ALAGAPPA UNIVERSITY

(Accredited with A+ Grade by NAAC (CGPA : 3.64) in the Third Cycle)

KARAIKUDI

Date: 06.07.2017

The inaugural function of the Three-Day International Conference on "Frontier Areas in Chemical Technologies – 2017", organized by the Department of Industrial Chemistry of Alagappa University, Karaikudi, was held on 6.7.2017. This conference was jointly sponsored by the Science and Engineering Research Board of the Department of Science and Technology (SERB-DST), New Delhi and Alagappa University, Karaikudi.

Presiding over the function, Prof. S. Subbiah, Vice-Chancellor of Alagappa University, said that the Department of Industrial Chemistry is organizing the first International Conference after the prestigious award of A+ Grade by NAAC to Alagappa University. He said that he was happy to see an assemblage of experts from Poland, Singapore, Malaysia, Thailand, France and India and the conference has provided a golden opportunity to the Research Scholars and Students to interact with eminent researchers from abroad and to develop their scientific talents in modern technologies. He added that Alagappa University is keen to provide financial support to the deserving research scholars for attending such conferences in India and abroad.

He stated that we are living in the information technology era and environmental era leading to the new general era of sustainable development. Sustainable development today is a humanitarian concept that aims at the improvement of quality of life and the welfare of humanity, equitably meeting the needs of future generations. It is, indeed, a vision of progress that links economic growth and protection of the environment rendering greater social justice. He added that among the reviews published recently are those that deal with green chemistry, renewable raw materials, clean fuels, nanotechnology, separation technology and innovations for sustainability and all these researches have indicated the damage done to clean air and water and the need for remediation. He emphasized the importance of the technologies to be adopted should restore the balance of the eco-system and biosphere which in turn provide ecologically sustainable development.

Prof. Jerzy Radecki, Polish Academy of Sciences, Poland, in his inaugural address, appraised the progress made in India through various technologies. Scientific technologies in the field of Electro-Chemistry, Supramolecular Chemistry, Green Chemistry are the special fields, to mention a few, in the technological advancement. He appreciated the contribution of Indian Scientists and Scholars towards the technological advancements around the world. In recent decade, the intermolecular recognition of anions in water has attracted the attention of numerous scientific groups involved in supramolecular chemistry. He added that developing systems for the recognition of anions in water medium is still a challenging task. The use of chemical products have become inevitable in everyday life and all researchers should concentrate to cater to the needs of people. The Scientists should use modern technologies appropriately and carefully without affecting the eco-system.

Prof. G. Paruthimal Kalaignan, Professor and Head i/c., Department of Industrial Chemistry, in his Thematic Address, said that this conference would provide an ideal platform to discuss the latest advancements in the frontier areas of Chemistry.

A voluminous souvenir containing 210 abstracts of research papers was released by the Vice-Chancellor and the first copy was received by Prof. Jerzy Radecki. 250 participants from across the country are attending this conference.

Prof. Hanna Radeeka, Polish Academy of Sciences, Poland, Dr. Toemsak Srikhirin, Nanotec Centre of Excellence Mahidol University, Bangkok, Thailand, Dr. Balamurugan Ramalingam, Scientist II, Institute of Chemical and Engineering Sciences, Singapore, Dr. T. Joseph Sahaya Anand, Associate Professor, Faculty of Manufacturing Engineering, Universiti Teknikal, Malaysia, Dr. Ravikumar, Institut Nanosciences et Cryogenie, France, Dr. A. Krishnaiah, Sri Venkateswara University, Tirupati, Prof. Srinivasan Natarajan, Indian Institute of Science, Bengaluru and ten other Indian Scientists representing various States will deliver Invited Lectures in the three-day conference.

Prof. P. Manisankar, Former Professor and Head, Department of Industrial Chemistry, Prof. J. Jeyakanthan, Syndicate Member, Deans, Heads of Departments, Research Scholars from Science Departments attended the inaugural session.

Prof. K. Gurunathan, Member of Syndicate, Alagappa University, offered felicitations. Prof. V. Balachandran, Registrar i/c., Alagappa University, welcomed the gathering. Prof. H. Gurumallesh Prabu, Professor, Dept. of Industrial Chemistry, proposed a vote of thanks.

Prof. V. Balachandran

Registrar i/c.
