DISTANCE EDUCATION

B.Sc. (IT) DEGREE EXAMINATION, DECEMBER 2015

DIGITAL COMPUTER FUNDAMENTALS

(2007 onwards)

Time : Three hours Maximum : 100 marks

Answer any FIVE questions.

All questions carry equal marks.

($5 \times 20 = 100$)

1. (a) Explain the use of complements. (10)

   (b) Convert the following from the given base to the other bases indicated.

   (i) 111110111_2 to Octal (10)

   (ii) $AB6_{16}$ to Decimal

   (iii) $15F_{16}$ to Binary

   (iv) 1568_{10} to Binary.

2. Explain the four rules for the following with suitable example. (20)

   (a) Binary Addition

   (b) Binary Subtraction

   (c) Binary 2's complement addition

   (d) Binary 2's complement subtraction.

3. (a) Simplify the following Boolean functions using four — variable maps. (10)

   (i) $F(A, B, C, D) = \Sigma(0\ 2, 4, 5, 6, 7, 8, 10, 13, 15)$

   (ii) $F(A, B, C, D) = \Sigma(0\ 1, 2, 4, 5, 7, 11, 15)$

   (iii) $F(A, B, C, D) = \Sigma(3, 7, 11, 13, 14, 15)$

   (iv) $F(A, B, C, D) = \Sigma(4, 6, 7, 15)$

   (b) Simplify the following expressions in product–of–sums form. (10)

   (i) $A'C + B'D + A'CD + ABCD$

   (ii) $x'z' + y'z' + yz' + xy$.

4. (a) Explain about Master Slave flip-flop. (10)

   (b) Simplify the following :

   (i) $x + x'y$

   (ii) $xy + x'z + yz$. (10)

5. (a) Explain about the following arithmetic building blocks. (10)

   (i) Half adder

   (ii) Full adder.

   (b) Design a 4–bit binary incrementer and explain its functions. (10)

6. (a) Explain about the functions of Asynchronous counter and draw the block diagram, waveforms, truthtable for the following. (10)

   (i) 3-bit binary ripple counter

   (ii) A down counter

   (iii) 3-bit binary updown counter.

   (b) Explain NOR gate latch and NAND gate latch in RS-flipflop. (10)

7. (a) Explain Master Slave Flip flops. (10)

   (b) What is binary counter? Explain. (10)

8. Explain about the concepts of input-output units and computer memory. (20)

B.Sc. (IT) DEGREE EXAMINATION, DECEMBER 2015.

DATA STRUCTURES USING 'C'

(2007 onwards)

Time : Three hours Maximum : 100 marks

Answer any FIVE questions.

All questions carry equal marks.

($5 \times 20 = 100$)

1. (a) Explain the various control statements in C.

   (b) (i) Explain the structure of C program.

   (ii) Discuss in detail about data types available in C.

2. (a) Give the hierarchy of the usage of operators in C language.

   (b) Discuss the format specifiers used with Data Input and Output functions with examples.

3. (a) How do you pass arrays to a function? Explain with an example program.

   (b) Write a C program to check whether the given number is prime or not.

4. (a) Explain the string handling functions.

   (b) Distinguish between local and global variables. Explain their uses with examples.

5. (a) Explain pointers. Illustrate with examples about array of pointers.

   (b) Write a note on "Dynamic memory allocation".

6. (a) How to open and close a file? Explain and give examples.

   (b) Discuss about stack. Explain the procedure to insert and delete a item in stack.

7. (a) Explain about queues.

   (b) What do you mean by linked list? Explain the algorithm to insert and delete a node in a singly linked list.

8. (a) Explain the create, insert and delete algorithm of single linked list.

   (b) Discuss in detail about representation of binary tree in memory.

15

DISTANCE EDUCATION

B.Sc. (IT) DEGREE EXAMINATION, DECEMBER 2015.

DISCRETE MATHEMATICS

(2007 onwards)

Time : Three hours Maximum : 100 marks

Answer any FIVE questions.

All questions carry equal marks.

(5 × 20 = 100)

1. (a) Construct the truth table for the formula $\neg(P \vee (Q \wedge R)) \leftrightarrow (P \vee Q) \wedge (P \vee R)$.

