Science college

2014- III Prize and Cash Award for Best Research Paper Presentation by Meditex International Conference, South India Textile Research Association, Coimbatore

COMPLETED PROJECTS

2006 To develop Virtual training module For Fashion designing, Beauty care and embroidery for Kwicksoft solutions pvt Ltd, Chennai **(Rs.94, 390)**

2006-2007 To Train Backward class Beneficiaries- in Fashion designing, Embroidery and Beauty care funded by National Backward Classes Finance Development Corporation **(Rs.2,67,000)**

2011 For Skill development training in Beauty care under SJSRY (Step up) funded by Erode City Municipal Corporation **(Rs. 1,58,650)**
