DE–8046 **13**

DISTANCE EDUCATION

B.Sc. (IT) DEGREE EXAMINATION, MAY 2014.

DIGITAL COMPUTER FUNDAMENTALS

(2007 onwards)

Time : Three hours Maximum : 100 marks

Answer any FIVE questions.

All questions carry equal marks.

$(5 \times 20 = 100)$

1. (a) Convert the following

   (i) $(D9)_{16} = (?)_8$

   (ii) $(134)_8 = (?)_2$

   (iii) $(704)_8 = (?)_{10}$

   (iv) $(428)_{10} = (?)_{16}$

   (v) $(AB7)_{16} = (?)_{10}$. (10)

   (b) What are BCD codes? Discuss their merits and demerits. What are their area of application? (10)

2. (a) Perform $(50)_{10} - (100)_{10}$ using twos complement arithmetic and verify the result. (10)

   (b) Explain AJCII and EBCDIC codes and compare them. (10)

3. (a) State and prove the basic axioms of Boolean algebra. (10)

   (b) What are sum of products form and product of sums form of logic expressions? Explain with suitable examples. (10)

4. (a) Simplify the Boolean function using the tabulation method

$$F(A, B, C, D, E, F, G) = \sum(20, 28, 38, 39, 52, 60, 102, 103, 127).$$ (10)

(b) Explain the working principle of demultiplexer with diagram. (10)

5. (a) Explain the principle and operation of octal to binary encoder with neat logic diagram and truth table. (10)

(b) Explain the half–adder and full–adder functions with truth table and circuit diagram. (10)

6. (a) What is a flip–flop? Explain its purpose in digital circuits. Explain the principle of JK flip–flop. (10)

(b) Discuss with diagram about the functioning of BCD counter. (10)

7. (a) Explain any two output devices in detail. (10)

(b) What is ROM? Explain the various types of ROM. (10)

8. (a) Describe the various generations of computer. (10)

(b) What is the function of a shift register? Explain its various types. (10)

DE–8047 **14**

DISTANCE EDUCATION

B.Sc.(IT) DEGREE EXAMINATION, MAY 2014.

DATA STRUCTURES USING C

(2007 onwards)

Time : Three hours Maximum : 100 marks

Answer any FIVE questions.

All questions carry equal marks.

$(5 \times 20 = 100)$

1. (a) Explain identifier and keywords in C.

   (b) Discuss about switch statement with example.

2. (a) Explain macros in C.

   (b) Discuss about string handling function.

3. (a) How do you pass pointer to function? Explain with example.

   (b) Write a C program to create an employee data file.

4. (a) Explain stack operation with example.

   (b) Explain insertion and deletion operation in queue.

5. (a) Briefly explain doubly linked list.

   (b) Explain binary tree representation.

6. (a) Write a C program to find simple interest.

   (b) Discuss about nested control structure.

7. (a) Write a C program to find factorial of n numbers using recursion.

   (b) Write a C program to multiply two matrices.

8. (a) Explain binary tree traversal.

   (b) Write a C program to reverse a number.

DE–8048 **15**

DISTANCE EDUCATION

B.Sc. (IT) DEGREE EXAMINATION, MAY 2014.

DISCRETE MATHEMATICS

(2007 Onwards)

Time : Three hours Maximum : 100 marks

Answer any FIVE questions.

All questions carry equal marks.

$(5 \times 20 = 100)$

1. (a) Show that $(P \to Q) \wedge (R \to Q) \Leftrightarrow (P \vee R) \to Q$.

   (b) Prove that $\{\uparrow\}$ is functionally complete.

2. (a) Find the pdnf and pcnf of the formula $P \vee (\neg P \to (Q \vee (\neg Q \to R)))$.

   (b) Prove that $((P \to Q) \wedge (Q \to R)) \Rightarrow (P \to R)$.

3. (a) Show that $R \to S$ can be derived from the premises $P \to (Q \to S)$, $\neg R \vee P$ and Q.

   (b) If A, B, C are sets, show that $A \cup (B - C) = (A \cup B) - (C - A)$.

4. (a) Let A, B, C be sets, R is a relation from A to B and S is a relation from B to C. Then prove that $(S \circ R)^{-1} = R^{-1} \circ S^{-1}$.

   (b) Let R denote a relation on the set of all ordered pairs of positive integers by $(x_1, y_1) R (x_2, y_2)$ if and only if $x_1 y_2 = y_1 x_2$. Show that R is an equivalence relation.