   (b) Obtain the PCNF of the formula

   $S : (\neg P \to R) \wedge (Q \to P)$ and hence obtains its PDNF.

2. (a) Show that : $(x)[P(x) \wedge Q(x)], (x)P(x) \Rightarrow -(x)\ Q\ (x)$.

   (b) If A, B and C sets, prove algebraically that $A \times (B \cap C) = (A \times B) \cap (A \times C)$?

3. (a) When is a relation said to be reflexive, symmetric, antisymmetric and transitive?

   (b) Let X = {1, 2, 3, 4} and R be the relation on X defined by R = [{(2,1), (3, 1),(4, 1), (3, 2), (4, 2) (4, 3)} . Draw the graph of R and give its matrix.

4. (a) Prove that the necessary and sufficient condition for the function $f : A \to B$ to be invertible is that f is one–to–one and onto.

   (b) If : $f : R \to R$ is defined by $f(x) = x^3 - 2$ find f^{-1}.

5. (a) If $f : R \to R$ and $g : R \to R$ are two functions defined by $f(a) = 2a + 1$, $g(b) = \frac{b}{3}$. Verify that $(g \circ f)^{-1} = f^{-1} \circ g^{-1}$.

(b) Let A and B be sets. Using characteristics function, show that

(i) $Z_{A \cap B}(x) = Z_A(x) - Z_B(x)$

(ii) $Z_{A \cup B}(x) = Z_A(x) + Z_B(x) - Z_{A \cap B}(x)$.

6. (a) Define semi group. Give an example. (5)

(b) Let T be the set of all even integers show that the semigroups (Z, +) and (T, +) are isomorphic. (15)

7. (a) Prove that for every element of a group (G, *) the inverse of 'a' is unique.

(b) If a and b are the elements of a group (a, *) then prove that $(a * b)^{-1} = b^{-1} * a^{-1}$.

8. (a) Explain the general properties of algebraic system.

(b) State and prove Lagrange's Theorem.

INTERNET PROGRAMMING

(2007 onwards)

Time : Three hours Maximum : 100 marks

Answer any FIVE questions.

All questions carry equal marks.

($5 \times 20 = 100$)

1. (a) Explain the Layered Architecture of the Network.

   (b) Give the importance of the TCP/IP.

2. Explain in detail about the following :

   (a) Transport layer,

   (b) Application layer.

3. (a) Explain about the Domain Name System.

   (b) How to creating Web Server? Explain.

4. (a) Explain the features of SMTP.

   (b) Explain how to do business using E-Commerce.

5. (a) Explain the application of Internet in various level.

   (b) Write note on intranet.

6. (a) Explain the concept of Array.

   (b) Write a Java program to multiply any two order matrix.

7. Write a single Java program using the following features :

   (a) Constructor

   (b) Inheritance

   (c) Overloading.

8. Explain in detail :

   (a) APPLET.

   (b) String Handling.

ANALYSIS AND DESIGN OF INFORMATION SYSTEMS

(2007 onwards)

Time : Three hours Maximum : 100 marks

Answer any FIVE questions.

All questions carry equal marks.

($5 \times 20 = 100$)

1. (a) Describe the concept of systems.

   (b) Discuss about computer based information systems.

2. (a) What is the systems development life cycle? Briefly describe the activities that are included.

   (b) Explain in detail about case scenario, problem definition and project Initiation.

3. (a) What are the steps needed for feasibility Analysis? Explain.

   (b) Explain how you can prepare questionnaire.

4. (a) Illustrate about logical and physical Design.

   (b) Write note on input design of on-line systems.

5. (a) Describe the different design methodologies.

   (b) Describe the different types of forms.

6. (a) Explain about file organization.

   (b) Write a note on HIPO.

7. (a) Describe the different types of databases.

   (b) Explain the need for post implementation review.

8. (a) What do you mean by system maintenance? Explain the types available.

   (b) Describe the steps in data and file preparation

APPLICATION PROGRAMS

(2007 onwards)

Time : Three hours Maximum : 100 marks

Answer any FIVE questions.

All questions carry equal marks.

