DISTANCE EDUCATION

M.B.A. (R.M) DEGREE EXAMINATION, DECEMBER 2014.

First Semester

MANAGEMENT CONCEPTS

(Upto 2012 – 2013 Academic Year and 2013 Calendar Year)

Time : Three hours Maximum : 100 marks

PART A — (5 × 8 = 40 marks)

Answer any FIVE questions.

1. Discuss the principles of scientific management in detail.

2. Write short notes on

   (a) Contingency approach to management

   (b) HRM approach to management.

3. Define the term planning Explain different types of planning.

4. What is organizational structure? State the steps in structuring an organization.

5. What is authority? Differentiate authority from responsibility and accountability.

6. Define the term 'direction'. Explain in detail the principles of direction.

7. What is management audit? Explain the importance and objectives of management audit.

8. Write short notes on Business process reengineering.

PART B — (4 × 15 = 60 marks)

Answer any FOUR questions.

9. Elaborate Fayol's principles of management.

10. What is MBO? Explain the process of MBO. How do you design an MBO programme?

11. What is delegation of authority? Explain the principles of delegation.

12. What is recruitment? How does it differ from selection? Explain recruitment and selection policies.

13. Explain the similarities and differences among Theory X, Theory Y and Theory Z.

14. Explain different kinds of control. Which kind of control is most desirable?

15. Evaluate the concept of six sigma.

First Semester

ORGANISATIONAL BEHAVIOUR

(Upto 2012-13 Academic Year and 2013 Calender Year)

Time : Three hours Maximum : 100 marks

PART A — (5 × 8 = 40 marks)

Answer any FIVE questions.

1. Define organisation behaviour.

2. What is meant by learning?

3. Explain importance of teams in present organisations.

4. What are various sources of power?

5. What is meant by management of stress?

6. Explain the term organisational efficiency.

7. What are various factors that resist to change in organisation?

8. "Is conflict important in organisations"? Explain.

PART B — (4 × 15 = 60 marks)

Answer any FOUR questions.

9. What is meant by personality? Explain difference types of personality? How do organisations help in developing personality?

10. What is meant by motivation? Explain any two theories of motivation.

11. What is meant by group? What are its characteristics? "Group is better/Team is better" Illustrate.

12. Explain the differences between constructive and destructive conflicts.

13. What is meant by organisation climate? What are various factors involved in it?

14. What is meant by organisational development? What are its scope and interventions?

15. "How do organisational politics makes employees of the organisation effective"? Comment on this statement.

First Semester

MANAGERIAL ECONOMICS

(Upto 2012-13 Academic Year and 2013 Calendar Year)

Time : Three hours Maximum : 100 marks

PART A — (5 × 8 = 40 marks)

Answer any FIVE questions.

1. Define Managerial Economics and bring out its scope.

2. Does the demand curve always slope downwards?

3. Bring out the significance of cost control.

4. Is Market-oriented pricing better than cost-oriented pricing?

5. Bring out the distinction between cash discount and trade discount.

6. Briefly explain the features of Perfect competition.

7. Briefly talk about the issues involved in impact of gold import on Indian economy.

8. Discuss the significance of managerial economics in business decision making.

PART B — (4 × 15 = 60 marks)

Answer any FOUR questions.

9. How can impact of changing price on demand measured and bring out the significance of such impact measurement on business decision making.

10. Explain the Cob-Douglas production function.

11. Explain the pros and cons of penetration and Skimming pricing methods with illustrations.

12. Explain the Steps involved in profit forecasting.

13. Can the NPV and IRR methods of appraising capital expenditure yield different results?

14. Discuss the implications of falling value of Indian rupee on the economy.

15. Explain the different methods of calculating National income.

First Semester

FINANCIAL AND MANAGEMENT ACCOUNTING

(Upto 2012 – 2013 Academic Year and 2013 Calender Year)

Time : Three hours Maximum : 100 marks

PART A — (5 × 8 = 40 marks)

Answer any FIVE questions.

All questions carry equal marks.