5. (a) Let $A = \{a, b, c, d, e\}$ and $R = \{(a,a), (a,b), (b,c), (c,e), (c,d), (d,e)\}$. Compute R^2 and R^α.

(b) Let $A = \{1, 2, 3, 4\}$ and $R = \{(1,2), (2,3), (3,3), (3,4), (4,2)\}$ be a relation on A. Find transitive closure of R?

6. (a) If A and B are any two subsets of $\cup$, f is a characteristic function then show that $f_{A \cup B}(x) = f_A(x) + f_B(x) - f_{A \cap B}(x)$.

(b) If f and g are functions defined in the set of real numbers R, be given by $f(x) = x^2 - 2$, and $g(x) = x + 4$. Find $f \circ g$ and $g \circ f$. State whether these functions are injective, surjective and bijective.

7. (a) Let $(s, *)$ and $(T, *')$ be monoids with identities e and e' respectively. $f : S \to T$ be an isomorphism then prove that $f(e) = e'$.

(b) Show that every cyclic group is abelian.

8. (a) If every element of a group is its own inverse prove that G is abelian.

(b) Show that A non empty subset H of a group $\{G, *\}$ will be a sub group of G if and only if $a * b^{-1} \in H$ whenever $a, b \in H$.

DISTANCE EDUCATION

B.Sc.(IT)/B.Sc.(IT) (Lateral) DEGREE EXAMINATION, MAY 2014.

INTERNET PROGRAMMING

(2007 onwards)

Time : Three hours Maximum : 100 marks

Answer any FIVE questions.

All questions carry equal marks.

$(5 \times 20 = 100)$

1. (a) Explain in detail about various Network Topologies.

   (b) What is an Internet Address Protocol? Describe in detail.

2. (a) Discuss about Mail Transfer Protocol in detail.

   (b) Give an account on Creating a Web Server.

3. (a) Explain the role of Internet at Business.

   (b) Discuss about the usage of Internet at Home.

4. (a) Briefly explain the concepts of Object Oriented Programming.

   (b) Explain the looping and decision making features of java.

5. (a) Explain about Type casting and Type conversion in Java. Give an example.

   (b) Write a Java program to subtract any 2×2 matrix.

6. (a) What is a Constructor? Give an example program.

   (b) Explain about Inheritance in Java. Give an example.

7. (a) With an example, explain I/O applet.

   (b) Discuss about JAVA classes and objects.

8. (a) Write a Java program for $1 + 2 + 3 + \ldots + n$ using Do-While.

   (b) Explain any two string functions in Java. Give an example program.

DE–8050 **24**

DISTANCE EDUCATION

B.Sc. (Information Technology)/B.Sc.(IT) (Lateral) DEGREE EXAMINATION, MAY 2014.

ANALYSIS AND DESIGN OF INFORMATION SYSTEMS

(2007 Onwards)

Time : Three hours Maximum : 100 marks

Answer any FIVE questions.

All questions carry equal marks.

($5 \times 20 = 100$)

1. (a) Explain the system development life cycle. (10)

   (b) Compare MIS. DSS and TPS. (10)

2. (a) List and explain the various feasibility studies. (10)

   (b) With suitable example, explain decision table. (10)

3. (a) Discuss about form design requirements. (10)

   (b) Write the procedure for capturing data for input. (10)

4. (a) What are the types of files? (10)

   (b) Describe the need for system testing. (10)

5. (a) What are the possible training methods used for training personnel? (10)

   (b) Explain the phases in hardware and software selection. (10)

6. (a) What are the elements of a system? Explain. (10)

   (b) What are the skills expected from a system analyst? (10)

7. (a) Explain the methods to represent the data flow concept. (10)

   (b) Write about the fact finding techniques. (10)

8. (a) Explain the following: (10)

   (i) Flow chart

   (ii) System flow chart

   (iii) Program flow chart

   (b) What are the conversion methods used for system implementation? (10)

DE–8051 **25**

DISTANCE EDUCATION

B.Sc. (IT)/B.Sc (IT) (Lateral) DEGREE EXAMINATION, MAY 2014.

APPLICATION PROGRAMS

(2007 onwards)

Time : Three hours Maximum : 100 marks

Answer any FIVE questions.