($5 \times 20 = 100$)

1. (a) Briefly explain about managing files with windows explorer.

   (b) Write short notes on Windows elements.

2. Explain how can you :

   (a) Change the background colour of the desktop

   (b) Create a desktop shortcut for an application

   (c) Activate a screen saver for your computer.

3. (a) Explain the options available for editing a document with an example.

   (b) Write short notes on the print options available for a document.

4. (a) What are the different views available for working on a document? Explain them.

   (b) Explain the concept of mail merge.

5. (a) Write short notes on the options for insert and delete rows and columns in MS-Excel.

   (b) Explain about creating a chart and working with chart object in MS-EXCEL.

6. (a) Show the example for fill the series of numeric, weekdays, months in the excel sheets.

   (b) Write short notes on the following :

      (i) Adding and deleting a slide.

      (ii) Moving a slide.

      (iii) Views.

7. (a) How can you create a presentation using the design template?

   (b) How can you add and delete a field in the existing MS-Access table?

8. (a) Explain about the various sections of report.

   (b) Briefly explain about creating and printing reports in MS-Access.

COMPUTER NETWORKS

(2007 Onwards)

Time : Three hours Maximum : 100 marks

Answer any FIVE questions.

All questions carry equal marks.

($5 \times 20 = 100$)

1. (a) Describe the concept of narrowband ISDN.

   (b) Explain the concept of communication satellites in detail.

2. (a) Discuss briefly on network hardware and network software.

   (b) Draw and explain finite state machine models and Petrinet models in detail

3. (a) Discuss the functions of carrier sense multiple access protocols.

   (b) Illustrate the two versions of ALOHA protocols.

4. (a) Explain the issues related in designing dada link layer.

   (b) Discuss the following routing algorithms:

      (i) Shortest path routing.

      (ii) Distance vector routing.

5. (a) Discuss briefly the Congestion Control Algorithms.

   (b) Discuss about routing and switching concept.

6. (a) Discuss about multiplexing.

   (b) Discuss about TCP and UDP.

7. (a) Describe the process of measuring network performance.

   (b) Discuss the secret and public key algorithms in detail.

8. (a) Design a Web Page of your own using HTML Tags

   (b) Explain the concept of JPEG and MPEG standards.

VISUAL PROGRAMMING

(2007 onwards)

Time : Three hours Maximum : 100 marks

Answer any FIVE questions.

All questions carry equal marks.

(5 × 20 = 100)

1. (a) Write about the Hardware and Software requirements for windows.
   (b) How to format and size the windows?

2. (a) Give the various menus available in windows and explain.
   (b) Write notes on OLE.

3. (a) Briefly explain about multimedia and windows.
   (b) Give a brief outlook about the picture attributes and drawing tools of paint brush.

4. How would you build a menu in visual basic? Explain.

5. (a) Explain any four events in VB.
   (b) With a suitable example explain the FOR....NEXT statement.

6. (a) Write a VB program to count the total number of positive, negative and zero's in a given list of 10 numbers.
   (b) Explain multiple form with suitable example.

7. (a) Write about functions in Visual Basic.

   (b) Write short notes on Event Handling.

8. (a) What are Control Arrays? Explain with the help of a suitable example.

   (b) Explain in detail about graphics in VB.

PRINCIPLES OF INFORMATION TECHNOLOGY

(2007 onwards)

Time : Three hours Maximum : 100 marks

Answer any FIVE questions.

All questions carry equal marks.

(5 × 20 = 100)

1. (a) Explain six elements of a computer and communication system.

   (b) Discuss about interactivity.

2. (a) Describe the role of Information Technology.

   (b) Describe the different types of applications software.

3. Explain cyber ethics and its important in detail.

4. (a) Explain briefly about video conferencing with suitable example.

   (b) List out the factors affecting data transmission in detail.

5. (a) What are telephone related communication services? Discuss.

   (b) Discuss about wireless communication in details.

6. What are the secondary storage devices? Explain.

7. (a) Explain in detail the concepts of file management.

   (b) Explain the types of database organizations

8. (a) Explain the compression and decompression in detail.

   (b) Explain the features of MIS.

   (c) What are the five steps in programming? Explain.