1. List the three rules of recording accounting transaction.

2. On what principle is stock valued and what is the justification?

3. Briefly explain the different subsidiary books.

4. Briefly describe the limitations of cash flow statements.

5. From the following balances, prepare a Trial Balance as on 31.03.2013

Cash	2,400	Bank	2,400
Capital	4,00,000	Purchases	80,000
Bills Payable	88,000	Opening stock	1,40,000
Debtors	2,00,000	Wages	64,000
Buildings	2,40,000	Sales	8,00,800
Furniture	60,000	Bad debts Reserves (Opening)	4,000
Bills Receivable	80,000	Rent and Taxes	40,000
Salaries	80,000	Creditors	96,000

6. How would you rectify the following errors?

   (a) Purchases made from Suresh on credit was credited to Cash Account.

   (b) Sales made to Satish was debited to Shatish Account.

7. Is preparation of budget absolutely necessary for a business undertaking?

8. Why should decisions involving capital investments be made after thorough scrutiny?

PART B — (4 × 15 = 60 marks)

Answer any FOUR questions.

9. Differentiate financial Accounting and management accounting.

10. From the following balance sheet and profit and loss A/c of Rajalaxmi Sugar Mills Lts. As on 31-12-1997, you are required to calculate the following ratios:

    (a) Current ratio
    (b) Quick ratio
    (c) Fixed assets ratio
    (d) Debt equity ratio
    (e) Proprietary ratio
    (f) Stock turnover ratio
    (g) Fixed assets turnover ratio
    (h) Return on capital employed
    (i) Debtors turnover ratio
    (j) Creditors turnover ratio
    (k) Net profit ratio
    (l) Operating ratio

Balance sheet as on 31.12.1997.

Liabilities	Rs	Assets	Rs
Issued capital:		Land and building	30,00,000
40,000 shares of Rs. 100 each	40,00,000	Plant and machinery	16,00,000
Reserves	18,00,000	Stock	29,60,000
Creditors	26,00,000	Debtors	14,20,000
Profit and loss Account	6,00,000	Cash at bank	6,20,000
6% Debentures	6,00,000		
Total	96,00,000	Total	96,00,000

Profit and Loss Account

Particulars	Rs.	Particulars	Rs.
To opening stock	19,90,000	By sales	1,70,00,000
To purchases	1,09,05,000	By closing stock	29,80,000
To direct expenses	2,85,000		
To gross profit c/d	68,00,000		
Total	1,99,80,000	Total	1,99,80,000
To administration expenses	30,00,000	By gross profit b/d	68,00,000
To selling & distribution expenses	6,00,000	By non-operating income	1,80,000
To financial expenses	3,00,000		
To other non-operating expenses	80,000		
To net profit	30,00,000		
Total	69,80,000	Total	69,80,000

11. X Ltd. is considering to make investment in a proposal which requires an outlay of Rs.50,000. The project has a life of three years over which the following cash inflows are likely to be generated:

Year 1		Year 2		Year 3	
Cash flow Rs.	Probability	Cash flow Rs.	Probability	Cash flow Rs.	Probability
10,000	0.10	10,000	0.20	10,000	0.30
20,000	0.20	20,000	0.30	20,000	0.40
30,000	0.30	30,000	0.40	30,000	0.20
40,000	0.40	40,000	0.10	40,000	0.10

If the discount rate is 4% and the cash flows of the three years are independent, determine the expected NPV.

12. Explain the various errors disclosed and not disclosed by the Trial Balance.

13. Explain the managerial uses of funds flow statement.

14. A newly started Pushpak Co wishes to prepare cash budget from January. Prepare a cash budget for the 6 months from the following estimated revenue and expenses.

Month	Total Sales	Materials	Wages	Production Overhead	Selling and Distribution Overhead
	Rs.	Rs.	Rs.	Rs.	Rs.
January	20,000	20,000	4,000	3,200	800
February	22,000	14,000	4,400	3,300	900
March	24,000	14,000	4,600	3,300	800
April	26,000	12,000	4,600	3,400	900
May	28,000	12,000	4,800	3,500	900
June	30,000	16,000	4,800	3,600	1,000

Cash balance in 1st January was Rs. 10,000. A new machine is to be installed at Rs. 30,000 on credit, to be repaired by two equal installments in March and April.

Sales commission at 5% on total sales is to be paid within the months following actual sales

Period of credit allowed by suppliers: 2 months

Period of credit allowed to customers 1 month

Delay in payment of overheads: 1 month

Delay in payment of wages: ½ month

Assume cash sales to be 50% of the total sales.