$(5 \times 20 = 100)$

1. (a) Briefly explain the following :

   (i) Personalize the desktop (4)

   (ii) View the drives folder (3)

   (iii) Working with multiple windows (3)

   (b) With a neat sketch explain the steps involved in creating, opening and saving files in the windows environment. (10)

2. (a) List out the steps involved in the following :

   (i) Add a new worksheet (2)

   (ii) Move and copy data (3)

   (iii) Steps in formatting text (5)

   (b) Illustrate the steps involved in building an excel database with an example. (10)

3. (a) Mention the steps involved in performing the following functions in MS Word. (10)

   (i) Editing text
   (ii) Selecting text
   (iii) Moving text
   (iv) Copying text
   (v) Deleting text

(b) Create a quotation for placing orders for the following items from M/S SONY Infotech Ltd., (10)

(i) Samsung make 17" Monitor, quantity 15

(ii) Logitech make web cam, quantity 10

(iii) Hard disk (SATA) 160 GB, quantity 6.

4. (a) (i) List out the steps involved in creating and editing slides with examples. (5)

(ii) Explain briefly about auto layout in MS-POWERPOINT. (5)

(b) Design an advertisement for a product with necessary animations in MS-POWERPOINT. (10)

5. (a) Explain the steps involved in adding, inserting and deleting records in a table with an example. (10)

(b) Briefly explain the following

(i) Auto form (3)

(ii) Sharing office data (3)

(iii) Embed copied data in another document (4)

6. Create a time table in MS-WORD for your classes in B.Sc. course. Explain the steps involved for creating and making updations with neat diagrams. (20)

7. Design an excel sheets for a leading manufacturing company with the targets and progress for the past 3 years. Explain the steps involved for the same and for inserting charts depicting the progress. (20)

8. List out the steps involved in creating a powerpoint presentation on your project. Perform the following changes after creation with neat sketch.

   (a) Insert header and footer

   (b) Insert slide numbers

   (c) Insert picture from clip art. (20)

DE–8052 **31**

DISTANCE EDUCATION

B.Sc. (IT) / B.Sc. (IT) (Lateral) DEGREE EXAMINATION, MAY 2014.

COMPUTER NETWORKS

(2007 onwards)

Time : Three hours Maximum : 100 marks

Answer any FIVE questions.

All questions carry equal marks.

($5 \times 20 = 100$)

1. (a) Explain ISO/OSI reference model.

   (b) Discuss about the Communication Satellites.

2. (a) Explain the Error detection and correction codes with examples.

   (b) Explore about HDLC.

3. (a) Describe the design issues of Network layer.

   (b) Briefly explain about Internet Multicasting.

4. (a) Discuss about Flow Control and Buffering in Transport Protocol.

   (b) Illustrate about UDP.

5. (a) Explain the DNS in terms of Name space, Resource Record and Name server.

   (b) Describe about Video Compression in detail.

6. (a) What are the various transmission media available? Explain the various standards of the guided media.

   (b) Give an account on Carrier Sense Multiple Access Protocols.

7. (a) Define routing and explain distance vector routing and link state routing.

   (b) Write a note on IP Subnetting.

8. (a) Discuss about the protocols for Gigabit Networks.

   (b) Write about the architecture and services of e-mail.

DISTANCE EDUCATION

B.Sc. (Information Technology)/B.Sc. (Information Technology) (Lateral) DEGREE EXAMINATION, MAY 2014.

VISUAL PROGRAMMING

(2007 onwards)

Time : Three hours Maximum : 100 marks

Answer any FIVE questions.

All questions carry equal marks.

$(5 \times 20 = 100)$

1. (a) Discuss in detail about Windows Environment.

   (b) Explain about Handling a Window and Menus.

2. (a) Discuss about Multitasking and Clipboard.

   (b) Explain about PIF Editor, OLE and Multimedia.

3. (a) Discuss in detail about VB Environment.

   (b) Explain about any ten visual basic controls available in VB toolbox.

4. (a) Explain about Scroll bars and Menus with examples.

   (b) Write about Frames, Check box and Option buttons with example.

5. (a) Write about VB Program Development Process.

   (b) Explain about various forms of IF statement with examples.

6. (a) Discuss about For-Next and Do-While control structures with example.

   (b) Write a VB program for simple arithmetic calculator.

7. (a) Discuss about creating procedures in VB.

   (b) Write a VB Program for calculating factorial of a given number.

8. (a) Discuss in detail about Arrays in VB.

   (b) Write a VB program for converting a decimal number to binary.