MOBILE COMPUTING

(2007 onwards)

Time : Three hours Maximum : 100 marks

Answer any FIVE questions.

All questions carry equal marks.

($5 \times 20 = 100$)

1. (a) Write short notes on Network Signaling.

   (b) List and explain the mobile computing fundamental challenges in detail.

2. (a) Write note on Palm Os.

   (b) Write short notes on VOIP.

3. (a) Discuss the concept of wireless in local loop.

   (b) Write short notes on CDPD.

4. (a) Explain the features of IPV6.

   (b) Explain the components of the WAP standard.

5. (a) Write note on WAP architecture design principles.

   (b) Give a brief introduction to wireless technologies.

6. (a) How can we implement markup languages?

   (b) Explain WML document structure with suitable example.

7. (a) Explain acquiring user input in WML.

   (b) Explain any two WML script control structures.

8. (a) Describe the process of displaying Images, Tables using WML.

   (b) What is called Event? Explain in detail.

RDBMS

(2007 onwards)

Time : Three hours Maximum : 100 marks

Answer any FIVE questions.

All questions carry equal marks.

($5 \times 20 = 100$)

1. (a) What is a database and explain the various views of the database in detail.

   (b) Write about the components and benefits of DBMS.

2. (a) Explain database management system and its features.

   (b) Explain in detail about manipulative capabilities and user interfaces in DBMS.

3. (a) What are the various types of data models available?

   (b) Write in detail on Mapping operation.

4. What are the set operations in Oracle? Explain.

5. (a) What are the benefits of client-server?

   (b) Also write about the benefits of Oracle.

6. (a) Explain ORACLE queries in detail.

   (b) What is Database objects? Explain in details with examples.

7. (a) Write about embedded SQL statements.

   (b) Illustrate with an example the Table Dropping Operation and create duplicate Table for any given original Table.

8. (a) Explain about the Role of Null values in Tables.

   (b) Explain Client/Server Databases.

DISTANCE EDUCATION

B.Sc. (IT) DEGREE EXAMINATION, DECEMBER 2015.

C AND DATA STRUCTURES — LAB I

(2007 onwards)

Time : Three hours Maximum : 100 marks

One question should be given to each candidate by lot system.

Each subdivision carries 50 marks.

1. (a) Write a C program to implement push and pop operations on stack.

   (b) Write a C program to find square root, square and cube of any number.

---------- Cut here ----------

2. (a) Write a C program that receives the data such as age and name of person to check the eligibility for voting. Take the condition that if a person is more than 18 years old he is eligible to vote. Else display the number of years, he has to wait for voting.

   (b) Write a C program to concatenate two given strings and find the length of the concatenated string.

3. (a) There are 10 students in a class. Their names and marks in three different subjects are given. If a student takes more than 40 marks in each subject, then he is declared 'PASS' otherwise 'FAIL'. Write a C program to do the above.

(b) Write a C program to find the area of the circle.

---------- Cut here ----------

4. (a) Write a C program to input a temperature in Celsius and find the corresponding temperature in Fahrenheit. Use the formula $F = 9/5^{*} C + 32$.

(b) Write a C program to find the biggest of five numbers.

---------- Cut here ----------

5. (a) Write a C program to find the factorial of a given number using FUNCTION declaration.

(b) Write a C program to sort 10 numbers in ascending order with naming of variable and the value before and after sorting.

---------- Cut here ----------

6. (a) Write a C program to compute commission earned by a salesman according to the scheme given below :

SALES AMOUNT	COMMISSION %
Upto Rs. 1,000	0
Above 1000 upto 5000	5
Above 5000	10

(b) Write a C program to add two numbers.

7. (a) Write a C program to find simple and compound interests using FUNCTION declaration.

(b) Write a C program to evaluate the given mathematical expression using stack.

---------- Cut here ----------

8. (a) Write a C program to input a basic pay and calculate Gross Pay and

Net Pay.

INCOME :

NRA	=	15%OF BASIC PAY
DA	=	90% OF BASIC PAY
GROSS PAY	=	BASIC PAY + DA + HRA

DEDUCTIONS :

PF	=	10% OF BASIC PAY
WCHARGE	=	200
DEDUCTIONS	=	PF + WCHARGE
NETPAY	=	GROSS PAY-DEDUCTIONS

(b) Write a C program to convert a given number into words for numbers 1 to 5.