15. Explain the merits and limitations of Payback Period and ARR Methods of appraising capital investments.

First Semester

MARKETING MANAGEMENT

(Upto 2012–13 Academic Year and 2013 Calendar Year)

Time : Three hours Maximum : 100 marks

PART A — (5 × 8 = 40 marks)

Answer any FIVE questions.

1. What is meant by social marketing concept?
2. Explain process involved in marketing segmentation.
3. What is meant by marketing research?
4. What are various reasons to failure of product in market?
5. What is meant by Market Integration?
6. Explain role of middlemen in channel distribution policy.
7. What is the process involved in training of sales force?
8. Define the term advertising copy. What is its importance?

PART B — (4 × 15 = 60 marks)

Answer any FOUR questions.

9. What is meant by Marketing Mix? Explain each 'P's with an example?
10. What are various approaches to the study of marketing? Explain in detail.

11. How psychological and sociological factors will affect process of consumer buying? Explain with an example.

12. What is meant by Test marketing? Explain importance of Test marketing with an example.

13. Compare product expansion and product elimination strategies.

14. How do administered and regulated pricing influence consumer behaviour? Explain it with an example.

15. What is meant by personal selling? Explain its process and steps in selling? What are the various factors affecting personal selling?

M.B.A. (RM) DEGREE EXAMINATION, DECEMBER 2014.

Second Semester

QUANTITATIVE METHODS

(Upto 2012-13 Academic year and 2013 Calender Year)

Time : Three hours Maximum : 100 marks

PART A — (5 × 8 = 40 marks)

Answer any FIVE questions.

1. Write various limitations of graphical method of solving a Linear programming Problem.

2. Write short notes on following terms related to Transportation problems:

   (a) Basic Cell

   (b) Demand

   (c) Balanced Transportation Problem

   (d) Transportation cost.

3. What is the procedure to obtain an initial solution by Vogel's Approximation Method?

4. Brief the procedure to solve the assignment problems.

5. Write a short note on Binomial Distribution and its business applications.

6. State examples for business applications of using Simulations.

7. What do you mean by expected value? What extent it is used in business applications?

8. Give an example of Inventory Management problem using Monte Carlo simulation.

PART B — (4 × 15 = 60 marks)

Answer any FOUR questions.

9. A bakery makes sweet rolls and donuts. A batch of sweet rolls requires 3 lb of flour, 1 dozen eggs, and 2 lb of sugar. A batch of donuts requires 5 lb of flour, e3 dozens eggs, and 2 lb of sugar. Solve the problem using Simplex Method to maximize profit, if the bakery has 760 lb of flour, 420 dozen eggs, and 480 lb of sugar. The profit on a batch of sweet rolls is $148.00 and on a batch of donuts is $133.00.

10. Find the optimum transportation plan such that the total transportation cost is lowest

Plant	Markets				
	S1	S2	S3	S4	Capacity
F1	4	6	8	13	50
F2	13	11	10	8	70
F3	14	4	10	13	30
F4	9	11	13	8	50
Total	25	35	105	20	

11. A restaurant has five maids to maintain the operations. To complete cleaning the restaurant, they must vacuum, clean the kitchen, clean the wash area and do general straightening up. The time it takes each maid to do each job is shown below in the table. Each maid is assigned to one job. Use the Hungarian method to determine assignments that minimize the total number of maid-hours needed to clean the restaurant.

Maid	Time (hours)			
	Vacuum	Clean kitchen	Clean wash area	Straighten up
1	6	5	2	1
2	9	8	7	3
3	8	5	9	4
4	7	7	8	3
5	5	5	6	4

12. De Rose & Co is planning rose production for Valentine's Day. Each rose costs $ 0.35 to raise and sells wholesale for $0.70. Any roses left over after Valentine's Day can be sold the next day for $ 0.10 wholesale. The manager has the following probability distribution based on previous years:

Roses sold	15000	20000	25000	30000
Probability	0.10	0.30	0.40	0.20

How many roses should the manager produce to minimize the firm's expected losses?