DISTANCE EDUCATION

B.Sc. (IT)/B.Sc. (Information Technology) (Lateral) DEGREE EXAMINATION, MAY 2014.

PRINCIPLES OF INFORMATION TECHNOLOGY

(2007 onwards)

Time : Three hours Maximum : 100 marks

Answer any FIVE questions.

All questions carry equal marks.

($5 \times 20 = 100$)

1. (a) Explain the different elements of computer and communication.

   (b) Write about the benefits of combined computer and communication technology.

2. (a) What is application software? Explain the five types.

   (b) Explain about ethics and intellectual property rights.

3. (a) Discuss about the practical uses of communication and connectivity.

   (b) Write about video conferencing and online information services.

4. (a) How resources can be shared? Explain in detail.

   (b) Write about different networks and factors affecting data transmission.

5. (a) Write about compression and decompression in detail.

   (b) Discuss about various secondary storage devices.

6. (a) Discuss about basic concepts of file management.

   (b) Explain in detail about the features of DBMS.

7. (a) Describe the various phases of SAD.

   (b) Write about evolution of programming languages.

8. (a) Write about the concepts of object oriented and visual programming. (10)

   (b) Discuss the features of :

      (i) HTML (5)

      (ii) XML (5)

DE–8055 **34**

DISTANCE EDUCATION

MOBILE COMPUTING

(2007 onwards)

Time : Three hours Maximum : 100 marks

Answer any FIVE questions.

($5 \times 20 = 100$)

1. (a) What are the subsystems under GSM? Explain.

   (b) Explain about transparent mode mobile networking?

2. (a) List the benefits of IMT-2000 over 2G systems.

   (b) Explain in detail about the GPRS applications.

3. (a) Discuss about the protocol architecture of VOIP.

   (b) Explain the different approaches available for IPv6 to support mobility.

4. (a) Discuss in detail about the Wireless Application Protocol.

   (b) Distinguish between Soft Handover and Hard Handover.

5. (a) Explain the various routing mechanisms of WAP.

   (b) Explain how the symmetry of wireless links influences the routing algorithm.

6. (a) Explain about fundamentals of wireless markup language.

   (b) Write notes on 'Displaying images using XML'.

7. (a) Explain different types of WML script.

   (b) Discuss the control structures of WML.

8. (a) What are the primary goals of WML? How they reflected in mobile computing.

   (b) Discuss the usability of WML.

DE–8056 **35**

DISTANCE EDUCATION

B.Sc. (IT)/B.Sc. (IT) (Lateral) DEGREE EXAMINATION, MAY 2014.

RDBMS

(2007 onwards)

Time : Three hours Maximum : 100 marks

Answer any FIVE questions.

All questions carry equal marks.

($5 \times 20 = 100$)

1. (a) What is mean by data bases? Explain the types of data bases? (10)

   (b) Explain schema and subschema with examples. (10)

2. (a) Discuss about various issues of a relational model. (10)

   (b) With example explain data definition facilities (10)

3. (a) Explain relational database Properties and benefits of Oracle. (12)

   (b) Explain the architecture of Oracle with neat diagram. (8)

4. (a) Explain DML commands. (10)

   (b) With example explain how to join multiple tables. (10)

5. (a) Explain how to create and modify tables using SQL. (10)

   (b) Explain how to create and eliminate index with examples. (10)

6. (a) Discuss about logical database design. (10)

   (b) Explain mapping operations facilities in relational model. (l0)

7. (a) Explain various types of Oracle SQL with examples. (12)

   (b) With examples explain how you can work with NULL values. (8)

8. (a) Explain the following with example.

   (i) Union (4)

   (ii) Intersection (4)

   (iii) Difference. (2)

   (b) Explain group by and having clauses with example. (10)

DE–8804 **16**

DISTANCE EDUCATION

B.Sc. (IT) DEGREE EXAMINATION, MAY 2014.

COMPUTER LAB I — C AND DATA STRUCTURES LAB

(2007 onwards)

Time : Three hours Maximum : 100 marks

ONE question should be given to each candidate by lot system.

Each subdivision carries 50 marks.

1. (a) Write a C program to input a basic pay and calculate Gross pay and Net pay.

Income : HRA = 15% of Basic pay

DA = 52% of Basic pay

Gross pay = Basic pay + HRA + DA

Deductions :

PF = 20% of basic pay

IT = 10% of basic pay

LIC = 1000

Deduction = PF + IT + LIC.