DE–9037

Sub. Code
26

DISTANCE EDUCATION

B.Sc. (IT)/B.Sc. (IT) (Lateral) DEGREE EXAMINATION, DECEMBER 2015.

LAB II — JAVA PROGRAMMING

(2007 onwards)

Time : Three hours Maximum : 100 marks

ONE question should be given to each candidate by LOT.

Answer both subdivisions (a) and (b).

1. (a) Write a Java program to display the contents of file along with a line number before each line.

   (b) Create and manipulate the following Text Areas, Canvas, Scroll bars, Frames, Menus, Dialog Boxes.

---------- Cut here ----------

2. (a) Write a JAVA program illustrates the implementation of abstracts class.

   (b) Write a Java program to implement producer/consumer problem using synchronization.

---------- Cut here ----------

3. (a) Write a Java program to illustrate the implementation of various form of Inheritance. (Use Hierarchical).

   (b) Write a Java program that reads on filename from the user and displays the contents of file.

4. (a) Write a Java program to write Applets to draw the various polygons.

   (b) Write a Java program which illustrates the implementation of multiple inheritance using interfaces in Java.

---------- Cut here ----------

5. (a) Write a Java program which illustrates the use of files and streams.

   (b) Write a Java program to add the values of diagonal element in a given 3×3 matrice.

---------- Cut here ----------

6. (a) Write a Java program to write Applets to draw the various polygons.

   (b) Write a Java Program for sorting a given list of names in ascending order using command line arguments.

DE–9038

Sub. Code
27

DISTANCE EDUCATION

B.Sc. (IT)/B.Sc. (IT) (Lateral) DEGREE EXAMINATION, DECEMBER 2015.

LAB III — APPLICATION PROGRAMS

(2007 onwards)

Time : Three hours Maximum : 100 marks

MS Word : 25
Excel : 35
Access : 40
Total : 100

Student has to do totally THREE questions, selecting ONE question from each Unit by Lot system.

UNIT I

(MS-Word : 25% marks)

1. Prepare your resume with photograph inserted. Use table, bullets and different font styles. Also give different colors and give backgrounds.

---------- Cut here ----------

2. Create a table with employee data. Use vertical alignment, column totals, merging cell features. Format table contents suitably.

---------- Cut here ----------

3. Create a table of students data that contains reg.no, name, subject1, subject2, subject3 marks. Add a new column named total and find the row total for each student.
   Add two rows named TOTAL, AVERAGE. Find the total and average values for each subject marks. Convert the table to text.

4. Create a Macro that formats selected text with the following :

   Times New Roman, 13 pt, Bold, Underline and Red Colour. Select text and execute the macro.

---------- Cut here ----------

UNIT II

(MS-Excel : 35% marks)

5. Draw Line, Bar, Pie charts for the data given below:

ABC company Ltd

Year	Sales	Cost	Profit
1991	1000	400	600

   Add data for 10 years from 1991 to 2000. Provide titles, legends, grids and data labels.

---------- Cut here ----------

6. Create a payroll worksheet for 10 employees with suitable columns.
   Format the worksheet with borders, colour and shading.

---------- Cut here ----------

7. The following were the observations made in certain experiments for the values y and given the values of x.

x :	1	2	3	4	5	6	7	8	9	10
y :	10	30	45	25	15	28	40	32	15	35

   Compute the following :

   (a) Find mean, median and standard deviation.

   (b) Correlation co-efficient between x and y.

   (c) Draw the bar chart and shading cells.

   (d) Draw a chart in Excel and paste it in word.

8. Create bar chart for student performance in five subject marks.

   Format the chart with scale, legend, label and colour features.

---------- Cut here ----------

UNIT III

(MS-Access : 40% marks)

9. Create inventory table with fields ITEMNO, NAME, Quantity-on-hand and Reorder-level.
   (a) Create a form in custom format.
   (b) Create a query MYQUERY to show all the items.
   (c) Create a macro that executes (MYQUERY) query automatically.