13. A supervisor for a hydro-electric dam knows that the dam's turbines generate electricity at the peak rate only when at least 10,00,000 gallons of water pass through the dam each day. He also knows from experience that the daily flow is normally distributed with mean equal to the previous day's flow and a standard deviation of 2,00,000 gallons. Yesterday, 8,50,000 gallons flowed through the dam. What is the probability that the turbines will generate at peak rate today?

14. A survey of 500 men and 500 women, designed to study financial tensions between couples, asked how likely each was to hide purchases, cash, or investments from his or her partner. The results were as follows:

TYPE	Likely to Hide	
	MEN	WOMEN
Auto-related	66	36
Cash	126	133
Clothes	62	116
Electronics	79	56
Entertainment	96	76
Food	74	94
Investments	76	52
Travel	53	39

If a respondent is chosen at random, (a) what is the probability that he or she is likely to hide a clothing purchase? (b) What is the probability that he or she is likely to hide investments? (c) Probability that the person is a male and is likely to hide auto-related purchases? And (d) the probability that the person is a female and is likely to hide clothing purchases?

15. George Nanchoff owns a gas station. The cars arrive at the gas station according to the following inter-arrival time distribution. The time to service a car is given by the following service time distribution. Using the following random number sequence: 92, 44, 15, 97, 21, 80, 38, 64, 74, 08, estimate the average customer waiting time, average idle time of the assistant and the average time a car spends in the system.

Inter arrival time (in minutes)	$P(X)$	Random numbers	Service Time (in minutes)	$P(X)$	Random numbers
4	.35	00-34	2	.30	00-29
7	.25	35-59	4	.40	30-69
10	.30	60-89	6	.20	70-89
20	.10	90-99	8	.10	90-99

BUSINESS ENVIRONMENT

(Upto 2012 – 2013 Academic year and 2013 Calendar year)

Time : Three hours Maximum : 100 marks

PART A — (5 × 8 = 40 marks)

Answer any FIVE questions.

1. Explain the importance of scanning the internal environment.

2. What is central bank? Explain its role in the financial system of a country.

3. Explain current regulatory environment of government on businesses.

4. Explain various components of India's GDP and its consequences on the economy.

5. Write a note on clean technology.

6. What is privatization? Explain as to when it is necessary.

7. What is carbon footprint? Explain the necessity to minimize the same.

8. Compare and contrast between the economic development and ecological impact on the environment.

PART B — (4 × 15 = 60 marks)

Answer any FOUR questions.

9. Discuss the impact of current inflation on the economy.

10. How and to what extent foreign capital is necessary to enhance the rapid development of industries in India?

11. Explain whether increasing competition always lead to consumer benefits.

12. Discuss the importance of clean energy in view of increasing environmental pollution.

13. Explain as to what extent the consumer protection law needs to be amended, in view of increasing corporate frauds and insufficient compensation from corporate and government for failure of breach of contract.

14. Explain the role of large and medium scale industries amidst increasing levels of globalization.

15. Discuss the prevailing scenario of capital markets in India.

BUSINESS RESEARCH

(Upto 2012 – 2013 Academic year and 2013 Calendar year)

Time : Three hours Maximum : 100 marks

PART A — (5 × 8 = 40 marks)

Answer any FIVE questions.

1. What is the difference between induction and deduction principle in research?

2. Write a short note on importance of doing social researches.

3. Discuss the importance of secondary data and various limitations of it.

4. Write the importance of research design? Write shortly about case study research.

5. What are the factors affecting the sample size? How will you determine the sample size?

6. Write a short note on validity and reliability of a construct.

7. List any three non-parametric tests; discuss its relevance with suitable example.

8. Write various components that should be included a research report.

PART B — (4 × 15 = 60 marks)

Answer any FOUR questions.

9. Compare the Descriptive and explorative research designs.

10. Describe various sources of secondary data; what are the advantages and disadvantages of using secondary data sources in business researches?

11. What are important points to be considered while conducting surveys? How will the researcher ensure best cooperation from the respondents?

12. Explain Chi-square test of independence with suitable illustration.

13. List various measures to be considered while preparing a questionnaire

14. Write a short note on various non-probability sampling methods and state their advantages and disadvantages.

15. Discuss various factors that should be considered while preparing research reports and state the importance of various diagrammatic representations in the reports.