Net pay = Gross pay – Deductions.

(b) Write a C program for linked list implementation of queue operations.

2. (a) Write a program in C to arrange the numbers in descending order.

(b) Write a C program to implement PUSH and POP operations on stack.

---------- Cut here ----------

3. (a) Write a C program to compute commission earned by a salesman according to the scheme given below :

Sales amount	Commission
Upto 10000	5%
Above 10000 upto 50000	10%
Above 50000	20%

(b) Write a C program to implement insert and delete operations on linked list.

---------- Cut here ----------

4. (a) Write a C program to concatenate two given strings and find the length of the concatenated string.

(b) Write a C program for linked list implementation of queue operations.

---------- Cut here ----------

5. (a) Write a C program to find simple and compound interests using function.

(b) Write a C program to evaluate the given mathematical expression using stack.

6. (a) A man is paid at the hourly rate of Rs. 15 per hour for the first 50 hours worked. Thereafter, overtime is paid at 1.5 times the hourly rate for the next 50 hours and 2 times the hourly rate for further hours worked per month. Calculate and print his gross monthly wage.

   (b) Write a C program to implement insert and delete operations on queue using array concept.

---------- Cut here ----------

7. (a) Write a C program to sort a set of elements using insertion sort.

   (b) There are 50 students in a Class. Their names and marks in three different subjects are given. If a student takes more than 50 marks in each subject, then he is declared 'PASS'. Otherwise 'FAIL'. Write a C program to do the above.

---------- Cut here ----------

8. (a) Write a menu driven program in C for linear and Binary search.

   (b) Write a C program to print the prime numbers between two limits.

DE–8805 **26**

DISTANCE EDUCATION

B.Sc. (IT)/ B.Sc.(IT)(Lateral) DEGREE EXAMINATION, MAY 2014.

COMPUTER LAB II — JAVA PROGRAMMING LAB

(2007 onwards)

Time : Three hours Maximum : 100 marks

One question should be selected by the examiner and given to each candidate by lot.

Answer both subdivisions (a) and (b).

1. (a) Write Java programs to create packages.

   (b) Write a Java program to handle mouse events and keyboard events.

---------- Cut here ----------

2. (a) Write a Java program to multiply two given matrices.

   (b) Write a java program to read a file name from the user and display contents of file.

---------- Cut here ----------

3. (a) Write a Java program which illustrates the implementation of multiple inheritance using interfaces.

   (b) Write a java program to count number of words and characters in a text.

4. (a) Write a Java program to implement single and multilevel inheritance.

   (b) Write a java program to read and write data using random access file.

---------- Cut here ----------

5. (a) Write a java program to illustrate implementation of abstract class.

   (b) Write a Java program to display the contents of file along with a line number before each line.

---------- Cut here ----------

6. (a) Write a java program to illustrate overloading and overriding methods.

   (b) Write a java program to use layout managers.

DE–8806 **27**

DISTANCE EDUCATION

B.Sc. (IT)./B.Sc. (IT) (Lateral) DEGREE EXAMINATION, MAY 2014.

COMPUTER LAB III — APPLICATION PROGRAMS LAB

(2007 onwards)

Time : Three hours Maximum : 100 marks

Examiner has to select ONE question each from WORD, EXCEL and ACCESS.

MS-WORD: 25
EXCEL : 35
ACCESS: 40
Total : 100

UNIT – I

MS – WORD

1. Prepare the first page of your record note book with picture insertion and alignment.

---------- Cut here ----------

2. Type lecture notes and provide audio explanation with the help of sound files.

---------- Cut here ----------

3. Create a table of student data that contains Reg. No, name, English, Tamil and Maths marks. Add a new column named total and find the row total for each student.

---------- Cut here ----------

4. Prepare your resume. Use tables, bullets and different colour features.

UNIT – II

MS-EXCEL

5. Draw line, bar, pie charts for the data given below :

XYZ company LTD

Year	Sales	Cost	Profit
1991	10000	4000	6000

Add data for 10 years from 1991 to 2000. Provide titles, legends, grids and data labels.

---------- Cut here ----------

6. Create two worksheets containing day to day house hold expenses for the months January and February 2008, with the following columns

Item	Amount
.....	.....

(a) Add 10 different items as shown above, for two months in two different worksheets

(b) Consolidate both the months data and find the total expenses on each item.

(c) Find the total expenses for two months.