---------- Cut here ----------

10. Create colourful data entry form for a table in a database. Use look up values for data wherever possible.

---------- Cut here ----------

11. Create two tables SALES 1, SALES 2 and join them to produce a third table SALES 3.

---------- Cut here ----------

12. Create three tables in a database as given below :

	EMPLOYEE	PAY	DEDUCTION
(a)	EMPNO	EMPNO	EMPNO
(b)	NAME	BASIC PAY	LIC
(c)	ADDRESS	HRA	PF
(d)	DESIGNATION	DA	LOAN

   (f) Generate a report that display payslip for all the employees.

DE–9039

Sub. Code
36

DISTANCE EDUCATION

B.Sc. (I.T.)/B.Sc. (I.T.) (Lateral) DEGREE EXAMINATION, DECEMBER 2015.

LAB IV — VISUAL BASIC AND ORACLE

(2007 Onwards)

Time : Three Hours Maximum : 100 Marks

Instruction.

1. Answer any TWO questions choosing ONE from VB and another from ORACLE.
2. Each questions carries 50 marks.
3. Questions are to be selected by the examiner for each candidate.
4. Write algorithm and flow chart if necessary.

---------- Cut here ----------

VB Questions

1. Write the test a VB program to compute the intervals between two dates in terms of day, months and years. Use option buttons, text boxes and command buttons.

---------- Cut here ----------

2. Write a VB program to display and calculate simple interest or compound interest using three command buttons namely Input, Calculate, Display.

3. Write a VB program to do temperate conversion C to F and F to C. Use option buttons.

---------- Cut here ----------

4. Write and test a VB program to compute and print either sum of odd numbers or even numbers at the user's choice using Label, Text, Option buttons.

---------- Cut here ----------

5. Write and test a VB Program to print twenty address lables in a two-column format for the address.

THE REGISTRAR

ALAGAPPA UNIVERISTY

KARAIKUDI —630003

ORACLE QUESTIONS

6. Create table NUMB with the following structure

Field Name	Type	Width	Decimal
NVM	Numeric	6	2
ABSNO	Numeric	6	2
SQRTNO	Numeric	6	2
ROUNDNO	Numeric	6	2
TRUNCNO	Numeric	6	2
SQRNO	Numeric	6	2
CUBENO	Numeric	6	2

(a) Add 5 records (Some numbers must be negative (or) decimal)

(b) Display all the records.

(c) Replace ABSNO with absolute value of given numbers

(d) Replace SQRTNO with square root value of given numbers.

(e) Replace round No by using ROUND function.

(f) Replace TRUNCNO by using TRUNC function.

(g) Replace SQRNO with the square of given numbers.

(h) Replace CUBNO with CUBE of given numbers.

(i) Display all the records.

7. Create a table BlO-DATA with the following structure :

Field Name	Type	Width	Decimal
NAME	Char	25	
AGE	NUMERIC	2	
SEX	Char	1	
DEGREE	Char	8	
CITY	Char	20	

(a) Add 5 records (BIO-DATA of 5 employees)

(b) Display all records of MALE employees

(c) Delete all B.Sc. degree holders and then display the table contents

(d) Remove all employee records whose AGE is greater than 20

(e) Display all records having AGE <20 and CITY is TIRUNELVELY

---------- Cut here ----------

8. Create table MARK with the following structure :

Field name	Type	Width	Decimal
REGNO	Numeric	8	
NAME	Character	20	
TAMIL	Numeric	3	
ENGLISH	Numeric	3	
MATHS	Numeric	3	
BIOLOGY	Numeric	3	

(a) Add 5 Records.

(b) Show data in fields REGNO, NAME, TAMIL & BIOLOGY alone on the screen.

(c) Show data in fields REGNO, BIOLOGY & MATHS alone on the screen.

(d) Show data in fields NAME & REGNO alone on the screen.

(e) Show all fields on the Screen.

9. Create table 'SALES' with the following structure :

Field name	Type	Width	Decimal
SNO	Numeric	5	
SNAME	Character	25	
SAMT	Numeric	8	2
COMM	Numeric	6	2

(a) Add 5 records

(b) Display the salesman details whose sales amount is maximum