---------- Cut here ----------

7. Create a worksheet in MS-Excel with the following columns :

Consumer no. Type, Name, PR, CR, Units, Amount

(a) Add data for 10 customers with type D for domestic user and type I for industrial user.

(b) Calculate the bill using slab. (assume your own slab)

(c) All customers should be charged a minimum bill of Rs. 50, even if their bill amount is below Rs. 50.

8. Create a worksheet in MS-EXCEL with following columns :

Employee no, Employee name, Designation, Basic pay, HRA, DA, LIC, PF, Gross pay, Net pay.

(a) Type data for employee no, employee name, designation basic pay, and LIC, PF.

(b) Calculate HRA = 10% of basic.

DA = 52% of basic

Gross pay = Basic + HRA+ DA

Net pay = Gross pay – (LIC+PF)

(c) Draw the bar chart between employee name and net pay.

---------- Cut here ----------

UNIT – III

MS-ACCESS

9. Create an employee table with the fields :

EMPNO, NAME, AGE, SEX, STREET, CITY, PIN, SALARY

(a) Add date for 10 employees

(b) Write a query to display all the male employees whose salary is between 10000 and 50000 and living in city "chennai".

(c) Write a query to display all the female employees whose ages are in the range 50 to 60.

(d) Show all the records in the table for the city "TRICHY" by filtering.

10. Create STUDENT table with the following fields :

REGNO, NAME, MARK 1, MARK 2, MARK 3

Create ADDRESS table with fields :

REGNO, STREET, CITY, PIN

(a) Write a query to display REGNO, NAME and total of all the three subject marks.

(b) Write a query to display REGNO, NAME, STREET, CITY, PIN and total of all three subject marks.

---------- Cut here ----------

11. Create a inventory table with fields :

ITEM NO, NAME, QUANTITY ON HAND, REORDER LEVEL

(a) Create a form in custom format.

(b) Create a query REORDER to show all the items

(c) Create a macro that executes REORDER query automatically.

---------- Cut here ----------

12. Create two table SALES 1 and SALES 2. Join them to produce a third table SALES 3.

DE–8807 **36**

DISTANCE EDUCATION

B.Sc. (IT)/B.Sc. (IT) (Lateral) DEGREE EXAMINATION, MAY 2014.

COMPUTER LAB IV — VISUAL BASIC AND ORACLE LAB

(2007 onwards)

Time : Three hours Maximum : 100 marks

1. Examiner has to select two questions, one from Visual Basic and another from Oracle.
2. Each question carries 50 marks.
3. Questions are to be given to the candidates by lot system.
4. Write an algorithm or flowchart if necessary.

VISUAL BASIC

1. Write and test a VB program to read principal, number of years and rate of interest through INPUT boxes. Compute and print the simple interest and compound interest through labels.

---------- Cut here ----------

2. Write a VB program to compute and print either the sum of odd numbers or even numbers at the user's choice using label, text and option buttons.

---------- Cut here ----------

3. Write a VB program that allows the user choice among four arithmetic operations of addition, subtraction, multiplication and division with two given numbers.

4. Write a VB program to display the day of the given date and convert the given word from lower case to upper case.

---------- Cut here ----------

5. Write a VB program to compute the surface area and volume of a sphere given the radius. Use option buttons and INPUT boxes.

$$\left\{\text{Area} = 4\pi r^2 \text{ ; Volume } = \frac{4}{3}\pi r^3\right\}.$$

---------- Cut here ----------

ORACLE

6. Create table ADDRESS with the following fields :

   Name, Street, City, Pincode.

   (a) Add 5 records.

   (b) Display the structure of the table.

   (c) Add the field district.

   (d) Fill all district with 'Trichy'.

---------- Cut here ----------

7. Create table PAY with the following fields :

   Emp no, name, date of joining, basic pay, DA, HRA, Deductions, Grade pay, Net pay.

   (a) Add 5 records (Fill all fields except)

   DA, HRA, deductions, Grade pay, Net pay)

   (b) Fill DA with 75% of basic pay.

   (c) Fill HRA with 3000 for all employees.

   (d) Fill deduction with 1000 for all employees.

   (e) Fill gross pay with the sum of basic pay, DA and HRA.

   (f) Fill net pay with gross pay – deductions.

   (g) Show all records.

8. Create table LABEL with the following fields.

   Name, Street, City, Pincode.

   (a) Add 10 records.

   (b) Display the ascending order sorted list with name as primary key.
